DABURN LEADIN INSULATORS

Sections are each 2 3/4" high hi vitrified porcelain glazed. Comes thru with 2 additional bushings 1/4" and 1/2" long, permitting complete insulation of the threaded rod of any length in multiples of 1/4". Complete with brass nickel plated hardware. Lead and cushion washers permit a water tight seal.

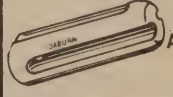
DABURN FISH SPINE BEADS

Made of L5 Steatite. Suitable for buss and heavy lines insulation. Beads follow bends and curves because of ball and socket style interlocks. Four beads cover approximately 1". 100 will cover 25" of wire. Size: 3/16" O.D. x 1/8" I.D. Beads treated with Dow Corning compound to prevent accumulation of surface moisture.

Daburn No.		Std. Pkg.
10-215	Fish Spine Beads	100, 1000

DABURN AIRPLANE INSULATORS



Suitable for mobile and aircraft or guy wire application. compression type strain insulators. Nos. 10-73, 10-74 made of white glazed low absorption porcelain. No. 10-72 made of wet process porcelain.

NEW OFF-THE-SHELF

DABURN TRANSISTOR HEAT SINKS and RETAINER CLIPS

IMMEDIATE DELIVERY

Transistor heat sinks made with beryllium oxide, which is unique among inorganic materials, insulates electrically like a ceramic, but conducts heat like a metal. Where electrical applications require both dielectric insulation and hi-heat transfer from device to chassis, only beryllium oxide (BeO) can provide a satisfactory solution to design problems. Heat generating devices will operate at higher power levels longer and more reliably, with beryllia cooling.

BERYLLIUM OXIDE HEAT SINKS OFFERS THESE ADVANTAGES:

- Extremely resistant to shocks, vibration and moisture.
- High resistivity — low dielectric loss
- Increased transistor life and output
- Freedom from outgassing, infinite shelf life

PHYSICAL PROPERTIES & DIELECTRIC STRENGTH

GREATER THAN: 300 Volts/MIL
CHEMICAL PURITY: 99+% Beryllium oxide
DENSITY: 2.9 Grams/CC
MELTING POINT: 4650°F
HEAT CAPACITY AT 350°: 0.3 BTU/LB
THERMAL EXPANSION: 3.2 x 10^{-6}/°F
THERMAL CONDUCTIVITY: 140 BTU/FT² HR°F-FT
TRANSVERSE STRENGTH: 25,000 PSI
ELASTIC MODULES: 40 x 10^{6} PSI

BERYLLIUM OXIDE FOR TRANSISTOR RETAINER CLIPS, HEAT DISSIPATION AND ELECTRICAL INSULATION

TRANSISTOR RETAINERS: Optimum thermal conductivity, with absolute electrical insulation reliability, is offered by spring clip transistor retainers. The retainers provide electrical isolation for the semiconductor by means of a disc of beryllium oxide ceramic brazed to the base of the beryllium copper retainer. Solid ceramic disc, in contrast to a thin insulating coating, is practically immune to loss of insulating value thru cracking, abrasion, chipping or other results of rough treatment in assembly. Heat transfer from the semiconductor to chassis or heat sink is not sacrificed since the high purity BeO has thermal conductivity to that of aluminum metal. Maximum soldering temperature —300°C.

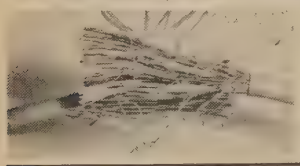
IRRADIATED HEAT SHRINKABLE TUBING (STANDARD PRE-CUT LENGTHS ¼" TO 2")

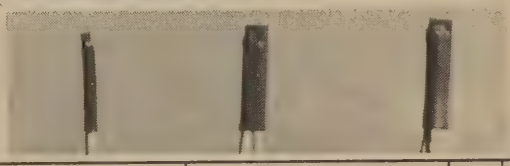
HUG-P SERIES

HEAT SHRINKABLE/IRRADIATED FLEXIBLE POLYOLEFIN TUBING

SHRINKS 50% (2:1 RATIO) WITH ONLY 5% LONGITUDINAL SHRINKAGE

Stock Colors: Black, White, Red, Blue, Yellow (all sizes) — self extinguishing. Clear (all sizes) — not flame retarded.





• Ideal for insulation, jacketing, bundling, conductor identification • Is easily marked by conventional hot stamp or ink-wheel marking techniques • Covers the diameter range from .023 to 2 inches with only 12 sizes.

Both the **HUG P** and **HUG E** series shown above • Exhibit high dielectric strength • Possess excellent chemical and solvent resistance • Do not split when shrunk over sharp or irregularly shaped objects • Operate continuously from −55°C to +135°C — up to 300°C for a short period • Shrink at 135°C (275°F) or above to predetermined sizes.

HUG-C SERIES

HEAT SHRINKABLE/IRRADIATED SEMI-RIGID POLYOLEFIN TUBING

SHRINKS 50% (2:1 RATIO) WITH ONLY 5% LONGITUDINAL SHRINKAG

Stock Colors: Yellow, White, Blue, Red, Green, Slate, Brown, White (each diameter col coded) — self extinguishing. Clear (all sizes) — not flame-retarded.

• High mechanical strength for strain relief applications and protection of delica components • Is easily marked by conventional hot stamp or ink-wheel marki techniques. • Exhibits high dielectric strength. • Possesses excellent chemical a solvent resistance • Does not split when shrunk over sharp or irregularly shap objects • Shrinks at 135°C (275°F) or above to pretedermined sizes • Covers t diameter range from .023 to 1 inch with only 10 sizes.

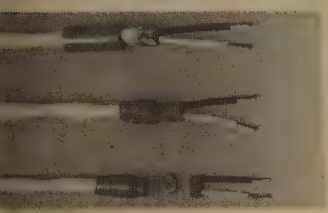
G-K SERIES

AT SHRINKABLE/IRRADIATED SEMI-RIGID HIGH TEMP. POLYVINYLIDENE FLUORIDE TUBING

RINKS 50% (2:1 RATIO) WITH ONLY % LONGITUDINAL SHRINKAGE

ck Color: Clear only (does not support combustion)



Tough, high strength, semi-rigid material of very high strength with standing resistance to abrasion and cut-through. Ideal for strain ef and protection of delicate components • Is easily marked by nventional hot stamp or ink-wheel marking techniques • Exhibits h dielectric strength • Possesses excellent chemical and solvent istance • Transparent for easy inspection and identification of objects covered • Does not split when shrunk over sharp or irregularly shaped objects • Generates no rosive by-products during heat aging • Shrinks at 175°C (347°F) or above to predetermined sizes • Covers the diameter range from .023 to 1 inch with only 10 sizes.

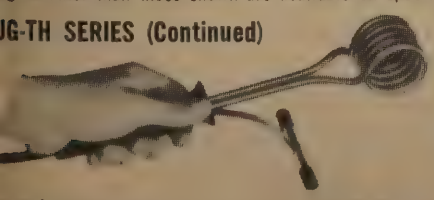
G-S SERIES

AT SHRINKABLE/RIGID DUAL-WALL POLYOLEFIN TUBING WITH MELTABLE INNER WALL

RINKS UP TO 42% WITH ONLY % LONGITUDINAL SHRINKAGE

ck Colors: Brown, Gray, White, Red, Blue, Yellow, Black (each diameter is or coded)



s the ideal encapsulating tubing for delicate components because of its idity, meltable inner wall and its ability to seal out moisture. Upon cooling entire mass becomes a homogeneous molding • Covers the diameter range m .023 to 1 inch with only 8 standard sizes • Exhibits good dielectric ength and low dielectric constant • Possesses excellent chemical and vent resistance • Is easily marked by conventional hot stamp or ink-wheel rking techniques.

UG-TH SERIES (Continued)

• Lightweight • Molded handle • Portable • Shrinks tubing up to 1½ inches in diameter and larger • 700°F • 350 Watts • Shrinks tubing in 5 to 7 seconds to 50% of supplied diameter • 3 wire grounded • Spring clip stand permanently affixed • **CAUTION:** Voltages in excess of 110 VAC or rough handling may impair or permanently damage HEAT TUNNEL.

You can depend on your local distributor of electronic parts and equipment for...

- ★ Instant off-the-shelf delivery
- ★ In-depth inventories
- ★ Wide varieties
- ★ Prompt service
- ★ Technical assistance
- ★ Availability of latest products
- ★ Speedy purchasing—
  one order does the job

Call your local distributor for all your requirements

Classic

Motors and Gearmotors

Carter Motor ®

Available up to 1/7 hp. Gearmotors from 1 to 750 rpm, up to 13 in. lbs. torque, continuous duty. Universal and DC shunt models, induction and variable speed types, base or flange mounted. Ball bearing, high quality, die cast construction. Ideal for SCR motor controllers, pumps, lab stirrers, machine drives. 3 5/16" dia., 6 1/16" long. Shaft, 5/16" dia., weight 5 lbs. Ask for "Classic" catalog.

115 V. DC SHUNT MOTORS

4 lead reversible, self ventilated, totally enclosed available

"CLASSIC" PM DC TACH-GENERATORS

A high output DC Tachometer-Generator for slow speed industrial and commercial purposes. Barium ferrite magnet. Couples to motor shaft and to meter for direct readings without belts or gears to step up speed. Requires no batteries, or external excitation. 2 lead reversible. Face or flange mount available. 5/16" dia. shaft. 1% linearity. Up to 15 watts capacity.

Model Number	DC Output per/1000	Mounting	Max. Speed RPM	List
CTA60AA	60 v.	base	3000	$78.00
CTA50AA	50 v.	base	4000	76.00
CTA25AA	25 v.	base	8000	74.00

Built-in capacitor filter assures ripple of less than 3%. Unfiltered models will average 5% or less AC ripple. Other voltages available.

"ECLIPTIC" TACHOMETER GENERATORS

Converts rotation rate into reference voltage for speed indication. Ideal for motor controllers and various industrial applications such as variable speed drives, textile machines, machine tools, etc. Can couple direct to drive motor, requires no belts or gears. 2 lead, reversible. Linearity below 1%. 5 to 20 MA capacity. May be connected to a DC meter calibrated for RPM, FPM, GPH or other measurements. Size 1-3/8" x 2-1/4" plus shaft, .118 dia. 19/32" long.

M176T1	2.5	v. per 1000 RPM	10,000 Max.	$51.00
M176T2	5	v. per 1000 RPM	10,000 Max.	53.00
M176T3	12	v. per 1000 RPM	4,000 Max.	56.00
M176T4	20	v. per 1000 RPM	2,500 Max.	70.00
M176T5	1.25	v. per 1000 RPM	10,000 Max.	51.00
M176T6	10	v. per 1000 RPM	5,000 Max.	56.00

TYPES X1000 & X1002

AC OPERATION

Standard SLO-SYN Synchronous/Stepping Motors are permanent magnet a-c motors having extremely rapid starting, stopping and reversing characteristics and a slow basic shaft speed of 72 rpm synchronous with a line frequency of 60 hertz. Three-lead types need only a single-pole, three-position switch for complete forward, reverse and "off" control. No excessive inrush current when energized because starting and operating current are nearly identical. Can be completely stalled without overheating and with no harmful effects on components. Starts or stops in less than 5° of shaft rotation; no need for mechanical or electrical braking. When used with an auxiliary high speed motor, the SLO-SYN motor can remain coupled to the load and safely overdriven. Phase shifting resistor and capacitor must be used when operating from a single-phase source but not from two-phase. All standard motors are rated for continuous duty at maximum ambient temperature of 65 °C. All models have Class B insulation.

DC STEPPING

When used for phase switched d-c stepping, 28.8 rpm models take 500 steps per revolution, 72 rpm models take 200 steps per revolution and 200 rpm models take 72 steps per revolution. Accuracy of the steps is ±.09° noncumulative. Three-lead types require a center-tapped d-c supply and single-pole, double-throw switching. Four-lead types require a single-ended power supply and single-pole, double-throw switching. Bifilar models can be used with transistorized switching circuits. Models specifically designed for stepping offer the best characteristics for most applications.

PRECISION STEPPING

For phase switched d-c stepping. These motors make 200 steps per shaft revolution. Each 1.8° step is accurate within ±3% (.06°) noncumulative. With properly designed circuitry incorporating programmed acceleration and deceleration, precision stepping motors can be operated at rates to 5000 steps per second.

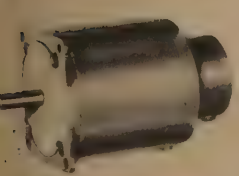
BIFILAR

Used for d-c stepping where use of push-pull circuitry and center-tapped power supply is not possible or where increased torque at high stepping speeds is required.



SPECIAL ENVIRONMENT

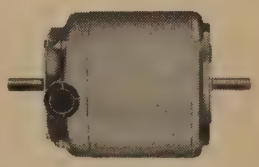
High Vacuum types for vacuums to 10^{-6} Torr; High Temperature types for temperatures to 130°C; High Radiation types withstand dosage of 3,000 megarads. All available from 50 to 1800 oz-in; High Vacuum 25 oz-in also.

PLANETARY GEAR

Basic 50 and 150 oz-in types and type X250 available with planetary gear assemblies in speeds of 16.6, 3.32, 0.665, 0.133 or 0.027 rpm; 16.6 rpm available in other 250 and on 400 oz-in types.

ENCODER

Consist of a precision stepping motor with an integrally mounted incremental photo encoder. The encoder outputs allow continuous monitoring of motor speed, position and direction of rotation.



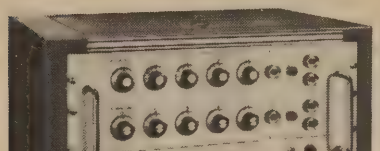
FOUR-LEAD

Designed for d-c stepping to provide the flexibility needed for use with equipment requiring isolated windings with no common connection.

DOUBLE END

Three-lead, bifilar and four-lead types with output shaft at each end of motor available in all listed torque ratings. 50, 150 and 250 oz-in types available also with planetary gear assemblies in 16.6, 3.32, 0.665, 0.133 or 0.027 rpm speeds.

VISCOUS DAMPED



Type HS50D precision stepping motor has a unique fluid system resulting in a step function approaching critical damping. Speed of response and running characteristics are essentially unaffected by the silicone viscous damping fluid. Possesses characteristics of types described under PRECISION STEPPING on facing page.

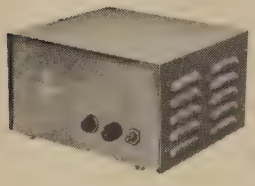
SLO-SYN® *Preset Indexers*

TWO-AXIS
TYPE 2SP1800-4

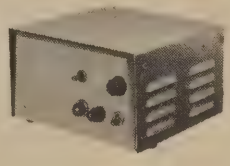
SINGLE-AXIS
TYPE SP1800B-4



ABSOLUTE
TYPE SA1800-5

Used to control indexing of SLO-SYN bifilar motors. The index angle, or position, can be preset by dial setting on the control panel the number of steps to be driven. Have provision for actuating any external equipment needed to perform related operations. Index, jog and free run can be initiated manually from the control panel or from an external switch. Can be made to cycle automatically with proper external switching. Single- and two-axis models are available with counting ranges to 99,999 steps. Two-axis models provide independent control of two SLO-SYN motors. Speed adjustable from 4 steps/second up to maximum possible with motor used. Optional backlash take-up circuit.

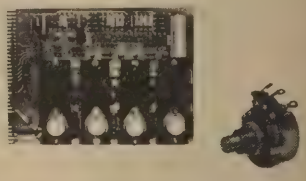
ABSOLUTE PRESET INDEXERS permit either absolute or incremental positioning modes. In the absolute positioning mode, the number set on the controls determines the final position of the motor relative to the starting, or "zero" point. When incremental positioning is used, the motor will move the preselected number of steps each time the INDEX button is pressed. Optional backlash take-up circuit.



SLO-SYN® *Translator*

TYPE ST1800B

Pulse-to-step converter designed for use with appropriate bifilar SLO-SYN motors converted for incremental stepping. Convert low level signal pulses or square waves into the correct switching sequence needed to step a SLO-SYN motor. Input is 105-125 volts a-c, 1 ampere. Signal input impedance is 500 ohms. Used for programmed positioning, indexing and indicating operations.



SLO-SYN® *Adjustable Speed Drive*

TYPE ST1800BV

Essentially, SLO-SYN Adjustable Speed Drive type ST1800BV is a translator which includes a built-in oscillator to supply the triggering signals. Oscillator frequency can be adjusted to vary the speed from 4 steps/second up to the maximum permissible with the motor used. Direction of rotation can be controlled either from the front panel or from a remotely located switch.

SLO-SYN® *Translator Module*

TYPE STM1800CV

Plug-in printed circuit boards with logic ca pabilities for stepping SLO-SYN motors Models offered for external triggering onl or with built-in oscillator for either interna or external triggering. Models STM1800 an STM1800V drive bifilar SLO-SYN motors Models STM1800C and STM1800CV drive bifilar and precision stepping motors an provide stepping rates to 2000 steps pe second.

SLO-SYN® *High Speed Drives*

TRANSLATORS

Drive SLO-SYN Precision Stepping motors at rates to 5000 steps per second. An internal oscillator can be adjusted to any desired stepping rate and provides programmed acceleration and deceleration. Translators can also be triggered externally by pulses from tape readers, computers, oscillators, pulse generators and other signal producing equipment.

TYPE HTR105RT

PRESET INDEXERS

Drive SLO-SYN Precision Stepping Motors in indexing and other positioning operations. Acceleration and deceleration circuit rates to 5000 steps per second without missing steps. Can be controlled from the front panel or from a TTL compatible computer link. Backlash take-up circuit is optional.

TYPE HPI 155T

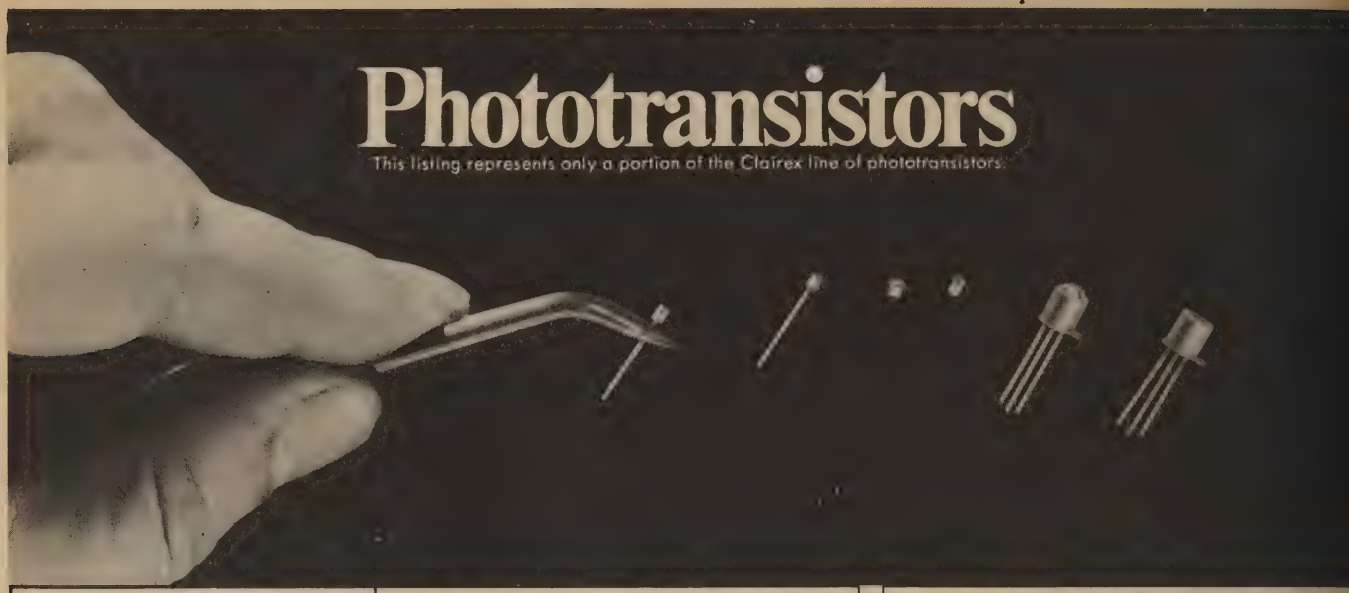
up-to-the-minute information

on photo electric controls

for any purpose

send for the

AUTOTRON CATALOG



The AUTOTRON Catalog describes Photoelectric Controls for an endless variety of applications including

• automation • counting • packaging • conveyors • cut-off • die protection
• processing • jam-up • registration • measuring • smoke detection • sorting
• fault detection • limit • orientation • positioning • inspection
• tension • traffic control • weighing • winding and others beyond enumeration

Also included in the catalog are

- Application sketches showing how Autotron Photoelectric Controls are used to meet a tremendous range of varied industrial control requirements.
- Hundreds of pre-engineered control-paks in stock for immediate shipment are illustrated, described and priced.
- Self-contained Retro-Reflective ON/OFF and Timing Controls.
- Self-contained photo controls and self-contained light sources.
- Remotely operated photo controls: ON/OFF, Timing, with Timed Output Pulse Width Control, Dual Timing, Solid State Switching and High Speed Counting.
- Remote photo sensing and light source heads including tiny models for small space, sensitive models for long range, many different shapes to meet application requirements, explosion proof models, retro-reflective, specular reflective and fiber optic models.
- Bin Level Photoelectric Controls
- Impak Switch Electronic Controls.
- Liquid Level Electronic Controls.
- Proximity Controls.
- Overload and Underload Electronic Controls.

Photoconductive Cells

This listing represents less than half of the Clairex standard and special photocells available. A 16-page design manual is available on request.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL5M2	.55 X .18	55K	1:100	250	2000-500[1]
CL602	.25 X .5	1 meg.		300	75
CL702	.36 X .18	1 meg.		300	125
CL902	.21 X .15	1 meg.		250	50

Type 2 CdS (photosensitive material designated by last number in ordering abbreviation, i.e. CL5M2). Peak spectral response 5150 angstroms, bluest response photosensitive material, high stability, lowest temperature error.

CL503	.5 X .5	7.2K	1:10,000	250	500-250[1]
CL5M3	.55 X .18	7.2K		250	2000-500[1]

CL903A	.21 X .15	67K		250	50
CL903L	.21 X .15	6.0K		100	50

Type 3 CdSe, peak spectral response 7350 angstroms, fast response, and very high light-to-dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps.

CL504	.5 X .5	1.5K	1:1000	250	500-250[1]
CL5M4	.55 X .18	1.5K		250	2000-500[1]
CL504L	.5 X .5	0.25K		170	500-250[1]
CL5M4L	.55 X .18	0.25K		170	2000-500[1]
CL604	.25 X .5	30K		300	75
CL604L	.25 X .5	1.5K		170	75
CL704	.36 X .18	30K		300	125
CL704L	.36 X .18	0.6K		100	125
CL904	.21 X .15	30K		250	50
CL904L	.21 X .15	2K		100	50

Type 4 CdSe, peak spectral response 6900 angstroms, lowest resistance photocells available. Can be used for "on-off" applications when low resistance is desired. For use with incandescent or neon lamps.

CL505	.5 X .5	9K	1:100	250	500-250[1]
CL5M5	.55 X .18	9K		250	2000-500[1]
CL505L	.5 X .5	1.5K		170	500-250[1]
CL5M5L	.55 X .18	1.5K		170	2000-500[1]
CL605	.25 X .5	166K		300	75
CL605L	.25 X .5	7.5K		170	75
CL705	.36 X .18	166K		300	125
CL705L	.36 X .18	3.3K		100	125
CL905	.21 X .15	166K		250	50
CL905L	.21 X .15	10K		100	50

Type 5 CdS, peak spectral response 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps.

CL705HL	.36 X .18	28K	1:1000	100	125
CL905HL	.21 X .15	100K		100	50
CL905HN	.21 X .15	700K		100	50

Type 5H CdS, peak spectral response 5500 angstroms (closely matches the human eye). Combines high speed, stability, linearity, and uniform color temperature response.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL507	.5 X .5	7.2K	1:1000	250	500-250[1]
CL5M7	.55 X .18	7.2K		250	2000-500[1]

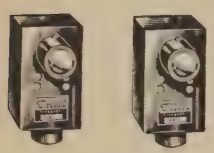
COMPLETE INSTALLATION INSTRUCTIONS WITH EVERY UNIT

THREE-UNIT CONTROLS

Model 63 Series represents a line of three high speed, precision Amplifiers; each engineered for a highly specialized use.

Each amplifier is designed for amplification of energy developed by one set of Series 33/23 Fotolectric Heads listed below.

Heavy duty construction throughout, size 9¼" x 11½" x 5". Engineered for 110/120v. 50/60 cy. a.c.



Model 63, the Worner Master Unit, serves most industrial uses. It is generally recommended for supervising fast moving objects and will operate normally up to 750 times a minute.....**Each $157.62**

Model 63-A, equipped with Time Delay Circuit giving delay from 0 to 45 seconds .....**Each $176.82**

Model 63-B, has added amplification to operate on less active change of light .....**Each $190.26**

Model 64. Economy Unit. Operates up to 450 times a minute..**Each $96.69**

WIDE RANGE OF FOTOLECTRIC HEADS

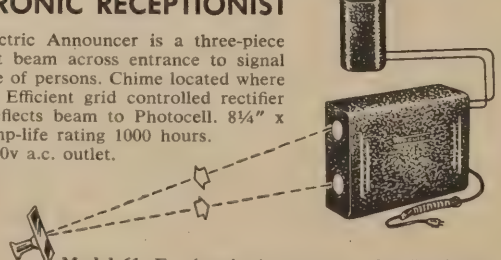
Series 33 Light Sources
Series 23 Photocells

Selection of any of the following seven combinations, with current flow amplified by a choice of any of the above Amplifiers, provides unbeatable control supervision. Units are alike externally.

Model 33 Series Light Sources and Model 23 Series Photocells are heavy duty units. Components are housed in solid metal castings equipped with conduit fitting. Size of case 3" x 3" x 4½".

DIRECTIONAL BEAM for objects over 2" square. Distances listed cover area of supervision (between units).

DISTANCE	LIGHT SOURCE	EACH		PHOTOCELL	EACH
1 to 10 ft.	**Model 33-10**	**$42.15**	use with	**Model 23-10**	**$42.15**
	Made moisture-proof upon order at $7.50 per unit.				
10 to 25 ft.	**Model 33-25w**	**$51.00**	use with	**Model 23-25w**	**$54.30**
	These units are moisture-proof.				



FOR SUPERVISING LARGE OBJECTS UP TO 75 FT.

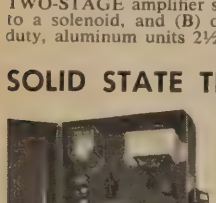
Model 33-C Light Source and Model 23-C Photocell supervise over an indoor distance over 25 ft. up to 75 ft. from unit to unit. 6¼" x 7" x 4½". Use with any of the above Amplifiers.

Model 33-C.....**Each $51.60**.....use with **Model 23-C**.....**Each $45.66**

THE ELECTRONIC RECEPTIONIST

Model 61 Fotolectric Announcer is a three-piece set. Projects light beam across entrance to signal entry or departure of persons. Chime located where signal is desired. Efficient grid controlled rectifier circuit. Mirror reflects beam to Photocell. 8¼" x 6½" x 3¾". Lamp-life rating 1000 hours. Plugs into 110/120v a.c. outlet.

Model 61. Fotolectric Announces.....**Per Set $61.86**



Model 61-T. Fully transistorized. Size 7¾" x 5¾" x 3⅛".....**Per Set 71.28**

SOLID STATE TWO-UNIT FOTOELECTRIC SET

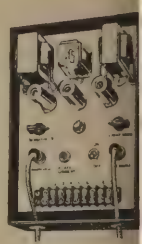
Amplifier, Photocell and Relay are combined in the Receiver unit. Light Source unit is designed with interchangeable optical system for supervising any specified distance up to 25 feet.

TWO-STAGE amplifier system provides: (A) operation direct from the relay to a solenoid, and (B) operation direct to the control of the task. Heavy duty, aluminum units 2½" x 3" x 7½" **Model 108** .....**Per Set $126.60**

SOLID STATE THREE-UNIT FOTOELECTRIC SETS

Model 118 Amplifier 6" x 8" x 5" ..**$111.00**

THREE-STAGE TRANSISTOR AMPLIFIER remotely installed to operate with a choice of Photocell and Light Source combinations according to distances to be handled.



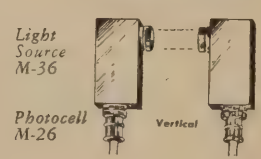
The Amplifier Relay operates at 450 **plus** per minute. Instant-On Feature, no waiting for tubes to warm up. Plug-in relay. D.P.D.T. 5 amp. Inductive per set of contacts. Sensitivity control for photocell input. Light Source control for required amount of light. Send for Model 118 Bulletin with complete descriptions and recommendations for Photocell and Light Source combinations for specific requirements.

AMPLIFIERS FOR MINIATURE HEADS

Model 66/67 Series Amplifiers are available in a choice of four units. For positive and accurate performance, the maximum speed rating of each unit can be regulated provided light projected to the Photocell will have an "on-period" equal to the "off-period" with wiring to Photocell having zero (0) capacity. 110/120v. 50/60 cy. a.c.

Model 67 Amplifier for general applications where fine detection at high speeds is not a factor or Relay is not required to operate in excess of 450 times per minute .....**Each $107.61**

Model 66 Amplifier, operates up to 900 counts a minute. Double-pole, double-throw relay with contact rating 110v. 60 cy. a.c., 10 amp.-non-inductive and 5 amp. inductive. Has light beam intensity control .....**Each $170.40**



Model 66 Amplifier Door removed to show components.

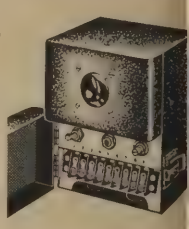
Model 66-A Amplifier, designed for use with ultra high speed electron decade counters. Accurate counts of light beam interruption or variatio of intensity up to 10,000 counts per minute. Output pulses up to 50 vol d.c. regulated by the sensitivity control.....**Each $183.**

Model 66-T Amplifier, same operating features as Model 66 with adde Time Delay circuit to give regulated time delay from 0 to 45 second Efficient for synchronizing operations.....**Each $205.**

"MINIATURE" FOTOLECTRIC HEADS

For use with Models 66/67 Amplifiers

Machined out of solid aluminum blocks. Light weight, unbreakable, on piece, dependable. Only 1¼" x 2½" x ¾". Unsurpassed for pin-poi detection. Distance to cross-over point 3" to 12". Distance of direction beam up to 8 feet. For desired speed, select Amplifier accordingly. Si foot cable equipped both ends with prong-type connectors having screw band tighteners. For 110/120v. 50/60 cy. a.c.

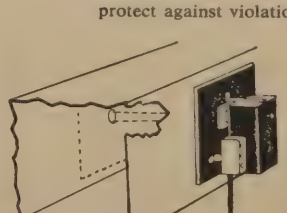


Model M-36 Vertical Light Source.....**$42.**
Model M-26 Vertical Photocell Receiver.....**46.**
Model M-37 Horizontal Light Source.....**42.**
Model M-27 Horizontal Photocell Receiver.....**46.**

TWO-UNIT CONTROL

For Indoor Use

Amplifier includes photocell, relay and components. Efficient for distances from a few inches to 75 ft. For use where Relay is not required to operate over 400 times a minute, such as; counting, sorting large objects; limit switches; start, stop operations; opening doors, etc.



Model 62 R & L "Two-Unit Set".....**Per Set $121.2**

STOP Smoking Smokestacks!

GET into Air-Pollution Business Now!

Control smoke at its source. Insure maximum boiler efficiency, profit by fuel economies, prevent waste, protect against violation of smoke control ordinances.

Automatic Control when light beam projected across duct, detects smoke.

A predetermined density of smok passing through the boiler breachin intercepts the light beam and activate whatever alarm or automatic contr equipment is employed. The Ampl fier Control unit is remotely installe for observation of its jewel ligh which indicate whether correct Ringl man Unit is maintained.

For comprehensive details, pleas address your distributor for "Worne Combustion Control Bulletin".

Prices subject to change without notice.

WORNER ELECTRONIC DEVICES

WORNER FOTOLECTRIC PROTECTION

NET PRICES

COMPLETE INSTALLATION INSTRUCTIONS WITH EVERY UNIT

THE WORNER MASTER CONTROL SYSTEM

MODEL 9000 SERIES

Consists of Model 9000-S Master Control Panel. Can supervise ONE to FOUR Light Source and Photocell detection sets, hereafter referred to as "Fotoelectric Sets".

On separate circuit, the Master Control Panel will also supervise foil tape, door traps and window switch systems. Both circuits operate independently and simultaneously. Sounds continuous alarm (until reset) when either of these detection circuits is opened or wiring of Fotolectric system is tampered with.

This control panel prevents false alarms should power fail or drop momentarily and resets automatically when power is restored. Also operates with any type electrical devices employed by professional burglar alarm companies.

The unit contains Relays which energize alarm circuits. The cabinet size is 7" x 10¼" x 4⅜" and its operation is safeguarded by a pick-proof lock. The unit is installed remotely. Designed for 110/120v. 50/60 cy. a.c.

Illustration shows FOUR Relay plug-in location for 1, 2, 3 and 4 Relays as needed; one Relay for each Fotolectric (detection) Set used. Model 9000-S Master Control Panel is priced "less Relays," as only ONE Relay is automatically supplied with each Model No. 9000 series Fotolectric Set ordered.

Model 9000-S Master Control Panel.....**Each $101.10**

Model	Range	Fotolectric Set	Per Set
9100	100 ft.	Light Source & Photocell.....	$143.94
9150	150 ft.	Light Source & Photocell.....	186.90
9075	75 ft.	Light Source & Photocell.....	179.46
9250	250 ft.	Light Source & Photocell.....	186-99
9500	500 ft.	Light Source & Photocell.....	221.49

MODEL 7000 SERIES

Comprises (light Source and Photocell) Fotolectric Sets that operate in conjunction with burglar alarm companies' central control equipment. The Fotolectric Sets do not interfere with operation of Central Alarm Companies', foil tapes or window traps. For 110/120v. 50/60 cy. a.c. For 24v. 60 cy. use Worner Step-Down Transformer.

Model	Range	Fotolectric Set	Per Set
7100	100 ft.	Light Source & Photocell.....	$143.94
7150	150 ft.	Light Source & Photocell.....	168.90
7075	75 ft.	Light Source & Photocell.....	179.46
7250	250 ft.	Light Source & Photocell.....	186.99
7500	500 ft.	Light Source & Photocell.....	221.49

MODEL 5000 SERIES

There are 2 Models. Each model has Light Source and Photocell units. The Photocell unit of each Model contains all amplifier components. Thus each Model is a Two-Unit alarm set. Each is designed for indoor use and not intended for use with foil systems, etc.

Has on-off switch, phone jack to test plate current, sensitivity control. Lock. Alarm can be turned off or trespass trap reset only by the possessor of the key. For 110/120v. 50/60 cy. a.c.

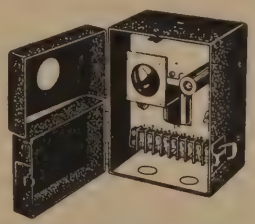
Model	Range	Fotolectric Set	Per Set
5100	100 ft.	Two-Unit System	$143.94
5150	150 ft.	Two-Unit System	168.90

LIGHT SOURCE & PHOTOCELL SETS

All light beams are infra-red (invisible) light.

Sets for 100 and 150 ft. ranges are for indoor use. Sets for 75, 250, and 500 ft. ranges are for both indoor and outdoor use.

Sets for 75, 150, 250 and 500 ft. ranges have unwanted light rejector for maximum daytime operating efficiency.



Some cases are similar, but circuits vary greatly.

Light Sources and Photocell Units for 100 ft. Ranges. Models: 9100, 7100, 5100.

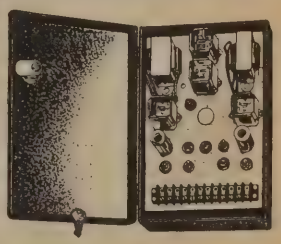
Light Sources for 150 ft. Range. Models: 9150, 7150, 5150.

Photocells for 150 ft. Range. Models: 9150, 7150, 5150.

Sets for 75, 250 and 500 foot ranges have hooded weatherproof cases. Photocell cases have locks.

Prices subject to change without notice.

BURGLAR DETECTION UNITS CONCEALED IN THE WALL

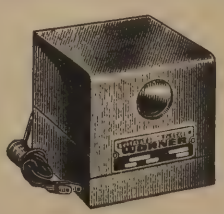


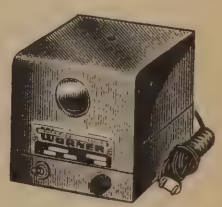
Light Source and Photocell Receiver units concealed behind light-switch-type face plates. Projects invisible light beam ranging up to 30 feet (indoors). Standard size wall plates concealing Fotolectric detection units are high finish stainless steel. Light bulb rated 2000 hours. For guaranteed efficiency Model 81/82 Fotolectric sets must be used only with specially engineered Amplifiers listed below. Complete installation instructions enable any electrician to install.

Model 81 "In-Wall" Light Source.....**Each $35.94**

Model 82 "In-Wall" Photocell Receiver.....**Each 42.00**

AMPLIFIERS FOR ABOVE FOTOLECTRIC SET





Two specially engineered units for amplifying the energy of the above concealed units.

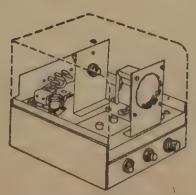
Circuits with no-voltage control relay prevent false alarms due to line voltage irregularities and will sound alarm if tampered with. Standard alarm continuous, Regulated warning signal "special" upon order. For 110/120v. 60 cy. a.c.

Model 86-1 is a single channel Amplifier Panel that will amplify current flow of one Fotolectric Set.....**Each $147.81**

Model 86-2 is a dual channel Amplifier Panel that will amplify current flow of two Fotolectric Sets, guarding separate areas. Will also supervise one Fotolectric Set, providing for future addition of a second Fotolectric Set **Each $236.31**

TWO-UNIT WORNER WATCHMAN

This Two-Unit Set consists of a Light Source and a Photocell unit that supplies 6-volt energy for activating the alarm circuit.



The Light Source is equipped with removable infrared filter providing visible light beam ranging up to 50 feet. The Photocell unit is equipped with toggle switch for either continuous alarm or to sound only while light beam is broken. Extraneous light rejector maintains daylight range. Two-piece case construction enables removal of cover without mounting. Identical cases 5" x 5" x 5½" welded steel, mahogany hammerloid finish. For indoor use; 110/120v. 60 cycle a.c.

Model 4000 Two-Unit Watchman (Indoors).....**Per Set $101.88**

Model 4100 Two-Unit Alarm (Weatherproof)...**Per Set 179.46**

SOLID STATE BURGLAR ALARM

Two-Unit Combination. Indoor Use.

Photocell - Amplifier has 2-piece case for convenient installation and servicing.

The Photocell unit supplies 6-volt a.c. energy to activate a 6-volt a.c. alarm, thus providing a Two-Unit alarm set.

Alarm may be sounded at one or more remote locations. Knob control for continuous, limited or reset alarm. Built-in device minimizes unwanted light. Infrared filter provides invisible light beam ranging up to 50 feet. Both Light Source and Photocell units are externally alike. 5" x 5" x 5½". Two-piece hammerloid cases simplify installation and servicing.

Model 8002 R & L, Solid State Burglar Alarm Set **$99.00**

SOLID STATE INVERTERS

All Units are Frequency Stable and have Automatic Frequency Control

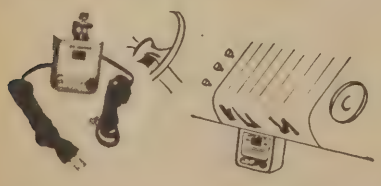
Specially Designed to Provide 117 Volt 60 Cycle AC Power for the Operation of Tape Recorders, VTR Equipment, Public Address Systems, TV Sets, Ham Gear, Small Portable Tools and Appliances, Test Instruments, Closed Circuit TV, Scientific Laboratory and Hospital Equipment, Small AC-DC Universal Motors, Fluorescent and Incandescent Lamps from 12 Volt DC Storage Battery Power in Automobiles, Buses, Trucks, Campers, Mobile Homes, Boats, and Aircraft.

Illustrates ATR Model 12U-S2A (275-300 Watts)
Overall Dimensions: 11" x 9" x 4"
Shipping Weight: 17 lbs.

Illustrates ATR Model 12U-S4G (400-450 Watts)
Overall Dimensions: 11" x 9¾" x 5¼"
Shipping Weight: 27 lbs.

ATR Model 12U-S6M (600-650 Watts) not illustrated, similar to illustration above
Overall Dimensions: 11" x 11¼" x 6¾"
Shipping Weight: 34 lbs.

ATR SOLID STATE Inverters are Universal Type Inverters recommended for the applications as listed above plus hundreds more! These Inverters are very well filtered and feature quick starting, frequency stability with varying load and input voltage, rugged heavy-duty construction, reverse polarity protection, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated here are equipped with heavy duty power transistors and plug-in frequency reed for automatic frequency control. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is approximately 80%. To figure approximate current consumption from storage battery, divide the rated input wattage of the load being operated by the storage battery voltage, and further divide this answer by .80 which will give the approximate current consumption from the battery based on the actual load being operated. These Inverters are recommended primarily for use with loads having power factors in excess of 70%. Inverters come complete with battery cables ready for operation.



Type	DC Input Volts	AC Output 60 Cycles (Volts)	Output Wattage		Net Price
			Int.	Cont.	
12U-S2A	12	117	300	275	$139.50
*12U-S2A-P	12	117	300	275	139.50
12U-S4G	12	117	450	400	198.45
12U-S6M	12	117	650	600	249.75

"-P" model is equipped with cigarette lighter cord set to plug into dash receptacle. Caution — Do not load beyond 150 watts due to possible damage to cigarette receptacle wiring.

All ATR Inverters are housed in attractively finished brown-hammerloid metal cabinets and are complete with battery cables ready for operation.

For Inverters having larger or smaller output capacities, or for operation on other DC input voltages from 6 volts to 220 volts, please consult available ATR Inverter catalog sheets.

ACCESSORIES

REMOTE CONTROL UNIT — for under-dash mounting permitting installation of Inverter in auto-trunk compartment.
Net Price $12.95

MOUNTING BRACKETS — to securely mount Inverter in trunk compartment of car or under-dash, as illustrated
Net Price $7.50 pr.

EXTENSION CABLES — to provide additional cable lengths for installation of Inverter in trunk compartment; #6 gauge, 15' length.
Net Price $21.75 pr.

ATR UNIVERSAL INVERTERS

Specially Designed for Operating Standard A.C. Tape Recorder, Television Set, Dictating Machine, Radio Set, Ham Gear, Public Address System, Amplifier, Record Player, Electric Razor, Food Mixer, Vacuum Cleaner, Sewing Machine, Business Machine, Electric Drill, Fluorescent and Incandescent Lamp, and Electronic Test Equipment from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, Planes, and D.C. Districts. Ideal for Emergency Lighting Applications for Civil Defense, Red Cross, Rescue Work, etc., Simply Using Extension Cords.

ATR Universal Inverters are actually a combination of 4 Inverter designs in one unit! These Inverters are especially recommended for applications as mentioned above and feature complete RF frequency interference suppression, instant starting, frequency stability, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated are equipped with ATR heavy duty plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulator which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of 75%. To figure approximate current consumption from storage battery, divide the rated input wattage of the recorder (or load) being operated by the storage battery voltage and further divide this answer by .75 which will give the actual current consumption based on the actual load and efficiency. The battery current consumption required for a tape recorder is normally less than that drawn by ordinary automobile headlight(s). These Universal Inverters are recommended only for use with loads having power factors in excess of 70%.

Featured cut above illustrates Model 12U-RHG.

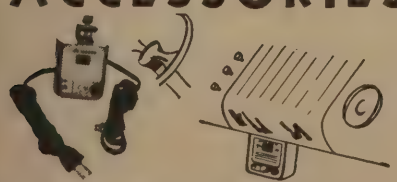
All Units are Frequency Stable and have Automatic Frequency Control.

"—P" models equipped with cigarette lighter cord set to plug into dash receptacle.

All ATR Universal Inverters are housed in attractively finished brown-hammerloid metal cabinets.

Dimensions of Standard (RSF) Model Universal Inverters, 8½" x 9⅞" x 5¼"; shipping weight 22 lbs.

Dimensions of Heavy Duty (RHG) Model Universal Inverters, 6⅞" x 11¼" x 8½"; shipping weight 27 lbs.



Dimensions of Super Heavy Duty (HSJ) Model Universal Inverters 6½" x 12⅞" x 8½"; shipping weight 37 lbs.

For correct replacement Vibrator, consult Inverter Vibrator Guide.

* Recommended for 24 volt battery systems.

ACCESSORIES for 6, 12, and 28 Volt D.C. Input Inverters.

EMOTE CONTROL UNIT — for under-dash ounting permitting installation of Inverter auto-trunk compartment.
Net Price $12.95

MOUNTING BRACKETS — to securely mount Inverter in trunk compartment of car or under-dash, as illustrated
Net Price $7.50 pr.

EXTENSION CABLES — to provide additional cable lengths for installation of Inverter in trunk compartment; #8 gauge, 15′ length.
Net Price $12.50 pr.

Manufactured by

ATR ELECTRONICS, INC.

QUALITY PRODUCTS SINCE 1931

PORTABLE — Plug-in Type
INVERTERS

All Units are Frequency Stable and have Automatic Frequency Control.

Specially Designed for Operating Standard A.C. Dictating Machines, Record Players, Incandescent Lamps, Electric Razors, Electronic Test Equipment, and Other Small Electrical and Electronic Devices from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Planes, Trains, and D.C. Districts.

Illustrates ATR Mighty Midget (DME) Model Inverter having Cigarette Lighter Plug Attachment.

ATR Portable Inverters are light-weight plug-in units for applications as recommended above. These Inverters feature instant starting, frequency stability, and high efficiency and reliability. Inverters have partial RF filtering which is only suitable for small insensitive type radios. For sensitive radio sets, ATR Universal Inverters, catalog sheet 657U, must be used. The 6 and 12-volt units are equipped with cigarette lighter cord set to plug into dash receptacle; whereas, the other higher input voltage units are equipped with standard two-blade plug-in cord sets. With ATR Inverters the need for special equipment is eliminated. They are designed for quiet, long-life operation. All ATR Models indicated are equipped with ATR plug-in Inverter Vibrators. Models RME and RMF come equipped with a four-point voltage regulator which makes possible the correct output voltage for minimum to maximum loads. The battery current consumption required is normally less than that drawn by one ordinary automobile headlight. The operating efficiency is approximately 75%. To figure battery current consumption see catalog sheet 657U. These Inverters are recommended only for use with loads having power factors in excess of 80% and should be used only for the applications as outlined above and on the reverse side of this sheet. These Portable Inverters are not recommended for tape recorder operation, except as specified in (2) below.

Illustrates ATR Medium (RME and RMF) Model Inverter having Four-Point Voltage Regulator and Cigarette Lighter Plug Attachment.

EASY TO INSTALL
EASY TO OPERATE

Illustrates Under-Dash Mounting for ATR Models RME and RMF.

Ideal for Emergency Lighting Applications for Civil Defense, Red Cross, Rescue Work, etc., Simply Using Extension Cords.

TYPE	INPUT D.C. VOLTS	A.C. OUTPUT 60 CYCLES	OUTPUT Int.	WATTAGE Cont.	SHIPPING WEIGHT	NET PRICE

220-RME	220	110 Volts	150	100	12 lbs.	59.95

* Recommended for 24-Volt Battery Systems.

For Inverters having larger or smaller output capacities, or for operation on other D.C. input voltages, please consult available ATR Inverter catalog sheets.

All models designated above are housed in attractively finished brown-hammertold metal cabinets. Dimensions of Medium (RME and RMF) Model Inverters, 8⅜" x 8" x 3¾"; shipping weight, 12 lbs. Dimensions of Mighty Midget (DME) Model Inverters, 5¼" x 4¾" x 2¾"; shipping weight, 5 lbs. For correct replacement vibrator, consult Inverter Vibrator Guide.

(1) These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Soundscriber (with engine of car not running).

(2) Primarily recommended for Dictaphone's Time Master, Gray Audograph and DeJur Stenorette dictating machines, or other similar types. Also, highly recommended for Norelco Tape Recorder Model EL-3516 and Geloso Model G255-S.

(3) THIS INVERTER SPECIALLY DESIGNED AND RECOMMENDED ALSO FOR USE WITH PORTABLE TV SET.

INVERTERS, VIBRATORS, "A" ELIMINATORS, ETC.

DC TO AC UNIVERSAL INVERTERS

New, universal inverters for operating 110-v., 60 cycle AC equipment from DC voltages in autos, buses, trucks, boats, trains, planes and DC districts. Designed especially for standard 110-volt AC tape recorders, TV sets, radios, PA systems, electric razors, test equipment, etc. Units are carefully engineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stability. Have operating efficiency in excess of 75%. Four-point voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or higher than normal. Inverters are recommended for use with loads having power factors in excess of 70%. Built-in toggle switch selects most efficient operation for use with TV sets or tape recorders. Inverters are not recommended for use with large motor driven appliances such as refrigerators, washing machines, etc. All have On-Off switches. Housed in attractive brown hammerloid metal cabinet with convenient leather carrying strap. Sizes: Standard Model RSF, 8½x9⅞x5¼"; Heavy-Duty Model RHG, 6⅞x11¼x 8½"; Extra-Heavy-Duty Model HSJ, 6½x12⅞x8½". With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles. *Recommended for 24 volt battery operation. **Before ordering, check wattage of equipment with which inverter will be used.**

PORTABLE PLUG-IN TYPE INVERTERS

Specially Designed for Operating Standard AC Dictating Machines, Record Players, Incandescent Lamps, Electric Razors, Electronic Test Equipment, and other Small Electrical and Electronic Devices from DC Voltages in Automobiles, Buses, Trucks, Boats, Planes, Trains, and DC Districts.

Lightweight inverters for operating 110 v. AC equipment from DC voltage sources. Feature excellent frequency stability and high efficiency. 6 and 12-volt units plug into cigarette lighter receptacle of any vehicle; others are equipped with standard 2-prong plugs. All are designed especially for use with dictating machines; record players, electric razors, test equipment, etc. Not recommended for large tape recorders and motor driven appliances such as refrigerators, washing machines, etc. Brown Hammerloid case with leather carrying strap. Sizes: DME, 5¼x4¾x2¾"; RME and RMF, 8⅜x8x 3¾". *Recommended for 24-volt operation. **Check wattage rating of equipment before ordering. RMF/RME Model Inverters equipped with voltage regulator.**

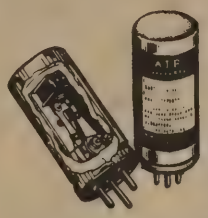
[1] These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Soundscriber (with engine of car not running).
[2] Primarily recommended for Dictaphone's Time Master, DeJur Stenorette, and Gray Audograph dictating machines or other similar types. Also recommended for use with Norelco tape recorder Model EL-3516 and Geloso Model G 255-S Tape Recorder.
[3] **This Inverter specially designed and recommended also for use with portable TV set.**



SOLID STATE INVERTERS

Specially Designed to Provide 117 Volt 60 Cycle AC Power for the Operation of Tape Recorders, VTR Equipment, Public Address Systems, TV Sets, Ham Gear, Small Portable Tools and Appliances, Test Instruments, Closed Circuit TV, Scientific Laboratory and Hospital Equipment, Small AC-DC Universal Motors, Fluorescent and Incandescent Lamps from 12 Volt DC Storage Battery Power in Automobiles, Buses, Trucks, Campers, Mobile Homes, Boats, and Aircraft.

ATR SOLID STATE Inverters are Universal Type Inverters recommended for the applications as listed above plus hundreds more! These Inverters are very well filtered and feature quick starting, frequency stability with varying load and input voltage, rugged heavy-duty construction, reverse polarity protection, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated here are equipped with heavy duty power transistors and plug-in frequency reed for automatic frequency control. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is approximately 80%. To figure approximate current consumption from storage battery, divide the rated input wattage of the load being operated by the storage battery voltage, and further divide this answer by .80 which will give the approximate current consumption from the battery based on the actual load being operated. These Inverters are recommended primarily for use with loads having power factors in excess of 70%. Inverters come complete with battery cables ready for operation.

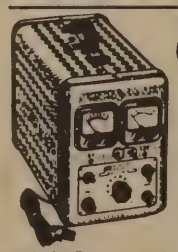
12U-S6M	12	117	650	600	249.75

*"-P" model is equipped with cigarette lighter cord set to plug into dash receptacle. Caution — Do not load beyond 150 watts due to possible damage to cigarette receptacle wiring.
All ATR Inverters are housed in attractively finished brown-hammerloid metal cabinets and are complete with battery cables ready for operation.
For Inverters having larger or smaller output capacities, or for operation on other DC input voltages from 6 volts to 220 volts, please consult available ATR Inverter catalog sheets.

VIBRATORS

For All Auto Radio Sets Since 1954 Use One of the ATR Vibrators Listed Below.



ATR Vibrators Feature:
Ceramic Stack Spacers with Two-Bolt Stack construction.
Instant Starting — as a result of highly efficient magnetic circuit with formed base for more-uniform operation on both high and low voltages.
Large Oversize Tungsten Contacts having Full Wiping Action — for greater reliability and longer life.
Perforated Reed of Highest Quality Swedish Spring Steel.
Highest Precision Construction and Workmanship — practically all parts used are held to within a tolerance of 0.0005 of inch.
Value Plus — as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship. Available in TEN-PAK.

ATR No. 1400 (Bulk), 4-Prong, 6-Volt For All 6-Volt Sets Since 1954.
ATR No. 1843 (Bulk), 3-Prong, 12-Volt For All 12-Volt General Motors Since 1954.
ATR No. 1843 also used in following automobiles: 1956 Ford (Philco), Lincoln (Bendix), and Mercury (Bendix); 1956 Chrysler (Philco); 1955-57 Packard; 1956-57 Plymouth (Philco); 1956 Studebaker (Philco) and 1957 Mercury (Philco).
ATR No. 1840 (Bulk), 4-Prong, 12-Volt For 12-Volt Cars other than GM Since 1954.

SHAV-PAKS

Every man should have this lightweight ATR Inverter in his car for that "Keep Clean-Shaved Look." Will operate standard AC Electric Shavers from your CAR or Boat. Complete with 3 ft. cord set. Plugs into cigarette lighter receptacle. Fuse protected, rugged construction, and attractively housed in grey hammerloid-finish steel case. Size: 4x2⅝x2¾". Ship. wt., 2½ lbs.
Model 6-SPB (6 volt) ..... Net **$18.15**
Model 12-SPB (12 volt) ..... Net **15.67**

"A" BATTERY ELIMINATOR

For Demonstrating and Testing Transistor or Vibrator - Type Auto Radios. Designed for testing DC Electrical Apparatus on regular 110 volt AC lines — equipped with full-wave dry disc-type rectifier, assuring noiseless, interference - free operation. Fully Automatic and Fool-Proof; has voltmeter, ammeter, and 8-position voltage control. Fuse protected and housed in heavy gauge brown hammerloid-finish metal case. 6 ft. cord set included. Size: Model 610C-ELIF, 6½x9½x8½", ship. wt., 22 lbs.; Model 620C-ELIT, 6½x12⅞x8½", ship. wt., 33 lbs.
Ideal as a Power Supply for Model Railroad Trains, Radio Sets, Electro Plating Outfits, and other 6 or 12 Volt, DC Equipment. May also be used as a Battery Charger.
Model 610C-ELIF (6 volt at 10 amps. or 12 volt at 6 amps.) ..... Net **$69.95**
Model 620C-ELIT (6 volt at 20 amps. or 12 volt at 10 amps.) ..... Net **$93.75**

EMERGENCY LIGHTING AND POWER UNIT

Illustrates ATR Emergency Lighting and Power Unit, Model ETS complete with lamps.
Completely Automatic Standby-Power Units Specially Designed to Permit the Instantaneous Continued Operation of Critical Lighting Equipment, PA Systems, Amplifiers, Intercom Systems, Burglar Alarms, Fire Alarms, Synchronous Electric Clocks, Electric Time and Recording Clocks, Incubators, Gas Valves, Telephone and Test Equipment, and Similar Critical Devices in the Event of 115 Volt AC Commercial Power Line Failure. For Use: In Hospitals, Banks, Hotels, Theatres, Factories, Office Buildings, Schools, Homes and Other Areas of Operation.

Custom DC to AC CONVERTERS

115 v. AC 60 HZ Output, 250 to 750 Watts

Carter Motor ®

Dependable rotary power for operating office business machines, professional tap recorders, railroad, mobile and marine radio and radar equipment. Finest constructio Sealed ball bearings require no lubrication. Long life, continuous duty, high efficienc on all models. Only popular models listed here. For 50 Hz output, add $7.50 to li prices. All models 100% power factor. Size: 200 watts, 12⅝" l. x 6¾" w. x 7¼" h 210 and 300 watts, 11⅝" long; 500 watts, 12⅝" long; 750 watts, 13⅞" long.

Frequency Control Models

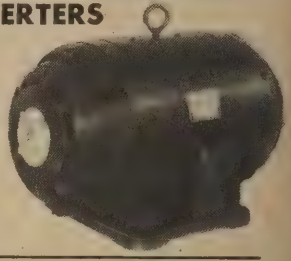
All models listed are for 115 V. AC 60 HZ single phase output. 100% power factor.

STAND-BY LOAD-TRANSFER CONVERTERS



Starts automatically should AC power fail. Shuts off when power restored. Runs from batteries. Operates paging and control circuits for hospitals, schools, utilities, etc. Popular models listed. Other ratings from 200 to 750 watt output. Batteries or trickle charger not supplied.

For stand-by feature on other custom converters listed above, add Y to code number and $90.00 to list price.

230 v. output also available

Monarch 1000 - 1500 - 2000 WATT CONVERTERS

1000, 1500 and 2000 watt 60 HZ AC output, 24 to 230 volt input models. The Monarch series is ideal for heavy-duty industrial service, marine, mine, crane and railroad communications. Slow speed (1800 rpm), long life. 4-pole design; ball bearing equipped. No filter is necessary for most applications. Size: 19" x 11" x 12" high. Three-phase output available, add $60 to list. 24 v. Input at 1500 w. rating. Built-in capacitor filter available, add $30.00 to list.

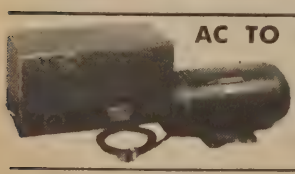
± Reduced voltage starters necessary, add $120.00 to list price.



"MARK II" SUPER CONVERTERS

Designed for high PF non-inductive AC loads such as amplifiers, lab and medical equipment, standby emergency lighting, telephone and marine communications. Not damaged by intermittent transients or sudden overloads. Will not operate refrigerators, large AC motors or low PF transformers. Ball bearing, con. duty. Size: 8¼" x 4½" x 5" high. Weight: 13 lbs. (*10¼" long, 4½" wide, 5" high. Weight: 19 lbs.)

Carter Number	DC Inputs Volts	Amps	Watts, AC at 60 HZ, 115 v.	List Price

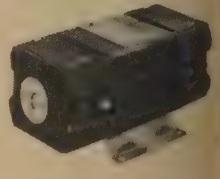
60 HZ output. 50 HZ available



REFRIGERATOR-APPLIANCE MARINE CONVERTERS

Operates standard refrigerators, compressors (up to 1/6 hp only), vacuum cleaners and other appliances from DC; for use aboard commercial and pleasure boats. Converter operates only when power is called for. Has handy AC outlet to run most appliances from DC. Input from 24 to 230 v. DC. Size: 14" x 6¾" x 11" high. Net Weight: 65 lbs. 750 w. con. duty rating. Models from 24 to 230 v. DC input.

Number	Input	List	Number	Input	List

Industrial Power Supplies

ELECTRO

Reliable source of filtered DC voltage for commercial, industrial, research, educational and service applications. Smooth action controls and DC meters permit adjustment to exacting requirements. Silicon and selenium rectifiers patented conduction cooling to provide greater output. Special filters improve regulation and hold AC ripple to a minimum. All output ratings, as listed, are extremely conservative. All units equipped with on-off switch, primary fuse, 6 ft. rubber-covered power cord and plug.

GENERAL PURPOSE TYPES

For operating or servicing mobile radio equipment, model trains, school labs, research, etc. Meters ±5% accurate.

Model D-612T—For CB transceivers, battery charging, solenoids, etc., requiring up to 16 VDC. Low ripple. Maximum output for the price. Voltage and current output meters. Input 117 VAC, 60 Hz.

Model H—Heavy-duty, dual range. Replaces storage batteries in labs, thermoelectric power source and other high current, low voltage uses. Both voltage and current output meters. Input 117 VAC, 50/60 Hz.

Model EC-2—Low cost unit for auto, tape, disk and transistor radio servicing, research and development. Continuously variable voltage adjust. Low ripple. Patented conduction cooling. Vertical or horizontal placement. Combination edge-view voltmeter ammeter. Input 117 VAC, 60 Hz.

Model PS-50—Delivers 50 amps continuously. Heavy-duty, adjustable 12-volt unit services autos, aircraft, marine communications gear. Many industrial and educational uses. Low ripple. Eight-position tap switch voltage output selection. Input 117 VAC, 50/60 Hz.

Model PS-30—Same, but delivers 30 amps continuously. Slightly higher ripple.

Electro Model	Output Volts*	Output Amps	Regulation‡ V/A†	Max. Ripple	Meters	DC Imped., Ohms‡	Size, Inches W. x D. x H.	Net Wt., Lbs.	Net Each

*Continuously variable unless otherwise noted. †Voltage change for each ampere of output current change. ‡No-load to full-load unless otherwise specified.

INDUSTRIAL TYPES

Voltage output continuously variable. Avalanche characteristics on rectifiers. Meters ±2% accurate.

Model EF—Variable 0-28 or 0-14 volts at 5 amps continuous; 10 amps intermittent. Selenium rectifiers. Input 117 VAC, 60 Hz.

Model EFB—Very low ripple version for transistor work; employs chokes and capacitors in ripple filter. Federal stock number 6130-957-1450. Input 117 VAC, 50/60 Hz.

Model EFBR—Same as EFB, but in standard EIA rack panel.

Model NFB—Heavy-duty, continuously variable output 0-32 V to 15 amps. Very low ripple. Variable autoformer for smooth control. Bridge-type silicon rectifiers. Input 117 VAC, 50/60 Hz.

Model NFBR—Same, but with standard EIA rack panel. Federal stock number 6130-853-3127.

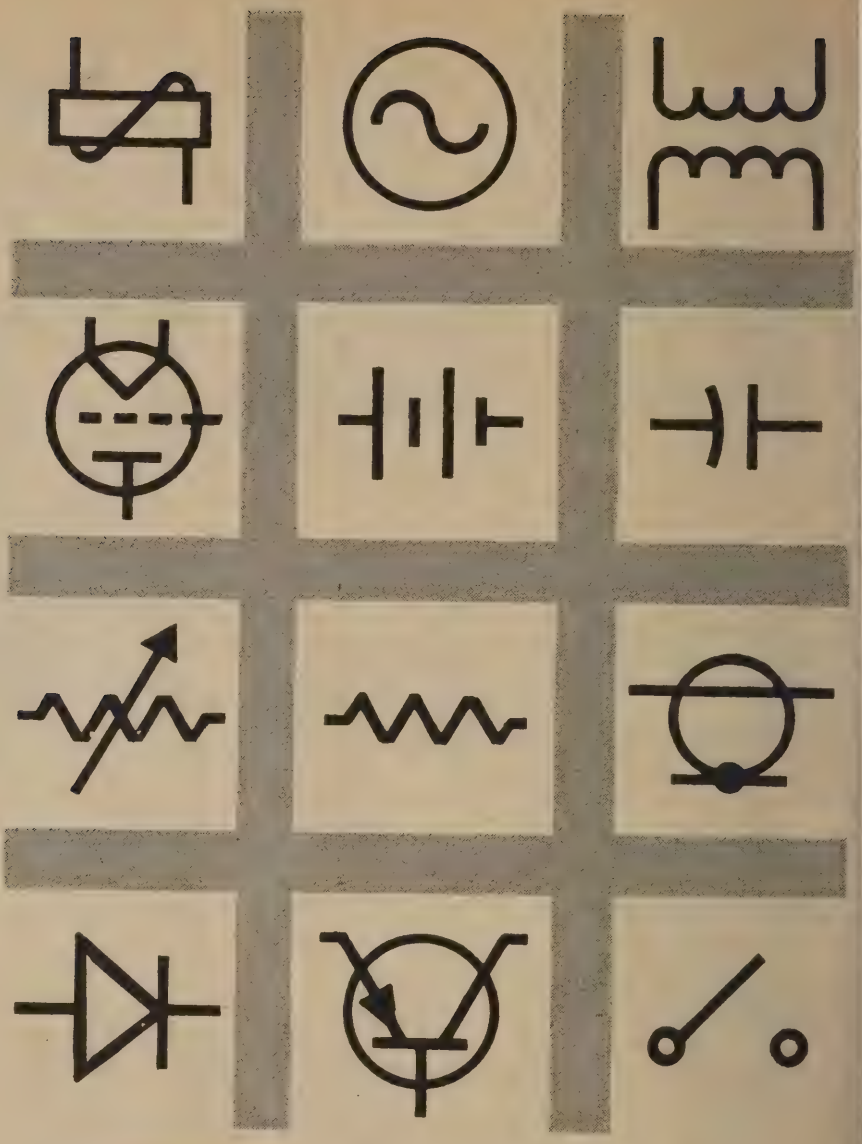
Model GFL—Low cost, semi-regulated, low ripple, higher voltage design. For design and testing DC appliances, phone circuits, relays, etc. Silicon rectifiers; overload protection. Input 117 VAC, 50/60 Hz.

Model GFLR—Same, but with standard EIA rack panel.

Model PS-5—For 48-volt applications, delivers 550 watts of well-filtered DC; continuously variable 0–55 VDC. Silicon rectifiers. Input 117 VAC, 50/60 Hz.

Model PS-5R—Same, but comes with standard EIA rack panel.

Model PS-1000-32—Heavy-duty type for continuous power, low ripple. Variable autoformer for smooth control. Bridge-type silicon rectifiers. Filter circuit uses chokes and capacitors. Output 0–32 VDC at 30 amps. Input 117 VAC, 50/60 Hz.



Model PS-1000-55—Same, but 0–55 VDC at 20 amps; improved ripple.

Model PS-1000-125—Same, but 0–125 VDC at 8 amps.

RECHARGEABLE DEVICES

—Never need batteries
—Retain a charge up to a year when not in use
—One year warranty

No. 3210 "Captain" Rechargeable Mini-Spotlight — Smooth roll action switch. Ideal for pocket or purse. Available in Harbor Blue or Jet Black.

No. 6300 "Commander" Rechargeable Flashlight — Handy for pocket or purse. Available in Diablo Red/Oyster White finish. Gift boxed or blister packed.

No. 71A Display 1 "Captain" 3200BL, 1 "Captain" 3300, 2 "Commander" 6200's, 2 "Commander" 6300's.

No. 3112 "Commander" Rechargeable Lantern — Modern, easy-to-hold, cantilever handle with thumb-tip, push-button control.

No. 3300 "Captain" Rechargeable Flashlight — Twice the light of standard 2-Cell Flashlights . . . never needs batteries! Uses rechargeable battery, No. PR-3 Lamp. Gift boxed or blister packed.

No. 3400 "Captain" Rechargeable Lantern — Twice the light of other rechargeable lanterns, powerful sealed beam lamp generates 13,000 candle power, rugged carrying case. Easy grip cantilever handle with finger-tip switch.

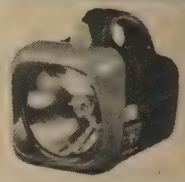
EVEREADY® FLASHLIGHTS, LANTERNS, and BATTERIES

THE WORLD'S MOST TRUSTED BRAND FOR OVER 60 YEARS

INDUSTRIAL and SPECIAL PURPOSE LITES

No. 308CT Combination spotlight/continuity tester . . . a high-quality tool for professionals.

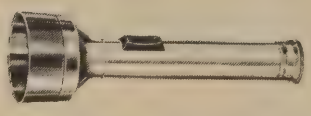
No. 330 Utility Lite. Uses 2 No. 950, D-99 or E95 Batteries, No. PR2 Lamp. Available individually boxed **(No. 330).**



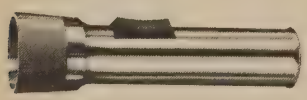
Industrial Flashlights
No. 1251 — 2 Cell, No. PR6 Lamp.
No. 1351 — 3 Cell, No. PR7 Lamp.
Uses Nos. 950, 1050, D99 or E95 Batteries. Will not shatter, crack or dent.

Signal Spotlights
No. 307R or Y. 2 Cell with signal wand (8") specify color: Red (R) or Yellow (Y).

Safety Flashlights
No. 1259 — 2 Cell, No. PR6 Lamp.
No. 1359 — 3 Cell, No. PR7 Lamp.
Uses Nos. 950, 1050, D99 or E95 Batteries. Approved by U.S. Bureau of Mines. Listed by Underwriters' Laboratories, Inc.



No. 459 Hercules Waterproof/Floating Lantern. Explosion-proof, insulated case impervious to gasoline, alcohol, most oils and greases.



No. 3452 Head-Lite. Uses 1 No. 510S Battery and No. PR13 Lamp. Rainproof pouch also available (No. 1348).

NEDA number same as an "Eveready" battery number on a different battery Omitted to prevent errors in shipping

°°Equipped with screw terminals unless Fahnestock spring terminals are specified

°Equipped with Fahnestock spring terminals unless screw terminals are specified

■ Furnished with Fahnestock spring terminals If socket terminals are required specify W-363P W-365P

†Flashlight Types

††These complete line specifications contain the basic data on all "Eveready" batteries in production at the time of preparation. Since the characteristics of individual batteries are sometimes modified, manufacturers who are designing their product to use a particular battery should contact the nearest Union Carbide Consumer Products Division Sales Office for verification of specifications.

††These complete line specifications contain the basic data on all "Eveready" batteries in production at the time of preparation. Since the characteristics of individual batteries are sometimes modified, manufacturers who are designing their product to use a particular battery should contact the nearest Union Carbide Consumer Products Division Sales Office for verification of specifications.

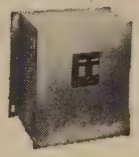
GATES POWER SUPPLIES



SILICON POWER RECTIFIER

For transistor circuits & electronic equipment
MODEL G92F

INPUT: 115 volts AC 60 cycles, 1 phase
OUTPUT: 0-32 Volts DC, 0-10 Amperes D.C. continuous duty
REGULATION: No load to full load 15%
RIPPLE: Less than 0.3% RMS
METERS: 2% Accuracy
DIMENSIONS: 17" x 9" x 9"
PRICE: $169.50 NET
*Also available in 5 Amperes
PRICE: $114.50 NET

INDUSTRIAL POWER UNITS

MODEL A10

INPUT 115 or 230 AC Volts, 60 cycles—Single Phase.
DC OUTPUT 115 Volts DC 125 Watts
APPLICATION: Power sources for operating DC Motors, Relays, Solenoids, Magnetic Chucks.
DIMENSIONS: 11" H x 9" W x 6½" D
PRICE $63.00 NET
250 Watts — $72.50

SILICON RACK MOUNT SUPPLY

MODEL #GX30-10

INPUT: 115 Volts AC 60 Cycles, Single Phase
OUTPUT: 26, 28, 30 Volts DC 0-10 Amperes Continuous Duty
REGULATION: 10% No Load to Full Load
RIPPLE: 0.3% RMS
DIMENSIONS: 8¾" H x 19" W x 10" D
PRICE: $137.50 NET

SELENIUM POWER SUPPLY

MODEL G48-6FM

INPUT: 115 Volts AC 60 Cycles—Single Phase
OUTPUT: 0-48 Volts DC, 0-6 Amperes
CONTROL: Continuously variable over entire range
RIPPLE: 1% RMS
DIMENSIONS: 19" W x 13" D x 10½" H, Fits RETMA, Western Electric racks
PRICE: $190.00 NET

SILICON POWER SUPPLY

MODEL #GS 14-15F

INPUT: 115 Volts AC, 1 Phase, 60 cycles
OUTPUT: 0-14 Volts DC, 0-15 Amperes, continuous duty
RIPPLE: Less than 1% RMS
METER ACCURACY: 2%
DIMENSIONS: 9" H x 17½" W x 9" D
PRICE: $159.50 NET
Rack Model Same Price

AIRCRAFT BATTERY ELIMINATOR

MODEL #G101F

INPUT: 115 Volts AC 60 cycles, single phase
OUTPUT: 0-32 Volts DC, 0-20 Amperes, continuous duty
RIPPLE: 0.5% RMS
Unique overload device prevents needle slam and shows overload condition
REGULATION: D.C.V. at full load: 30
D.C.V. at 1/10 load: 35
METERS: 2% Accuracy
DIMENSIONS: 19" x 14¼" x 12¼"
PRICE: $275.00 NET
May be used for Rack or Bench

ECONOMY RANGE DC POWER SUPPLIES — Less Than 1% Ripple · Good Regulation · Rack Mount Type · Heavy Duty Construction · Powerstat · Fused 2% Meters · 115 Vac Input

ALL TYPES OF POWER SUPPLIES

SILICON POWER RECTIFIER
Model G50-50R

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-50 volts DC, 0-50 amperes continuous duty

RIPPLE: .3% RMS

REGULATION: No Load to Full Load 8%

METERS: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON INDUSTRIAL POWER UNIT
Model G30-100

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-100 amperes continuous duty

RIPPLE: .3% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and at maximum output voltage setting

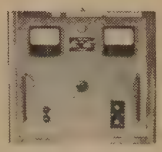
METERS: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON AIRCRAFT BATTERY ELIMINATOR
Model G30-200

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-200 amperes continuous duty also avail. 300A



RIPPLE .5% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and maximum output voltage setting

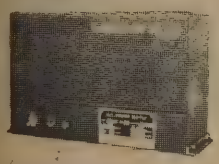
METERS: 2% Accuracy

DIMENSIONS: 25" x 25" x 43"

SILICON REGULATED POWER SUPPLY
Model G530-40M

INPUT: 115 Volts AC, 60 cycles, 1 phase

OUTPUT: 5-30 Volts DC, 0-40 amperes



RIPPLE: 1% RMS

REGULATION: ±1% from no load to full load

METERS: 2% Accuracy

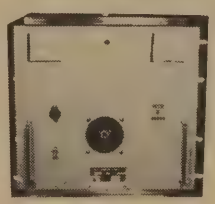
DIMENSIONS: 21" x 15" 19"

SILICON POWER SUPPLY

MODEL GX 30-5

INPUT: 115 Volts AC 60 cycles, single phase

OUTPUT: 28-30-32 Volts DC, 0-5 Amperes, DC Continuous Duty



REGULATION: 12% No Load to Full Load

RIPPLE: .5% RMS

DIMENSIONS: 5" W x 13½" L x Overall Height 9"

PRICE: $85.00 — 6 Amps $95.00

SILICON GENERAL PURPOSE RECTIFIER

MODEL G-115

INPUT: 115 Volts AC 60 cycles, 1 Phase

OUTPUT: 0-32 Volts DC, 0-50 Amperes DC, Continuous duty variable over entire range

RIPPLE: 1% RMS

DIMENSIONS: 22"H x 19"W x 15"D

PRICE: $522.00 NET

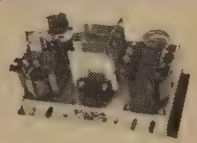
DC POWER SUPPLY

MODEL G94F

INPUT: 115 Volts AC 60 cycles, 1 Phase DC

OUTPUT: 0-300 Volts DC Continuous Variable 0-1 Amperes.

RIPPLE: 3 MV RMS



DIMENSIONS: Rack 8¾" H x 19" L x 9½" D

CABINET: 10½"Hx22"Lx12"D

PRICE: $275.00

Also 0-2 Amp. **PRICE:** $340.00

SILICON POWER SUPPLY

MODEL GX30-20

INPUT: 115 Volts, 1 Phase, 60 cycles

OUTPUT: 0-34, Volts, DC 0-20 Amperes, continuous duty

REGULATION: No load to full load: 18%

RIPPLE: Below 1% Silicon Rectifiers, High Efficiency

DIMENSIONS: 10" x 17" x 3"

PRICE: $185.00 NET

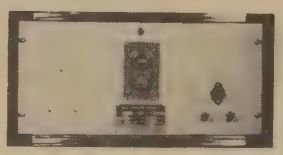
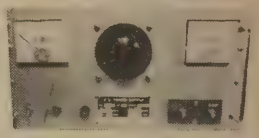
GATES POWER SUPPLIES

MODEL G230-25



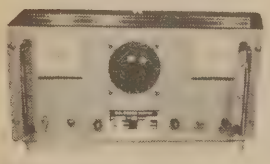
INPUT: 208/440, 3ph 60 cy
OUTPUT: 230 @ 25A
RIPPLE: 4.5%
REGULATION: 1/10 Load 8%
METERS: None
DIMENSIONS: 21" W x 15" D x 14" H
PRICE: $575.00
METERS $50.00 EXTRA

MODEL G12-250



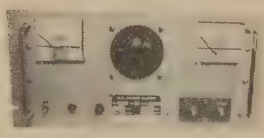
INPUT: 208, 3ph 60 cy
OUTPUT: 0-12V @ 250A
RIPPLE: 4.5%
REGULATION: 1/10 Load 8%
METERS: YES
DIMENSIONS: 20" W x 20" D x 35" H
PRICE: $575.00

MODEL G220-10



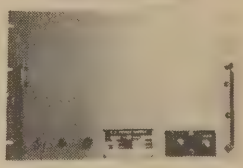
INPUT: 115VAC
OUTPUT: 220VDC @ 10A
RIPPLE: 48%
METERS: NONE
DIMENSIONS: 21" W x 15" D x 10" H
PRICE: $425.00
METERS $50.00 EXTRA

SILICON INDUSTRIAL POWER UNIT
MODEL G30-40F



INPUT: 115 Volts AC, 60 cycles, single phase.
OUTPUT: 0-32 Volts DC, 0-40 Amperes DC, continuous duty
RIPPLE: 1% RMS
DIMENSIONS: 12¼"H x 19"W x 13"D
REGULATION: D.C.V. at full load: 32 minimum D.C.V. at 1/10 load: 35 maximum
PRICE: $425.00

MODEL GT125-5F



INPUT: 115VAC
OUTPUT: 0-125 @ 5A
RIPPLE: 0.5%
REGULATION: UNREGULATED
METERS: YES
DIMENSIONS: 21" W x 15" D x 10½" H
PRICE: $325.00

MODEL GT14-40

INPUT: 115VAC
OUTPUT: 0-14 @ 40A
RIPPLE: 0.1%
REGULATION: UNREGULATED
METERS: YES
DIMENSIONS: 19" W x 13½" D x 8-3/6" H
PRICE: $275.00 — RACK MOUNTED

MODEL GX28-50

INPUT: 115VAC
OUTPUT: 28 @ 50A
RIPPLE: 0.5%
REGULATION: UNREGULATED
METERS: NONE
DIMENSIONS: 19" W x 13½" D x 12¼" H
PRICE: $325.00 — RACK MOUNTED

MODEL G45-30

INPUT: 115VAC
OUTPUT: 45, 42, 40, 36, 32, 30, 29, 28, 26 @ 30A
RIPPLE: 1%
REGULATION: FAN COOLED
METERS: 5%
DIMENSIONS: 19" W x 10" D x 8-3/6" H
PRICE: $375.00

MODEL GT20-200

INPUT: 220 VAC 60 cy. 1 Phase
OUTPUT: 0-22 VDC @ 200A
RIPPLE: 1%
CABINET: 35" x 20" x 20"
METERS: VOLT & AMP.
PRICE $625.00

NEW SCR REGULATED POWER SUPPLIES

GCR32-30 115VAC 24-32 @ 30A 1% ±1% Meters 19"Wx17"Dx12¼"H
PRICE: $550.00 — Cabinet $25.00 more

GCR32-25 115VAC 24-32 @ 25A 1% ±1% Meters 19"Wx17"Dx12¼"H
PRICE: $505.00 — Cabinet $25.00 more

GCR32-20 115VAC 24-32 @ 20A 1% ±1% Meters 19"Wx17"Dx10¼"H
PRICE: $475.00 — Cabinet $25.00 more

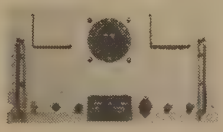
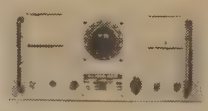
HIGHEST QUALITY-LOWEST PRICE

SILICON POWER SUPPLY
Model GX24-1

INPUT: 115 Volts AC, 60 cycles, 1 phase
OUTPUT: 24 Volts DC, 0-1 ampere DC, continuous duty
RIPPLE: 0.3% RMS
REGULATION: 8% no load to full load
DIMENSIONS: 3" x 5" x 10"
PRICE: $75.00
0-2 Amps **PRICE: $85.00**





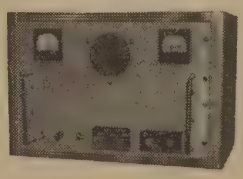
PORTABLE SILICON BATTERY CHARGER
Model G612-20

INPUT: 115 volts AC, 60 cycles, 1 phase
OUTPUT: 6/12 Volts DC, 20 amperes continuous duty
METER: Amp. meter 2% Accuracy
DIMENSIONS: 11"H x 9"W x 6½"D
PRICE: $57.50

SILICON RECTIFIER
Model GT32-30

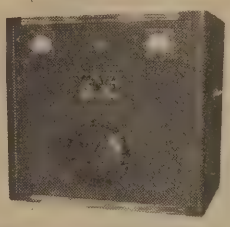
INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 30 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1% RMS
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy volt meter, amp. meter
DIMENSIONS: 10½" x 13½" x 19"
PRICE: $350.00 — WT. 92 Lbs.

SILICON RECTIFIER
Model GT32-24



INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 24 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1%
VOLTAGE CONTROL: Powerstat
DIMENSIONS: 8¾" x 13½" x 19"
METERS: 2% Accuracy volt meter, amp. meter
PRICE: $325.00 — WT. 75 Lbs.

BENCH PLATING RECTIFIER
Model G50-8



INPUT: 115 volts, 50-60 cycles, 1 phase
OUTPUT: 50 amperes, 0-8 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $75. extra
VOLTAGE CONTROL: Powerstat
METER: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: $175.00

BENCH PLATING RECTIFIER
Model G100-8

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 100 amperes, 0-8 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $75. extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: $275.00

BENCH PLATING RECTIFIER
Model G200-6

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 200 amperes, 0-6 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $100 extra
COOLING: Fan
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21" x 15" x 19"
PRICE: $385.00

BENCH PLATING RECTIFIER
Model G50-15

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 50 amperes, 0-15 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $125 extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: $210.00

A single source for all possible types of "brute" force" and regulated power supplies that can fill 90% of your design and application needs. Gates Power Supplies give you absolutely lowest cost and long life. The units are excellently constructed of high rated components for trouble free, years of service.

Silicon or Selenium. Single and three-phase units. 1 to 1000 volts, 1 to 1000 Amps. Metered and unmetered Static or variable outputs. Rack, cabinet or chassis mounts. Unit or hundred quantities 48 hour delivery. Two year guarantees. Power supplies for OEM Application, Testing Prototype, Lab type units, Plating, Motor Control, Cathode Protection, Transistor power, Anodizing, Battery Charging, Battery Conversions, Marine types, Aircraft Starting.

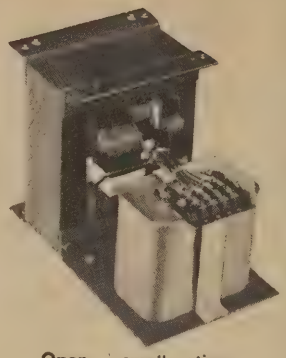
AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment

General Electric a-c voltage stabilizers are static-magnetic transformer-type products which provide voltage maintained within ±1% variation while input line voltage fluctuates ±15%. They are offered in the following variations:

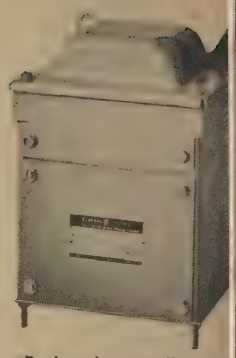
Unfiltered output: output voltage waveform is relatively flat-topped, with harmonic content from 15 to 20%.

Harmonic filtered output: output voltage is filtered to near sinusoidal waveshape, with a maximum of 3% harmonic content.



Enclosed construction: completely metal enclosed for safe external mounting.

Open construction: for installation within electronic or electric equipment.



Cord/Receptacle units: for convenient temporary connections.

SINGLE PHASE — Magnetic-capacitor circuitry is frequency sensitive. Stabilizers designed for one frequency are not suitable for use on another.

THREE PHASE — Standard single-phase a-c voltage stabilizers can be connected for 3-phase, 4-wire loads with input connected delta. However, single-phase models cannot be connected for 3-phase, 3-wire loads: select from 3-phase delta-delta models.

Open — small ratings

Enclosed — small ratin

STABILTRON* AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment Requiring PRECISE Voltage Control

General Electric Stabiltron a-c voltage stabilizers can be used in a wide variety of electronic equipment applications where precise control of voltage is required. The Stabiltron consists entirely of static components — there are no tubes to burn out or moving parts to replace or maintain.

The Stabiltron senses deviations from a predetermined output voltage level by an error detector. The error signal, through the silicon-controlled rectifier circuit, augments the voltage stabilizer action and provides almost instantaneous correction of output voltage.

Typical applications include computers, radar and communications equipment, industrial process control, and X-ray equipment.

Input Voltage — The most common power source voltages can be handled by the standard models listed. Stabiltron units can be provided for special voltage levels on request.

Output Voltage — Stabiltron voltage stabilizers maintain extremely precise voltage output in spite of wide fluctuations of line voltage, frequency, load, load power factor, and ambient temperatures.

The table below illustrates the effect on the output of the maximum steady state excursions, within rated limits of some of these variables.

TABLE 1 — TYPICAL OUTPUT VOLTAGE CHARACTERISTICS

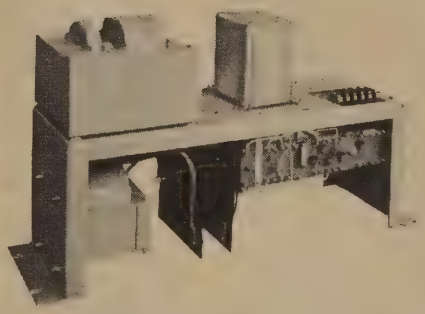
Variable	Excursion	Output Voltage Bandwidth¶
Line voltage†	95 to 130	0.02 to 0.2%
Frequency	57 to 63 Hertz	0.15 to 0.4%
Load	0 to 100% rated load	0.02 to 0.1%
Load power factor	0.4 lagging to unity	0.01 to 0.1%
Ambient temperature	—25C to 40C	0.01%/degree C

¶ A range is indicated because exact amounts are dependent on the static level of other variables.

† When the Stabiltron unit is operated at less than rated load, the line voltage can be reduced considerably below 95 volts without serious deterioration of the output voltage.

Response — Under transient line or load conditions, elapsed time for correction of output voltage and transient excursion from the normal bandwidth are key considerations to equipment operation.

The Stabiltron provides fast response and small transient excursion through its unique combination of solid state and magnetic circuitry.



* Trade-name of General Electric Co.

ENCLOSED CONSTRUCTION - 2-kva units are suitable for either wall or floor mounting. 5- and 10-kva units can be floor mounted only.

PANEL CONSTRUCTION is suitable for standard 19-inch rack mounting.

OPEN CONSTRUCTION is suitable for horizontal or vertical mounting surfaces in equipment enclosures.

TABLE 2 — TYPICAL TRANSIENT RESPONSE CHARACTERISTICS

Transient Change	Percent Peak Output Voltage Excursion	Response‡ Time	Total Recovery§ Time
0 to 115V input	14%	4 Hertz	13 Hertz
95 to 130V input	14%	3 Hertz	8 Herzt
130 to 95V input	9%	5 Hertz	9 Hertz
0 to 100% rated load	24%	1 Hertz	2 Hertz
20% to 100% rated load	21%	1 Hertz	2 Hertz
100% to 20% rated load	34%	1 Hertz	10 Hertz

‡ The time required for the output to recover 63.3% from its maximum excursion.

§ The time required for the output to recover to normal bandwidth limits.

Harmonic Content — Under all rated ranges of line variation and most load conditions, the total harmonic content of the output wave form will not exceed three percent for a sine wave power source. Even under adverse conditions, when the power source is not a sine wave, the Stabiltron voltage stabilizer will correct the wave form to the load to approximately three percent harmonic content.

Rectifier-filter Loading — Since the output wave form is low in harmonic content, the Stabiltron voltage stabilizer can be connected successfully to a rectifier (capacitor input) filter load to the input of a d-c power supply having capacitor input filters.

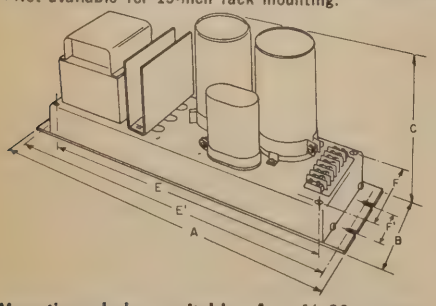
REGULATED DC POWER SUPPLIES

Improve Performance of Computers and Other Electronic Equipment



These component power supplies can be used in a wide variety of applications where relatively constant d-c voltage is required despite fluctuating line voltages. Computers, process control equipment, and electronic measuring devices are typical applications where demands for accuracy require constant regulation of voltage.

Performance-proved GE d-c power supplies can be designed to suit your needs for either 50- or 60-Hertz power sources.

† May vary ±1%. All standard units come equipped with a plate for 19-inch rack mounting.
‡ Indicates approximate percent increase in output voltage due to decrease of load current from full load.
§ Rack mounting plate has four mounting slots on each end. Distance between centers of two outer slots is 7½ in., between two inner slots 3 in.
¶ Not available for 19-inch rack mounting.

Mounting holes suitable for ¼-20 screws. Length of screw may vary with chassis height.

Typical circuit showing voltage stabilizers and filter components.

EFFECT OF INPUT VOLTAGE VARIATION

D-c power supplies can be designed for various input voltages and ranges. With all other variables constant, the output voltage will not vary more than ±1 percent for a change in input voltage over the rated range of 97 to 130 volts input.

EFFECT OF TEMPERATURE CHANGE

For every 40C change in the ambient temperature, the output voltage level will change approximately one percent.

EFFECT OF FREQUENCY

A change of one percent in frequency will change output voltage level approximately one and one-half percent.

ISOLATION

All d-c power supplies provide electrical isolation between the a-c power source and the d-c load.

POLARITY

GE d-c power supplies can be de signed with the polarity you requir All standard units listed can be installe with either plus or minus grounded.

RIPPLE

Ripple levels of one percent RM meet most requirements. However, othe levels of ripple content can be designe into GE power supplies.

EFFICIENCY

Efficiency ranges from 70 to 85 per cent for normal output voltage level For unusually low output voltages o low power ratings, some decrease i efficiency may occur.

REGULATION

Load regulation characteristics depen on the rated output voltage and rate power level of the power supply.

volt-pac® VOLTAGE REGULATORS

- **New solid-state control**
- **Precise output voltage control**
- **Fast voltage-correction rate**
- **Cabinet or rack-mounted models**
- **Magnetic circuit-breaker protection**

General Electric's new automatic voltage regulator line provides closely regulated output voltages from varying input voltages. They normally include a motor-operated Volt-Pac variable transformer, associated buck-boost transformers which handle a wide range of input-voltage variation, and a new solid-state SCR control.

These automatic regulators maintain a preselected output voltage level within 1 percent bandwidth, and are temperature compensated from −20 to +40C. They can be bench or floor mounted, or in smaller sizes, mounted in standard relay racks.

Adjustable Output¶	60	130.0	104.0	15.0	.....	.....	.....	.....	.....	9T92Y152	2169.00

▲ Where narrow range input ratings are not listed for certain models, units can be custom designed as needed.

* Load kva is based on ontput voltage at midpoint in the output range.

¶ When output voltage is adjusted up or down from midpoint, the rated input range will shift proportionately.

Note: All dual input voltage range models are connected for the narrow range when shipped. Reconnection for the wide input range can be made when the unit is installed, if desired. For reconnection, follow directions included with the unit.

§ OEM quantity prices are available on request.

† This model is suitable for a wider input voltage range, i.e., 190-270V.

‡ These models can be used for 199-217V output and 181 to 236V input by changing connections as outlined in connection diagram included in shipping carton.

No Waveform Distortion

No harmonic waveform distortion is introduced at any load or with any input voltage. The output voltage waveform is a precise reproduction of applied input waveform.

Adjustable Output Voltage

Output voltage for units nominally rated 115 volts is adjustable from 110 to 120 volts. Output voltage also is adjustable from 220 to 240 volts for units rated 230 volts; from 440 to 480 volts for nominally rated units of 460 volts. Please note that the specified input-voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage range shifts in proportion with the selected output voltage.

Accurate Static-sensing Control

Solid-state control combined with the new Sylvan-Kettler static-sensing device achieve the optimum in automatic accuracy. The voltage regulator is governed automatically by a dead-band-type voltage-sensitive control utilizing either lamp or zener bridges. The circuit includes magnetic input circuit breakers and an output voltmeter.

FEATURES

- No wave-form distortion
- Dual rated for wide or narrow input voltage ranges
- Adjustable output voltage
- ±1% output voltage band for rated input ranges
- Output voltmeter included
- Fused control circuit
- Fast voltage correction
- −20 to +40C ambient temperature range
- 0 to 100% rated load
- Not sensitive to load power factor
- Not sensitive to line frequency (59-61 Hz)
- Up to 99% efficient
- Solid State control using lamp bridge circuit (Zener diode bridge circuit is available at slightly higher price.)
- Easily replaceable control circuit

Prices subject to change without notice.

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

ORDERING

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.

Modular power supplies* dual and dual tracking models

voltage and current ratings

LXD-3-152 DUAL TRACKING OUTPUT MODEL

3 3/16" x 3 3/4" x 5"
REGULATION: 0.1%
RIPPLE: 1.5 mV RMS

MODEL	ADJ. VOLT. RANGE VDC	MAX. AMPS AT AMBIENT OF: (1) 40°C	50°C	60°C	71°C	PRICE(2)
LXD-3-152	+(12 to 15)	400	370	340	300	$85
	−(12 to 15)	400	370	340	300	
	can also be used					
LXD-3-152	24-30	400	370	340	300	85

Only one overvoltage protector accessory is required for both outputs.

LXD-A-152 DUAL TRACKING OUTPUT MODEL

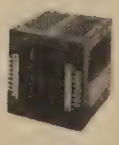
3 3/16" x 3 3/4" x 6 1/2"
REGULATION: 01.%
RIPPLE: 1.5 mV RMS

MODEL	ADJ. VOLT. RANGE VDC	MAX. AMPS AT AMBIENT OF:(1) 40°C	50°C	60°C	71°C	PRICE(2)
LXD-A-152	±15	1.0	1.0	0.9	0.7	$125
	to ±12	0.8	0.8	0.7	0.6	

Only one overvoltage protector accessory is required for both outputs.

LXD-B DUAL TRACKING OUTPUT MODELS

3 3/16" x 3 3/4" x 6 1/2"
REGULATION: 01.%
RIPPLE: 1.5 mV RMS

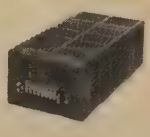


MODEL	ADJ. VOLT. RANGE VDC	MAX. AMPS AT AMBIENT OF:(1) 40°C	50°C	60°C	71°C	PRICE(2)
LXD-B-062	±6	2.7	2.4	1.9	1.4	$160
	to ±3	2.1	2.0	1.6	1.2	
LXD-B-152	±15	1.6	1.4	1.2	0.7	150
	to ±12	1.4	1.3	1.1	0.6	

Only one overvoltage protector accesscry is required for both outputs.

LCD-4-152 DUAL OUTPUT MODEL

4 29/32" x 4 29/32" x 5"
REGULATION: 0.01% + 1 mV
RIPPLE: 250μV RMS



MODEL	FIXED VOLT. RANGE VDC	MAX. AMPS AT AMBIENT OF: (1) 40°C	50°C	60°C	71°C	PRICE(2)
LCD-4-152	15±5%	1.5	1.3	1.0	0.6	$220
	15±5%	1.5	1.3	1.0	0.6	

Two separate independent output voltages. One overvoltage protector accessory is required for each output.

LXD-C DUAL TRACKING OUTPUT MODELS

3 3/16" x 4 15/16" x 9 3/8"
REGULATION: 0.1%
RIPPLE: 1.5 mV RMS

MODEL	ADJ. VOLT. RANGE VDC	MAX. AMPS AT AMBIENT OF: (1) 40°C	50°C	60°C	71°C	PRICE(2)
LXD-C-062	±6	3.5	3.3	2.7	1.7	$170
	to ±3	2.6	2.4	1.9	1.3	
LXD-C-152	±15	2.5	2.3	1.9	1.5	160
	to ±12	2.0	1.8	1.5	1.2	

Only one overvoltage protector accessory is required for both outputs.

*Note: Non-standard voltage and current ratings 0-150 volts fixed and wide range models available as a special. Contact factory for price and delivery.

Specifications of LC series

Specifications of LC series

DC output

voltage range: refer to tables.

Regulated voltage

regulation, line	0.01% + 1 mV
regulation, load	0.01% + 1 mV
ripple and noise	250 μV RMS, 1 mV pk-pk
remote programming resistance	1000 ohms/volt, nominal
remote programming voltage	volt per volt
temperature coefficient	0.01% + 300 μV/°C with external programming resistor; 0.015% + 300 μV/°C with internal programming resistor.

AC input

line	105-132 Vac; 57-63 Hz. For operation at other than 57-63 Hz and 205-265 Vac, see AC input option.
power	LCS-1 13 watts; LCS-2, LCD-2 20 watts; LCS-3, LCD-3 40 watts; LCS-A 80 watts; LCD-A 55 watts; LCS-4, LCD-4 125 watts; LCS-B 125 watts; LCS-C 215 watts.

Overshoot

no overshoot on turn-on, turn-off, or power failure

Ambient operating temperature range

continuous duty from −20°C to +71°C with corresponding load current ratings for all modes of operation.

Storage temperature range

−55°C to +85°C

Overload protection

Thermal

thermostat; automatic reset when overtemperature condition is eliminated. (Not applicable to LCS-1, LCS-3, LCD-3, LCS-A, and LCD-A models.)

Electrical

external overload protection: automatic electronic current limiting circuit limits the output current to a preset value, thereby providing protection for the load as well as the power supply.

Input and output connections

thru terminal block on chassis.

Integrated circuit regulation

integrated circuit provides regulation system, except for input and output capacitors, rectifiers and series regulation transistors.

Convection cooled

no external heat sinking or forced air required.

Number of package sizes

seven (7). Package 1, 2, 3, A, B, 4, C.

Controls

DC output control

simple screwdriver voltage adjustment over entire voltage range.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Current limit

140% of 40°C rating for LCS-1, LCS-2, LCD-2, LCS-3, LCD-3, LCS-A, LCD-A, 110% of 40°C rating for LCS-4, LCD-4, LCS-B, LCS-C.

Mounting

LCS-1 five mounting surfaces; LCS-2, LCD-2 four mounting surfaces; LCS-3, LCD-3, LCS-A, LCD-A, LCS-4, LCD-4, LCS-B and LCS-C three mounting surfaces, designed to mount in Lambda standard rack adapters.

Physical data

Weight

LCS-1 1 lb. net, 1⅞ lbs. ship; LCS-2, LCD-2 2¼ lbs. net, 3⅛ lbs. ship; LCS-3, LCD-3 3½ lbs. net, 4½ lbs. ship; LCS-A 6 lbs. net, 7 lbs. ship; LCD-A 5 lbs. net, 6 lbs. ship; LCS-4, LCD-4 8 lbs. net, 9 lbs. ship; LCS-B 7 lbs. net, 8 lbs. ship; LCS-C 10 lbs. net, 11 lbs. ship.

Size

LCS-1 3 5/32" x 3 9/32" x 1 21/32" single output models; LCS-2, LCD-2 3 5/32" x 3 9/32" x 3 9/32" single and dual output models; LCS-3, LCD-3 3 3/16" x 3 3/4" x 5" single and dual output model; LCS-A, LCD-A 3 3/16" x 3 3/4" x 6½" single and dual output models; LCS-4, LCD-4 4 29/32" x 4 29/32" x 5" single and dual output model; LCS-B 3 3/16" x 4 15/16" x 6½" single output models; LCS-C 3 3/16" x 4 15/16" x 9 3/8" single output models.

Finish

gray, FED. STD. 595 No. 26081

Accessories

rack adapters, overvoltage protectors, chassis slides and blank panels.

Options

AC input

add suffix "-V" to model number for operation at 205-265 Vac, 47-440 Hz, except LCS-1 series and derate current 10% for 47-53 Hz operation except LCS-1 series. For 360-440 Hz operation consult factory. Add 10% or $10.00 to price, whichever is greater.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

Specifications of LX series

Specifications of LX series

DC output

voltage range: refer to tables.

Regulated voltage

regulation, line	0.1%
regulation, load	0.1%
ripple and noise	1.5 mV RMS, 5 mV pk-pk with either positive or negative terminal grounded.
remote programming resistance	200-ohms/volt nominal for LXS-B and LXS-C models. 1000 ohms/volt nominal for LXS-A and LXS-4 models.
temperature coefficient	0.03%/°C

AC input

line: 105-132 Vac, 47-440 Hz. 40° rating not applicable for 50 Hz operation. For 205-265 Vac, see A.C. input option. For operation at 400 Hz consult factory.

power:

LXD-3	35 watts
LXS-A	90 watts
LXD-A	90 watts
LXS-B	125 watts
LXD-B	115 watts
LXS-4	140 watts
LXS-C	215 watts
LXD-C	185 watts
LXS-CC	300 watts
LXS-D	460 watts

Ambient operating temperature range

continuous duty from 0° to +71°C with corresponding load current ratings for all modes of operation.

Storage temperature range

−55°C to +85°C

Tracking accuracy (dual models)

2% absolute voltage difference; 0.2% change for all conditions of line, load and temperature.

Overload protection

Thermal

thermostat; automatic reset when overtemperature condition is eliminated. (Not applicable to LXD-3-152.)

Electrical

external overload protection: automatic electronic current limiting circuit limits the output current to a preset value, thereby providing protection for the load as well as the power supply.

Overshoot

no overshoot on turn-on, turn-off or power failure.

Input and output connections

through terminal block on chassis.

Power hybrid voltage regulator or integrated circuit regulation

some models have Power Hybrid Voltage Regulator providing complete regulation system while others have an integrated circuit providing regulation system except for input and output capacitors, rectifiers and series regulation transistors.

Convection cooled

no external heat sinking or forced air required.

Number of package sizes

seven (7) packages 3, A, B, 4, C, CC, and D.

Controls

DC output control

simple screwdriver voltage adjustment over entire voltage range.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Transformer

MIL-T-27C, Grade 6.

Mounting

three mounting surfaces, designed to mount in Lambda standard rack adapters.

Physical data

Weight

LXD-3:	3.0 lbs. net,	4.0 lbs. ship.
LXS-A, LXD-A:	6.0 lbs. net,	7.0 lbs. ship.
LXS-B, LXD-B:	7.0 lbs. net,	8.0 lbs. ship.
LXS-4:	8.5 lbs. net,	9.5 lbs. ship.
LXS-C, LXD-C:	10.0 lbs. net,	11.0 lbs. ship.
LXS-CC:	15.0 lbs. net,	17.0 lbs. ship.
LXS-D:	23.0 lbs. net,	26.0 lbs. ship.

Size

LXD-3:	3 3/16" x 3 3/4" x 5"
LXS-A, LXD-A:	3 3/16" x 3 3/4" x 6 1/2"
LXS-B, LXD-B:	3 3/16" x 4 15/16" x 6 1/2"
LXS-4:	4 29/32" x 4 29/32" x 5"
LXS-C, LXD-C:	3 3/16" x 4 15/16" x 9 3/8"
LXS-CC:	4 15/16" x 4 15/16" x 9 3/8"
LXS-D:	4 15/16" x 7 1/2" x 9 3/8"

Finish

gray, FED. STD. 595 No. 26081.

Accessories

rack adapters, blank panels, chassis slides. Overvoltage protectors are available for all models except 5 V single output models which have built-in fixed overvoltage protection at 6.8 volts ± 10%.

Options

A.C. input

add suffix "V" to model number for operation at 205-265 Vac, 47-440 Hz and add 10% or $25.00 to the price, whichever is greater.

Fungus proofing

Add suffix "R" to model and add $20.00 to price.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

Specifications of LY series

Specifications of LY series

DC output

voltage range: refer to tables

regulation, line ..... 0.1% for line variations from 105-132 VAC

regulation, load ..... 0.1% for load variations from 0 to full load

remote programming resistance 1000 ohms/volt (not applicable on dual tracking models)

remote programming voltage .. volt/volt (not applicable on dual tracking models)

ripple and noise ..... 0.2% RMS of output voltage with either positive or negative terminal grounded (LYS & LYD models)

10mV RMS on 5 V DC output

3mV RMS on ±15 to ±12V DC output } LYT & LYQ models

3mV RMS on 24-28 V DC output } LYT & LYQ models

temperature coefficient ..... 0.03% °C.

power failure ..... output will remain within regulation for 20 mS after power failure on LYS-5-50V, LYS-5-6, LYD-5-062, LYT-5-5152, and LYQ-5-5153 models.

AC input

line ..... 105-132 VAC 47-440 Hz

power .....

LYS-5-5-OV	280 watts
LYS-5-6	280 watts
LYS-5-12 thru LYS-5-28	405 watts
LYD-5-062	280 watts
LYD-5-152	405 watts
LYT-5-5152	320 watts
LTQ-5-5153	320 watts

DC input

145 VDC ± 10%

Overshoot

no overshoot on turn-on, turn-off, or power failure

Ambient operating temperature range

continuous duty from −20°C to +71°C (LYS and LYD models) 0°C to +71°C with load current ratings as shown in tables (LYT and LYQ models)

Storage temperature range

−55°C to 85°C

Tracking accuracy (dual tracking outputs)

2% absolute voltage difference; 0.2% change for line load and temperature.

Overload protection

Thermal

thermostat, automatic reset when over-temperature condition is removed.

Electrical

external overload protection: automatic factory preset electronic current limiting circuit limits the output current thereby providing protection for the load as well as the power supply.

internal failure protection: provided by fuse.

Input and output connections

heavy duty terminal block on rear of chassis.

Controls

DC output controls

one voltage adjustment control for single or dual tracking outputs. two voltage adjustment controls for independent dual outputs.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Overvoltage protection

built in fixed overvoltage protection on all models with 5V dc outputs. Non-adjusting trip point is 6.8 V dc ± 10%.

For all other voltages, optional overvoltage protection available.

Physical data

Weight:

11½ lbs. net

13 lbs. ship

mounts in two positions.

Size:

3 3/16" x 4 15/16" x 15"

Accessories

rack adapters, overvoltage protectors (only one overvoltage protection unit required for dual tracking outputs).

Guaranteed for 5 years

5 year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

Specifications of LM series

Specifications of LM Series

DC output

voltage range: refer to tables.

Regulated voltage

regulation, line	0.05% plus 4 mV for line variations from 105-132 Vac. 0.01% plus 1.0 mV for line variations from 105-132 Vac. ("Y" option)
regulation, load	0.03% plus 3 mV for load variations from 0 to full load. 0.02% plus 2 mV for load variations from 0 to full load. ("Y" option)
remote programming resistance	200 ohms/volt, nominal
remote programming voltage	volt per volt
ripple and noise	1 mV RMS, 3 mV pk-pk with either pos. on neg. terminal grounded. 0.5 mV RMS, 1.5 mV pk-pk with 60 Hz input. ("Y" option)
temperature coefficient	0.03%/°C; 0.01%/°C ("Y" option)

Overshoot

no overshoot on turn-on, turn-off, or power failure

AC input

line	105-132 Vac: 45-440 Hz. 40°C rating not applicable for 50 Hz operation. For 400 Hz operation consult factory. 205-265 Vac, see AC input option.
power	LM-B Models, 80 watts(1). LM-C Models, 140 watts(1); LM-CC Models, 220 watts(1); LM-D Models, 300 watts(1); LM-E Models, 450 watts(1); LM-EE Models, 750 watts(1); LM-F Models, 900 watts(1); LM-G Models, 1300 watts(1); LM-H Models, 2200 watts(1).

(1) With output loaded to 40°C rating, input 132 Vac and 55-65 Hz.

Ambient operating temperature range

continuous duty from −20°C to +71°C ambient with corresponding load current ratings for all modes of operation and mounting positions.

Storage temperature range

−55°C to +85°C

Overload protection

Thermal

thermostat; automatic reset when over-temp condition is eliminated.

Electrical

external overload protection: fixed, automatic electronic current limiting circuit limits the output current upon external overloads, including short circuit, thereby providing protection for load as well as power supply.

Input and output connections

heavy duty terminal block on rear of chassis; output terminals on LM-F, LM-G, and LM-H are two heavy duty studs.

Controls

DC output control

simple screwdriver voltage adjustment over entire voltage range.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Meters

voltmeter and ammeter on metered models of LM-F, G, and H.

Mounting

three surfaces, each with tapped mounting holes, can be utilized for mounting LM-B, C, CC, and D Models. One mounting surface for E and EE Models, and only in the horizontal plane. Designed to mount in Lambda Standard Rack Adapters.

Physical data

Weight

LM-B Models, 6 lbs. net, 7 lbs. ship; LM-C Models, 9 lbs. net, 10 lbs. ship; LM-CC Models, 15 lbs. net, 17 lbs. ship; LM-D Models, 20 lbs. net, 23 lbs. ship; LM-E Models, 28 lbs. net, 31 lbs. ship; LM-EE Models, 37 lbs. net, 47 lbs. ship; LM-F Models, 54 lbs. net, 64 lbs. ship; LM-G Models, 72 lbs. net, 84 lbs. ship; LM-H Models, 110 lbs. net, 145 lbs. ship.

Size

See tables.

Finish

LM-B, C, CC, D, E, EE, F, G, and H — grey, FED. STD. 595 No. 26081. LM-F, G, H front panels brushed aluminum clear anodized panels with grey inlay (standard).

Accessories

rack adapters, chassis slides, overvoltage protectors, metered and non-metered panels, blank panels.

Options

High performance

add suffix "-Y" — all models available with these specifications for $15.00 extra: Line regulation .01% + 1 mV; Load regulation .02% + 2 mV; Ripple and noise — with 60 Hz input: ½ mV RMS; 1½ mV pk-pk with either positive or negative terminal grounded; Temp. coeff. .01%/°C. These specifications are standard on all H Packages and are included in the price.

AC input

add suffix "-V" — for operation at 205-265 Vac. Add 10% or $10.00 to the price, whichever is greater.

Fungus proofing

add suffix "-R" — all models can be obtained with MIL-V-173 varnish for all fungi nutrient components. LM-B thru EE at $10.00 surcharge; LM-F, G, H at $15.00 surcharge.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

Specifications of LV series

Specifications of LV series

DC output

voltage range: refer to tables.

Regulated voltage

regulation, line	0.15% + 10 mV for line variations from 105-132 Vac.
regulation, load	0.15% + 10 mV, no load to full load or full load to no load.
ripple and noise	10 mV RMS, max. with electronic ripple reducer.
remote programming resistance	200 ohms/volt nominal
remote programming voltage	volt per volt
temperature coefficient	0.03% + 0.5 mV/°C

AC input

line	105-132 Vac, 57-63 Hz
power	LV-E Models, 450 watts; LV-EE Models, 850 watts; LV-G Models, 1350 watts.

Overshoot

no overshoot on turn-on, turn-off, or power failure

Efficiency

greater than 50%, with advanced SCR circuitry.

Ambient operating temperature range

0°C to +71°C

Storage temperature range

−55°C to +85°C

Overload protection

Thermal

thermostat on LV-E and LV-EE models automatic reset when overtemp condition is eliminated; circuit breaker must be reset on all LV-G models.

Electrical

external overload protection: fixed, automatic electronic current limiting circuit limits the output current upon external overloads, including short circuit, thereby providing protection for loads as well as power supply.

internal failure protection: provided by fuse.

Overvoltage protection

built-in, continuously adjustable overvoltage protection crowbars output when trip level is exceeded. Included on all models.

Input connections

heavy duty terminal block on rear of chassis.

Output connections

2 heavy duty studs on rear of chassis; ¼"-28 on all E and EE packages, 5/16"-24 on G packages.

Convection cooled

no external heat sinking or forced air required.

Number of package sizes

three (3) packages E, EE, G.

Controls

DC output control

screwdriver voltage adjustment over entire voltage range.

Overvoltage protector control

screwdriver adjustment covers entire operating range.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Mounting

one surface with tapped mounting holes for LV-E and LV-EE Models; designed to mount in standard Lambda rack adapters. LVG is rack mounted.

Physical data

Weight

LV-E Models, 40 lbs. net, 50 lbs. ship; LV-EE Models, 60 lbs. net, 75 lbs. ship; LV-G Models, 120 lbs. net, 140 lbs. ship.

Size

LV-E, 4 13/16"H x 7½"W x 11¾"D; LV-EE, 4 13/16"H x 7½"W x 16½"D; LV-G, 5¼"H x 19"W x 16½"D (full rack).

Finish

LV-E, EE, and G grey FED. STD. 595 No. 26081. LV-G. Front panel — brushed aluminum clear anodized panels with grey inlay (standard).

Accessories

rack adapters, chassis slides, blank panels.

Options

AC input

add suffix "V" to LVEE models only for operation at 205-265 Vac. 47-63 Hz and add 10% to the price.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Mounting

one surface with tapped mounting holes for LW-E and LW-EE Models; three surfaces for LW-D; designed to mount in standard Lambda rack adapter. LW-G is rack mounted.

Physical data

Weight

LW-D Models, 40 lbs. net, 50 lbs. ship; LW-E Models, 40 lbs. net, 50 lbs. ship; LW-EE Models, 60 lbs. net, 75 lbs. ship; LW-G Models, 120 lbs. net, 140 lbs. ship.

Size

LW-D, 4 15/16"H x 7½"W x 9⅜"D; LW-E; 4 15/16"H x 7½"W x 11¾"D; LW-EE, 4 15/16"H x 7½"W x 16½"D; LW-G, 5 3/16"H x 19"W x 16½"D (full rack).

Finish

LW-D, E, EE, G grey, FED. STD. 505 No. 26081. LW-G Front Panel — brushed aluminum clear anodized panels with grey inlay (standard).

Options

AC input

add suffix "V" to LVEE models only for operation at 205-265 Vac. 47-63 Hz and add 10% to the price.

Accessories

rack adapters, chassis slides, blank panels.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

Consult factory for current ratings or voltages not listed above. (2) Prices are U.S.A. list prices only, F.O.B. Melville, N.Y.; North Hollywood, California; Montreal, Canada. All prices and specifications are subject to change without notice.

FEATURES

Outputs
Single and dual (tracking) outputs

Regulation
0.15%—line or load

Ripple and Noise
1.5 mV RMS, 5 mV, pk-pk

Temp. coefficient
0.03%/°C

Tracking accuracy
2% absolute voltage difference (dual output models only) 0.2% change for all conditions of line, load and temperature

Ambient operating temperature
continuous duty from 0°C to +50°C

Wide AC input voltage range
105 to 132 Vac, 57-63 Hz

Storage temperature
—25°C to +85°C

60-day guarantee

LL series I-C regulated power supply

Net
© United Technical Publications

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

LP and LPD series general-purpose laboratory power supplies

Outstanding features

Designed for both bench and rack use

Convection-cooled
no blowers, no external heat sinks

Series/parallel operation

Continuously variable

Remotely programmable

Remote sensing

Constant voltage/constant current

Designed to meet RFI
per MIL STD 826A

Completely protected
short circuit proof; continuously adjustable automatic current limiting

No overshoot
on turn-on, turn-off or power failure

Features of dual output models

5 Models with two independent DC outputs offer widest choice
up to ±250 Vdc, up to 1.7 amps. Either output may be plus or minus, or both outputs may be plus or minus.

Series/parallel operation
of both outputs yields two times the voltage or two times the current—up to 500 volts or up to 3.4 amps.

Auto series/auto parallel (master-slave)
permits tracking to a common reference.

4 Meters
provide simultaneous monitoring of both voltage and current.

Specifications of LP and LPD series

Specifications of LP and LPD series

DC output
voltage ranges shown in tables on page 6.

Regulated voltage

regulation (line or load)	0.01% + 1 mV for line variations from 105-132 Vac
current range	as shown in table
remote programming resistance	200 ohms/volt nominal
remote programming voltage	volt per volt
ripple and noise	500 μV RMS, 1.5 mV pk-pk (either plus or minus terminal grounded). LPD-425-FM model only — 1 mV RMS, 3 mV, pk-pk.
temperature coefficient	(0-015% + 0.3 mV)/°C—LP models (0.015% + 0.5 mV)/°C—LPD models

Constant current
(current regulated line and load)

Automatic crossover

voltage range	as shown in tables
current range	min: 5 mA or 1% whichever is greater. max: as shown in table.
regulation (line or load)	less than 0.2% or 5 mA whichever is greater.

AC input
105-132 Vac; 47-440 Hz. Ratings based on 57-63 Hz. 205-265 Vac, see "AC Input Option."

Ambient operating temperature range
continuous duty from 0° to +60°C

Storage temperature range
−55°C to +85°C

Overload protection

Thermal
thermostat, automatic reset.

Electrical

external overload protection	adjustable, automatic electronic current limiting, settable to 105% of rated current.
internal failure protection	provided by fuse.

Input and output connections
covered terminal block on rear of chassis; five-way binding posts on front panel. On LPD Models one set of five-way binding posts is provided for each output.

Meters
voltmeter and ammeter. For LPD Models, each output has a separate voltmeter and ammeter.

Controls

DC output controls
coarse and fine voltage adjust and coarse and fine current adjust on front panel of all models. On LPD Models these controls are provided for each output.

Power
on-off switch, front panel.

Remote sensing
provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Physical data

Size
LP-400A Series: 5 3/16"H x 4 3/16"W x 10"D; LP-500 Series: 5 3/16"H x 4 3/16"W x 15 1/2"D; LPD Series: 5 3/16"H x 8 3/8"W x 10 3/32"D.

Weight
LP-400A Series: 7 lbs. net, 10 lbs. ship.; LP-500 Series: 14 lbs. net, 18 lbs. ship., LPD Series: 13 lbs. net, 16 lbs. ship.

Panel finish
brushed aluminum clear anodized panels with grey inlay (LPD models only).

Accessories
rack adapters, overvoltage protectors, pot covers, blank panels.

Options

AC input
add suffix "-V" to model number for operation at 205-265 Vac and add 10% or $25.00 to the price (whichever is greater).
For 50 Hz operation derate current 10%.

Fungus proofing
add suffix "-R" to model number and add $15.00 to price.

Guaranteed for 5 years
5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

voltage ranges shown in tables, page 9.

Regulated voltage
regulation, line ..... 0.015% + 1 mV for line variations from 105-132 Vac.

regulation, load ..... 0.015% + 1 mV for load variations from 0 to full load.

remote programming resistance 200 ohms/volt (nominal)
remote programming voltage.. volt per volt
ripple and noise ..... 250 μV RMS; 1 mV pk-pk with either positive or negative terminal grounded.
temperature coefficient ..... 0.015% + 0.5 mV/°C

Constant current
(current regulated line and load)
Automatic crossover
voltage range ..... as shown in tables.
current range ..... minimum, 20% of 30° rating; maximum, as shown in tables.
regulation, line ..... less than 15 mA for Input Variations of 105-132 Vac.
regulation, load ..... less than 15 mA for input variations of 105-132 Vac from 0 to rated Vdc load voltage change.
ripple and noise ..... less than 1 mA RMS either pos. or neg. terminal grounded.

Constant current
(current regulated line and load)
high precision: barrier strip reconnection
voltage range ..... as shown in tables.
current range ..... 5% to 100% of Current Ratings at any ambient temperature as shown in table.
regulation, line ..... less than 0.05% or 0.5mA whichever is greater for Input Variations of 105-132 Vac
regulation, load ..... less than 0.05% or 0.5 mA whichever is greater for Input Variations of 105-132 Vac from 0 to rated Vdc load voltage charge.
ripple and noise ..... less than 1 mA RMS either pos. or neg. terminal grounded.

AC input ..... 105-132 Vac, 45-480 Hz.

LH-122A-FM, 300 watts(1); LH-119A-FM, 325 watts(1); LH-128A-FM, 250 watts(1); LH-125A-FM, LH-131-FM, 275 watts(1).
(1) With output loaded to full 30°C rating and maximum input voltage.

Ambient operating temperature range
continuous duty from 0° to +71°C with load current ratings shown in tables.

Storage temperature range
−55°C to +85°C

Overload protection
Thermal
thermostat; automatic reset when over-temp. condition is removed.
Electrical
external overload protection: adjustable, automatic electronic current limiting circuit limits the output current to the preset value.
internal failure protection: provided by fuse.

Input and output connections
terminal block on rear of chassis: five-way binding posts on front panel.

Meters
voltmeter and ammeter on all models.

Controls
(consult instruction manual for specific instructions)
DC output controls
coarse and fine voltage adjust, single current adjust, on front panel.
Power
switch, front panel power light energizes when power is on.

Remote sensing
provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Physical data
Size
LH-119A-FM thru LH-131-FM: 5 3/16"H x 8 3/8"W x 15 5/8"D.

Weight

LK series

Three high current, all-convection-cooled power packages

0-20, 0-36, 0-60 Vdc and up to 66 amps.

Outstanding features

Convection-cooled
no blowers, no external heat sinking

Regulation
0.015% or 1 mV — line or load

Ripple
500 μV RMS max.

No voltage spikes or over shoot
on turn-on, turn-off or power failure

Series/Parallel operation

Constant voltage/constant current

Remotely programmable
all models, by voltage or resistance

Remote sensing
eliminates effect of power output lead resistance on DC regulation

Meet mil. environment specs.
vibration: MIL-T-4807A
shock: MIL-E-4970A Proc. 1 & 2
humidity: MIL-STD-819 Meth. 507
temp. shock: MIL-E-5272C (ASG) Proc. 1
altitude: MIL-E-4970A (ASG) Proc. 1
marking: MIL-STD-130
quality: MIL-Q-9858

LK SERIES ½-RACK MODELS

5 3/16" x 8 3/8" x 16"
REGULATION: 0.015% + 1 mV
RIPPLE: 500 μV RMS

MODEL	ADJ. VOLT. RANGE VDC	MAX. CURRENT (AMPS) AT AMBIENT OF:[1] 40°C	50°C	60°C	71°C	PRICE[5]
LK-340-A-FM	0-20	8.0	7.0	6.1	4.9	$360
LK-341-A-FM	0-20	13.5	11.0	10.0	7.7	415

REGULATION: 0.015% + 1 mV
RIPPLE: 500 μV RMS

MODEL	ADJ. VOLT. RANGE VDC	MAX. CURRENT (AMPS) AT AMBIENT OF:[1] 40°C	50°C	60°C	71°C	PRICE[5]
LK-360-FM	0-20	66	59	50	40	$1,100
LK-361-FM	0-36	48	43	36	30	1,000
LK-362-FM	0-60	25	24	22	19	1,100

OVERVOLTAGE PROTECTOR ACCESSORIES

ADJ. VOLT. RANGE VDC	MODEL	FOR USE WITH	PRICE[5]
3-24	LH-OV-4	LK-340-A-FM, -341-A-FM	$35
3-47	LH-OV-5	LK-342-A-FM, -343-A-FM	35
3-70	LH-OV-6	LK-344-A-FM, -345-A-FM	35
3-70	Add "-OV" to Model No.	LK-350-FM, -352-FM	90
3-70		LK-360-FM to 362-FM	120

NOTES:
(1) Current rating applies over entire voltage range.
(2) Prices are for metered models. Non metered models available at same price. Models LK-360-FM, LK-361-FM, and LK-362-FM, which are metered models, not available without meters.
(3) Overvoltage protection up to 70 Vdc as a built-in option for full-rack models. To order, add suffix "-OV" and add $90.00 to price of models LK-350-FM, 351-FM, 352-FM. For models LK-360-FM, 361-FM, 362-FM, add $120.00 and order by adding -OV to model number.
(4) Chassis slides for full rack models: add suffix "-CS" to model number and add $60.00 to the price, except for models LK-360-FM, LK-361-FM and LK-362-FM, for which add $100.00.
(5) All specifications and prices subject to change without notice.

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

Specifications of LK series

Specifications of LK series

DC output

voltage ranges shown in tables, page 12.

Regulated voltage

regulation, line or load..... 0.015% + 1 mV for line variations from 105-132 Vac. (or 188-238 Vac LK-360-FM series).

remote programming resistance 200 ohms/volt

remote programming voltage.. volt per volt

ripple and noise ..... 500 μV RMS; with either pos. or neg. terminal grounded.

temperature coefficient ..... 0.015%/°C.

Constant current

(current regulated line and load)

Automatic crossover

voltage range..... as shown in tables.

current range..... minimum — 5% of 40° rating. maximum — as shown in tables.

regulation, line ..... less than 10 mA or 0.1% whichever is greater for Input Variations of 105-132 Vac (188-238 Vac LK-360-FM series).

regulation, load ..... less than 10 mA or 0.1% whichever is greater for Input Variations of 105-132 Vac (188-238 Vac LK-360-FM series) from 0 to rated Vdc load voltage change.

AC input

105-132 Vac, 47-63 Hz. 188-238 Vac, 47-63 Hz (LK-360-FM series only). For operation at 50 Hz derate output current by 10%. 205-265 Vac, see AC option.

Ambient operating temperature range

continuous duty from 0° to +71°C with load current ratings shown in tables.

Storage temperature range

−55°C to +85°C

Overload protection

Thermal

thermostat; automatic reset when over-temp. condition is removed.

Electrical

external overload protection: adjustable, automatic electronic current limiting circuit limits the output current to the preset value, thereby providing protection for load as well as power supply. Current limiting settability to 105% of rated current.

internal failure protection: provided by fuse.

Input and output connections

terminal block on rear of chassis.

Meters

voltmeter and ammeter on all models.

Controls

DC output controls

coarse and fine voltage adjust and coarse and fine current adjust on front panel.

Power

on-off switch, front panel — ½ rack models; circuit breakers, front panel — full-rack models.

Remote sensing

provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Physical data

Size

LK-340-FM Series: 5 3/16"H x 8 3/8"W x 16"D; LK-350-FM Series: 5 3/16"H x 19"W, 16½"D; LK-360-FM Series: 7"H x 19"W x 18½"D.

Weight

LK-340A-FM thru LK-345A-FM — 36 lbs. net, 41 lbs. ship. LK-350-FM thru LK-352-FM — 95 lbs. net, 125 lbs. ship. LK-360-FM thru LK-362-FM — 135 lbs. net, 170 lbs. ship.

Panel Finish

brushed aluminum clear anodized panels with grey inlay (standard).

Accessories

rack adapters LRA-1, LRA-2 (LK-340 series only) chassis slides, overvoltage protectors, pot covers, blank panels.

Options

AC input

for operation of all models at 205-265 Vac, add suffix "-V" to model numbers and add 10% to the price. For operation of LK-360 series at 208 ± 10%, 47-53 Hz add suffix "-Z" to model number and add 10% to price. For "V" and "Z" option derate current 10%.

Fungus proofing

add suffix "R" to model number and add $20.00 to price.

Guaranteed for 5 years

5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

DISTRIBUTOR DIVISION

LB series provides up to 87% efficiency in convection-cooled power packages

3kW output – 7" panel height
5kW output – 12 3/16" panel height

Outstanding features

Up to 87% efficiency

Regulation
line 0.05% + 6 mV
load 0.1% + 10 mV

Ripple
10 mV RMS max. by use of electronic ripple reducer

Convection cooled
no blowers or internal fans, no external heat sinking

Overvoltage protection
standard on all models up to 60 Vdc rating

No overshoot
on turn-on, turn-off or power failure

Remotely programmable

Remote sensing

Magnetics
designed to MIL-T-27C, grade 6

Completely protected
short circuit proof — continuously adjustable automatic current limiting

Constant I. / Constant V.
by automatic crossover

Series operation

Multi-current-rated
for 40°C, 50°C, 60°C, 71°C

Specifications of LB series

Specifications of LB series

DC output
voltage ranges as shown in tables, page 15.

Constant voltage

regulation, line	0.05% + 6 mV for line variations from 187-229 Vac or from 229-187 Vac
regulation, load	0.1% + 10 mV for load variations from 0 to full load
remote programming, resistance	200 ohms/volt, nominal
remote programming, voltage	volt per volt
ripple and noise	10 mV RMS max 100 mV RMS max for LB-706-FM 150 mV RMS max for LB-726-FM with "Z" option: 15 mV RMS for LB-701 thru LB-705; 150 mV RMS for LB-706
temperature coefficient	(0.03% + 0.5 mV/)°C

Constant current
(current regulated line and load)

Automatic crossover

current range	zero to max. current as shown in tables
regulation (line and load combined)	less than 1% + 10 mA (1% + 50 mA for LB-706-FM, 726-FM) for input variations from 187-229 Vac or from 229-187 Vac and from 0 to 95% output voltage change
ripple and noise	for LB-701-LB-705-FM and LB-721-FM-OV-LB-725-FM less than $(\frac{1}{*Vout})$% RMS of load current either positive or negative terminal grounded for LB-706-FM, less than $(\frac{10}{Vout})$% of load current for LB-726-FM, less than $(\frac{15}{Vout})$% of load current with "Z" option $(\frac{1.5}{Vout})$% of Idc for LB-701-705; $(\frac{15}{Vout})$% of Idc for LB-706

*Vout equals $I_{out}R_L$ measured at output terminals of power supplies.

AC input
208 ± 10% Vac: 57-63 Hz, 3 phase ± 10% max. phase unbalance, 4 wire. For operation at other than 57-63 Hz, see AC input option. For operation of LB-700 series at 50 Hz consult factory for derating.

Efficiency
up to 87% efficiency.

Response time
for a 20% load change between 20% load and 100% load, the voltage will recover to within 0.5 volt in 150 milliseconds.

Ambient operating temperature range
continuous duty from 0° to +71°C with load current rating shown in tables.

Storage temperature
−55°C to +85°C.

Overload protection
Thermal

thermostat requires resetting of circuit breaker to re-energize.

Overvoltage protection
built-in overvoltage protection on all models up to 60 Vdc rating

Electrical

external overload protection: adjustable, automatic electronic current limiting circuit limits the output current to the preset value, thereby providing protection for load as well as power supply. Current limiting settability to 110% of rated current.
internal failure protection: provided by primary circuit breaker.

Input connections
terminal block on rear of chassis.

Output connections
LB-700 series: 2 heavy duty studs ½"-20 on LB-701-FM-OV and LB-702-FM-OV models; all other models: 5/16"-24 studs on rear of chassis. LB-720 series: 4 heavy duty studs 5/16"-24 on LB-721-FM-OV and LB-722-FM-OV models; all other models: 2 studs, 5/16"-24.

Meters
independent voltmeter and ammeter with ±2% accuracy.

Controls
DC output control

coarse and fine voltage adjust and coarse and fine current adjust on front panel.

Power

circuit breaker to protect against internal failure and to provide an on-off control on front panel. Pilot lamp on front panel energizes when circuit breaker is "on."

Remote sensing
provision is made for remote sensing to eliminate effect of power output lead resistance on dc regulation up to 5 volts in each leg.

Physical data
Weight

LB-700 series: 215 lbs. net, 240 lbs. ship.
LB-720 series: 360 lbs. net, 410 lbs. ship.

Size

LB-700 series: 7"H x 19"W x 20 1/16"D
LB-720 series: 12 3/16" H x 19"W x 22 1/16"D

Panel finish

brushed aluminum clear anodized panels with grey inlay.

Chassis finish

grey, FED. STD. 595 No. 26081

Options
AC input

The LB-700 and 720 Series are available for operation at 230 ±10% VAC 57-63 Hz 3 phase. Add suffix "V" to the model number and add 10% to the price.

LB-700 Series only is available for operation at 208 ±10% VAC 47-53 Hz 3 phase. Add suffix "Z" to the model number and add 10% to the price.

Accessories
chassis slides (LB-701-FM-OV thru LB-706-FM models only) and pot covers.

Guaranteed for 5 years
5-year guarantee includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

High performance, high regulation power supplies

from 60 mA to 1.8 amperes for rack or bench use.

Outstanding features

Convection cooled
for convenience and reliability . . . no blowers or external heat sinks

Regulation
0.0005% + 100 μV line or load

Ripple
35 μV RMS

2 meters
monitor both voltage and current simultaneously and continuously.

Remote sensing

Remote programming
by external voltage or resistance for convenience in systems, test equipment and automatic equipment applications.

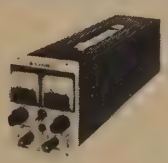
No overshoot
on turn-on, turn-off or power failure

Accuracy
0.01% + 1 mV

Stability
0.001% + 100 μV over 8 hr. period

Temperature coefficient
(0.001% + 10 μV)/°C

Auto series/auto parallel
with Master-Slave tracking



Constant I/Constant V
by automatic crossover

Completely protected
short-circuit proof; continuously adjustable automatic current limiting.

Overvoltage protection
available as low cost add-on accessory.

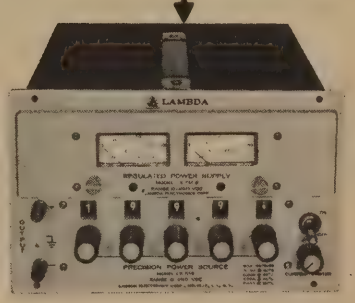
LS series is two instruments in one
Expand the capability of your laboratory

With this plug-in

it becomes a high precision power differential voltmeter



LS power source

ONE DAY DELIVERY ALL MODELS

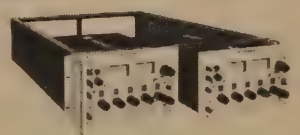
With this plug-in

it becomes a metered high precision power supply

FEATURES OF THE HIGH PRECISION POWER DIFFERENTIAL VOLTMETER

- **Draw power as you measure voltage...**

  The first and only differential voltmeter to furnish high stability power output while being used as a voltmeter... no need for a separate power supply.



- **Plus all power supply specifications**

FEATURES OF THE METERED HIGH PRECISION POWER SOURCE

- **0.0005% plus 100μV Regulation** — best of any high stability power supply in this price range.
- **Ripple** — 35μV rms; 100μV p-p.
- **Accuracy** — 0.01% + 1mV.
- **2 Meters** — monitor both voltage and current simultaneously and continuously.
- **Twice the power** — in a convenient ½-rack package.
- **Guaranteed for 5 years** — the only 5-year guarantee that includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.

- **Multi-Current-Rated** — for 30°C, 40°C, 50°C, 60°C — Covers temperatures most often encountered in laboratory work.
- **5 Models** — with ranges of 0-10, 0-20, 0-40, 0-120, 0-250VDC—Wide selection of ranges to suit your specific needs.
- **Illuminated digital readout** — 5-digital voltage dials provide convenient precise adjustment (200μV resolution over entire range).
- **Only 5¼" high**—convenient half-rack size for rack or bench use.
- **Stability** — 0.001% + 100μV for 8 hours.
- **All silicon-designed for maximum reliability.**
- **Convection-cooled** — no blowers, no external heat sinks.
- **Remote programing**—by changes in voltage or resistance for convenience in systems, test equipment and automatic equipment applications.
- **Auto Series/Auto Parallel** — with Master-Slave tracking.
- **Constant voltage/Constant current.**
- **Completely protected** — short-circuit proof; continuously adjustable automatic current limiting.
- **Overvoltage protection**—available as low cost add-on accessory.
- **Rubber feet** — provided for bench use.
- **AC Input** — 105-132VAC, 47-440 Hz (derate dc output current 10% at 50 Hz) 205-265VAC at extra charge. ("-V" option)
- **Fungus Proofing Option**—Add suffix "R" to model number and add $20.00 to price

- **Mount in Rack Adapters**—LRA-1 ($60.00) or LRA-2 ($35.00). Rack adapter LRA-1 only is available with chassis slides mounted. Add suffix "CS" to rack adapter model number and $50 to price.

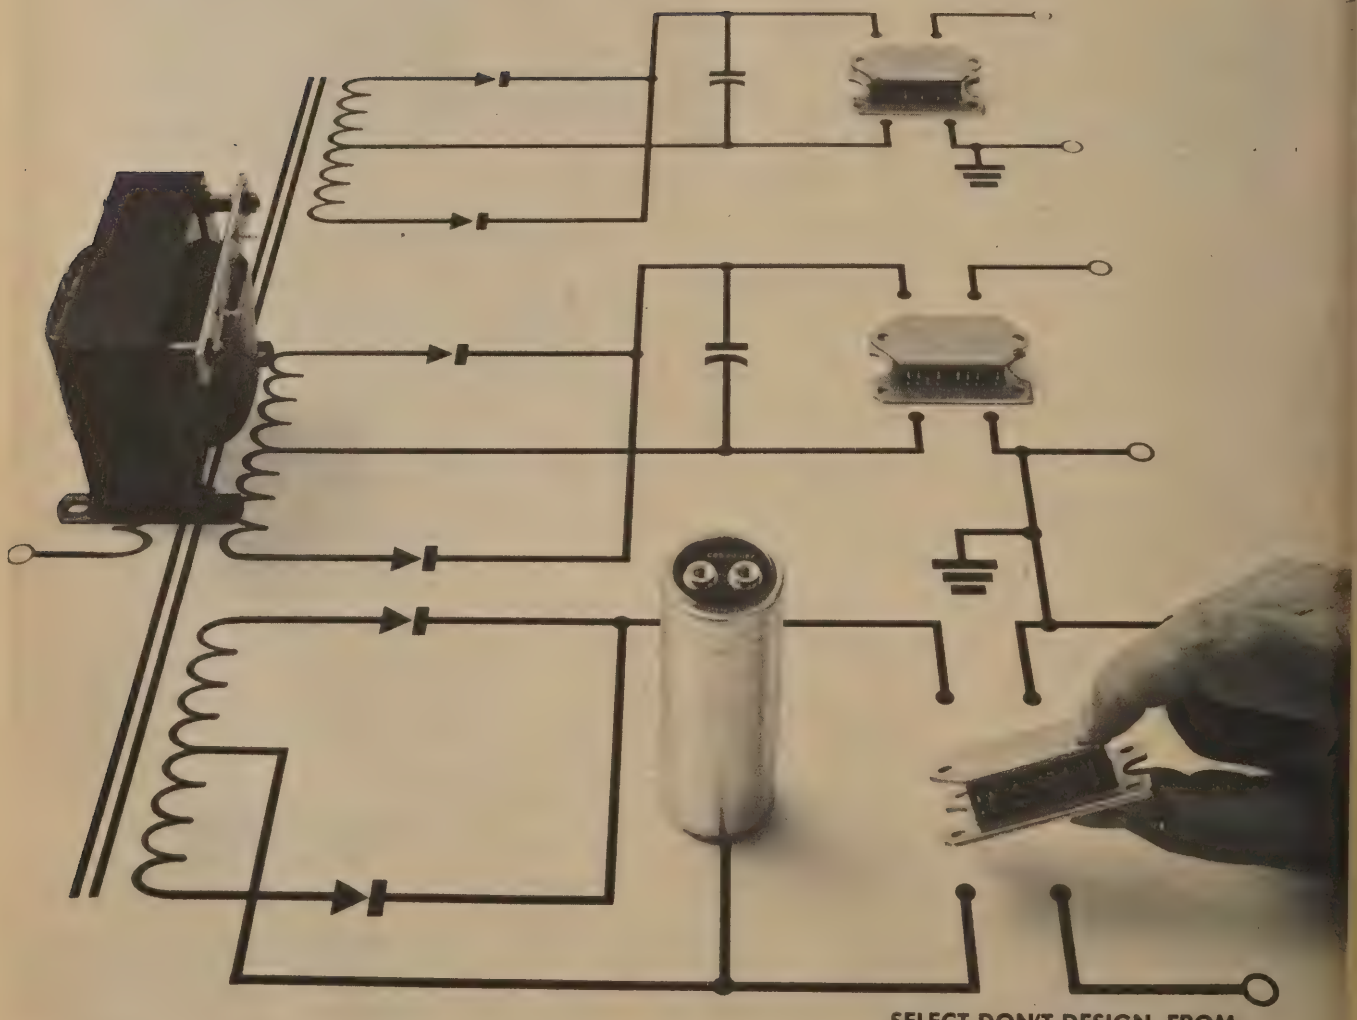
LHOV-5	3-47	35

NOTES:



1 Current rating applies over entire voltage range. Ratings based on 55-65 Hz operation. Derate current 10% for 50 Hz.
2 This price is for non-metered Precision Power Source. Addition of Metered Accessory Plug-In (next two columns) is necessary to have Metered High Precision Power Supply. Addition of Differential Voltmeter Accessory Plug-In to the basic model is necessary for the unit to function as a High Precision Differential Voltmeter.

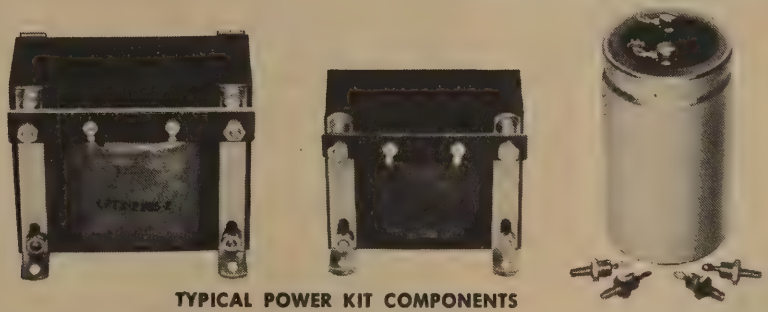
Lambda power kits



pre-designed power supply circuits and selected components providing four levels of regulation and ripple . . . 200 circuits

1. Define parameters

- **output voltage**
- **current**
- **regulation**
- **ripple**

2. Select power kits

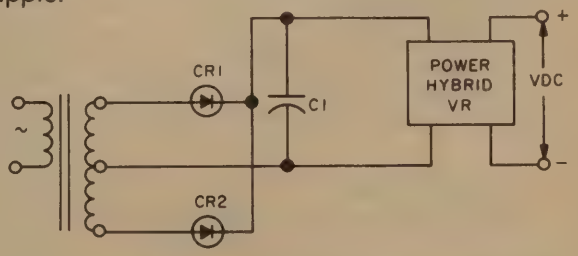
All the major components you need . . . pre-designed to meet your specific requirements and delivered off-the-shelf from a single source of supply

TYPICAL POWER KIT COMPONENTS

Everything you need for a pre-designed power supply

Lambda power kits are comprised of components selected for a pre-designed power supply circuit so that you can build your own dc power supply. The components vary depending upon the circuit selected, as well as the dc voltage and dc current required.

Major components supplied are:



- power and ferro-resonant transformers
- ac capacitors
- filter chokes
- computer grade electrolytic capacitors
- silicon rectifiers
- regulator systems
- power hybrid voltage regulators

Designed for breadboard, pre-production and production models

Lambda, with the introduction of standard power kits, leaves you free to design your circuit without having to bother with the power supply. Lambda now offers a wide selection of power supply kits to provide you with all the major components needed to build a power supply. At the same time, Lambda stocks these items so you get off-the-shelf delivery from 4 regional distribution points.

Wide selection of circuits for regulation and ripple

Lambda offers a selection of pre-designed groups of circuits from which you can select the regulation and ripple characteristics required for your application. Specifications are available from 0.01% regulation 250 μV RMS ripple to 20% regulation at 2 V RMS ripple.

Wide selection of output voltages and currents

in each group of circuits Lambda offers a wide selection of voltages and currents to meet your needs . . . both single and dual outputs. Voltage ranges up to 48 Vdc and current ranges up to 50 amperes dc are provided.

Simply select what you need . . . no calculations or design necessary

all the circuits supplied with the Power Kits are complete showing all components, and have been pre-designed, proved and tested by Lambda Engineering to assure you the same quality and performance achieved by Lambda's standard line of power supplies. In addition, thermal properties of rectifiers and transistors for heat sinking are provided. Lambda transformers and chokes carry the same 5 year guarantee as Lambda power supplies. Lambda transformers and chokes are fully varnish-impregnated.

Circuit specifications/power kits

Circuit specifications

SERIES 1000 — Capacitor-input filter power supply circuits

regulation, line	1.2% per % @ full load
regulation, load	20% from ½ load to full load
output voltage tolerance	±5% @ nominal line of 115 Vac
ripple	1 v RMS, up to 12 Vdc 2 v RMS, 15 to 48 Vdc
dc output voltages	5 to 48 Vdc (eleven ranges)
dc output currents	0.25 to 50 amps (seven ranges)
input voltages	105-132 Vac, 57-63 Hz

SERIES 2000 — Choke-input filter power supply circuits

regulation, line	1% per % @ full load
regulation, load	10% from ½ load to full load
output voltage tolerance	±5% @ nominal line of 115 Vac
ripple	2% (RMS) of dc output voltage
dc output voltages	5 to 48 Vdc (eleven ranges)
dc output currents	1.0 amp to 50 amps (five ranges)
input voltages	105-132 Vac, 57-63 Hz

SERIES 3000 — Regulated power supply circuits

regulation	0.15% + 10 mV — line or load
ripple	5 mV pk-pk
dc output voltages	5 to ±15 Vdc (four ranges)
dc output currents	2 to 50 amps (five ranges)
input voltages	105-132 Vac, 57-63 Hz
temperature coefficient	0.03%/°C
remote sensing	available on some models
automatic current limiting	

SERIES 4000 — Highly regulated power supply circuits

regulation	0.01% + 1 mV — line or load
ripple	250 μV RMS, 1 mV pk-pk
dc output voltages	5 to ± 18 Vdc (five ranges)
dc output currents	0.25 to 50 amps (seven ranges)
input voltages	105-132 Vac, 57-63 Hz
temperature coefficient	0.015%/°C
remote sensing	
remote programming	1000 ohm/v nominal or volt/volt
series/parallel operation	with similar single or dual units
automatic current limiting	

SERIES 5000 Ferro resonant power supply circuits

Input

105-132 Vac — 59-61 Hz

Output

regulation, line	2% for line changes from 105 to 132 Vac or 132 to 105 Vac for any load between 25% and 100% of full load
regulation, load	5% from ½ load to full load for output voltages above 6V. 500 mV from ½ load to full load for 5V and 6V units
output voltage tolerance	±2% @ 25°C, 115 Vac 60 Hz input and 100% load
ripple	100 mV RMS or 1% RMS whichever is greater (200 mV RMS for LPKT-5031-1 and LPKT5081-1)
current limit	transformer automatically limits short circuit current to less than 200% of rated current
effect of line frequency on output voltage	the output changes less than 2.4% for each cycle change in line frequency
dc output voltages	5 to 48 Vdc
dc output currents	1 to 50A

SERIES 6000 Ferro resonant power supply circuits using power hybrid voltage regulator

Input

105-132 Vac — 59-61 Hz

Output

regulation, line	0.02% for line changes from 105 to 132 Vac or 132 to 105 Vac for any load between 0 and 100% of full load
regulation, load	0.2% for 0 to 100% of full load for any line between 105 and 132 Vac
output voltage tolerance	±1% @ 25°C, 115 Vac and 100% load
ripple	1.5 mV RMS, 5 mV pk-pk
current limit	regulator circuit has automatic foldback current limiting to protect the supply as well as the load
temperature coefficient	0.03%/°C
dc output voltages	5 to 28 Vdc
dc output currents	1 to 25A
remote sensing	available on some models

Special Purpose and Multi-Output Transformers

Lambda produces special purpose and multi-output transformers in the standard sizes A through GG (up to 750 VA) as used in the Power Kits.

Also available are open, sealed and encapsulated transformers up to 6 KVA @ 60 Hz and 10 KVA @ 400 Hz, also ferro resonant transformers up to 2 KVA.

Full technical data and prices are available on request.

LAMBDA ELECTRONICS CORP.

ISTRIBUTOR DIVISION

LAMBDA
CUSTOM POWER KITS
Single or multiple outputs...
Designed to your specifications...
Delivered in 3-4 weeks.

If your application requires custom power supplies, you can save time, money and compromises by assembling them yourself from Lambda Custom Power Kits designed to your electrical specifications. These kits utilize Lambda's revolutionary Power Hybrid Voltage Regulator, the biggest advance in power supply design since the silicon power transistor. They can be supplied in single or multiple outputs with regulating (ferroresonant) or non-regulating transformers.

You write the specs. Lambda's engineers, who are power specialists, design a circuit and select components to meet those specs. All the electrical parts, including the circuit diagram and thermal data, are delivered in 3 to 4 weeks after receipt of your order.

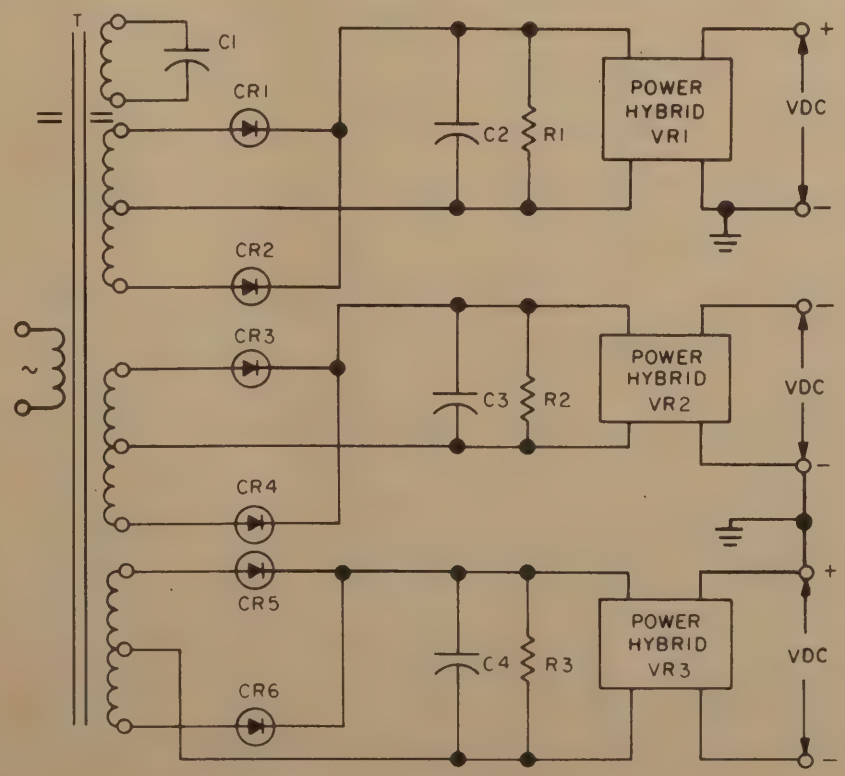
YOU BENEFIT 12 WAYS

Consider these time and money saving advantages of building your own power supplies from Lambda's designed-to-order power kits. You get...

1.
A power supply designed expressly to your electrical specifications and guaranteed to meet them.

2.
A wide choice of regulated or unregulated single or multiple outputs up to 100 VDC, up to 50 amps DC.

3.
Complete circuit and thermal data for heat sinking and mounting.



4.
The same quality components used in Lambda's standard supplies (example: Sprague 85°C, 3500-hr. computer grade electrolytic capacitors).

5.
Simplicity of assembly by use of Lambda's exclusive Power Hybrid Voltage Regulator which replaces discrete components, reducing parts count and inventory substantially.

6.
Low cost by use of your existing labor force and factory overhead.

7.
Low cost because production set-up costs are minimized.

8.
Low cost because you save on engineering design cost.

Typical circuit with regulating (ferroresonant) transformer

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

LAMBDA CUSTOM POWER KITS

Single or multiple outputs... Designed to your specifications... Delivered in 3-4 weeks.

9.
Full control of quality and production scheduling.

10.
Complete flexibility to meet your form factor requirements.

11.
Sharply reduced lead time. Lambda gives you 3 to 4 weeks delivery on design and parts.

12.
5-year guarantee on magnetics.

GUARANTEED PERFORMANCE

Lambda guarantees to meet your electrical specifications when components are properly assembled and heat sinked in accordance with the circuit and data supplied. In addition, Lambda guarantees all magnetic components for five years when operated within specified ratings.

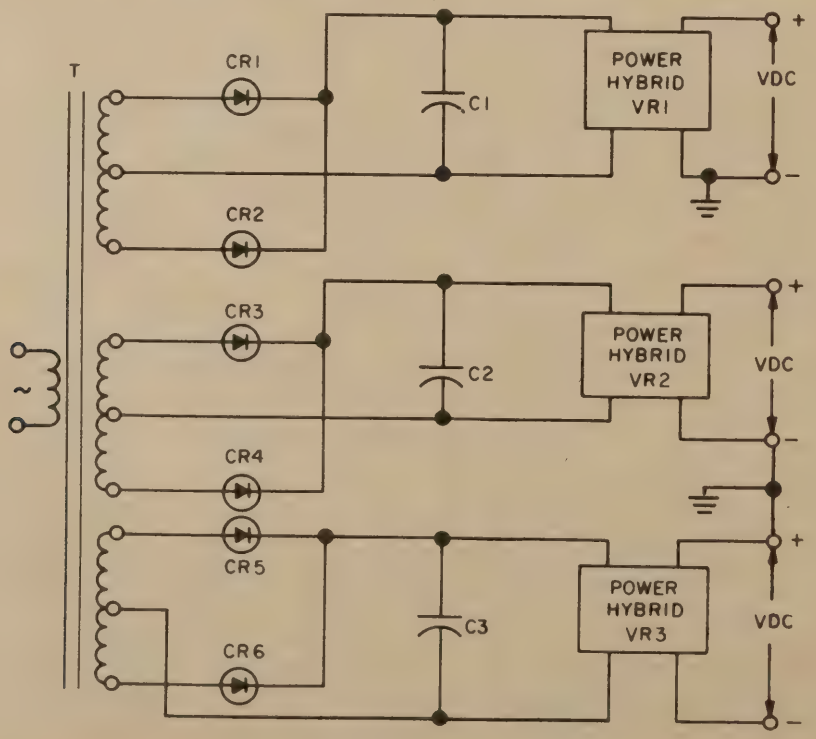
HOW TO ORDER

To obtain a firm quotation on Lambda Custom Power Kits, submit your specifications to any Lambda sales representative or direct to the factory. A form for this purpose has been included in this catalog for your use.

This is the information we need:

1.
AC input voltage and frequency.

2.
DC output voltage and current.



3.
Number of outputs and voltage/current ratings for each.

4.
Regulation requirements.

5.
Ripple requirements.

6.
Additional requirements.

7.
Number of kits to be supplied.

Typical circuit with non-regulating transformer

How to order Lambda power kits

How to Select Lambda Power Kits

1. Determine the regulation and ripple requirement for the circuit you wish to supply.
2. Select one of the six series of circuits that best satisfies your needs — 1000, 2000, 3000, 4000 5000 or 6000 series.
3. Turn to the table for that series and select the power supply kit that meets your dc output voltage and current requirements. No need to design the power supply or to calculate voltage drops across components. This has already been done for you.
4. You may purchase either the entire kit, the transformer, or the filter choke.
5. Number System — The Lambda part number is an alpha-numeric designation in three parts:

Stock No. Prefix	Stock No.	Suffix
LPKT	**2311**	**-3**

The stock number prefix defines the kit or transformer you wish to purchase and the suffix identifies the circuit to be used within that series.

LPKT = Lambda Power Kit
LPTX = Lambda Power Transformer
LPFC = Lambda Filter Choke

The stock number defines the circuit series (which identifies the regulation and ripple) in addition to output voltage and current. For stock numbers in the:

1000 series, see pages 751-752
2000 series, see pages 753-754
3000 series, see pages 755-756
4000 series, see pages 757-758
5000 series, see pages 759-760
6000 series, see pages 761-762

Ordering:

1. Turn to the page listing the circuit series that meets your requirement for regulation and ripple.
2. Select the voltage you need along the vertical axis of the selection chart.
3. Select the current you need along the horizontal axis of the selection chart.
4. Pick the stock number directly off the chart at the intersection of the axes.
5. You select the stock number prefix to the number depending upon whether you want the entire kit or just individual components. The price for each item is also listed in the same section of the chart. Prices for 1 to 9 units are listed in the left-hand column and prices for 10-24 units are listed in the right-hand column under each current rating.
6. Send all transformer and other component orders directly to Lambda Electronics Corp.

Example:

If you were to order part number LPKT 2311-3, you would be ordering (from the Power Kit and Component Selection chart on Page 754) a complete Lambda Power Kit in the 2000 series, a power supply with a choke input filter, which provides a dual + and − 18 volts dc output at 5 amps each, as shown in series 2000 circuit 3. The kit price on the chart is $108.00. If, on the other hand you only wanted the transformer, you would order LPTX 2311-3 at $26.00 or LPFC 2311-3 at $74.00 if you only wanted the filter chokes, etc.

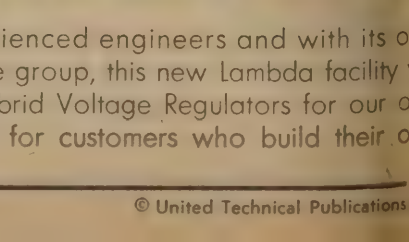
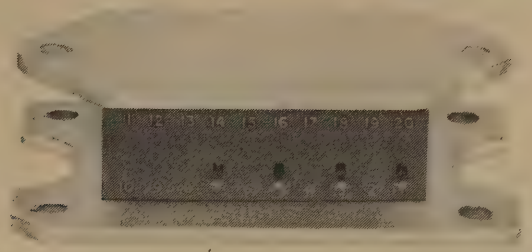
Lambda's microelectronic facility for power hybrid voltage regulator production



We not only developed the Power Hybrid Voltage Regulator; we build it too—from basic material to finished product. The most modern equipment for the manufacture of microelectronic circuitry has been installed in a new facility at our Melville, New York plant.



Staffed by experienced engineers and with its o Quality Assurance group, this new Lambda facility supply Power Hybrid Voltage Regulators for our o requirements and for customers who build their o power supplies.

LAMBDA ELECTRONICS CORP.

DISTRIBUTOR DIVISION

Do you face a "make or buy" decision on power supplies?

"actual size"

A revolutionary development by Lambda offers you improved power supply performance at lower cost whether you "make" OR "buy." It is the Series LAS2000 Power Hybrid Voltage Regulator, which provides 0.2% line or load regulation for any dc power supply with output ratings up to 28V and 5A.

The Power Hybrid Voltage Regulator replaces all discrete components of conventional regulator circuitry. It converts any source of filtered dc into a regulated power supply. Designed and built by Lambda in a new microelectronic facility, the Power Hybrid Voltage Regulator is available as a separate component for the buyer or builder of custom power supplies. It is also incorporated in many of Lambda's off-the-shelf supplies and in Lambda's power kits.

What it is

The Series LAS2000 Power Hybrid Voltage Regulator utilizes cermet thick-film resistors, capacitors and monolithic integrated circuits, and power transistors in chip form, to achieve optimum regulator performance at minimum cost.

A key feature of its construction is the high degree of thermal isolation between the heat generating power elements and the heat sensitive control and reference elements. This thermal isolation results in extremely low thermal drift characteristics for changes in power levels. In addition, a unique thermal power limiting circuit is built into the power section of the unit for increased operational reliability.

What it offers

The Power Hybrid Voltage Regulator allows the power supply builder to achieve rock-bottom simplicity in his design. This is one of its major advantages. The regulator package, occupying about 2.5 cubic inches of space, replaces all of the transistors, diodes, resistors, capacitors and circuit boards of present-day voltage regulators. 22 electrical configurations provide exceptional versatility to meet specific design requirements.

For the builder of power supplies . . .

this means lower cost at every stage of production: lower engineering costs, simpler incoming inspection, smaller and simpler parts inventory, lower manufacturing costs. Of course, these same benefits accrue to us as a manufacturer of regulated power supplies. This is why we can offer a wide range of high-performance packaged supplies at moderate cost.

For the user of power supplies . . .

the Power Hybrid Voltage Regulator means, above all, unequaled reliability. The advantages of ICs over discrete circuitry need no elaboration. Moreover, this ruggedly packaged unit is less susceptible to physical damage than exposed IC or discrete components, thus, longer MTBF is achieved. If a malfunction should occur, the low cost of the Power Hybrid Voltage Regulator makes it economically practical to simply replace the entire unit.

LAMBDA ELECTRONICS CORP.

DISTRIBUTOR DIVISION

Only Lambda's power hybrid voltage regulators offer you these 15 features in a package this small

(and at a price of $20 each in lots of 100)

"actual size"

Features

1
up to 5 Amperes dc output

2
up to 28 Volts dc output

3
up to 85 Watts dissipation

4
0.2% regulation, line or load

5
0.007% / °C temperature coefficient

6
short circuit and overload protection

7
thermal protection

8
remote programming

9
remote sensing

10
electrically isolated case

11
increased power handling capability with external regulation transistor

12
increased current output when used as a driver for series regulation transistors

13
positive regulator

14
dual tracking connection and negative regulator connection with transformer isolation

15
22 models available

NOTES:

1. See curves for limitations imposed by heat sink thermal resistance and input-output differential.
2. Maximum foldback current is 140% of current rating shown in table.
3. External component required for adjustment of output voltage (see figure 15).
4. For line variations from 105-132 Vac.
5. For load variations from 0 to full load.
6. See general ratings.
7. Maximum foldback current is 140% of 40°C current rating.
8. For quantities 1-9; for quantities 100, $20.00; for quantities 1000, $16.00; consult factory for other quantities.
9. Maximum current rating (based on 2°C/W heatsink).
10. Output voltage adj. of LAS 2200 series and LAS 2400 series is ±5% except for LAS 2205 and LAS 2405 which can operate from −50% to +5% of 5V. For current ratings at other than 5V ±5% consult factory.

Definition of terms

"actual size"

V_{IN} (maximum)
the instantaneous maximum allowable input voltage to the regulator between pin 1 and pin 3.

V_{IN} (minimum)
the instantaneous minimum allowable voltage to the regulator between pin 1 and pin 3.

V_{IN} (average)
the steady state or average input voltage to the regulator, between pin 1 and pin 3.

V_{IN} (ripple)
the peak to peak ripple voltage applied to the input of the regulator between pin 1 and pin 3.

V_O
the steady state or average output voltage between pin 7 and pin 4 (pin 5 on 2100 and 2300 models).

Input-output differential (V_{IN} average — V_O average)
the maximum steady state voltage between pin 1 and pin 7.

Saturation voltage (V_{IN} minimum — V_O)
the minimum instantaneous voltage between pin 1 and pin 7.

V_{IN} (control amplifier)
the voltage available to the control amplifier (pin 20) from a peak detector circuit (see figure 19).

Line regulation
the maximum amount of change in the output voltage as the result of a change in the input voltage with load current and ambient temperature held constant.

Load regulation
the maximum amount of output voltage change due to a change in the load from, or for a specified load change with line voltage and ambient temperature held constant.

Temperature coefficient
the percent change in the output (voltage or current) averaged over the operating ambient temperature range expressed in percent per °C. This assumes constant AC input voltage, constant load and internal voltage programming.

Ripple attenuation
the ratio of the ac component of the rectified and filtered power line voltage to the ac component of the output voltage.

Standby current
the input current drawn by the regulator with no output load.

Programming resistance
the change in resistance value required at the program control terminals of the regulator per unit change in output voltage.

Programming voltage
the change in voltage applied to the program control terminals of the regulator per unit change in output voltage.

Regulation load (6)				0.2	%
Programming resistance			1000 nominal		ohms/volt
Programming voltage			one/one		volt/volt
Temperature coefficient	T.C.			.007	% / °C
Ripple attenuation (7)		V_{IN} minimum I_O maximum	60		dB

NOTES:

1. Varies with model number.
2. Single DC input voltage (see figure 15).
3. Separate DC input voltages for power circuit (pin 1) and control circuit (pin 20) (see figure 19). V_{IN} minimum = 9.5 volts at pin 20.
4. Maximum storage temperature limited by tantalum capacitor.
5. I_O constant for entire range from 0 to full load.
6. V_{IN} constant for entire range from V_{IN} minimum to V_{IN} maximum.
7. Ripple attenuation is 54dB minimum for 20V, 24V, and 28V modules.
8. See notes on page 779.
9. Minimum input-output differential based on $T_J \geq 25°C$.

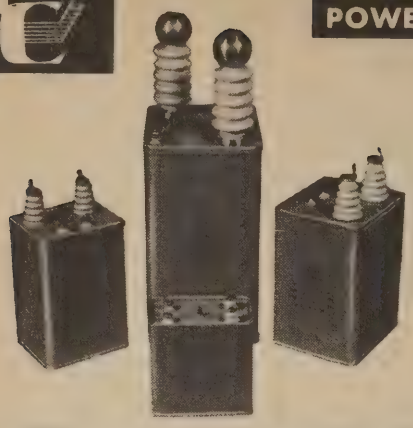
Notes for Determining Values of External Components in Figures 15 through 20

1. Minimum value of input filter capacitors C1 and C3 is determined by: C1, C3 = I_o (1000 mfd/amp) recommended.
2. Minimum value of output capacitors C2 and C4 is determined by: C2, C4 = I_o (100 mfd/amp).
3. Minimum value of output voltage adjust resistors R1 and R3 for LAS 2205 and LAS 2405 is 3K ohms. See note 4 to determine value for all other models.
4. Minimum value of output voltage adjust resistors R1 and R3 is determined by: R1, R3 = ($0.25V_o$ x 1000Ω/V) ohms wirewound. Use next highest standard value.
5. Values of tracking reference voltage divider resistors R2 and R4 for all models except LAS 2205, 2405, 2206, and 2406 are determined by:
   a) R2 = (2000 V_o − 7150) ohms, ±1%, ½W film
   b) R4 = 7.15K ohms, ±1%, ½W film
6. Value of tracking reference voltage divider resistor R2 and R4 for LAS 2205 and LAS 2405 is:
   a R2 = 7.50K ±1% ½W film
   b) R4 = 2.43K ±1% ½W film
7. Value of tracking reference voltage divider resistor R2 and R4 for LAS 2206 and LAS 2406 is:
   a) R2 = 8.06K ±1% ½W film
   b) R4 = 4.02K ±1% ½W film
8. Values of current sharing resistors R5 and R6 are determined by: R5, R6 = $\frac{(N \times 0.5V)}{MAX\ I_o}$ ohms ±3% wirewound where N = number of emitter current sharing resistors required.
9. Nominal value of the current sharing resistor R10 for Fig. 17 is determined from table below.



R10	Model
.100Ω	LAS 2105, 2106, 2112, 2115, 2205, 2206, 2212, 2215
.150Ω	LAS 2120, 2220
.200Ω	LAS 2305, 2306, 2405, 2406, 2124, 2224
.250Ω	LAS 2128, 2228, 2312, 2315, 2412, 2415

10. Value of current sensing resistor R7 is determined by R7 = $\frac{(2.4V)}{I_o}$ ohms, nominal, wirewound.
11. R8 (part of reference voltage divider) = 750 ohms nominal, ½W film resistor for all models except LAS 2205, 2405, 2206, and 2406.
12. R8 for LAS 2206 and 2406 is 3.2K nominal, ½W film.
13. R8 for LAS 2205 and 2405 is not required.
14. Rectifiers CR1 and CR2 should be rated at peak inverse voltage of 50 V and forward current equal at least to maximum rated I_o.
15. Value of I_{cbo} drain resistor R9, is determined by: R9 = $\frac{(V_o)}{(N \times MAX\ I_{cbo})}$ ohms, ±5% composition where N = number of external series pass transistors.
16. All fixed resistors shown on diagrams with given values in ohms are ½W composition.
17. Temperature rise of case 2, △ TC2, is given by the following:
    a) For no external heat sink on case 2,
    $$\triangle TC2 = 0.25P_D\ \theta J_1\text{-}A$$
    b) For an external heat sink on case 2 with thermal resistance θ
    $$\triangle TC2 = \frac{\theta\text{-HS2}}{50°C/W + \theta HS2} \times P_D\ \theta J_1\text{-}A$$

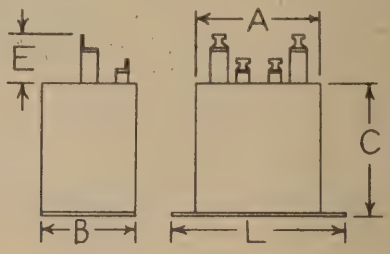
POWER SUPPLIES

POWER SUPPLIES — COMPACT "M" SERIES



THE HV-M SERIES Power Packs have these important features:

1. **Input Voltage** 0 to rated input voltage* at 50 to 500 CPS.
2. **Output Ratings** 0 to 10 milliamperes in accordance with the rating of the power pack.
3. **Ripple** 1% RMS or 2.75% peak to peak at rated voltage.
4. **Output Voltage** can be varied from 0 to rated voltage and load by means of a variable auto transformer.
5. **Two Output Terminals** are isolated from the container, permitting either terminal or both to be operated away from ground. EXCEPTION: The HV750-152M and HV750-502M has a small and a large output terminal. The power pack is normally furnished to deliver a positive output.
6. **Ambient Temperature Range** is minus 55° C to plus 85° C (with limited ratings). EXCEPTION: The HY300-502M, HV500-502M and the HV750-502M are limited to operation at an ambient temperature of 50° C maximum.
7. **Design Life** 40,000 hours at 35° C and 25,000 hours at 65° C at rated output. Life is 5000 hours at 85° C if the output current is no more than 80% of the rated current. Useful life is generally double the figure given above if an approximately 3% drop in voltage is tolerable.
8. **Mounting Position:** Any.
9. **Altitude** up to 10,000 feet operating 50,000 feet non-operating.
10. **Vibration** 10 to 55 CPS with a total of 0.06 inches for 2 hours in each plane for all power packs which have a base dimension of 3 3/4" x 9/16" or less.
11. **Salt Spray** per MIL-Q-151 for 50 hours.
12. **Rectifiers** are long life selenium type.
13. **Filter Capacitors** are special film types designed for long life.
14. **Hermetically Sealed Container.**
15. **Oil Filled Container** prevents corona.
16. **Container Finish** Zinc chromate primer and light blue-gray lacquer per MIL-L-7178.
17. **Terminals** are steatite, solder seal type with solder lug terminals.

*HOW TO ORDER

Select the part number for output voltage and current. This number has a rated input voltage of 118V. If a 220V. input is needed, add the suffix "X" to the part number. For 230V. input, add the suffix "Y", and for 240V. input, add the suffix "Z".

PART NUMBER	KV RANGE	MAX. MA.	DIMENSIONS A	B	C	E	WEIGHT LBS.

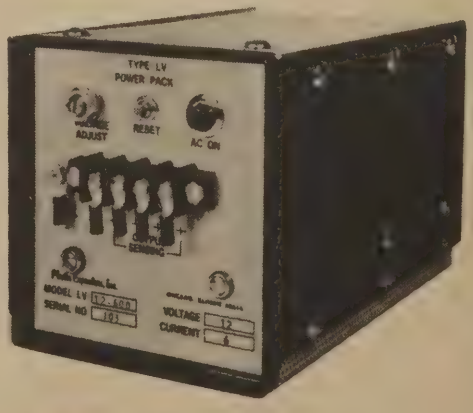
POWER SUPPLIES — LVE SERIES — REGULATED LOW VOLTAGE

AC Input 105 to 125 volts. 50 to 420Hz.

DC Output Voltage Catalog items are available in the most commonly used voltages between 12 vdc and 100 vdc.



Regulation

0.01% for line voltages 105 to 125 vac.
0.05% for no load to full load.
Temperature coefficient is negative 0.015% per degree centigrade over the temperature range.

SPECIAL FEATURES

- All Solid Sate
- All Silicon Semiconductors
- ±2% Output Voltage Control
- Remote Sensing Terminals
- Less than 3 MV P-P Ripple and Noise
- 0 to 55°C Temperature Operating Range
- Unique Heatsink Design
- Natural Convection Cooling (NO FORCED AIR)
- Control Circuit maintained in a stable environment
- Input electrically isolated from Output
- Protected from Overload and Short Circuit
- Floating Output Potential allows Positive or Negative Output
- Output terminal, control, pilot light and reset button are mounted on the front panel
- Any mounting position

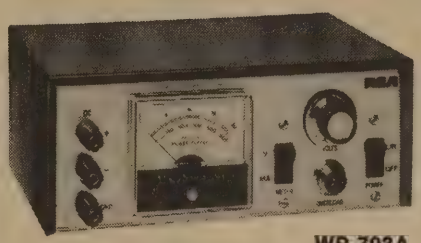
Solid-State Regulated DC Power Supplies

Type WP-700A, WP-702A, WP-703A, WP-704A



RCA

Test Equipment and Accessories

WP-700A

$48.00*

WP-703A
WP-704A

$60.00*

WP-702A

$87.00*

Features

- **All solid-state circuitry**
- **Continuously adjustable voltage output down to 0 volts**
- **Electronic short-circuit protection — short across the output terminals won't harm the supplies**
- **Front-panel overload-indicator lamp signals when maximum current condition is approached**
- **Negative feedback regulator circuit maintains constant output voltage with low ripple**
- **Compact and lightweight**

Description

The WP-700A, 702A, 703A, and 704A are solid-state, constant voltage dc power supplies. These versatile bench-type supplies are ideally suited for use in circuit design, servicing, industrial, and educational applications. Typical applications include developmental transistor or integrated circuit projects, production line testing of dc operated equipment, industrial maintenance, life testing of devices that require dc supply, and classroom use.

The WP-700A and WP-702A circuits are identical, except that the WP-702A is a dual unit, with separate controls, output terminals, and meters for each section. The two sections of the WP-702A are electrically isolated from each other.

Output voltage of the WP-700A and WP-702A is continuously adjustable from 0 to 20 volts, at current levels up to 200 milliamperes.

Output voltage of the WP-703A is continuously adjustable from 0 to 20 volts at current levels up to 500 milliamperes.

The output voltage of the WP-704A is adjustable from 0 to 40 volts at current levels up to 250 mA.

Overload current is limited to prevent damage to the power supplies. No damage will occur even if connected to an external short circuit. A special overload indicator panel lamp will begin to glow when the current approaches the maximum rated level.

A meter is provided to indicate either output voltage or current level. The meter function is selected by a convenient panel switch.

All silicon transistors and diodes are used in the four supplies. Circuit design features include a negative feedback circuit to maintain constant output voltage with low ripple regardless of varying line.

Three convenient output terminals (+DC, —DC, and GND) are provided. The units are equipped with a three-wire ac power cord to permit connecting the external circuit to the power line ground, using the "GND" terminal.

Specifications

	WP-700A WP-702A	WP-703A	WP-704A
Output	0 to 20V 0 to 200 mA	0 to 20V 0 to 500 mA	0 to 40V 0 to 250 mA
Line Regulation (Max. change in output with power-line variation of 110 to 135 V ac)	30 mV	7 mV	15 mV
Load Regulation (Max. change at rated load)	less than 50 mV	less than 10 mV	less than 20 mV
Ripple	less than 500 uV rms	less than 200 uV rms	less than 200 uV rms
Meter Functions (Function selected with panel switch)	0 to 20V 0 to 200 mA	0 to 20V 0 to 500 mA	0 to 40V 0 to 250 mA

Controls ..... Continuously variable voltage
Power on/off
Meter selector V/mA

Output Terminals ..... DC+, DC—, GND, (Pos. or neg. output)

Short Circuit Protection ..... Protected from damage due to external short circuit

Overload Indicator ..... Panel lamp glows when current approaches max. level

Power Cord ..... Three-wire type

Dimensions
WP-700A ..... 4 in. x 6½ in. x 3 in., weight 2 lbs., 11 oz.
WP-702A ..... 6 in. x 12 in. x 3 in., weight 4 lbs., 13 oz.
WP-703A and
WP-704A ..... 5¼ in. x 8¼ in. x 3¼ in., weight 5 lbs., 13 oz.

SOLATRON® ±½% LINE VOLTAGE REGULATORS

Fig. A

Fig. B

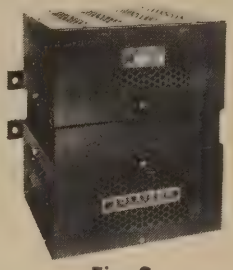

Fig. C

Fig. D

Fig. E

SELECTING THE PROPER SOLATRON® REGULATOR FOR YOUR APPLICATION

1. Determine the proper wiring configuration. Solatron® regulators are cataloged for single-phase, three-phase delta, and three-phase wye applications. The configuration used will depend on service available and on the nature of equipment loading.

2. Determine KVA capacity required. KVA capacity should at the very least equal the total load KVA involved. It is of course wise to provide additional KVA capacity in the regulator as protection against errors in load rating and the possibility of additions to the load at later times.

3. Determine operating voltage. Having located the KVA rating desired on the correct catalog page, you should then determine the operating voltage of your system.

4. Determine variation range required. The extent of voltage excursions you experience or anticipate will determine which of the input voltage ranges should be chosen. Units are offered to regulate line variations of ±10% and +10%/−20%. Since larger variations are likely to occur on the low side of nominal voltage, the +10%/−20% unit is recommended where line voltage may drop more than 10%.

5. To insure correct Solatron® regulators for your application, be sure to specify, in addition to catalog number, the KVA rating and power factor of load, operating voltage, frequency, and whether single-phase, 3-phase delta, or 3-phase wye is desired.

SINGLE PHASE (60 Hz ±3 Hz) (*)

LINE VOLTAGE REGULATORS FOR COMPUTERS

SOLATRON® FOR COMPUTERS

With the problems of low line voltage due to power cutbacks or line loss; the increase of power line transients from lightning or the switching of power or equipment; and, the increased speed and sensitivity of new E.D.P. equipment — the need for a method of achieving consistent, reliable, clean power is becoming more critical every day.

The new, improved Solatron® LVR for computers is designed specifically to meet the stringent requirements of E.D.P. equipment.

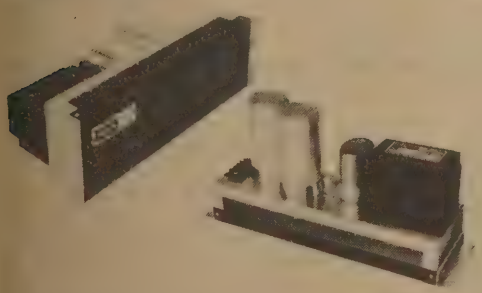
CONTROL TRANSFORMERS



For control circuits incorporating electromagnetic and electronic devices — solenoids, valves, contactors, relays, rectifiers, and solid state components — in applications such as motor control, processing equipment, and machine tools.

Transformers meet or exceed NEMA, ANSI & NMBTA standards.

SOLA® CVDC POWER SUPPLIES

REGULATED DC WITH FIXED OUTPUT

For computers, data processing, process control, electronic measuring, telemetering, and wherever isolation from line fluctuation is required.

The Sola CVDC offers a wide range of voltage outputs. It is rugged, simple, and features dependable operation.

OUTPUT SELECTIONS Single-phase input: 100-130v. A.C., 60 Hz std. 19 inch rack mounting

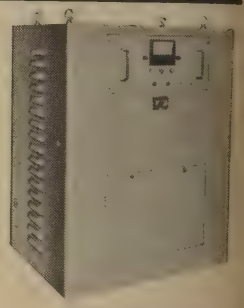
STABILINE® automatic VOLTAGE REGULATORS

- THE MOST EXTENSIVE LINE OF AUTOMATIC VOLTAGE REGULATORS
- RATED OUTPUTS FROM 0.25 TO 275 KVA

Deliver a constant output voltage regardless of variations in input voltage or changes in load current. Conservatively rated, ruggedly built, precision products. Submit specifications for ratings desired but not given in the charts. Input voltage ranges shown are at nominal output voltage; input voltage range shifts with output voltage setting. All are cabinet types; those with other construction also are indicated.

EMT series



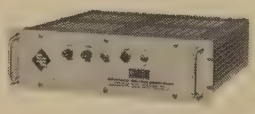
Electro Mechanical Transistorized types in ratings from 2.3 to 118 kva. Control circuit is completely transistorized. POWERKOTE Coils in power section permit higher output ratings. Rated accuracy ±0.75% for all variations of line voltage or load current within stated range of unit.

TYPE EMT4115B

EMS series

Electro Mechanical Transistorized types for single or three phase duty with ratings from 25 to 275 kva. Several types available with individual line control for greater application flexibility. Plug-in transistorized control circuit permits quick replacement in event of malfunction.

TYPE EMS42100



EMK series

Electro Mechanical high speed, high accuracy assemblies in ratings of 2.5/5.0 KVA. Accuracy ±1.0% of nominal output voltage.

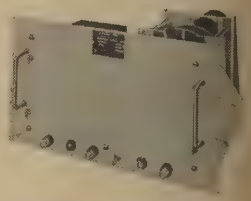
TYPE EMK4105R

IES series

TYPE IES9101

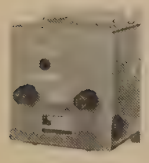
Solid-state types with accuracy within 100 millivolts bandwidth, efficiency up to 95%, fast response, low distortion and wide operating frequency range. No vacuum tubes, motors, blowers or relays are used. All units have provision for remote sensing and have removable plug-in solid-state circuit boards.

All-boost Marine



Electro Mechanical Transistorized type EMT10228 is fully enclosed in a weatherproof cabinet. Well suited for marine or industrial applications where equipment must withstand effects of dust and moisture. Has 6 KVA rated output.

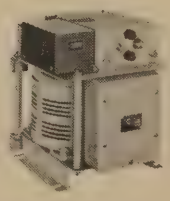
TYPE EMT10228



Militarized

Standard Electro Mechanical and Electro Mechanical Transistorized types that meet the requirements of applicable military specifications. Type EMTH41007MH is 3½ x 6 x 4½"; type EM4108MCR fits standard 19" relay rack. Accuracy ±1.0%.

TYPE EM4108MCR



Overvoltage Detector OVK100

TYPE OVK100

Solid-state voltage level detector used with STABILINE Automatic Voltage Regulators. Actuates relay contacts when monitored voltage exceeds preset level. Relay contacts can be used to actuate protective equipment in a latching (relay remains closed) or nonlatching (relay automatically resets) connection. Trip level adjustable from 110 to 150 volts. Adaptable for higher voltage operation.

Types EMT4104B, (U), (UT)

TYPE EMT4104BUT

Have two primary windings for parallel or series (120 or 240 volt) duty. Type EMT4104B is cabinet enclosed; EMT4104BU is of open construction; EMT4104BUT has components screened or enclosed.

▲At 400 hertz. †Also available as rack model (suffix R when ordering). ¶For 60 hertz operation only.
*Can also be operated on an input range of 95 to 135 volts with a rating of 57 amperes, 6.6 kva and a correction rate of 0.075 seconds per volt.
§Also available as rack (suffix R when ordering) or wall mounted (suffix W when ordering) models.
‡Unit can be converted for 208 volt operation by simple tap changes. Input and output voltage ranges change proportionally.
**At nominal output. Shifts with output voltage setting but not proportionally.
††Also available in open construction (suffix U) and with screened and enclosed (suffix UT) construction.
‡‡At nominal output. Shifts proportionally with output voltage setting.

IN SECTIONS 2100, 3500 AND 5600

STABILINE®
FULL RANGE REGULATOR CONTROLLERS

TYPE FR501MP

For use with any motor-driven POWERSTAT® Variable Transformer to provide full range:

1. REGULATED AC VOLTAGE

A type FR501 or FR501MP STABILINE Full Range Regulator Controller can regulate the output from any motor-driven POWERSTAT Variable Transformer designed for 120 or 240 volt, 50/60/400 hertz, single phase service. For three-phase applications the unit may be used to monitor one line-to-neutral or one line-to-line voltage, depending on the type of variable transformer used. The unit may also be used in 480 volt applications, but when sensing line-to-line voltage, a 480/120 volt step-down transformer, Superior Electric part no. T6026, is required. Output voltage will remain within a 2 volt band when used with 120 volt POWERSTAT Variable Transformers and within a 4 volt band when used with 240 volt POWERSTAT Variable Transformers. The output voltage will remain within the stated bands for any and all variations in line voltage that the variable transformer is capable of correcting and for variations in the control input between 95 and 135 volts.

2. REGULATED AC CURRENT

With the addition of a T6340 transformer and a user supplied current transformer, an FR501 or FR501MP Full Range Regulator Controller can be used with any motor-driven POWERSTAT Variable Transformer to automatically regulate current. The user-supplied current transformer should be of the proper rating to supply 0 to 5 amperes, 10 VA minimum to the transformer. The Full Range Regulator Controller will maintain constant output voltage accurate within ±1% of the maximum current setting. Current can be maintained at any point from zero to maximum.

3. REGULATED DC VOLTAGE

A type FR501DC STABILINE Full Range Regulator Controller is used to provide regulated d-c voltage. Required are a motor-driven POWERSTAT Variable Transformer, an FR501DC Full Range Regulator Controller and a user-supplied d-c power supply. The FR501DC requires 0 to 28 volts d-c, 16 milliamperes to the sensing terminals.

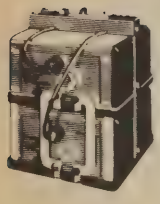
terado CHARGERS, INVERTERS AND VOLTAGE ADJUSTERS

CHANGES BATTERY CURRENT TO 110 VAC, 60 CYCLE, ±½ CYCLE, REGARDLESS OF LOAD*



CAN BE ADAPTED FOR 50 CYCLE USE †

SOLID STATE

INVERTERS

FREQUENCY STABLE QUAD CONTINENTAL

Transistorized, 1200 watts

Converts 12 VDC to 117 VAC, 60 Hz, 1100 to 1200 watts. Frequency stable within ¼ Hz, not affected by change in input or load. Filtered for sensitive electronic equipment. Operates such equipment as small refrigerators, lights, tape recorders, video cameras and tape recorders, electric tools, laboratory test equipment, television, including color, and portable hospital equipment. Adjustable output control and accurate AC output meter. Sophisticated, solid state design at sensible cost. Variable control head may be installed from main unit with 4 optional plug-in extension cables. Size: 12" w. x 12" l. x 15" h. Shpg. Wt., 140 lbs.
Terado No. 50-110—Net Each..... **$610.05**

DUAL CONTINENTAL*†

Transistorized, 600 watts

Same as QUAD CONTINENTAL except: 550 to 600 watts capacity. Size 10¾" w. x 13" d. x 6" h. Shpg. Wt., 60 lbs.
Terado No. 50-202—Net Each..... **$327.74**

CONTINENTAL*†

Transistorized, 300 watts

Same as DUAL CONTINENTAL except: 275-300 watts capacity. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 30 lbs.
Terado No. 50-191—Net Each..... **$158.40**

ATLAS*†

Transistorized, 200 watts

Same as DUAL CONTINENTAL except: 175-200 watts capacity. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 21 lbs
Terado No. 50-200—Net Each..... **$116.50**

TITAN*†

Transistorized, 175 watts

Same as DUAL CONTINENTAL except: less remote control; 150-175 watts capacity; on-off switch; AC receptacle. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-201—Net Each..... **$100.51**

SUPREME*†

Non-transistorized. Converts 12 VDC to AC. Power output, 175-200 W, filtered. Remote control has variable AC output switch and signal light. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-153—Net Each..... **$89.70**

RECORDER*†

150-175 watt version of SUPREME, less remote control. Plugs into cigarette lighter. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 21 lbs.
Terado No. 50-175—Net Each..... **$78.00**

CHIEF*†

Operates tape recorders, power tools, dictation machines, mixers, blenders, etc. Front AC receptacle connects direct to battery. Toggle switch output control. Ventilated steel case. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-137—Input, 6 V; AC power output, 75-100 watts. Net Each..... **$53.90**
Terado No. 50-138—Input, 12 V; AC power output, 100-125 watts. Net Each..... **$53.90**

AUTOMATIC*†

Operates automatically from 6 or 12 VDC without vibrator change or switching (6 V, 55-75 watts; 12 V, 85-110 watts). Easy installation into cigarette lighter. For dictation machines, radios, tape recorders, phonographs, heating pads, etc. Steel case. Seal brown baked enamel. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-134—Net Each..... **$50.52**

SUPER*†

Single input version of AUTOMATIC above. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-126—Input, 6 V; AC power output, 60-75 watts. Net Each..... **$42.90**
Terado No. 50-127—Input, 12 V; AC Power output, 75-100 watts. Net Each..... **$42.90**

MASTER*†

Voltage input, 12 V; AC power output, 60-75 watts. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 6 lbs.
Terado No. 50-122—Net Each..... **$39.90**

ELECTRAL*

Glove compartment size inverter, available in 12 volt input. Easy installation into cigarette lighter. Vinyl coated steel case with leatherette appearance. Size: 3" w. x 2¼" d. x 5½" h. Shpg. Wt., 3 lbs.
Terado No. 50-167—Voltage input, 12 V; AC power output, 42-52 watts. Net Each..... **$21.30**

SENIOR

Operates radios, lights, phonographs and small tape recorders. Available in 6 V or 12 V input. Simple to install into cigarette lighter. Aluminum case. Seal brown baked enamel. Size: 2½" w. x 4½" d. x 2¼" h. Shpg. Wt., 3 lbs.
Terado No. 50-115—Voltage input, 6 V; AC power output, 35-40 watts. Net Each..... **$20.16**
Terado No. 50-116—Voltage input, 12 V; AC power output, 40-50 watts. Net Each..... **$20.16**

DYNAMO*

Permits operating AC radios and electric shavers on 12 VDC battery. Power output, 25-30 watts. Size: 2" x 2" x 3¾". Shpg. Wt., 2 lbs.
Terado No. 50-197—Net Each..... **$16.47**

AUTO SHAVER*

Operates all electric shavers. Available in 6 V (10-15 W) or 12 V (15-20 W) input. Plugs into cigarette lighter. Polyethylene non-breakable case. Size: 3⅝" w. x 2¼" d. x 4½" h. Shpg. Wt., 2 lbs.
Terado No. 50-102—6 V. Net Each..... **$11.85**
Terado No. 50-103—12 V. Net Each..... **$11.85**

ULTRA FINE FREQUENCY STABLE INVERTERS

DUAL CONTINENTAL-3

Converts 12 VDC to 110 VAC, 60 Hz, 550-600 watts. Frequency variation plus or minus ¼ Hz with changing input and load. Ideal for operation of fine or critical equipment as: video-tape equipment and instruments. Includes battery cables, remote control and variable AC output. Size: 10¾"x13"x6"; shipping weight 60 lbs.
Terado No. 50-202-3—Net Each..... **$417.64**

CONTINENTAL-3

Same as DUAL CONTINENTAL-3 Except 275-300 watts, capacity — Frequency stable to plus or minus ¼ Hz. Size: 10¾"x6"x6"; shipping weight 30 lbs.
Terado No. 50-191-3—Net Each..... **$233.40**

24 VOLT TRANSISTORIZED INVERTERS WITH ULTRA FINE FREQUENCY CONTROL

DUAL CONTINENTAL — 24 VOLT

Converts 24 VDC to 110 VAC, 60 Hz, 700-800 Watts, Frequency stable to ± ¼ Hz with changing input and load. Designed for duty in aircraft or other 24 volt D.C. applications. Includes battery cables, remote control and variable A.C. output. Size: 10¾"x13"x7¼": shipping weight 60 lbs.
Terado No. 50-152—Net Each..... **$621.23**

CONTINENTAL — 24 VOLT

Same as 24 Volt Dual Continental; except 350-400 watt capacity—Frequency stable to ± ¼ Hz; Size: 10¾"x6"x-6"; Shipping weight 30 lbs.
Terado No. 50-190—Net Each..... **$305.35**

PORTABLE 117 VOLT POWER SUPPLY

TRAV-ELECTRIC*†

Operates anything using 117 VAC, 60 Hz, from enclosed 25 amp storage battery. Capacity, 125-175 watts. Frequency stable within ½ Hz with load change. Recharges from AC outlet or car cigarette lighter. Meter shows charge rate and hours of output. Size 12" x 5½" x 8" Shpg. Wt., including battery, 36 lbs.
Terado No. 50-160—Net Each..... **$78.79**

TRANSISTORIZED INVERTERS

Frequency Not Stabilized

GEMINI

(Transistorized, 450 to 500 watts)

Transistorized 12 VDC to 110 VAC. Designed to operate equipment not sensitive to frequency change. Size: 12½" x 6" x 6". Shpg. Wt., 20 lbs.
Terado No. 50-128—Net Each..... **$97.17**
Remote Control No. 50-130—Net Each..... **$11.50**

FALCON

(Transistorized, 275 to 300 watts)

Transistorized 12 VDC to 110 VAC. Designed to operate equipment not sensitive to frequency change. Size: 12½" x 6" x 6". Shpg. Wt., 20 lbs.
Terado No. 50-129—Net Each..... **$78.15**
Remote Control No. 50-130—Net Each..... **$11.50**

GALAXY

Transistorized 12 VDC to 110 VAC, 175-200 watts filtered. Adjustable voltage and frequency. Ideal where frequency is not critical. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 9½ lbs.
Terado No. 50-205—Net Each..... **$51.50**

TEMPEST

Transistorized 12 VDC to 110 VAC, 150-175 watts. Ideal where frequency is not important. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 9½ lbs.
Terado No. 50-170—Net Each..... **$45.45**

INVERTER-CHARGER COMBINATION

Transistorized — Solid State

Frequency Not Controlled

MARK I

Copper baked enameled case. Changes battery voltage to 117 volts. AC capacity 450 to 500 watts. Charges 12 volt storage battery at 20 amps, 10 amps or trickle. Has charge meter. Size: 12½" x 6" x 6". Shpg. Wt., 21 lbs.
Terado No. 50-131—Net Each..... **$108.50**

MARK II

Same specifications as MARK I above except inverter capacity is 275-300 watts.
Terado No. 50-132—Net Each..... **$89.50**

12 VDC POWER SUPPLIES with BATTERY CHARGING FEATURE

POWR-MITE

Brown baked enamel, ventilated steel case. Supply and charge rate 10 amps. 12 volts D.C. Filtered for 1 amp. loads. Includes output meter. Size: 3½" x 4" x 6½". Wt. 10 lbs.
Terado No. 50-105—Net Each..... **$32.90**

POWR-ALL

Same type as **Powr-Mite** except: Capacity 25 amperes—continuous 40 amps. intermittent. Two complete circuits. SEPARATE CIRCUIT BREAKERS. Battery Charge rate 25 amps. to trickle. Filtered for 1 amp.loads.
Size: 12½" x 6" x 6". Wt. 21 lbs.
Terado No. 50-106—Net Each..... **$61.20**

VOLTAGE ADJUSTERS

POLARIS & SATURN

For TV, hi-fi and AC motorized equipment. Change high or low voltage over range of 95-135 V to normal. Input: 110 VAC line. Size: 3" x 2¼" x 5½".
Terado No. 50-204 Polaris—Cap., 300 W cont., 500 W int. Wt. 3 lbs. Net Each..... **$12.24**
Terado No. 50-172 Saturn—Same as Polaris, but with accurate AV voltmeter. Net Each..... **$18.77**

APPOLLO

Cap. 1200 W Cont. 1500 W int. Wt. 8 lbs. Size: 3½" x 6½" x 4".
Terado No. 50-141—Net Each..... **$24.75**

KORECT-A-LINE

For **CB and Ham** radio equipment, monitor and correct abnormal voltage; accurate AC voltmeter. Cap., 300 W cont. Wt. 3 lbs.
Terado No. 50-150—Net Each..... **$18.77**

BATTERY CHARGERS

DYN-A-MITE

Baked seal brown paint over aluminum case. Charge rat 1 amp, both 6 and 12 volts. Size: 1¾" x 1¾" x 3¾" Wt., 1 lb.
Terado No. 50-186—Net Each..... **$71**

CHARGRITE

Brown baked enamel, ventilated steel case. Charge rate amps. tapers to trickle. 12 volts only. Charge rate meter Brackets for coiling wire provided. Size: 4"x5"x6". 10 lbs
Terado No. 50-194—Net Each..... **$233**

TAPERITE

Brown baked enamel case. Charges 6 amps, or in lo position charge automatically tapers to 0. Will not over charge battery; has charge rate meter. Size: 4" x 5" 6". Wt., 7½ lbs.
Terado No. 50-192—Net Each..... **$284**

CHALLENGER

Brown baked enamel, ventilated steel case. Charge rat 6 amps, both 6 and 12 volts. Charge rate meter Brackets for coiling wire provided. Size: 4" x 5" x 6" Wt., 5 lbs.
Terado No. 50-189—Net Each..... **$239**

SUPER CHARGER

Brown baked enamel, ventilated steel case. Charge rat 10 amps, both 6 and 12 volts. Color coded meter show condition of battery and charge rate. Size: 4" x 5" x 6" Wt., 7½ lbs.
Terado No. 50-181—Net Each..... **$290**

POWERHOUSE

Heavy duty, heavy copper clad, ventilated steel case with handle. Full fast 20 amp charge rate on 12 volts only. volt batteries, plus trickle charge. Full wave type with 4 silicon rectifiers. Complete with charge rate meter and 6 ft. cable with battery clamps. Size: 11" x 6" x 6". Ship Wt., 20 lbs.
Terado No. 50183—Net Each..... **$541**

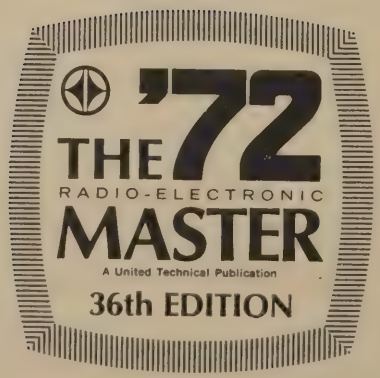
It's easy



to order from this catalog.

When ordering products shown in this catalog
or writing for additional information,
be sure to specify:

1. **The year and edition of this MASTER**
2. **Manufacturers' catalog numbers and page numbers**

This will avoid confusion
and expedite delivery.

Thank you!

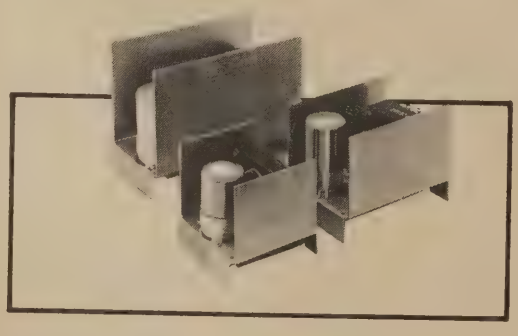
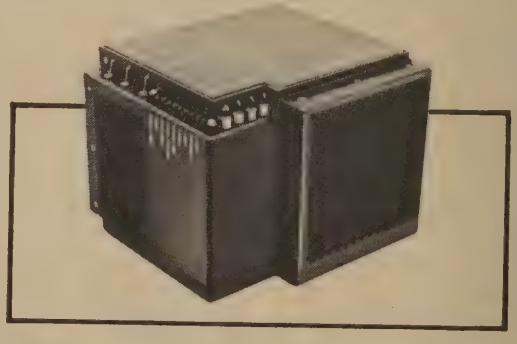
* Voltage regulation, at fixed load due to input dc line variation read by conventional ac voltmeter which responds to average voltage but calibrated in rms volts.

Wanlass Power Supplies...



CUSTOM OEM ASSEMBLIES

Power supplies, voltage regulators, inverters, converters, frequency converters and filters custom designed to meet your exact need. Conventional solid-state designs or Wanlass proprietary PARAX®, CLIP-AC™ and VARAX™ techniques in any configuration.



LAB INSTRUMENTS

Complete instruments in rack-panel or bench configurations for multi-purpose power supply requirements, AC power conditioning, dynamic line filtering, and voltage regulation, including PARAX® and VARAX™ technology for transient-free lab power!

STANDARD OEM ASSEMBLIES

The same technologies applied to standard OEM units available for immediate delivery from stock of more than 100 distributors across the nation. The "special" you have in mind could be a standard "off-the-shelf" unit stocked locally.

MILITARY ASSEMBLIES

High reliability power supplies designed and produced at state-of-the-art levels of technology. You'll get production with quality control conforming to MIL-Q-9858A, performed in highly automated "clean room" facilities.

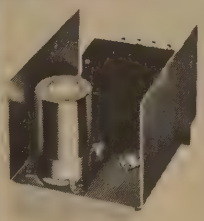
Wanlass Standard OEM D.C. Power Supplies

DPS SERIES
Super Economy All Purpose D.C. Power Supplies
...to 3 Amps



10 & 20W Regulated Power Supplies

No frills, just sound "functionalized" design that offers ±1% regulation, overload and short-circuit protection, and a high-power to small-package ratio. The DPS-1 has 50% fewer parts, provides 1-Watt/cubic inch, weighs just 1.6 oz./Watt and costs only 65¢/Watt — less than you could build it yourself!

Wanlass Model	D.C. Output	Prices 1-9	10-24	25-49	50-99
DPS-1	5 & 6V @ 3.0A	$24.95	$23.70	$22.45	$21.20
DPS-5	5 & 6V @ 1.5A	19.95	18.95	17.95	16.95
DPS-2	12 & 15V @ 1.5A	24.95	23.70	22.45	21.20
DPS-6	12 & 15V @ 0.75A	19.95	18.95	17.95	16.95
DPS-3	24V @ 1.0A	24.95	23.70	22.45	21.20
DPS-7	24V @ 0.4A	19.95	18.95	17.95	16.95
*DPS-4	180-220V @ 100mA	36.00	34.20	32.40	30.60

*DPS-4 only: Reg. = ±2.0%; Line Ripple = ±2.0%

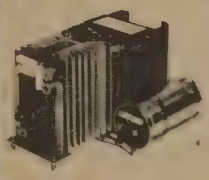
PHASE II SERIES
OEM D.C. Power Supplies
...to 10 Amps

30-60-120W Power Supplies

Offering a choice of three power ratings — 30-60-120W — with 4 voltage ranges in each (3.6-9V/9-17V/17-30V/30-60V), these floating-output supplies provide design flexibility and peak performance at low prices! Line/load regulation is just ±1%, they have automatic short-circuit protection.

Wanlass Model	D.C. Output	Prices
30-OEM-1	3.6-9V @ 2.5A	1—9 $46.00
30-OEM-2	9-17V @ 30W	10—24 $43.75
30-OEM-3	17-30V @ 30W	25—49 $41.50
30-OEM-4	30-60V @ 30W	50—99 $39.00
60-OEM-1	3.6-9V @ 5A	1—9 $57.50
60-OEM-2	9-17V @ 60W	10—24 $54.50
60-OEM-3	17-30V @ 60W	25—49 $51.75
60-OEM-4	30-60V @ 60W	50—99 $49.00
120-OEM-1	3.6-9V @ 10A	1—9 $86.25
120-OEM-2	9-17V @ 120W	10—24 $82.00
120-OEM-3	17-30V @ 120W	25—49 $77.75
120-OEM-4	30-60V @ 120W	50—99 $73.50

MARK III SERIES
Precision OEM Slot Supplies
...to 10 Amps



60-120W Power Supplies

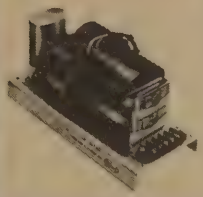
Ideal for IC, OP-AMP and MOS/FETS or other voltage sensitive loads. Features dual 115/230V A.C. input, regulation to ±0.1%, ripple of 1 mV or less RMS at full load, and adjustable voltage. Built-in adjustable overvoltage crowbar provides overvoltage protection. Overload protection is automatic and adjustable.

Wanlass Model	D.C. Output	Prices 1-9	10-24	25-49	50-99
III OEM 5-5	5V @ 5A				
III OEM 6-5	6V @ 5A				
III OEM 12-5	12V @ 5A				
III OEM 15-4	15V @ 4A	$89.50	$85.00	$80.50	$76.00
III OEM 18-3	18V @ 3A				
III OEM 24-2.5	24V @ 2.5A				
III OEM 28-2	28V @ 2A				
III OEM 5-10	5V @ 10A				
III OEM 12-10	12V @ 10A	137.50	130.60	123.75	116.85
III OEM 24-5	24V @ 5A				

"BRUTE" SERIES
High Power OEM D.C. Slot Supplies
...to 50 Amps

300-600-1200W Power Supplies

Choose any one of the three BRUTE power ranges — 300-600-1200W — and you'll get a single unit that provides two continuously adjustable voltage ranges (2-25V or 5-50V), SCR closed-loop control assures ±0.1% line/load regulation. Adjustable current limiting protects against overload and "shorts". All this at lower than "slot supply" prices!



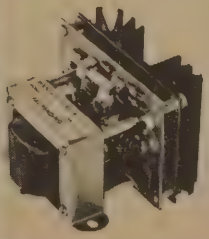
Wanlass Model	D.C. Output	Prices 1-9	10-24	25-49	50-99
BRUTE I	5-50/2-25V* @ 6/12A	$148.00	$141.00	$133.00	$126.00
BRUTE II	5-50/2-25V* @ 12/24A	195.00	185.00	176.00	166.00
BRUTE III	5-50/2-25V* @ 24/50A	315.00	299.00	284.00	268.00

*Can be connected either for 5 to 50V or 2 to 25V depending upon output current desired

Optional Kits: K1 — 10-Turn Potentiometer Kit (for fine voltage adj.) — $20.00/ea.
K2-1/K2-2 — Ripple Reduction Kit (cuts ripple by 50%) — $25.00/ea.
K2-3 — Ripple Reduction Kit for BRUTE III (cuts ripple by 50%) — $52.00/ea.
K3 — OVP for all BRUTE types (may also be used with any DC power supply within a 6-60V/0-500A range) — $52.00/ea.

Wanlass Standard OEM Power Conditioners

PARAFORMER™ PEC SERIES
...over 50dB Noise Attenuation

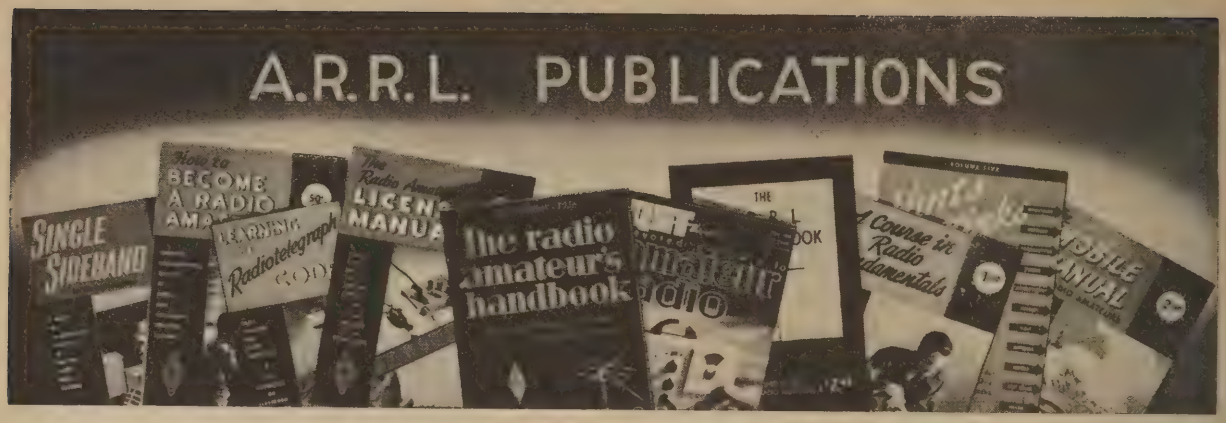


Invented by Wanlass, the novel PARAFORMER™ provides a number of important design advantages ... over 50dB noise filtering at low-frequencies (below 1.0MHz); line voltage regulation; unilateral operation, phase-locked output voltage; and, inherent overload and short-circuit protection. Its simple, no-moving-parts structure assures trouble-free, highly reliable operation under the most stringent conditions.

A.C. Input: 105-125V, Single Phase
A.C. Output: 117V, Single Phase

Model No.	Capacity	Regulation Line / Load	Prices 1-9	10-24	25-49	50-99
PEC-60	60VA @ 60Hz	±0.25% / ±1.5%	$95.00	$90.25	$85.50	$80.75
PEC-150	150VA @ 60Hz	±0.5% / ±2.0%	150.00	142.50	135.00	127.50
PEC-500	500VA @ 60Hz	±0.5% / ±2.0%	225.00	213.75	202.50	191.25
PEC-1000	1KVA @ 60Hz	±0.5% / ±2.0%	425.00	401.75	382.50	361.30
PEC-4-75	75VA @ 400Hz	±1.0% / ±2.5%	105.00	99.75	94.50	89.25

CLIP-AC™ C3000 SERIES
AC Regulators
...30VA to 1000VA



Wanlass CLIP-AC™ regulators are the ideal successors to ferroresonant transformers for the majority of AC regulation requirements to 1KVA! Frequency insensitive, they offer a host of advantages such as: wide input voltage and frequency ranges, adj. output voltage, line transient suppression, line regulation to 0.1%, instant response, "clipped" sinusoidal output, excellent TC and efficiency. All this, plus their low-cost, small-size and light-weight make them a "best buy" in AC regulators!

A.C. Input: 100-130V, 47-420Hz, Single Phase
A.C. Output: 117V Nominal
Regulation (RMS): ±0.5% (for ±10% A.C. Line Change)
±0.5% (for 10% to full Load Change)
Power Factor Regulation: ±0.5%
Frequency Regulation: ±0.5%

Model No.	Ratings	Prices 1-9	10-24	25-49	50-99
C-3003	30VA	$39.00	$37.00	$35.00	$33.00
C-3006	60VA	46.00	43.75	41.50	39.00
C-3012	120VA	51.00	48.50	46.00	43.50

C-3050	500VA	125.00	118.75	112.50	106.00
C-3100	1000VA	210.00	199.50	184.00	178.50

WANLASS
DIVISION OF AMBAC

QST. Ranks high among the leading technical publications of the world. The oldest continuously published radio magazine (it was founded in 1915), its technical articles are aimed at all classes of radio enthusiasts. Construction articles are clearly illustrated with pictures and diagrams. Typography and clarity are tops. General interest articles and special columns abound. Complete advertising coverage. Truly, the "complete magazine on amateur radio."——QST and ARRL membership, **$6.50** in USA and Canada (US Funds), **$7.00** Elsewhere.

The RADIO AMATEUR'S HANDBOOK. Internationally recognized as one of the most valuable and widely used books in electronics, the Radio Amateur's Handbook is universally consulted by both amateur and professional alike. Its more than 700 pages are annually revised and modified in the light of current application and technique. The Handbook is found on the desks of executives, engineers, technicians and purchasing agents of the radio industry as often as in the shacks of radio amateurs throughout the world. Twenty-five chapters plus a catalog section including data on all types of vacuum tubes and semiconductors. **$4.50**

HOW TO BECOME A RADIO AMATEUR. Pointing the way for the beginner, tells how to get started in this fascinating hobby. Special emphasis given to the needs of the Novice licensee with several complete simple stations featured **$1.00**

The RADIO AMATEUR'S LICENSE MANUAL. Study guide and reference book, the License Manual points the way toward the coveted amateur license. Complete with typical questions and answers to all of the FCC amateur examinations — it provides an ideal means of self-study and examination. Continually kept up to date. Complete FCC regulations included..... **$1.00**

The ARRL ANTENNA BOOK. A complete book on antennas. Its fifteen chapters are divided into two principal divisions: (1) a basic text on antennas and transmission lines, wave propagation and its relationship to antenna design, and the performance characteristics of directive antenna systems, and (2) specific designs for a multitude of antennas for various amateur bands. **$2.50**

The MOBILE MANUAL FOR RADIO AMATEURS. It is a collection of articles on tried and tested equipment that have appeared in QST. Contents include a section on receivers, transmitters, antennas and power supplies. A "must" for anyone interested in the installation, maintenance and operation of mobile stations... **$2.50**

The RADIO AMATEUR'S OPERATING MANUAL. A ready reference source and guide to good operating practices. Written for the amateur who prides himself on good operating procedures... **$1.50**

A COURSE IN RADIO FUNDAMENTALS. A complete course of study for use with the Radio Amateur's Handbook, it applies the time-tested principle of "learning by doing." Study assignments, experiments and examination questions make this book equally applicable to individual home study or classroom use..... **$1.00**

HINTS AND KINKS. If you build equipment and operate an amateur radio station you will find Hints and Kinks a mighty valuable book in your shack and workshop. More than 300 practical ideas give you a helping hand at all times..... **$1.00**

UNDERSTANDING AMATEUR RADIO. Written for the beginner. Explains in simple language the elementary principles of electronic and radio circuits, tells how transmitters, receivers and antennas work. Includes complete how-to-build-it information on low cost gear — receivers, phone and code transmitters up to 150 watts, v.h.f., measurements, and easy-to-build antenna systems. A "must" guide for every newcomer in setting up and operating his amateur station..... **$2.50**

THE RADIO AMATEUR'S V.H.F. MANUAL. A thorough treatment of v.h.f. Contains the first authentic history of v.h.f. ever written. Covers receiving and transmitting principles, techniques and construction; antenna and feed system design, construction and adjustment; u.h.f. and microwaves; test equipment, construction and use; interference, causes and cures; v.h.f. hints and kinks. Emphasis throughout is on tried and tested equipment and practice. A book about things that work and the ideas behind them. **$2.50**

SINGLE SIDEBAND FOR THE RADIO AMATEUR. This third edition of a popular ARRL publication is a digest of the best SSB articles that have appeared in QST. The newcomer to Single Sideband as well as the experienced SSB user will find it indispensable. Includes discussions of theory and practical how-to-build-it descriptions of equipment. Covers reception and transmission. **$3.00**

LEARNING THE RADIOTELEGRAPH CODE. Supplying the key toward mastery of the International Morse Code, this publication trains you to handle the code skillfully and easily. Based on the accepted method of "sound conception," it is a boon to the beginner without access to the help of an experienced operator or code machine. Practical material for both home study and classroom use is included **50c**

ARRL WORLD MAP. Printed in eight colors on heavy map paper with countries clearly outlined. Call letter prefixes printed on the countries and in the margin. Continental boundaries and time zones plainly marked. Thirteen countries have call districts indicated. An equi-distant azimuthal projection centered on Wichita, Kansas. Prepared by ARRL and Rand-McNally. **$2.00**

QST BINDERS. No need to let your copies of QST rest in a disordered pile. . . . A QST Binder will keep them neat and orderly. Sturdy binders hold a one year file, protecting and preserving your copies. QSTs in the Binder open and lie flat at any page permitting quick and easy reference. **$4.00**

L/C/F CALCULATOR: Quick as a flash the answer is yours when you use this handy slide-rule design calculator. It will solve problems of inductance, capacitance, and frequency as well as computing single-layer coil dimensions and inductance. An invaluable tool for the amateur, technician or engineer. **$2.00**

LOG BOOK. Record keeping made easy. Fully ruled 8½ by 11 inch pages with legible headings permitting all necessary entries. Spiral bound to lie flat when open. **75c**

MINILOG. Mobile and portable operational needs are met by this pocket size log. Spiral bound, 4 by 6 inch pages. Headings for all necessary information. **50c**

RADIOGRAMS. First impressions are important. Official ARRL Radiogram Forms add prestige; informs the addressee about amateur radio. ..... Per pad of 70 blanks, **35c**

RCA

TECHNICAL LITERATURE
THE MOST AUTHORITATIVE IN THE INDUSTRY

TECHNICAL MANUALS

Inexpensive and current reference sources, these easy-to-understand and well illustrated manuals cover theory, application and circuits, as well as performance data, for RCA electronic components and devices.

■ **RCA SOLID-STATE HOBBY CIRCUITS MANUAL — HM-91** — 368 pages. A remarkable book for electronic hobbyists, experts, teachers, and students. Features 62 different solid-state circuits. Contains theory, circuit operation, construction practices, and trouble shooting. $1.95*

■ **RCA TRANSISTOR, THYRISTOR AND DIODE MANUAL — SC-15** — This 768 page manual contains text, data, and circuit information on bipolar and MOS transistors, thyristors, silicon rectifiers, and other types of semiconductor diodes. $2.50*

■ **RCA LINEAR INTEGRATED CIRCUITS — IC-42** — 416 pages covering the basic principles involved in the design and application of linear integrated circuits. Includes description of silicon monolithic fabrication process, derivation of design equations, performance criteria, schematic diagrams and performance data. $2.50*

■ **RCA SILICON CONTROLLED-RECTIFIER EXPERIMENTER'S MANUAL — KM-71** — 136 pages. Contains schematic drawings and practical working control circuits which can be made with one or more basic RCA experimenter's kit (KD2105) and two add-on sensor kits (KD2106, KD2110). 95 cents*

■ **RCA TRANSMITTING TUBES — TT-5.** More than 180 power tubes described in 320 pages . . . circuits for transmitting and industrial applications . . . applications guide. $1.00*

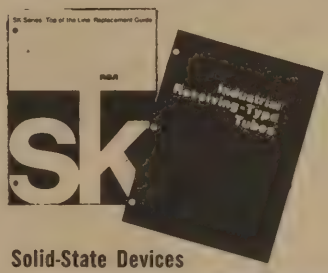
■ **RCA RECEIVING TUBE MANUAL — RC-28** — 784 pages containing data for 1650 tube types including black-and-white and color picture tubes and 200 Industrial Receiving types. New section cross-references tube types by base terminal diagrams. 64 page chart lists data on RCA discontinued and renewal types. $2.50*

■ **RCA HIGH-SPEED, HIGH-VOLTAGE, HIGH-CURRENT POWER TRANSISTORS — PM-81** — 96 pages of theory and application of RCA medium-frequency power transistors. Typical circuits illustrate amplification, switching, and control applications. Selection charts are included. $2.00*

■ **COS/MOS INTEGRATED CIRCUITS MANUAL — CMS-270** — 160 pages covering basic design and application of COS/MOS IC's. Gives design criteria, procedures, examples, and typical practical circuits for many applications. $2.50*

■ **RCA ELECTRO-OPTICS HANDBOOK — EOH-10** — 150 pages of data from all technical areas of Electro-Optics with a coherent system of symbols and definitions. More than 100 tables, charts and graphs. $2.50*

■ **RCA PHOTOMULTIPLIER MANUAL — PT-61** — 192 pages. The construction, operation and application of photomultipliers are detailed in this manual. Contains a selection guide for over 100 RCA photomultiplier tubes, including outlines, basing diagrams and circuit information. $2.50*



RCA ELECTRON TUBE HANDBOOK HB-3

Five 7⅜" x 5⅝" black 4-ring binders containing approximately 6000 pages of electron-tube data for 1600 tube types. Includes applications, characteristics, maximum ratings, typical operating values, mechanical dimensions, and characteristics curves for RCA receiving tubes, transmitting tubes, cathode-ray tubes, picture tubes, photocells, phototubes, camera tubes, ignitrons, rectifiers, traveling-wave tubes, pencil tubes, and other types for special applications. $20.00 ($25.00 foreign) includes service mailings for one year.

RCA SOLID-STATE DATABOOK SERIES

See your local RCA Solid-State Distributor for details.

RCA CATALOGS AND APPLICATION BOOKLETS

These fact-filled publications are a valuable guide to the practical use of electron tubes, solid-state devices, integrated circuits, microphones, and audio recording tapes, and batteries. Convenient 10⅞" x 8⅜" size handy for 3-ring binders.

Solid-State Devices

■ **RCA SOLID-STATE PRODUCTS GUIDE — SPG-201G.** 25 cents*

■ **MOS/FET PRODUCT GUIDE — MOS-160C.** 25 cents*

■ **MOUNTING HARDWARE FOR RCA SEMICONDUCTOR DEVICES — MHI-300B.** 15 cents*

■ **MICROWAVE SOLID-STATE DEVICES AND SUBSYSTEMS — MWD-104E.** Single copy free.

■ **RF POWER TRANSISTORS — RFT-700H.** 40 cents

■ **SILICON SIGNAL TRANSISTOR QUICK CROSS-REFERENCE DIRECTORY — PHP-150A.** 15 cents*

■ **SILICON VHF TRANSISTORS APPLICATION GUIDE — 1CE-228.** 50 cents*

■ **RCA THYRISTORS/RECTIFIERS — THC-500A.** 35 cents

■ **TOP-OF-THE-LINE SOLID-STATE REPLACEMENT GUIDE — SPG-202L.** 35 cents*

■ **TRANSISTORIZED VOLTAGE REGULATOR APPLICATION GUIDE — 1CE-254.** 25 cents*

■ **SOLID-STATE POWER CURCUIT MODULES — High Power Arrays — HPA-100A.** 65 cents*

■ **RCA POWER TRANSISTOR DIRECTORY — PTD-187B.** 40 cents*

■ **INTRODUCTION TO JUNCTION TRANSISTORS — 4T86-C.** 50 cents*

■ **RCA GALLIUM-ARSENIDE LASERS AND EMITTERS — OPT-100.** 25 cents*

Integrated Circuits

■ **INTEGRATED CIRCUITS MOUNTING AND CONNECTION TECHNIQUES — 1CE-338.** Single copy free.

■ **PRODUCT GUIDE, LINEAR-DIGITAL — CDL-820D.** 45 cents*

■ **COS/MOS INTEGRATED CIRCUITS PRODUCT GUIDE — COS-278A.** 20 cents*

Electron Tubes

■ **GUIDE TO RCA INDUSTRIAL TUBE PRODUCTS — TPG-200E.** 35 cents*

■ **INDUSTRIAL RECEIVING-TYPE TUBES — RIT-104G.** 20 cents*

■ **VIDICONS — CAM-700B.** 60 cents*

■ **IMAGE ORTHICON INTERCHANGEABILITY GUIDE — CAM-702.** Single copy free.

■ **IMAGE ORTHICONS — CAM-800.** 40 cents*

■ **STORAGE TUBES AND CATHODE RAY TUBES — STC-900B.** 20 cents*

■ **PHOTOMULTIPLIER TUBES — PIT-700B.** $1.25*

■ **PHOTO-CATHODE SPECTRAL RESPONSE CHART — PIT-701B.** 75 cents*

■ **IMAGE-INTENSIFIER AND IMAGE-CONVERTER TUBES — PIT-702C.** $1.00*

■ **TRAVELING - WAVE TUBE CLASSIFICATION CHARTS — MWD-101D.** Single copy free.

■ **PENCIL TUBE CLASSIFICATION CHARTS — MWD-102B.** Single copy free.

■ **POWER TUBES FOR NEW EQUIPMENT DESIGN — PWR-505B.** 75 cents*

■ **PRODUCT GUIDE FOR POWER DEVICES — PWR-506C.** 30 cents*

■ **SELECTION GUIDE — RCA SUPER POWER TUBES — PWR-522.** Single copy free.

■ **SOCKETS FOR RCA POWER TUBES — PWR-532A.** 35 cents*

■ **RCA RF CAVITIES AND CIRCUITS — PWR-535.** Single copy free.

■ **RCA BROADCAST POWER TUBES AND CAVITIES — PWR-553.** Single copy free.

■ **HELIUM NEON SELECTION GUIDE — PWR-554.** Single copy free.

■ **RECEIVING TUBE AND PICTURE TUBE DIRECT REPLACEMENT GUIDE — ERT-198B.** 25 cents*

■ **RECEIVING TUBES AND PICTURE TUBES — ERT-1275Q.** 40 cents*

■ **PICTURE TUBE PRODUCT GUIDE — COLOR AND BLACK & WHITE — PIX-300D.** 55 cents*

Batteries, Microphones and Audio Recording Tape

■ **BATTERIES — BAT-134H.** 35 cents*

■ **BATTERY MANUAL — BDG-111B.** 60 cents*

■ **RECHARGEABLE ALKALINE BATTERIES — BAT-135A.** 20 cents*

■ **AUDIO RECORDING TAPE — IT1182A.** Single copy free.

■ **STARMAKER MICROPHONES — IS1056 and IS1072.** Single copy free.

*Suggested Price

REFERENCE and TV SERVICE PUBLICATIONS

■ **RADIOTRON DESIGNER'S HANDBOOK — RDH-905.** $7.00*

■ **SOLID-STATE POWER CIRCUITS DESIGNER'S HANDBOOK — SP-52.** $7.50*

■ **TRANSISTOR SERVICING GUIDE — TSG-1673.** $3.50*

■ **COLOR TV SERVICE HANDBOOKS — 1A1553** — 1960 - 1966. $1.50*
1A1759 — 1967 - 1968. $2.00*
1A1848 — 1969 - 1970. $2.25*

■ **FIELD SERVICE GUIDES — RCA COLOR TV RECEIVERS** — 1955-1970. **ERT-200** — 1955 - 1966 $2.00.* **ERT-201** — 1967 - 1968. $1.60.* **ERT-202** — 1969 - 1970. $1.90*

■ **COLOR TV TROUBLE SHOOTING PICT-O-GUIDE — 1A1389.** $5.75*

■ **"BY-STAGE" GUIDE TO COLOR-TV RECEIVERS — ERT-205B.** 50 cents*

■ **TV SERVICING — TVS-1032.** 50 cents*

THERMOSTATIC **AMPERITE** DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT

AMPERITE THERMOSTATIC DELAY RELAYS

STANDARD

Amperite Thermostatic Delay Relays are manufactured on automatic high production equipment — resulting in a low price — and top quality. Quality is not sacrificed at any point. For example, although contacts are rated at 3 amps, 10 amp contacts are actually used. Similarly with all other parts—only the best available are used.

Amperite Thermostatic Delay Relays are actuated by a heater . . . and therefore can be used on A.C., D.C., or pulsating current. Being hermetically sealed, Amperite Relays are not affected by altitude, moisture, or other atmospheric conditions. REPLACED AS EASILY AS A RADIO TUBE.

CIRCUITS SPST: Available only — normally open or normally closed.

HEATER VOLTAGES AVAILABLE: 2.5, 5.0, 6.3, 12.6, 26, 50, 115V.
For 220V use a 6000 ohm-5 watt resistor in series, with 115V heater.

HEATER WATTAGE: Standard and Miniature Relays—all voltages—2.3w prox. All heaters may be operated continuously. Heaters will not be damaged by a 50% voltage overload for duration of 1 hour or less.

Amperite Delay Relays are recognized under component program of Underwriters' Laboratories, Inc. for all voltages up to and including 115V.

MINIATURE

VARIATION OF DELAY WITH HEATER VOLTAGE

FIG. 1—Effect of change in heater voltage on delay in seconds. Only low voltage heaters (2.5 to 26 V.) incorporate heater voltage regulations as shown in diagram.

For 22 to 30 V. supply: We recommend Amperite Delay Relays with 26 V. heaters for airplanes and similar power supplies. These heaters are regulated for battery variation of 22 to 30 V. as shown in this diagram.

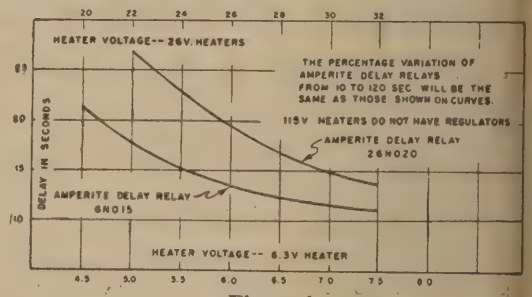

Figure 1

CONTACT RATING

	Delay	Contact Rating Non-Inductive	DC Voltage Breakdown Contact-to-Contact	Heater-to-Contact
STANDARD	2 to 10 Sec.	115V - 3a AC	250V	500V
RELAYS	15 to 180 Sec.	115V - 3a AC	800V	800V
		220V - 1a AC	800V	800V
MINIATURE	2 to 10 Sec.	115V - 2a AC	250V	500V
RELAYS	15 to 120 Sec.	115V - 2a AC	800V	800V
		220V - 1a AC	800V	800V
FLASHERS		- ½a AC		

AMBIENT TEMPERATURES: Relays are compensated for temperatures of −55° to +80°C. (Relays can be operated from −80°C to +125°C without damage). Low voltage heaters 26V or less have better ambient compensation than relays with 115V heaters. If the relays are actually to be used over ambients of −55°C to +80°C it is advisable to have each relay tested at the factory over the ambient. A nominal charge is made for this service.

CONTACT DROP: — 0.1V — Prox. at 1A.

DELAYS AVAILABLE:—From 2 to 180 seconds. Relays can be used in series to obtain longer delays. The delay of any individual relay up to 120 seconds can be increased up to 25% by using a resistor in series with the heater. Delays above 120 seconds cannot be increased. Relays with short delays such as 2 to 5 seconds can be increased 50%.

LIFE of any individual relay will depend on the service the contacts are subjected to. With a 115V — 2A A.C. non inductive load the contacts will withstand at least 250,000 operations. SHELF LIFE of Amperite Delay Relays is over 10 years.

CONTACT FLUTTER:—If encountered, this can be eliminated by flashing approximately 1 amp. through the contacts a dozen times. Contacts of Amperite Delay Relays clean up and get better with use because of the oxygen free atmosphere. **Relay Contacts should not be used on voltages above 220V.**

FOR INSTANTANEOUS RECYCLE AND ELIMINATION OF CHATTER

For instantaneous recycle and elimination of chatter. Cannot be used with Sensitive Relays.

Magnetic Relay requires extra N.O. contact as shown at "E".

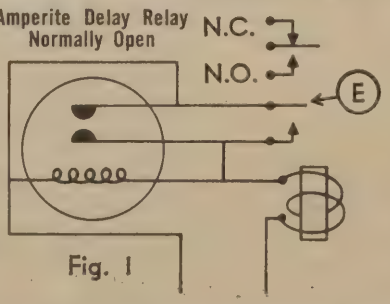

Fig. 1

For instantaneous recycle and elimination of chatter when Sensitive Relay is used.

Magnetic Relay requires an extra SPDT contact as shown at "F".

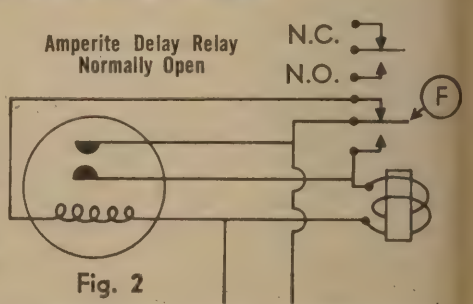

Fig. 2

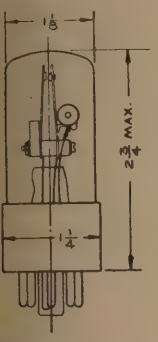
INSTANTANEOUS RECYCLE: This can be obtained by using a normally open Amperite Delay Relay in conjunction with a Magnetic Relay as shown above. If normally closed is required — use a **normally open** Amperite Delay Relay — and use the contacts on the magnetic relay. Choose the Amperite Delay Relay for the voltage required and the delay required (e.g. — 115N030 — would be used on 115 volt supply — for a 30 second delay).

LONG CYCLE RELAYS: are also available. For example, Amperite Delay Relay 115N07T has a delay in closing of 3 to 7 seconds. After heater is disconnected, contacts will remain closed for 30 seconds minimum. Write us about your requirements.

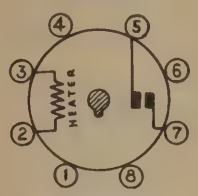
© United Technical Publications



THERMOSTATIC AMPERITE DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT

BREAKING D.C. CURRENT: When Relay contacts open D.C. above 50 volts, a condenser of approximately 0.5 uf with a resistor in series with it must be connected across the contacts. Arc suppressors can also be used.



INDUCTIVE A.C. LOADS: When breaking an inductive A.C. load, use a condenser of .01 to .1 mfd. across contacts. In some cases, putting a 20,000 ohm, 5w resistor across the contacts reduces the arcing considerably.

Relay contacts should not be used on voltages over 220V.

Flashers operate approximately ⅓ on, ⅔ off. The percentage time on can be increased by reducing voltage of heater.

115V Flashers available ONLY in quantities of 12 or less. Cannot be supplied in production quantities.

Normally closed flashers are standard, and are indicated by the letter "F." The number following letter "F" denotes flashes per minute. *For example a 6F30 flasher,* has 6.3V heater, normally closed 30 FPM with a ± 15 flashes per minute tolerance. A 6F30T, would be the same type but in 9-pin miniature. Flashers are available from *30 to 90 Flashes per minute* with tolerances as shown in the chart below:

FLASHERS have contact rating of ½a 115V AC, non-inductive.

Tol. FPM — 20°C	Standard Flashers Available			
30 ± 15	6F30	12F30	26F30	115F30
45 ± 15	6F45	12F45	26F45	115F45
60 ± 20	6F60	12F60	26F60	115F60
75 ± 20	6F75	12F75	26F75	
90 ± 25	6F90	12F90	26F90

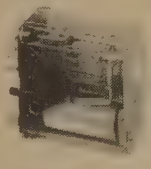
You can depend on your local distributor of electronic parts and equipment for...

- ★ Instant off-the-shelf delivery
- ★ In-depth inventories
- ★ Wide varieties
- ★ Prompt service
- ★ Technical assistance
- ★ Availability of latest products
- ★ Speedy purchasing—
  one order does the job

Call your local distributor for all your requirements

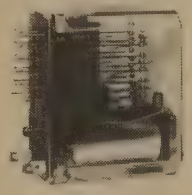
American Zettler, inc.

STANDARD AZ 420 AND 430 SERIES RELAYS



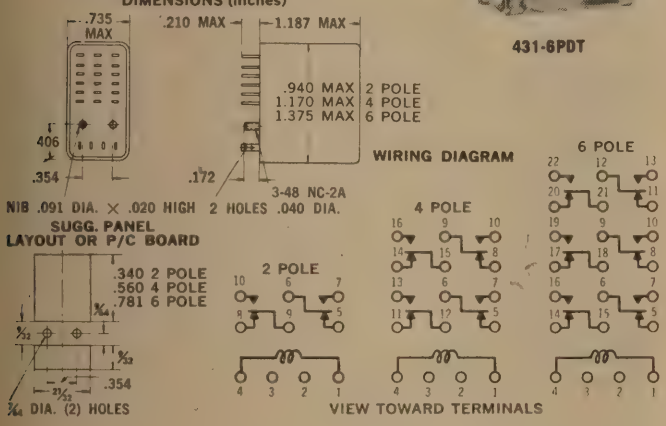
General purpose miniature relays in plastic dust cover — Interchangeable with other cradle type relays — Combination solder and plug-in terminals. UL-version listed under UL Component Recognition File E43203.

SERIES AZ 420 — MINIATURE GENERAL PURPOSE RELAYS — UP TO 6 FORM C



• International Standard type • Combination plug in/wire or PC terminals • Low level bifurcated, 2 amp or 5 amp contacts • Life expectancy more than 100 million operations • Form A, B, C and D contacts are available • Molded cradle eliminates phenolic dust inside the relay • Balanced, spring-held armature allows dependable operation in any position • Round core and larger coil volume provides more pull force, eliminating expensive, sensitive version • Slim profile mounting with right-angle socket • Sockets are of unbreakable fiberglass-filled base and have unique knife-type connectors for dependable contact • Available from stock.

420-DPDT



421-4PDT

431-6PDT

DIMENSIONS (inches)

ELECTRICAL SPECIFICATIONS

CONTACT RATING — noninductive load
Light Duty (Code L): Fine silver goldplated — low level to 2 amps @ 26 VDC or 1 amp @ 115 VAC
Heavy Duty (Code H): Silver cadmium oxide — 5 amp @ 26 VDC or 3 amp @ 115 VAC (other contact material available)
LIFE EXPECTANCY — Mechanical Operations: 10^8 — Operations at Rated Load: 10^5
CONTACT RESISTANCE — 50 milliohms max. initially — 200 milliohms at end of life
OPERATE TIME — at two times "must operate" voltage or current: ≤ 8ms
RELEASE TIME — at two times "must operate" voltage or current: ≤ 3ms
CONTACT BOUNCE — at 10 ma contact current: 2 ms max. at operate, N.O. contacts
3 ms max. at release, N.C. contacts
DIELECTRIC STRENGTH — 1000 V rms; 500 V rms across contact gap
INSULATION RESISTANCE — 1000 megohms minimum @ 25°C, 100 VDC, 50% RH
COIL TEMPERATURE — Max. 105°C (220°F)
AMBIENT TEMPERATURE — Operating: −55°C (−72°F) to 80°C (175°F) @ nominal operating voltage
Storage: −55°C (−72°F) to 105°C (220°F)
VIBRATION — Operating: .062 DA @ 5-55 Hz; 10g @ 55-110 Hz
Non Operating: 10g @ 5-500 Hz
SHOCK — Operating: 20g @ 11 ms — Non Operating: 30g @ 11 ms
WEIGHT — 23 to 35 grams (approx. 1 oz.)

AZ 480 & AZ 481

AZ 482 & AZ 483

ELECTRICAL SPECIFICATIONS

CONTACT RATING — 10 amp @ 115 volts AC 60 Hz non inductive
CONTACT MATERIAL — Silver-cadmium-oxide
CONTACT ARRANGEMENT — 1, 2, 3 and 4 form C (up to 4PDT)
LIFE EXPECTANCY — Mechanical: 10 million operations
Rated Load: ¼ million operations
DIELECTRIC STRENGTH — 1500 v rms
500 v rms across contact gap
INSULATION RESISTANCE — 100 megohms minimum
COIL VOLTAGE — to 280 volts AC
COIL POWER — Nominal — DC: 1.2 watts — AC: 2.5 VA
Max. Continuous Dissipation: 2.5 watts @ 35°C (95°F) ambient
AMBIENT TEMPERATURE — Open relay −45°C (−50°F) to +70°C (158°F) [at nominal operate voltage]
Enclosed relay −45°C (−50°F) to +50°C (125°F) [at nominal operate voltage]
OPERATE TIME — Less than 15ms at nominal operate voltage (DC coils only)
RELEASE TIME — Less than 8ms at nominal operate voltage (DC coils only)
WEIGHT — Open relay: 2.3 oz (65 gr) — Enclosed relay: 3 oz (85 gr)
TERMINALS — Open relay: pierced solder lugs
Enclosed relay: octal plug-in
MOUNTING — See mechanical specifications
ENCLOSURE: Heat and shock resistant clear plastic

MINIATURE AC, DC RELAYS SERIES AZ 560

AZ-560

AZ-561

FEATURES

- AC or DC coils
- Less than 1 watt operating power
- 4PDT 5 amp contacts, gold plated
- Longer life expectancy due to unique contact blade design
- 1 Million operations at 3 amp 26VDC
- Polycarbonate dust cover
- Made in Western Europe

GENERAL DESCRIPTION

The miniature relay series AZ 560 with AC or DC coils and 4PDT contacts, available with either plug-in or PC terminals, is ideally suited for use in alarm systems, communications, and data processing equipment. Due to the low price, less than 50 cents per transfer contact, (considerably less expensive than solid state techniques) these units are finding broad acceptance in consumer type products. The rugged construction assures longer life than other similar relays. The unique design of the support for the contact blade provides better wiping action and less bounce. Strict quality control, in compliance with stringent Western European practices, guarantees uniform characteristics in high production quantities.

ELECTRICAL SPECIFICATIONS

Contact Rating — Resistive Load 5 amp at 26VDC or 115VAC*

Contact Material — Silver gold plated. Other contact material available.

Contact Arrangement — 4 form C (4PDT)

Life Expectancy — Mechanical operations: 10^8

Electrical operations: at rated load: 5×10^4
at 3 Amp 26VDC or 115VAC: 10^6

Contact Resistance — 50 Milliohms typical

Time Values — at nominal voltage @ 20°C
13 ms max operate
10 ms max release

Dielectric Strength — 1500 Vrms; 500 Vrms across contact gap

* For low level switching AZ 420 series with bifurcated contacts recommended

Insulation Resistance — 1500 megohms, min. @ 20°C, 100VDC, 50% RH

Coil Power at 20°C — AC: 1.20 Va nom.
DC: .90 Watts nom.

Coil Temperature — Max. 105°C

Ambient Temperature — Operating: −45°C to +70°C at nom. voltage
Storage: −45°C to +100°C

Temperature Rise — 35°C at nom. voltage

Vibration — .062 DA @ 10-55Hz

Weight — Appr. 42 gr (1.5 oz)

Terminals — Solder lug/plug-in or PC on relay
Solder lug or PC on socket

Enclosure — Glear, high impact polycarbonate cover

THINPAK™ MINIATURE RELAYS SERIES AZ 530

FEATURES

- 0.415″ high for 0.6″ standard pc board spacing
- Up to 5 Amp SPDT contacts
- 0.1″ Grid Terminal spacing
- Insulation resistance greater than 10^{10} ohms
- Contact resistance less than 50×10^{-3}
- No phenolic insulation used
- 2500 Vrms contact to coil

GENERAL DESCRIPTION

The AZ miniature THINPAK relay, Series 530, has been designed for applications with either demanding space limitations, such as 0.6″ center-to-center PC card mounting, or operating requirements that cannot be met by reed relays or conventional contact type relays. The high pressure SPDT 1, 2 or 5 amp contacts operating at 26 VDC enables the unit to switch capacitance or lamp loads with current spikes that would normally weld the contacts of reed relays. The high sensitivity of 125 mW pull-in, long life and insulatio resistance of more than 10^{10} ohms makes it an ideal uni for galvanic separation between electronic circuits. Th AZ-530 THINPAK is available in standard coil voltages fror 6 to 115 VDC with an operate and release time of less tha 2 ms. It has PC terminals in 0.10″ grid spacing. A blac plastic dust cover with a mylar bottom plate is provided

ELECTRICAL SPECIFICATIONS

Contact Rating — noninductive load
- Light Duty: Fine silver goldplated, 1 Amp @ 26 VDC or 0.5 Amp @ 115 VAC
- Medium Duty: Silver Cadmium-Oxide, 2 Amp @ 26 VDC or 1 Amp @ 115 VAC
- Heavy Duty: Silver Cadmium-Oxide, 5 Amp @ 26 VDC or 3 Amp @ 115 VAC or 2 Amp @ 220 VAC

Life Expectancy — Mechanical Operations: 10^7; Operations at Rated Load: 10^5
Contact Resistance — 50 milliohms max. initially
Operate Time — <5 ms at 2 times must operate voltage or current
Release Time — <2 ms at 2 times must operate voltage or current
Contact Bounce — at 10 mA contact current: 2 ms max. at operate N.O. side; 3 ms max. at release N.C. side
Capacitance — typical: NC to Movable 0.6 pF; NO to Movable 0.9 pF; contact to coil 12 pF

Dielectric Strength —	AZ 530	AZ 535
Contact — Contact	500 Vrms	1000 Vrms
Contact — Coil	500 Vrms	2500 Vrms

Insulation Resistance — 10,000 Megohms min. @ 20°C. 100 VDC, 50% RH
Drop Out — 10% minimum of must operate-voltage or current.
Coil Power — Pick up typical:
Light duty type — 125 mW
Medium duty type — 250 mW
Heavy duty type — 400 mW
Max. Continuous Dissipation:
AZ 530 — 1.6 W @ 20°C (68°F) ambient; 1.2 W @ 40°C (105°F) ambient
Temperature Rise: appr. 55°C per watt
AZ 535 — 2.3 W @ 20°C (68°F) ambient; 1.9 W @ 40°C (105°F) ambient
Temperature Rise: appr. 35°C per watt
Coil Temperature — Max. 105°C (220°F)
Ambient Temperature —
Operating: −55°C (−72°F) to 80°C (175°F) @ nominal operating voltage
Storage: −55°C (−72°F) to 105°C (220°F)
Vibration — 0.062 DA @ 10-55 Hz
Shock — 20 g
Enclosure — Black plastic cover with mylar bottom plate
Terminals — Printed circuit board terminals goldplated in 0.10″ standard grid space
Weight — Approx. 10 (AZ 530); Approx. 20 gr. (AZ 535)

All values at 20°C
* Relay will pull in with less than "must operate" value. There will be a change of less than 10% in must operate if several relays are mounted close together.

Note: To fasten relay on PC board do not bend contact terminals as this damages adjustment. Use coil terminals only. After soldering relay to board, do not dip the board into a cleaning solution.
Solder temperature: Max. 270°C (500°F)
Soldering time: Max. 5 sec.

C. P. Clare & Co., a pioneer in relay engineering, offers a wide selection of over 400 stock relays. Clare Distributors have large on-the-shelf quantities waiting for your order.

Clare relays meet the exacting size and performance requirements of todays sophisticated switching applications. Stock relay capabilities range from low level logic switching at microsecond speeds to high power 15 ampere load switching. Pick an application — we probably have a relay or stepping switch to handle the job waiting for your order. Detailed Data Sheets on our products are available on request.

C. P. CLARE & CO.
A GENERAL INSTRUMENT COMPANY

"VP" SERIES GENERAL PURPOSE RELAYS

TYPE VP

Clare/Varley VP relays have 2, 4 or 6 Form C contact arrangements and Silver contacts rated 2A at 120Vac or 30Vdc resistive. Standard coil voltages are 12, 24, 48 & 120Vdc. The VP is enclosed in an amber Lexan polycarbonate dust cover to prevent contamination. The relays provide an economical and space saving way of solving complex switching problems. Typical applications include telecommunications, business machines, process controls and digital instruments. Sockets available for wired assembly and PCB mounting.

MERCURY-WETTED CONTACT RELAYS

HGJM

Clare HGJM relays have established new industry standards for quiet, fast and stable operation. HGJM Series SPDT relays have the 100VA load and multi-billion operation reliability characteristic of our HGSM and are recommended for all new applications.

Response times approach 1ms speeds, noise levels are less than 5μV at 5ms after coil energization (10kHz bandwidth) and the relays are ultra-stable to 250Hz. The 1 Form C contact will switch μV, nanoampere loads to 2A or 500V loads (100VA max, ac or dc). The relays are offered in 0.400″ height high sensitivity models and 0.350″ height low profile versions. Both mount on staggered 0.100″ PCB grid patterns. The low profile models permit 0.5″ board centers.

HGJ2MT

Clare HGJ2MT relays feature the same outstanding electrical characteristics as the HGJM relays in a DPDT (2 Form C) package. High sensitivity HGJ2MT relays have common open time durations to 50μs at 100Hz for capacitor transfer technique applications. Electrostatic shielding is standard on all models.

HGQM

Clare HGQM relays for PCB mounting have the fastest response times in the industry for mercury-wetted relays. The contact form is a SPDT transfer-contact configuration. Typical response times range from 0.8 to 1.0ms and noise levels are under 5μV within 1.5ms after coil energization (1000Hz bandwidth). HGQM relays are ultra-stable at switching speeds to 500Hz (bistable) and 400Hz (single-side-stable). Switching capabilities range from signal levels to 1A or 500V loads (50VA max).

The HGQM package is only 0.580″ high and mounts on convenient staggered 0.100″ grid patterns. An ideal companion for HGJM relays in many applications requiring low level sensor-based analog signal switching or process control for data logging/acquisition.

HGQ2MT

The HGQ2MT relays feature the same electrical characteristics as the HGQM relay with transfer contact switching but in a DPDT package. This ultra-high speed two pole relay is ideal for low level switching applications.

Contact noise is less than 10μV within 2ms after coil energization — three times faster than the industry standard. Thermal emf levels are 15μV maximum.

SPECIFICATIONS — HGJM & HGJ2MT

CONTACT RATING (Resistive Load): Power — 100VA, max. Voltage — 500V, dc or ac, max. Current — 2A switched, max., 5A carry only, max.

CONTACT RESISTANCE (ON impedance): 15 to 25 milliohms, ±2.0 millioms

LIFE EXPECTANCY: Greater than 10 x 10^9 operations at rated load

OPERATE TIME: 1.25ms response time — Switching up to 250Hz (4.0ms period)

BREAKDOWN VOLTAGE: 1,000V rms 60Hz min. between all mutually insulated terminals, except between windings of double wound coils, 200Vdc

INSULATION RESISTANCE (OFF impedance): HGJM Series, Standard Value 100 megohms. Available, 100,000 megohms — HGJ2MT Series, Standard Value, 10,000 megohms. Available 100,000 megohms (Measured across open contacts at 25°C, 40% relative humidity)

ENVIRONMENTAL: Vibration — 10 to 300Hz 0.06″ d.a. or 5g's. Shock — 10g, 11 ±1ms, ½ sinewave (non-operating). Temperature — −38.8°C to +105°C (operating)

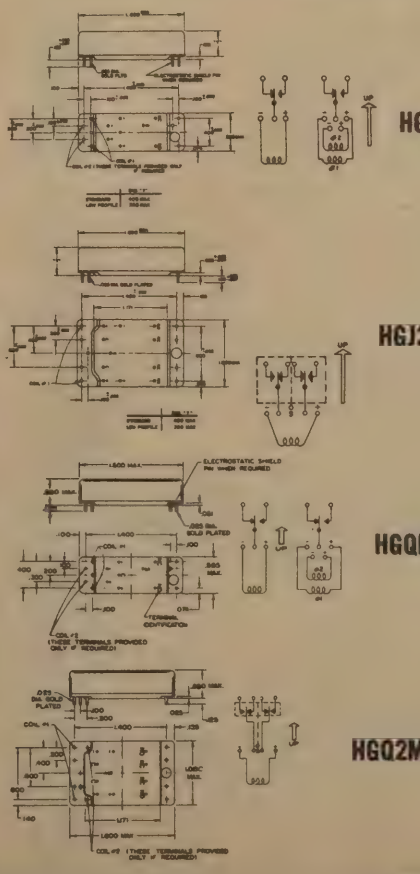
SPECIFICATIONS — HGQM & HGQ2MT

CONTACT RATING (Resistive Load): Power — 50VA, max. Voltage — 250V, dc or ac, max. Current — 1A switched, max. 5A carry only, max.

CONTACT RESISTANCE (ON impedance): Initial — 15 to 25 milliohms, ±2.0 milliohms

LIFE EXPECTANCY: Greater than 2 x 10^9 operations at rated load

OPERATE TIME: 1000μs. Switching up to 500Hz (2.0ms period) bistable and to 400Hz single-side-stable



BREAKDOWN VOLTAGE: 1,000V rms 60Hz min. between all mutually insulated terminals, except between windings of double wound coils, 200Vdc

INSULATION RESISTANCE (OFF impedance): HGQM Series — Standard Value, 100 megohms. Available 100,000 megohms — HGQ2MT Series, Standard Value, 10,000 megohms. Available 100,000 megohms (Measured across open contacts at 25°C, 40% relative humidity)

ENVIRONMENTAL: Vibration — 10 to 300Hz 0.06″ d.a. or 5g's. Shock — 10g, 11 ±1ms, ½ sinewave (no mechanical damage, non-operating test). Temperature — −38.8°C to +105°C (operating)

MERCURY-WETTED CONTACT RELAYS

HGSM

HGS2MT

HGM

HG2M

HGSM

Clare HGSM relays are PCB mount models with 2A or 500V (100VA max.) switching capabilities. The HGSM series SPDT relay is recommended for replacement applications only. New applications should specify the faster HGJM series with the same load switching capabilities, life expectancy and lower noise. The HGSM package is 5/8" high and mounts on staggered 0.100" grid patterns.

HGS2MT

Clare HGS2MT relays have the same ratings and life expectancy as the HGSM series in a DPDT model. The HGS2MT relay is also recommended for replacement purposes only. HGJ2MT relays are recommended for all new applications requiring 100VA (per pole) switching capabilities in DPDT configurations.

HGM

HGM relays are Clare standard HG switch capsules in module form, are provided with plated steel covers for excellent mechanical protection and magnetic shielding. The standard HG switch in the HGM is not polarity sensitive. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250VA maximum. Life expectancy is 22 x 10^9 at specified ratings.

HG2M

HG2M has the same characteristics as the HGM but contains 2 capsules to give you double-pole, double-throw configuration make-before-break. This results in saving space and cost over single element units. Contacts are rated at 5 amps 500 Volts, 100VA maximum with life expectancy of 22 x 10^9.

SPECIFICATIONS — HGSM, HGS2MT, HGM, HG2M

CONTACT RATING (resistive load):
- Power 250VA max.
- Voltage 500V max.
- Current 5A max.

CONTACT RESISTANCE (ON impedance):
- 28 milliohms typical

CLARE MERCURY-WETTED CONTACT RELAYS

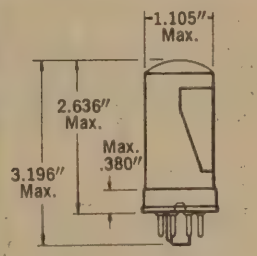
HG

HG relays have SPDT make-before-break form D contacts rated at 5 amps, 500 volts, 250VA max. Operating time can be as short as 2 milliseconds. The Series HG2 relay utilizes two switch capsules to furnish DPDT operating time can be as short as 2¼ milliseconds. Series HG3 relay utilizes three capsules providing 3 PDT, operating time can be as short as 2½ milliseconds. Series HG4 relay utilizes four capsules providing 4 PDT, operating time can be as short as 3¾ milliseconds. Life expectancy is 22 x 10^9 at specified ratings. Resistance, ±10% tolerance at 25 degrees C. Typical applications include computers, data logging and low-level dry circuits.

HGS

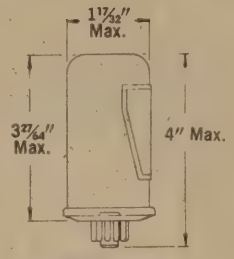
HGS Mercury-wetted relay offer increased speed and reliability along with high sensitivity. HGS 1000 Series. provide SPDT make-before-break and HGS 5000 Series provides SPDT break-before-make. Both are rated at 2 amps, 500 Volts, 100VA max. Operate time as fast as 1 millisecond. Standard design available only in single element assemblies, they come in the following, single-side-stable, bi-stable and chopper. Life expectancy is 22 x 10^9 at specified ratings.

HGP



HGP is similar to the HG series except for the inclusion of permanent magnets making a slight increase in height. Magnets provide increased sensitivity. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250VA maximum with operate time as short as 2 milliseconds. Life expectancy is 22 x 10^9 at specified rating.

SPECIFICATIONS — HG, HGS, HGP



CONTACT RATING (Resistive Load): Power — HG, HGP, 250VA; HGS, 100VA. Voltage — HG, HGP & HGS, 500V. Current — HG, HGP, 5A; HGS, 2A. CONTACT RESISTANCE (ON Impedance): 25 milliohms typical. LIFE EXPECTANCY: 22 x 10^9 Operations. OPERATE TIME: See description. BREAKDOWN VOLTAGE: 1000Vac, rms, 60Hz between mutually insulated terminals. ENVIRONMENTAL: Vibration: 10-500Hz, 0.06″ d.a. or 10g's. Shock: 30g's, 11 ±1ms. Temperature: −38.8° to +100°C.

DRY REED RELAYS

PRB & PRBH SERIES PICOREED®

LOW PROFILE

HIGH SENSITIVITY

Clare's micro-miniature PRB and PRBH series Picoreed relays offer signal level to 10VA switching characteristics, power requirements ranging from 48 to 500 milliwatts (dependent on relay configuration) and operate times typically less than 500 microseconds in economical space saving packages. The low profile PRB series permits 0.375" PCB mounting centers and the high sensitivity PRBH series will mount on 0.5" PCB centers.

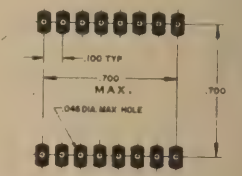
The 5 volt PRB/PRBH relays are fully compatible with the standard 5 volt DTL/TTL logic families and will solve many interface application problems.

Both series have molded epoxy bases with stamped metal covers and mount on 0.70" x 0.100" grid pattern. The PRB low profile models are also available in 6 Form A, 1B, 1A1B and 1A latching contact configurations.

SPECIFICATIONS — PRB & PRBH

CONTACT RATING (Resistive Load): Power: 10 volt-amperes, max. Voltage: 100 volts dc or peak ac, max. Current: .5 ampere, switched, max. 2 amperes, carry only, max.

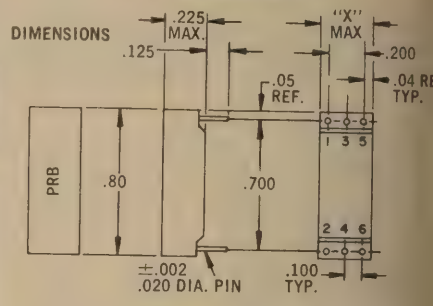
CONTACT RESISTANCE (ON Impedance): Initial: 200 milliohms max., measured at 10mA, 1000Hz



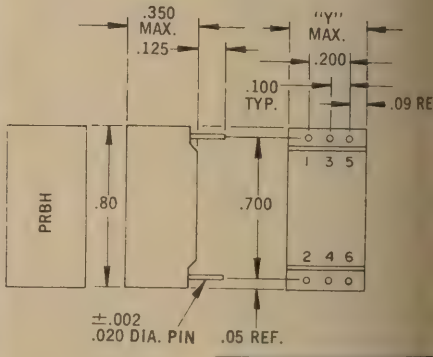
LIFE EXPECTANCY: 100 x 10^6 operations at signal levels. 5 x 10^6 operations at full rated load

TYPICAL OPERATE TIME: As low as 500 μs including bounce

BREAKDOWN VOLTAGE: 200Vac, rms, 60Hz across open contacts or 275Vdc, max.



INSULATION RESISTANCE (OFF Impedance): 10^{10} ohms min. at 100Vdc +25°C, 40% rel. hum.



ENVIRONMENTAL (Operating): Vibration: 0.06" d.a. or 20g's, 10 - 5000Hz. Shock: 100g's, 11 ±1ms, ½ sinewave. Temperature: −40° to +85°C.

DRY REED RELAYS

PRME SERIES PICOREED®

Clare's new dual-in-line package PRME Picoreed relay represents a significant addition to the micro-miniature Picoreed relay family packaging. The relays feature 600 microsecond typical response times, signal level to 10VA switching capabilities, total input/output isolation, epoxy molded construction and an IC compatible TO-116 DIP package. Traditional Clare reliability gives 100 x 10^6 operations at signal level loads or 5 x 10^6 operations at the rated load.

The PRME one Form A switching arrangement is compatible with most DTL/TTL drive IC's. The coil draws only 13 milliamperes from standard 5 volt logic supplies. Low contact noise and low thermal emf characteristics make the PRME ideal for electronic process control equipment and low level switching applications.

The 0.180" height optimizes the industry trend toward high density packaging by allowing PRME mounting on 0.375" PCB centers compatible with IC components. The PRME adapts to either automatic insertion equipment techniques for direct PCB mounting on 0.30" x 0.100" grid patterns or to mounting in standard 14 pin DIP sockets.

SPECIFICATIONS — PRME

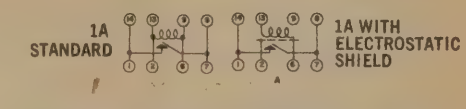
CONTACT RATING (Resistive Load): Power: 10 volt-amperes, max. Voltage: 100 volts dc or peak ac, max. current .5 ampere max, switched. 1.5 amperes, carry only, max.

CONTACT RESISTANCE (ON Impedance): Initial: 200 milliohms max., measured at 10mA, 1000Hz

LIFE EXPECTANCY: 100 x 10^6 operations at signal levels. 5 x 10^6 operations at full rated load

TYPICAL OPERATE TIME: As low as 600 μs including bounce

BREAKDOWN VOLTAGE: 200Vac, rms, 60Hz across open contacts or 275Vdc, max.



INSULATION RESISTANCE (OFF Impedance): 10^{10} ohms min. at 100Vdc +25°C, 40% rel. hum.

ENVIRONMENTAL (Operating): Vibration: 0.125" d.a. or 20g's 10-5000Hz. Shock: 100g's, 8 ±1ms, ½ sinewave. Temperature: −40° to +85°C.

PCB PAD LAYOUT DIMENSIONS

CRTN SERIES CLAREED® DRY REED RELAYS

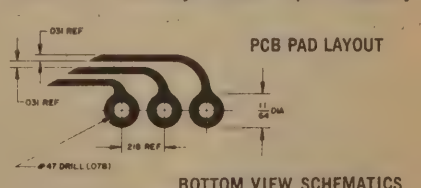
Clare's economical CRTN standard size reed relays offer signal level to 15VA power handling capabilities, total input/output isolation, and low millisecond switching speeds. CRTN relays are direct replacements for our CRT series relays. Like all Clare reed relays, they are immune to false operation and are insensitive to overload transients that affect solid state devices. Clareed relays are rated for millions of reliable, trouble free operations.

Optional CRTN series contact configurations are 3 & 5 Form A, 1B or 2B, 1C or 2C, and 1A latching or 2A latching. Special relays are available with up to twelve contacts. UL recognized versions of our 1 to 12 Form A relays are available as listed in UL File E43775. The relays feature open assembly construction and PCB 2.5" x .218" grid mounting centers.

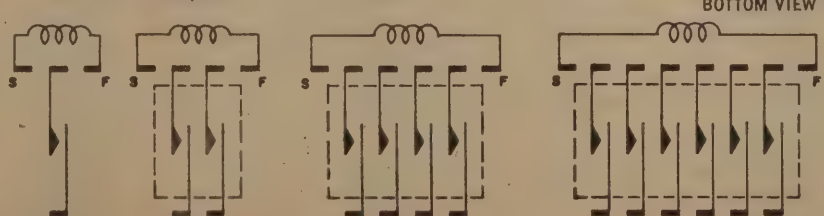
SPECIFICATIONS — CRTN

CONTACT RATING (Resistive Load): Power: 15 volt-amperes, max. Voltage: 250 volts dc or peak ac, max. Current 1 ampere, switched, max. 5 amperes, carry only, max.

CONTACT RESISTANCE (ON Impedance): Initial: 70 milliohms max., measured at 100mA, 1000Hz



LIFE EXPECTANCY: 100 x 10^6 operations at signal levels. 20 x 10^6 operations at full rated load



TYPICAL OPERATE TIME: Less than 4.0ms including bounce

BREAKDOWN VOLTAGE: 500Vac, rms, 60Hz across open contacts or 750Vdc, max.

INSULATION RESISTANCE (OFF Impedance): 10^{10} ohms min. at 100Vdc +25°C, 40% rel. hum.

ENVIRONMENTAL (Operating): Vibration: 0.06" d.a. or 10g's, 10-750Hz. Shock: 30g's, 11 ±1ms, ½ sinewave. Temperature: −65°C to +85°C

MRME TYPE MICROCLAREED®

Clare's MRME Microclareed relays feature signal level to 10VA switching characteristics, and 800 microsecon typical response speeds in a miniature size package. The rugged MRME molded epoxy construction is idea for critical environmental applications. MRME relays are direct electrical and mechanical replacement for our MRMC series relays.

MRME relays will handle simultaneous signal and power level switching in the same device over a wide band Total input/output isolation and immunity to false operation by overload transients that affect soli state devices are characteristics of MRME relays.

Optional MRME relays are available in 5 Form A, 1 or 2 Form B, 1A1B or 2A2B, and 1A latching o 2A latching contact configurations. The pins are arranged in a 1.000" x 0.100" staggered offset gri mounting pattern. The MRME relay package readily mounts on 0.5" PCB centers.

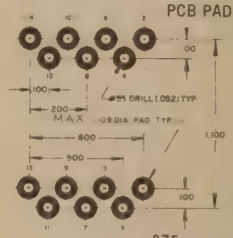
SPECIFICATIONS — MRME

CONTACT RATING (Resistive Load): Power: 10 volt-amperes, max. Voltage: 200 Volts dc or peak a.c. max. Current: 0.75 amperes, switched, max. 2.0 amperes, carry only, max.

CONTACT RESISTANCE (ON Impedance): Initial: 200 milliohms max., measured at 10mA, 1000Hz

LIFE EXPECTANCY: 100 x 10^6 operations at signal levels. 10 x 10^6 operations at full rated load

TYPICAL OPERATE TIME: Less than 800μs including bounce



BREAKDOWN VOLTAGE: 250Vac, rms, 60Hz across open contacts or 350Vdc, max.

INSULATION RESISTANCE (OFF Impedance): 10^{10} ohms min. at 100Vdc +25°C, 40% rel. hum.

ENVIRONMENTAL (Operating): Vibration: 0.06" d.a. or 10g's, 10 - 2000Hz. Shock: 20g's, 11 ±1ms, ½ sinewave. Temperature: −40° to +85°C.

CLARE DRY REED RELAYS

MRB SERIES MICROCLAREED®

Clare's MRB Microreed relays offer versatile signal level to 10VA switching capabilities, total input/output isolation, 800 microsecond typical switching speeds in the miniature sized relay family.

The MRB relays operate with coil power requirements as low as 10 milliwatts. The ultra-reliable operation will exceed 100 x 10^6 operations at signal level loads or 10 x 10^6 operations at the rated load.

Optional MRB relays are available in 3 or 5 Form A, 2 Form B, 3 or 4 Form C, 1A latching or 2A latching and 2A2B contact forms. UL recognized versions in all but Form C are available as listed in UL File E43775. The relays have molded epoxy bases with stamped metal covers and convenient 1.000" x 0.100" grid mounting centers for printed circuit board mounting. This low profile package will mount on 0.5" PCB centers.

GENERAL PURPOSE RELAYS

GP2 & GP3

The GP3 (Lexan® dust cover) Relays are UL bulletin 508 recognized (UL File E47012) and CSA list (File LR26727) as magnetic motor controllers. The rugged AC or DC relays are available in SPDT, DPDT a 3PDT configurations with Gold flashed Silver Cadmium Oxide contacts rated at either 10 amperes at 28V resistive or 120/150Vac, .8 power factor. The GP3 plain case models are available with matching mold nylon sockets for plug-in applications. The GP3 bracket case model is available for direct chassis mounti only. Mechanical life expectancy is 100 million operations, electrical life 100,000 operations minimum rated load .187" quick connect terminals standard. GP2 models are identical to GP3 models less dust cove

SPECIFICATIONS — GP2 & GP3

CONTACT RATING: 10 Amperes at 28Vdc resistive or 120/150Vac, .8 power factor. 6 amperes at 240/300Vac, .8 power factor. ⅓ hp at 120Vac, ½ hp at 240Vac

CONTACT RESISTANCE: Initial — 50 milliohms max. at rated current

LIFE EXPECTANCY: Electrical: 100,000 operations minimum at rated load. Mechanical: 10,000,000 operations

OPERATE TIME: Pickup: 15ms typical. Dropout: 10ms typical

BREAKDOWN VOLTAGE: 600Vac, rms, 60Hz minimum between open contacts. 1200Vac, rms, 60Hz all other mutually insulated elements

INSULATION RESISTANCE: 1000 megohms minimum at 500Vdc

GENERAL PURPOSE RELAYS

GP1

GP1 Relays are miniature 4PDT relays available in both AC and DC models. GP1 Relays with Lexan® dust covers are UL recognized (File E47012) and CSA listed (File LR26727) as magnetic motor controllers. Solder lug terminals are standard. Sockets are available in .375" or .187" solder lug or PCB mounting styles. Gold Flashed Fine Silver contacts are standard.

SPECIFICATIONS — GP1

CONTACT RATINGS (Resistive): Gold Flashed Fine Silver: 5A at 120Vac or 28Vdc, ⅛ hp at 120Vac. Silver Cadmium Oxide: 5A at 120Vac or 28Vdc, ⅛ hp at 120/250Vac

CONTACT RESISTANCE (ON Impedance): Initial 50 milliohms

LIFE EXPECTANCY: Electrical: 100,000 operations min. at rated load. Mechanical DC: 100,000,000 operations. AC: 50,000,000 operations

OPERATE TIME: Pickup: 13ms, max. Dropout: 6ms, max. Nom. voltage, 25°C, unsuppressed

BREAKDOWN VOLTAGE: 500Vac, rms, 60Hz between open contacts. 1200Vac, rms, 60Hz all other mutually insulated elements

INSULATION RESISTANCE (OFF Impedance): 2000 megohms minimum

ENVIRONMENTAL: Shock: 15g, 11 ±1ms, ½ sine-wave. Vibration: 0.06" d.a. or 10g's 10 to 55Hz. Temperature Range: −45°C to +75°C.

OPTIONS	Add to List
OPPOSITE POLARITY RATING	$0.25 each

To order, replace the "R" in the part number with "Q" Example: GP1R11A0000 becomes GP1Q11A0000

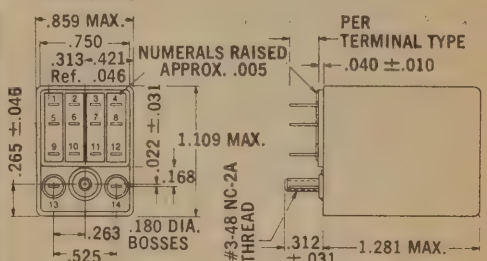
SILVER CADMIUM OXIDE (GOLD FLASHED) CONTACTS	No Charge

To order, change 5th character in part number from "1" to "2". Example: GP1R11A0000 becomes GP1R21A0000.

P.C.B. TERMINALS	No Charge

To order, change 6th character in part number from "1" to "2". Example: GP1R11A0000 becomes GP1R12A0000.

TAPER TAB TERMINALS	No Charge



To order, change 6th character in part number from "1" to "3". Example: GP1R11A0000 becomes GP1R13A0000.

NOTE: Some optional relays may be built to order.

CLARAC™ AC POWER RELAYS

WIRING DIAGRAM

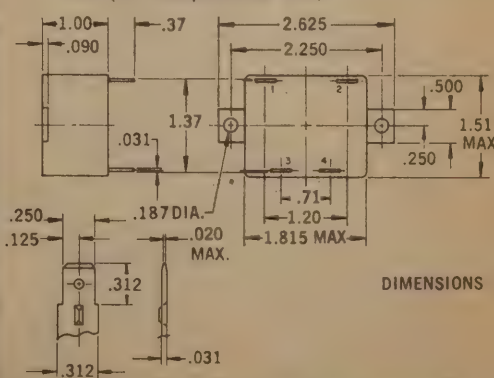
The Clarac relay is an ultra-reliable hybrid relay featuring a reed input and a triac solid state output. The relays are very sensitive and operate with less than 200mW power inputs. Rugged construction, low cost and long life make the Clarac an excellent choice for tough circuit applications such as switching solenoids, ac motors, lamps and other industrial loads.

The units maximum ratings are 4, 7, 10 or 15A at 240Vac, 50/60Hz when mounted on a 8" x 8" x ⅛" aluminum heat sink for optimum operation. The relays must be derated when used without heat sink (free air) or at elevated temperatures (consult Clare Data Sheet 1201 for surge current capabilities and additional details). The relays have dust and explosion proof nylon covers, quick-connect terminals and an average shipping weight of 2 oz.

SPECIFICATIONS

LOAD RATING: 4, 7, 10 or 15A at 240Vac, 50/60Hz (400V max. peak)

ELECTRICAL ISOLATION: Greater than 10^{10} ohms input/output isolation



LIFE EXPECTANCY: 100 x 10^6 operations min. with random switching during the cycle

TYPICAL OPERATE TIME: Turn On: 1ms max. Turn Off: At 1st zero amplitude current point of the sinewave after coil de-energization

BREAKDOWN VOLTAGE: 1000Vac, 60Hz min. between all mutually insulated terminals and the mounting plate

ENVIRONMENTAL: Operating temperature from 0° to 70°C (with adequate heat sink)

TELEPHONE TYPE RELAYS

LA/LB SERIES

Designed for the user who must have high quality at a reasonable price. The LA relays have 4PDT contacts and the LB/LBP relays have 6PDT contacts. These miniature relays have extraordinary switching capacity and versatility for their size. Contacts rated 2 amps at 28Vdc. LA/LB Series is for direct P.C.B. mounting and the LBP Series is for direct plug into socket mounting. These relays are ideal components for military, industrial and commercial applications.

SPECIFICATIONS — LA/LB SERIES

CONTACT RATING (Resistive Load): 2A at 28Vdc

CONTACT MATERIAL: Palladium, with Gold overlay on bifurcated make and break springs

CONTACT RESISTANCE (ON Impedance): 100 milliohms max. initial

LIFE EXPECTANCY: 100,000 operations at rated load min. 100,000,000 operations mechanical life min.

OPERATE TIME: 10-25ms typical

RELEASE TIME: 5ms max.

TELEPHONE TYPE RELAYS

J & JDP SERIES

J

JDP

J & JDP relays are compact telephone type relays for applications ranging from simple switching in alarm circuits to complex computer functions. Contact combinations of 4, 6 & 8 pole double throw are rated 4A at 120Vac, 60Hz or 30Vdc resistive. Mechanical life exceeds 70 x 10^6 operations.

Type J relays are open type construction for direct chassis mounting. Series JDP relays are furnished with a basic J relay, a socket with solder lug terminals and a dust cover enclosure.

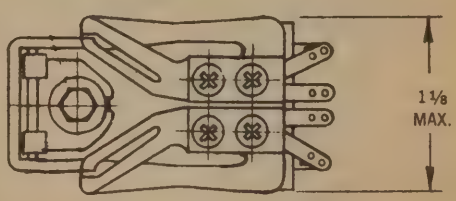
SPECIFICATIONS — J & JDP

CONTACT RATING (Resistive Load): 4A at 120Vac, 60Hz or 30Vdc

CONTACT MATERIAL: Twin Palladium (bifurcated make-and-break springs)

CONTACT RESISTANCE: 100 milliohms max. initial

LIFE EXPECTANCY: 1 x 10^5 operations min. at rated load, mechanical life 70 x 10^6 operations



OPERATE TIME: 5-30ms typical

RELEASE TIME (Coil unsuppressed): 5ms typical

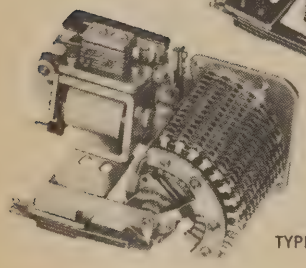
CLARE STEPPING SWITCHES



TYPE 20

TYPE 26

TYPE 210

TYPE 211

Clare stepping switches offer an economical alternative to solid state switching. Multiplexing, counting sequencing problems are easily solved by providing the most working capacity in the smallest sp Clare stepping switches allow you to select, interrupt or change connections in a succession of circ in response to current pulses.

Type 210 offers 3, 6 & 12 levels of 10 points with a life expectancy of 100 million steps at 12 le Contacts are rated 0.1A at 115Vac or 30Vdc resistive with a 3A carry rating. Operate time is app 20ms at 25°C and release time is 10ms. Solder lug terminals are standard.

Type 211 has the same electrical characteristics as the type 210 but in 3, 6, & 12 levels of 11 points.

Type 20 offers 4 & 8 levels of 20 points with a life expectancy of 180 million steps at 8 levels. Cont are rated 0.1A at 115Vac or 30Vdc resistive with a 3A carry rating. Operate time is approx. 20ms 25°C and release time is approx. 10ms at 25°C. Solder lug terminals are standard.

Type 26 has the same electrical characteristics as the type 20 but is offered in 4 & 8 levels of 26 poi or 6 levels of 52 points.

ALL SWITCHES LISTED HAVE 1 BRIDGING LEVEL WITH THE REMAINING LEVELS BEING NON-BRIDGI 2C OFF-NORMAL AND 2C INTERRUPTER CONTACTS ARE STANDARD.

SPECIFICATIONS

CONTACT RATINGS (Resistive Load): 0.1A at 115Vac or 30Vdc switched, 3A carry only; max.

CONTACT RESISTANCE (ON Impedance): 0.15 ohm typical

LIFE EXPECTANCY: (See description)

TYPICAL OPERATE TIME: Approximately 20ms at 25°C, release time approx. 10ms

BREAKDOWN VOLTAGE: 1000Vac, 60Hz across op contacts

INSULATION RESISTANCE (OFF Impedance): 1 ohms at 500Vdc between levels

ENVIRONMENTAL: Vibration: 0.06" d.a., 10-55 Shock: 30g's, 11 ±1ms. Temperature: 0°C +85°C

CLARE MILITARY RELAYS

TYPE F(W) & HF(W)

Clare provides full and half-size military-type relays of unusual versatility, capable of reliable long life operation under adverse environments. The relays are available in both solder seal versions (F & HF) and welded seal models (FW & HFW). These relays are ideal for use in industrial application as well as airborne and aerospace. Relays employ a rigid frame to maintain permanent alignment of all elements. Contact arrangements are 2 form C. These relays are manufactured to meet Mil-R-5757/10 and 5757/9.

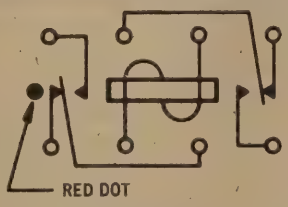
SPECIFICATIONS — F(W) & HF(W)

CONTACT RATING (Resistive Load): 2A at 28Vdc

CONTACT RESISTANCE (ON Impedance): 50 milliohms max. at 6Vdc, 100mA

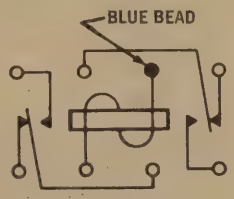
LIFE EXPECTANCY: F & FW: 250,000 operations at rated load. HF & HFW: 100,000 operations at rated load

OPERATE TIME: F & FW: 5ms max. HF & HFW: 4ms max.



BREAKDOWN VOLTAGE: 1000Vac, rms, 60Hz between all terminals and case

INSULATION RESISTANCE (OFF Impedance): 1000 Megohms min.



ENVIRONMENTAL: Vibration: 5 - 2000 Hz, 0.125″ d.a. or 30g peak (HF & HFW). 10 - 3000Hz, 0.125″ d.a. or 30g peak (F & FW). Shock: 65g peak, 11 ±1ms Temperature range: −65° to +125°C

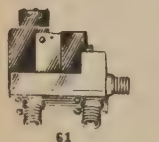
COAXIAL RELAYS, SWITCHES AND CONNECTORS

RELAYS



60

60 SERIES SPDT TYPES

SPDT coaxial relays for low-level to 1-kW operation. Available with one or two form C auxiliary contacts and with high-isolation "G" connector at NC or receiver terminal in transmit-receive applications. The "G" connector increases isolation to greater than —100 dB at up to 500 MHz. UHF connectors are not recommended for use above 400 MHz. RF power rating: 1 kW to 100 MHz, 750 W at 400 MHz, 500 W at 1000 MHz. VSWR: 1.05:1 at 50 MHz, 1.31:1 at 1000 MHz. Impedance: 50 ohms. Body Size: 3.00"x0.88". **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDCx or 6, 12, 24, 115 or 230 VAC. **See Coil Voltage Table.**

61

61 SERIES SPDT TYPES

Small relays for military and severe environmental requirements. Balanced armature actuator prevents contact chatter under high frequency vibration and severe shock. Offered with many connector types and 1 or 2 Form C aux. contacts. Power rating: 150 W at 50 MHz, 75 W at 1GHz. VSWR: 1.03:1 at 50 MHz, 1.18:1 at 1GHz. Body size: 1.58"x 0.64"x1.20". Wt. 3½ to 4½ oz. **Specify coil voltage:** 6, 12, 26, 48 or 110 VDC or 115 VAC. **See Coil Voltage Table.**

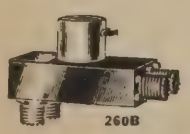
77

77 SERIES SPDT TYPES

Medium-size, lightweight, low-priced coaxial switches for industrial and less critical military uses. Available with or without 1 Form C aux. contacts. Power rating: 150 W at 50MHz, 60 W at 1.2 GHz. Impedance: 50 ohms. Other RF specifications similar to 61 Series above. Size: 1.88"x0.68"x0.68". Wt.: 3 oz. **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC, (115 VAC available at additional cost). **See Coil Voltage Table.**



Dow-Key Model	Conn. Type	With Two Form C Aux. Contacts	Net Each, Lots of 1	2-4	5-9	10-24

260

260/260B SERIES DPDT TYPES

The 260 Series is a standard DPDT relay with six connectors. 260B Series bypass relay is similar but has an internal connection between its NC contacts, leaving only four connectors. RF ratings and specifications same as 60 Series above. With UHF connectors (others available). Body size: 3"x1.75"x0.88". **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC or 6, 12, 24, 115 or 230 VAC. **See Coil Voltage Table.**

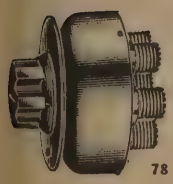
SWITCHES

71

Weatherproof high power switches for switching antennas, transmitters, or receivers up to 500 MHz. Power rating: 1 kW to 200 MHz, 750 W at 500 MHz. VSWR: 1.06:1 at 50 MHz, 1.31:1 at 500 MHz. Impedance: 50 ohms. With UHF connectors. Body size: 72 Series, 4"x 3.5"x2.62"; 71 Series, 5.75" dia. x 2.75". **Specify Coil Voltage:** 6, 12, 26, 48 or 115 VDC or 6, 12, 24, 115 or 230 VAC. **See Coil Voltage Table.**

71/72 SERIES MULTI-POSITION TYPES



Dow-Key Model	Description	Net Each, Lots of 1	2-4	5-9	10-24

72

78 SERIES MULTI-POSITION TYPES

Manually operated switches with true coaxial switching members (not wafer switches). Useful frequency range 0-500 MHz. RF power rating 1.5 kW at 50 MHz, 1 kW at 100 and 400 MHz. Impedance, 50 ohms. With UHF connectors (also available with BNC, C, N, or TNC connectors; frequency range 0-1 GHz.)Size, 3" dia. x 1". Weight, 10 oz. approx.

CONNECTORS

A B

UHF CONNECTORS AND ADAPTERS

Types C-201, C-60P and C-60PT have UHF female or male connector to solder terminal, and mount through panels ⅛" thick, max. C-201 mounts through ⅝" hole. C-601 mounts into a ⅝-24 tapped hole or through a ⅝" hole. C-60PT is similar to C-60P except has Teflon of Dupont insulation and better impedance match.

Dow-Key Model	Fig.	Description	Net Each, Lots of 1	2-4	5-9	10-24
A-2F	A	UHF double male	$0.97	$0.87	$0.82	$0.77
C-60P	B	UHF panel-mount female	.87	.78	.75	.70
C-60PT	B	UHF panel-mount female	1.25	1.13	1.07	1.00
C-201	C	UHF panel-mount male	1.36	1.22	1.15	1.08
A-202	D	UHF double female	1.03	.93	.87	.83

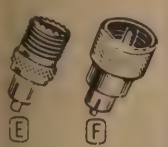
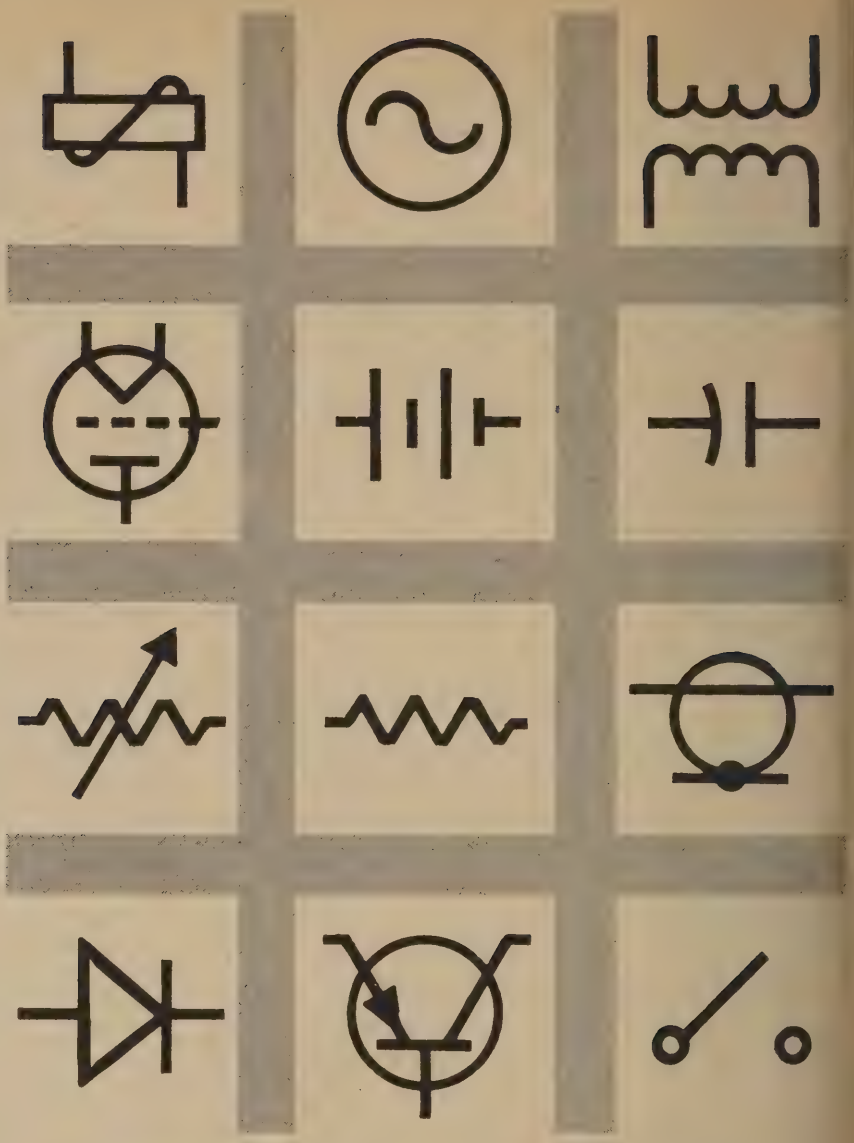
A-211	F	UHF male to male phono	1.67	1.49	1.41	1.33



C D

COIL VOLTAGE TABLE



To specify coil voltage desired, substitute two digits (21 through 60) from this table for **XX** in the Dow-Key model number; e.g. 260-XX04 with 6 VDC coil becomes 260-2104.

Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage
21	6 VDC	24	48 VDC	27*	220 VAC
22	12 VDC	25	110 VDC	28*	6 VAC
23	26 VDC	26*	115 VAC	29*	24 VAC
				60†	115 VAC

*Intermittent Service • 50% max. duty, 15 mins. max "on".
†110 VDC coil plus diode bridge rectifier.

— SPECIALLY DESIGNED CONTROLS HAVE THEIR PLACE — BUT CONSIDER THE ADVANTAGES OF USING RBM STANDARD CONTROLS

RBM, one of the world's largest manufacturers of industrial relays, realizes that design engineers are beginning to "SEE IT LIKE IT IS" — standard relays are really "VERY SPECIAL". They are produced in high volume, there are no replacement problems, they are less expensive, the are immediately available, and are field-proven.

RBM also realizes that a distribution system is needed for off-the-shelf delivery. We therefore, stock all standard controls in depth. Our central warehouse can ship to your authorized distributor within days, compared to weeks for a special device.

Below 250 pieces we sell standard catalog items only through authorized RBM distributors. Your authorized RBM distributor can also handle larger quantity orders. Call or write your authorized RBM distributor — NOW! There's something SPECIAL about RBM's Standard Relays.

Prices and specifications are subject to change without notice. For latest prices refer to United Pricing Service or contact "Distributor Sales Department" at:

* Magnet coils designed for continuous duty. Do not operate at rate higher than indicated under Mechanical Life.
** Based on steady state test under laboratory environmental conditions. Consult factory if application involves unusual load, speed of operation, off-on ratio, environmental or operating conditions. Electric life substantially greater when operated below rated load.
† Load tests — making inrush ratings (0.4 to 0.5 P.F.) — breaking 125% continuous rating (0.65 to 0.8 P.F.).
• Cross-bar contacts.

Applications for the RBM Type 93 miniature DC and AC Relays include vending machines, heating, air conditioning, business machines, control panels, appliances, data processing equipment, office machines, communications systems and instruments.

The coil bobbin and contact terminal block are an integral molded plastic material which is highly resistant to arc tracking. The unique configuration of contact terminals allows—(a) easy insertion and removal of connectors, (b) any stresses caused by wiring hook-up cannot change relay contact adjustment. The contact springs are molded as an integral assembly and the molding material is selected to give excellent stability over the temperature range and environmental conditions. The armature contact springs make connection to the terminals by means of flexible insulated leads welded to the terminals. Wiring connections for the contacts and the coil are located on the front of the relay.

Solder terminal type has combined front, single hole screw and stud mounting. Screw and stud included in Boxed units. Printed circuit type may be controlled by SCR if firing angle is no more than 10 degrees. Plug-In Type has 8 pin octal base for single and two pole. 11 pin base for three pole. High impact case. Standard pin connections.

Enclosed quick connect type designed for front mounting or polarized socket mounting. For socket mounting use 93-153-1 socket kit. Relay has .20 x .187 terminals. High impact case.

U/L & CSA—Relays are recognized under Component Recognition Program.

CONVERSION INSTRUCTIONS

All 10 and 15 ampere contact assemblies on RBM standard type C contactors are normally open. To convert to normally closed, use screwdriver. No special parts needed.

1. Remove movable contact assembly and lock washer by backing off terminal nut "A".
2. Loosen screws "B" and remove stationary contact assemblies.
3. Invert movable contact assembly, and replace on contactor with flat "I" spring resting on contact block. Contacts facing out.
4. Remove screws "B" from, and reinsert into opposite end of, stationary contact assembly. Re-install stationary contact assemblies; holding contacts in alignment with movable contacts while tightening screws.

120 V.	.5 - 90 seconds	187-902	

Hidden trimming resistor for tamper-proof field timing adjustment. Reset time 100 M.S. Can use Types 93, 84, 91, 92, 129, 143 or 75 as slave relay. Hardware included in boxed units only.

RBM CONTROLS is fully qualified to analyze custom specifications; design, test and produce the correct component or system for lowest product and installation cost.

From the inception of a design to its final production maturity, **RBM CONTROLS** serves its customers with a competent engineering department, complete laboratory facilities and qualified production personnel experienced in highest quality manufacturing standards. Factory trained sales engineers — specialists in the control field — are located in all major marketing areas.

NUMBER OPERATIONS	1,000,000	300,000	100,000					

Miniature Sensitive Relays, are used where maximum sensitivity and small size are very important. Ideally these relays are suited when minimum power is available such as transistorized circuits, alarm systems, signal systems, computers, communication equipment, automatic controls and remotes. All Miniature Sensitive Relays have integrally molded coil terminal board of glass filled alkyd. Highly reliable cross-bar contacts are gold alloy construction. Magnet core and armature assembly features high grade electrical steel carefully annealed and processed to obtain the best magnetic characteristics. The materials selected for use in coil winding keeps electrolysis to a minimum under severe environmental conditions.

The MS64 Miniature Sensitive Relay is specifically designed for electronic applications where printed circuit termination and enclosed construction are of major importance. It has symmetrical configuration providing for minimum mounting space requirements and maximum protection to moving parts. A snap-on cover provides protection against contaminants and prevents damage to moving parts when handling. Mounting bracket versions of the relay are for conventional chassis mounting and solder on" lead wire terminations.

The MS50 Multi-Pole isolated contact relay was specifically designed for electronic applications where reliability, small size, sensitive operation, rugged construction and low cost are prime factors.

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

ORDERING

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.

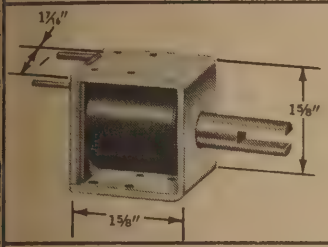
GUARDIAN® ELECTRIC SOLENOIDS



NO. 1A1 AC or DC

Low cost modified U-frame solenoid in six pull type models. Insulation material: Class "A" (105°C). Coil finish: Acetate yarn, coalesced with acetone. U/L construction. Termination: External leads. Shipping weight: 4.5 oz.

PULL TYPE

Guardian No.	Duty	Coil Voltage	Ohms	LIFTS AND STROKES (Minimum)	(Maximum)	Net Ea. 1-24
1A1	Inter	120AC	300	8 oz. at 1/8"	2 oz. at 1/2"	$3.64

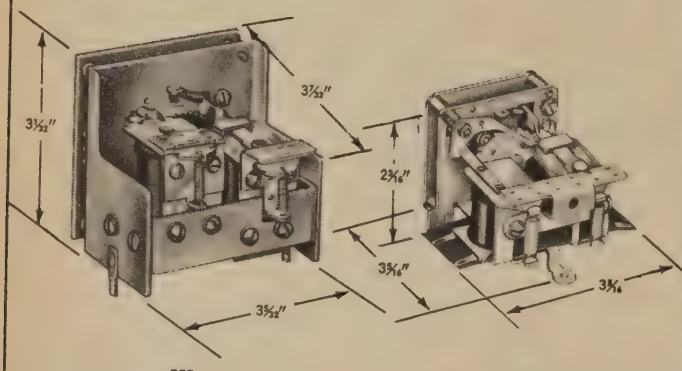
GUARDIAN® ELECTRIC STEPPERS

STEPPING CONTROLS

For accurate sequence selecting, pulse multiplying, pulse dividing, circuit selecting, automatic homing, remote homing, counting and latching. Guardian steppers are specified for automatic control of electrically operated business machines, accumulators (coin and other), animated displays, electrical scoreboards, automatic overhead garage doors, assembly line controls, automatic packaging (loading) controls, sump pump controls, commercial slide projectors, among others. All Guardian steppers except Series 705 are intermittent duty. All are direct-drive units with switching operations completed upon energization.

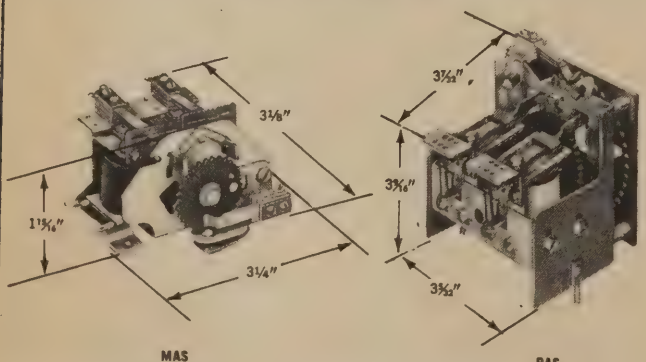


PC MC

CONTINUOUS ROTATION

The circuit selection wiper on Continuous Rotation Steppers moves in one direction only, upon energization of the step coil. This type of stepper is available in standard 24 point (MC) or 40 point (PC). The Guardian MC Midget Continuous Rotation Stepper is particularly adaptable to repetitive sequence functions. The 24 bridging contact deck is evenly divisible by eight possible sequences. The PC stepper features self-stepping speeds up to 30 steps per second and mechanical life expectancy of over 4,000,000 steps.

Guardian No.	Watts	Volt Amperes	No. of Points	No. of Active Contacts	Max. Steps per Second	Shipping Weight Ounces	Net Ea. 1-24
IR-PC-120AC	30	40	40	40	20	17	$23.49
IR-MC-120AC	17	30	24	24	20	9½	17.39



PER MER

ELECTRICAL RESET

Type MER. A direct drive (steps on energization) with positive mechanical reset interlock actuated by the reset magnet and unlocked on the first energization of the step magnet. Assures positive reset on as short a pulse as one-hundredth of a second. By interconnecting two or more Steppers, count can be increased to any desired total counting by tens, or any convenient multiple. Will control a sequence of operation and then automatically reset to starting position. The circuit selecting wiper on Electrical Reset Steppers can be reset to zero or home from any desired position, by energization of the reset magnet. They are frequently employed to record counts by various numerical groups, then resetting automatically.

Type PER. Operation same as MER but with up to 36 active contacts.

Guardian No.	Watts	Volt Amperes	No. of Points	No. of Active Contacts	Max. Steps per Second	Shipping Weight Ounces	Net Ea. 1-24

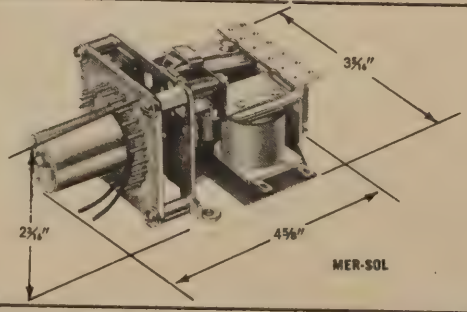
MER-24DC	20-8¶	35- 9¶	24	22	20	11½	18.56

MAS PAS



ADD AND SUBTRACT

Add and subtract steppers are basically continuous rotation types with the added feature of being able to reverse the movement of the selecting wiper when required.

Type MAS. A midget add and subtract stepper incorporating a cam actuated switch which operates at zero position. Used primarily to indicate a zero balance between pulses supplied to the "add" coil as compared to pulses received by the "subtract" coil.

Type PAS. New Bi-directional steppers whereby the selector wiper moves either direction depending on which of the coils is energized. Supplied with .057" dia. AMP quick-connect terminals arranged in circle on deck, and also includes a form "C" cam switch.

Guardian No.	Watts	Volt Amperes	No. of Points	No. of Active Contacts	Max. Steps per Second	Shipping Weight Ounces	Net Ea. 1-24

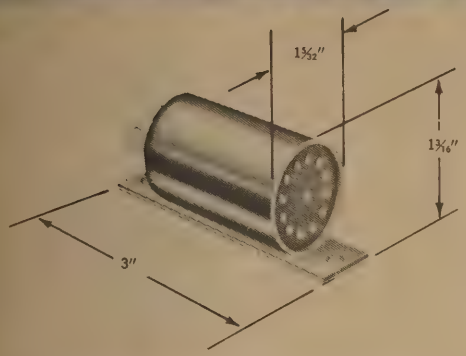
MER-SOL

FRICTION-FREE ELECTRICAL RESET



All features of the widely used Guardian MER 24 point electrical reset stepper . . . PLUS Solenoid "lifts" wiper contacts when stepping to reduce friction . . . and arcing. Increased contact ratings to 5 amps resistive at 120 volts AC. Increased function capability. Increased dependability. Increased life expectancy — now up to 10,000,000 steps. Compact design.

Guardian No.	Watts	Volt Amperes	No. of Points	No. of Active Contacts	Max. Steps per Second	Shipping Weight Ounces	Net Ea. 1-24
MER-SOL-120AC	20-8¶	20-9¶	24	22	20	14	$26.48
MER-SOL-24DC	20-8¶	20-9¶	24	22	20	14	26.48

NOTES: All stepper contact points are rated 1½ amps resistive, at 120 V., 60 Hz Coil* Voltages are 120 AC, 60 Hz and 24 DC.
* Steppers will operate satisfactorily at 15% below or 10% above rated voltage.
¶ Listings are for stepping coil and reset coil, respectively.
† Includes Zero (0) position.
‡ Zero (0) position switch only.

GUARDIAN® ELECTRIC — STEPPERS LEVER SWITCH

ROTOMITE STEPPER SERIES 705

An entirely new concept in stepper design, the Guardian "Rotomite" is first with maximum stepper control in minimum space. Offering high contact rating of 3 amps resistive, 1 amp inductive (50% PF). Featuring continuous duty operation with life well in excess of one million steps, the completely enclosed Rotomite is geared for continuous rotation of 12 positions. A few Rotomite applications presently include computers, business machines, lighting and vending controls, counting and sorting devices, and model trains. Shipping weight, 5 oz.

SERIES 660 - 665 SEQUENCE

Intended to perform switching operations in a repetitive transfer sequence. Each electrical impulse moves the switch contacts to the opposite position in the sequence. Applications include lights, signs, motors, appliances and similar units. Contacts rated up to 12½ amps, 120V., 60 Hz, non-inductive load. Shipping weight, 8 oz. Mounting: 4 holes 8-32 (NC-2B).

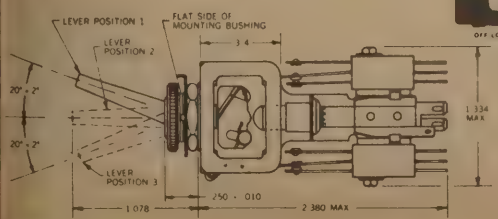
NEW 840L ON/OFF STEPPER



SINGLE COIL IMPULSE OPERATED MECHANICAL LATCHING RELAY STEPPER

New, improved, compact Latching Relay for positive on/off control of positioning devices, remote controls, lighting circuits and many additional applications. SPDT, DPDT or 4PDT contact combinations. Impulse as short as 20 MS energizes coil to reverse position of switches. Holds last position of switch with coil de-energized. Contacts rated for 10 amps at 120VAC, 60 Hz non-inductive. Power requirement: 8.2 volt-amperes. Solder lug terminals for coils and contacts. Shipping weight, 5.2 oz. Mounting: Single mounting hole tapped 8-32 (NC-2B).

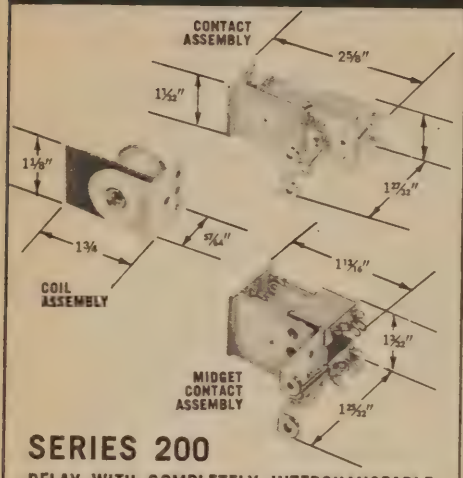
ILLUMINATED LEVER SWITCHES



WITH SNAP-IN CAM INSERTS

Bushing mounted illuminated lever switches capable of mounting vertically on 1⅜" centers and horizontally on ¾" centers. Mount in panels up to 1/16" thick with behind panel size .750" x 1.334" x 2.380" max. Supplied with 28 volt lamp and red and green insertable color filters. (Center position on 3 position switches remains clear.) Available in Locked-off-Locked (LOL), Locked-locked (LL), and Locked-Momentary (LM) in either 4 or 10 amps (110VAC Resistive). Other switching position configurations possible with easily replaceable cams. Terminals, .110 quick disconnect.

COLOR FILTER/LAMP KIT . . . 28 volt lamp; socket; retainer clip; 2 red, 2 green filters. 1-9 $1.10; 10 & up $1.00.

GUARDIAN® ELECTRIC OPEN RELAYS

SERIES 200

RELAY WITH COMPLETELY INTERCHANGEABLE COIL AND CONTACT ASSEMBLIES

The coil consists of the coil and field piece; the contact assembly consists of switch blades, armature; return spring and mounting bracket. The Guardian Midget Contact Assembly is interchangeable with the standard Series 200 contact assembly. Available with SPDT, DPDT or 4PDT contact switch assemblies, each suitable for use with any AC or DC coil.

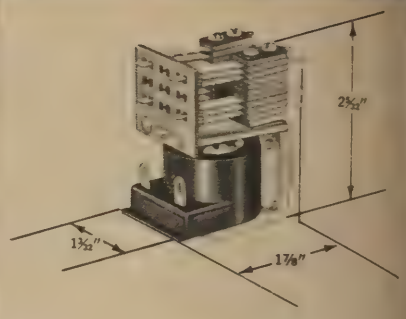
SERIES 240U - 245U



15 AMPERE RELAY

Designed for contact ratings up to 15 amps, Guardian series 240U AC and 245U DC relays are compact, reliable, inexpensive. Factory pretested and adjusted to be ready for assembly into your product. Contact rating is 15 amp, 120V., 60 Hz non-inductive load. Easy assembly with 8-32 single-screw, center-hole mounting. Shipping weight 4.5 oz.

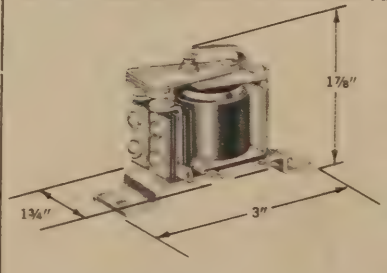
SERIES 640U - 645U



ALL PURPOSE ECONOMY RELAY 10 AMPERE

A compact, lightweight relay capable of unusually heavy power control for its size. Long life, high quality relay available in a variety of AC and DC voltages with a selection of contact combinations. All contact ratings are 10 amps. Contact ratings at 60 Hz 120V. non-inductive load. 8-32 single screw, center pole mounting. Shipping weight, 3.5 oz.

U/L Recognized Component File #E-17260.

SERIES 220

HEAVY DUTY INDUSTRIAL AC RELAY 20 AMPERE

This rugged unit makes and breaks up to 20 amps, at 240 volts. Armature is equipped with phenolic contact mounting block carrying 5⁄16" dual contacts. Phenolic is tested at 1500 volts breakdown to ground. Contacts are silver alloy. Relay is available in dual SPST, normally open contact combination only. Contact rating 20 amps at 60 Hz, 240VAC non-inductive load. Mounting: Mounting holes — clearance for 8-32 with 2¹⁹⁄₃₂" centers. Shipping weight, 5.5 oz.

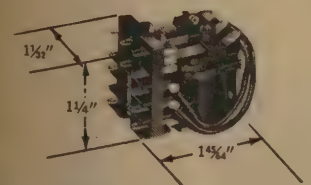
GUARDIAN® ELECTRIC OPEN RELAYS

SERIES 900-905
SERIES 910-915

10 AMP RELAY

- U/L Recognized component
- Designed with reduced number of parts for long, trouble-free service
- Has keyed and locked lifter



Series 910 is exactly the same as the 900 relay, both electrically and mechanically, but with 3/16" quick disconnects instead of soldered termination.

Dependable, low cost, DPDT relay featuring new, trouble-free design that incorporates a minimum of parts. Contacts all rated 10 amps, 120VAC resistive load. Has molded switches, one-piece mounting clip and return spring; molded bobbin and coil cover. Average shipping weight, 6 oz.

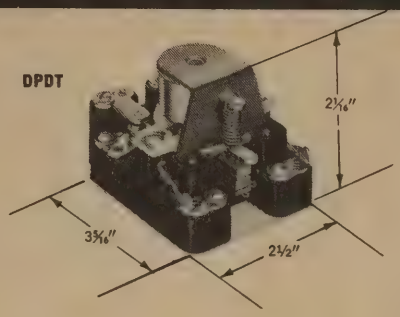
U/L Recognized Component File #E-23524B

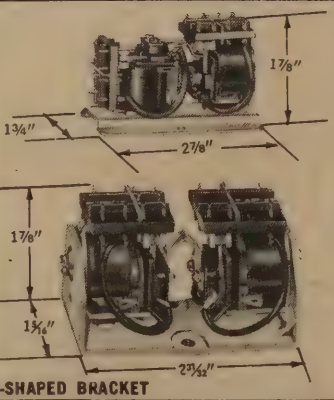


Further savings are available when above Series relays are purchased in bulk packs of 50 units. Relays are supplied nested in new convenient "form fitted" asembly line trays . . . one package of 50 — $76.50 ea.; 2 and up — $67.00 ea.

SERIES 1240 - 1245

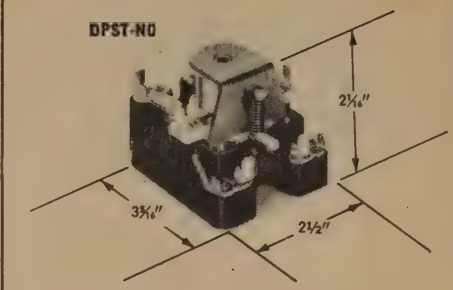
NEW SMALL, EFFICIENT MEDIUM POWER RELAY — 10 AMPERE

Highly efficient relay for communications, automation, remote control switching circuits and laboratory applications. All terminals are solder lug type and molded in phenolic panel block for coils as well as contacts. Barriers in panel block raised to meet U/L over-surface spacing; U/L insulation throughout. Contacts rated 10 amps at 60 Hz, 120 VAC, non-inductive load. Mounting: Single mounting hole, 6-32 tap. Shipping weight, 2.5 oz.



SERIES 2600U - 2605U

25 AMPERE POWER RELAY



New line of power relays with double pole double throw contacts rated at 25 amperes. Inverted coil construction protects armature and contacts from inadvertent mechanical damage or electrical shorting. Series 2600U-DPDT-AC coils are rated for continuous duty at 240 VAC, with 75% power factor; operating power requirement is 9.5 volt amperes, 60 Hz. Series 2600U and 2605U have easily accessible screw type terminals as pictured; also available are ¼" AMP quick connect terminals as pictured on series 2620U and 2625U. (Purchase 2600 — Q.C. terminal kit for easy "do-it-yourself" conversion). "Press to Test" armature lever makes for convenient manual circuit testing. Recessed SPDT auxiliary switch as illustrated is not included but is simple to mount and may be purchased separately if needed; auxiliary switch has solder lug blade tails and is rated for 10 ampere operation. These new 25 ampere power relays are very compact with a shipping weight of only 8 ounces. For mounting there are two .196" diameter holes in the base; these are located on 1 7/8" centers.

U-SHAPED BRACKET

SERIES 2620U - 2625U

25 AMPERE POWER RELAY

Compatible line of power relays with double pole single throw contacts (normally open). Same inverted coil construction as for 2600U and 2605U. Important note: Series 2620U and 2625U are manufactured with the easily accessible screw type terminals as pictured on series 2600U and 2605U. The ¼" AMP quick connect terminals pictured here are available in the 2600 Q.C. terminal kit for easy "do-it-yourself" installation. Same "Press to Test" armature lever as for 2600U and 2605U. Auxiliary switch may be added if desired. Overall dimensions, shipping weight and mounting provisions are identical to the compatible DPDT units of the 2600U and 2605U series.

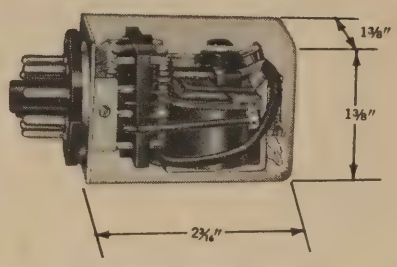
GUARDIAN® ELECTRIC ENCLOSED RELAYS

8 pin for DPDT 11 pin for 3PDT

SERIES 1210 - 1215

ENCLOSED PLUG-IN RELAY — 10 AMPERE



A powerful and economical relay enclosed in a transparent, lightweight Lexan case which has high impact strength, is unaffected by weather, and is resistant to temperatures of 200°F. Relay available with 8 pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated for 10 amps at 60 Hz, 120VAC non-inductive load. Shipping weight, 3.5 oz.

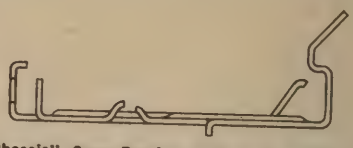
SERIES 1210N



ENCLOSED PLUG-IN AC RELAY WITH BUILT-IN NEON LAMP TO INDICATE CIRCUIT FAULTS — 10 AMPERE

This plug-in relay utilizes a miniature neon lamp connected across coil terminals. The lamp lights each time the coil is energized, or indicates a circuit fault when lamp is "dark". Ideal for detecting circuit faults in relay banks, mass arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Available with 8 pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated 10 amps at 120VAC 60 Hz, non-inductive load. Shipping weight, 3.5 oz.

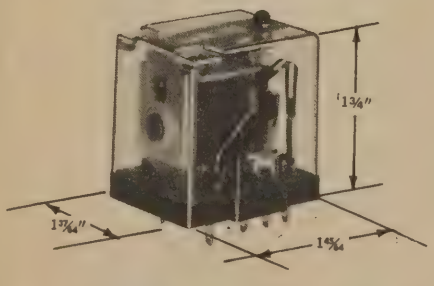
SERIES 1220 AC — 1225 DC



"Above Chassis" Snap Bracket accurately positions relay for quick connects or soldering.

Modern design of this relay has become the standard of the industry. Series 1220 and 1225 are reduced in height and cost by eliminating the radio-type plug and all the wiring between the relay and the plug. These series use the terminal panel itself as the male plug. Famous "UNI-GUARD" continuous-loop moving blades eliminate soldered connections. Cover snap-locks in place with a flush fit that guards against shorting. Universal terminals function as solder-lug, .110" quick connect, or socket plug-in. Mounting bracket for above chassis installation included with each relay. Contacts will safely switch 10 amperes at 120 VAC non-inductive in most applications and are U/L approved at 7 amperes.

U/L Recognition File #E-23524.

SERIES 1220M AC - 1225M DC

MANUAL RESET RELAY

Basic size and cost advantages of the Series 1220 AC and 1225 DC are obtainable off-the-shelf in a manual reset version. Height and cost are reduced through the elimination of the radio-type octal plug and the wiring between the relay and the plug. Unit is built to meet U/L requirements and features the "UNI-GUARD" continuous-loop moving blades. Double pole double throw contacts transfer when coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts re-transfer only when manual reset button is pressed.

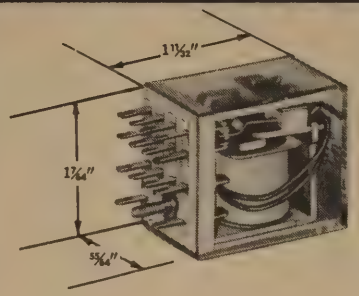
GUARDIAN® ELECTRIC ENCLOSED RELAYS



SERIES 1220/1220

ENCLOSED INTERLOCK

For an enclosed interlock or electrical reset relay the Guardian Series 1220/1220 has all the mounting and cost advantages of the Series 1220 and Series 1225. Double pole double throw contacts on relay transfer when relay coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts re-transfer **only** when interlock (reset) magnet is energized. Contacts are rated for 10 amperes at 120 VAC non-inductive.

Guardian No.	Coil Voltage	Coil Res.	Cont. Comb.	Net ea. 1-24
IR-1220/1220-2C-24A	24A	54	DPDT	$13.75

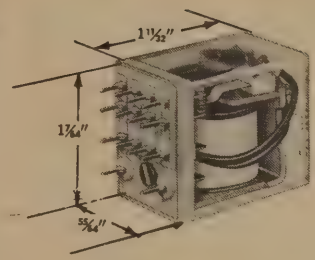
IR-1225/1225-2C-24D	24D	300	DPDT	13.75

SERIES 1310 - 1315



LONG LIFE 4PDT, 5 AMP — MINIATURE RELAY

4PDT . . . 5 amp Plug-In Relay available AC or DC. Contacts rated 5 amps at 30VDC or 120VAC resistive. Heat resistant, Lexan cover. Life in excess of 100 million operations. Weight: 1⅛ oz.

U/L Recognized File #E-23524

Guardian No.	Coil Voltage	Net ea. 1-24
1310-4C-6A	6AC	$5.00
1310-4C-12A	12AC	5.00
1310-4C-24A	24AC	5.00

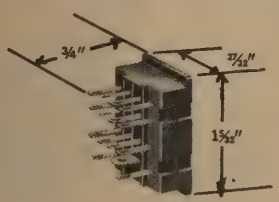
1315-4C-24D	24DC	4.30
1315-4C-110D	110DC	4.85

NOTE: For motor load applications, inquire about cadmium oxide contacts available on Series 1310-1315 through distributors, with prompt delivery from Guardian stock upon special order.



SERIES 1310P - 1315P

MINIATURE RELAY WITH PRINTED CIRCUIT TERMINATION

4PDT . . . 5 Amp Plug-In Relay available AC or DC. Contacts rated 5 amps at 30VDC or 120VAC resistive. Heat resistant Lexan cover. Life in excess of 100 million operations Weight: 1⅛ oz.

Guardian No.	Coil Voltage	Net ea. 1-24
1310P-4C-6A	6AC	$5.00

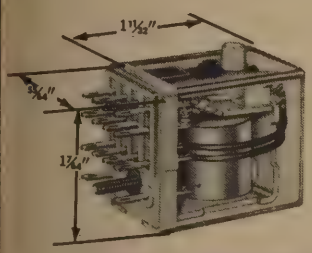
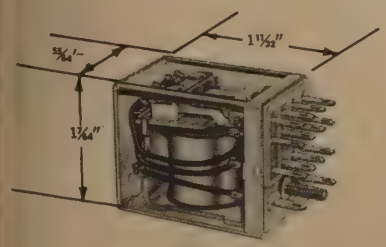
NOTE: For motor load applications, inquire about cadmium oxide contacts available on Series 1310P-1315P through distributors, with prompt delivery from Guardian stock upon special order.



SERIES 1310 SOCKET

Select either the 1310-1 ST Series Relay Socket with solder terminals or the 1310-2 PC Relay Socket with printed circuit terminals for mounting your miniature relays. Panel cutout for socket should measure 1.015" x .858" with .025" radii at all four corners.

1310-1 ST Series Relay Socket (SOLDER TERMINALS) ..... 60¢ ea.



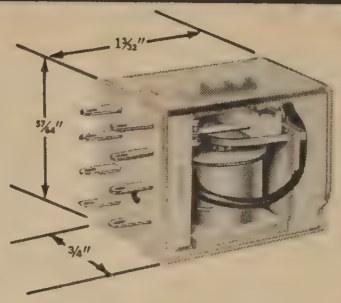
1310-2 PC Series Relay Socket (PRINTED CIRCUIT) ..... 60¢ ea.

SERIES 1310B - 1315B PUSH-TO-TEST RELAY

The same basic characteristics, size and cost advantages of the Series 1310-1315 relays, now available off-the-shelf in a "push-to-test" version. This 4PDT, 5 amp miniature relay is equipped with a readily accessible, insulated button which provides for checking relay and circuit performance without applying voltage to the relay coil. Weight: 1⅛ oz.

Guardian No.	Coil Voltage	Net ea. 1-24
1310B-4C-120A	120AC	$5.80
1315B-4C-24D	24DC	4.90
1315B-4C-110D	110DC	5.45

SERIES 1310N - 1315N



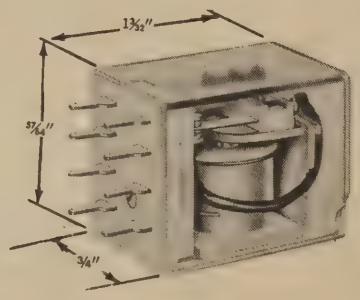
ENCLOSED, LONG LIFE MINIATURE PLUG-IN AC OR DC RELAY WITH BUILT-IN NEON LAMP TO INDICATE CIRCUIT FAULTS

This plug-in relay utilizes a miniature neon lamp connected across the coil terminals. The lamp glows each time the coil is energized, or indicates a circuit fault when lamp fails to glow upon circuit energization. Ideal for detecting circuit faults in relay banks, mass arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Relay is 4PDT with 120VAC operating coil. Contacts rated at 5 amps at 30VDC or 120VAC resistive. Heat resistant Lexan cover. Weight: 1⅛ oz.

Guardian No.	Coil Voltage	Cont. Comb.	Net ea. 1-24
1310N-4C-120A	120AC	4PDT	$5.80
1315N-4C-24D	24DC	4PDT	4.90
1315N-4C-110D	110DC	4PDT	5.45

GUARDIAN® ELECTRIC ENCLOSED RELAYS

NEW



SERIES 1330 - 1335

NEW LOW COST DPDT PLUG-IN RELAYS FOR LARGE CONTROL CAPACITY IN A SMALL SIZE

Compact new DPDT . . . 5 amp Plug-In Relay available AC or DC. Ideal for circuitry found in business machines, photocopy equipment, computers, appliances . . . wherever you need reliable control with economy of space and cost. Contacts rated 5 amp at 30VDC or 120VAC resistive. Heat resistant Lexan cover. Weight: ¾oz.

Guardian No.	Coil Voltage	Coil Res.	Net ea. 1-24
1330-2C-6A	6AC	15	$3.80

SERIES 1350PC - 1355PC

PRINTED CIRCUIT RELAYS 2PDT SWITCHING

For low power solid state circuitry. All terminals on .1" grid spacing for standard printed circuit board. Solders right on PC board. Conforms to U/L requirements for Office Appliances and Business Equipment. 1 watt normal power . . . 3500 ohms coil resistance (120 VAC - 60 Hz). Mechanical life in excess of 10 million operations. 5 amp resistive 120VAC 60 Hz contact rating. DPDT switching. Weight: 1 oz.

Guardian No.	Coil Voltage	Net ea. 1-24

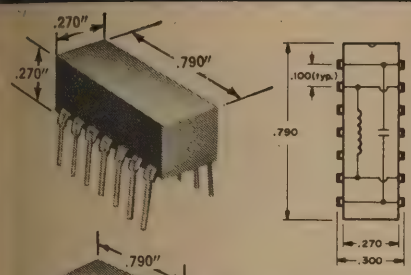
SERIES 1330 SOCKETS

Select either the 1330-1ST Series Relay Socket with solder terminals or the 1330-2PC Relay Socket with printed circuit terminals for mounting your miniature relays. Panel cutout for socket should measure .759" x .830" with .025" radii at all four corners. Recommended for .031" to .062" thick chassis.

1330-1 ST Series Relay Socket (Solder Terminals) ..... $.50 ea.

1330-2 PC Series Relay Socket (Printed Circuit) ..... $.50 ea.

SOLID STATE RELAYS SERIES 6100 - 6300



Universal AC or DC control voltage with complete circuit isolation from load switching circuit. Externally adjustable pull-in voltage level from 80-130 volts AC or DC, with close differential between pull-in and drop-out where accurate voltage sensing is required. Control of high inrush lamp, inductive or normal resistive loads from 10 ma to 3 amps. Internal filtering prevents random turn-on of "off" contacts.

"O" - Designates Octal Plug
"T" - Designates .110 QC base

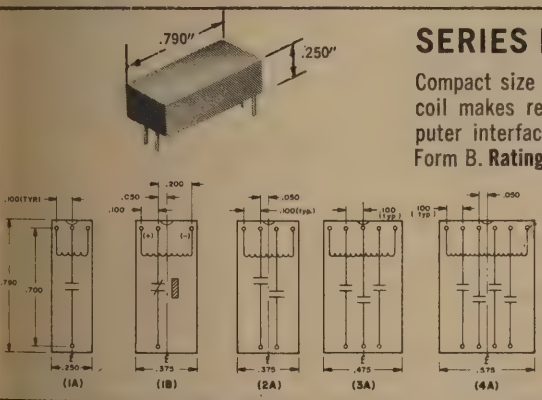
GUARDIAN® CALIFORNIA REED RELAYS

SERIES MDR MINI REED RELAYS

Compatible with dual-in-line integrated circuits. Terminals can be inserted into the same PC board as a 14-terminal dual-in-line IC. Operating sensitivity of the 5-volt DC coil makes it compatible with DTL and TTL logic families: has must-operate value of 3.75 volts at 25°C. **Contacts:** 1 Form A. **Contact Ratings:** 250 mA with 500 mA carry or maximum voltage of 28 VDC at 3 watts. **Contact Resistance:** 200 milliohms max. Breakdown Voltage: 200 VDC minimum. **Capacitance:** 0.25 pF typical. **Operate Time:** 0.350 msec typical, including bounce. **Release Time:** 0.025 msec typical. **Insulation Resistance:** 10^{10} ohms. **Temperature:** −55° to +85°C. **Terminals:** spaced .100".



Guardian No.	Nominal Voltage VDC	Cont. Comb.	Coil Res.	Net ea. 1-24
MDR-1A005	5	1A	500	$5.35
MDR-1A006	6	1A	500	5.35
MDR-1A012	12	1A	1400	5.35
MDR-1A024	24	1A	3600	5.35

SERIES MDX MINI REED RELAYS

Guardian now offers a series of reed relays that are compatible with DTL and TTL logic families (5VDC). The relays can be inserted into the same printed circuit board as a 14 terminal dual-in-line IC. **Contacts:** 1A, 1B or 2A. **Ratings:** 250mA (carry 500mA); 28VDC, 3 watts maximum. **Operate Time:** 0.350 msec typical, including bounce. **Release Time:** 0.025 msec typical. **Insulation Resistance:** 10^{10} ohms. **Temperature:** −55° to +85°C. **Pins:** .023" dia., .125" long.

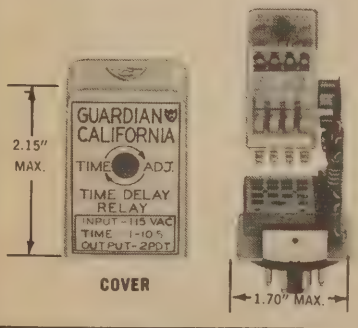
ERR-1C024	24	1C	1200	4.90

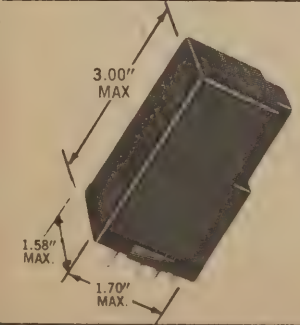
MET SERIES TIME DELAY



The MET Series of Time Delays are designed to replace many expensive units now on the market. They offer close tolerance repeatability at a low price. Designed for on-operate and on-release, with a range of .5 to 300 seconds, these low cost Time Delays provide a DPDT relay output of 10 amp resistive, 120 VAC, 50-60 Hz and operate on inputs of 120 VAC, 50-60 Hz, 24 VAC, 50-60 Hz or 24 VDC, polarity protected. These new Time Delays feature accuracy of ±10% of nominal setting over voltage and temperature range, repeatability to 1% within fixed conditions, a single turn potentiometer and time delays of .5 to 100 and 100 to 300 seconds over a temperature range of 0°C to 55°C.

Guardian No.	Volts	Delay Range (Sec.)	Net ea. 1-24
MET-O-100-24A	24 VAC	.5 to 100	$18.00
MET-O-300-24A	24 VAC	100 to 300	19.10
MET-O-100-120A	120 VAC	.5 to 100	17.60
MET-O-300-120A	120 VAC	100 to 300	19.10
MET-O-100-24D	24 VDC	.5 to 100	18.00
MET-O-300-24D	24 VDC	100 to 300	19.10
MET-R-100-24A	24 VAC	.5 to 100	26.20
MET-R-300-24A	24 VAC	100 to 300	26.90
MET-R-100-120A	120 VAC	.5 to 100	25.50
MET-R-300-120A	120 VAC	100 to 300	26.25
MET-R-100-24D	24 VDC	.5 to 100	26.20
MET-R-300-24D	24 VDC	100 to 300	26.90

O in part number indicates delay on operate, R delay on release.

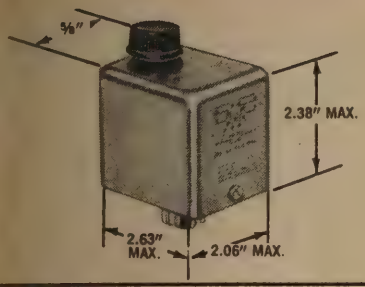


BDT SERIES TIME DELAY

A new Time Delay with unusual features which include operation on high or low line, replaceable electro-mechanical relay, repeatability, temperature stability and small size. The Time Delay incorporates all silicon transistor circuits that operate over a wide input range of 75-125 VAC, 50-60 Hz and draw only 5 ma prior to time out. 24 VDC units also available. Enclosed in a standard relay housing, terminated with an octal plug (8 pin), they are available with time delay periods from 1-10 to 10-60 seconds, adjustable. BDT Time Delays operate in the most severe industrial applications. The solid state circuit is immune to most transient noise found on commercial power lines. Voltage up to 2500 volts peak (short duration) can be tolerated. In the area of machine control, where large numbers of control cycles are expected, the BDT offers another advantage, ability to replace the internal relay. The solid state timing control has the minimum capability of 5 x 10^7 operations under normal conditions with 5 amp DPDT relay output.

Guardian No.	Volts	Delay Range (Sec.)	Net ea. 1-24
IR-BDT-O-10-120V	120 VAC	1 to 10	$17.10
IR-BDT-O-60-120V	120 VAC	10 to 60	17.60
IR-BDT-O-10-24V	24 VDC	1 to 10	16.90
IR-BDT-O-60-24V	24 VDC	10 to 60	17.10

SERIES TD TIME DELAY



The most accurate, compact time-delay relay available from stock. Adjustable delays frsom 1 to 180 seconds. 15 turn potentiometer provides high adjustment resolution. Accurate to 5% of nominal setting over complete temp. and voltage range. Repeatability, 2% after line interruption of 50 MS. Delays on attract. 3PDT contacts rated at 10 amps resistive.

Guardian No.	Volts	Delay Range (Sec.)	Net ea. 1-24
TD-33C15-24D	24 VDC	1 to 15	$24.20
TD-33C60-24D	24 VDC	10 to 60	25.19

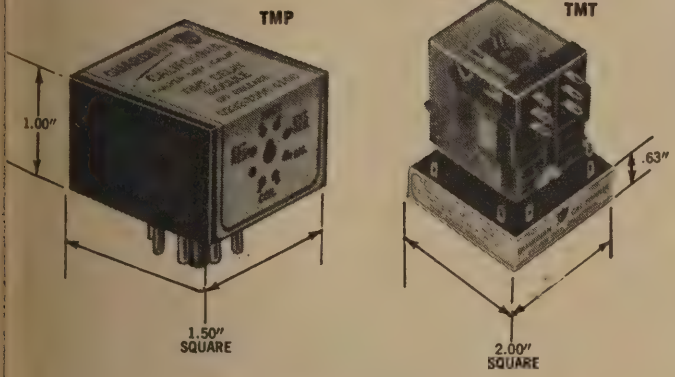
GUARDIAN® CALIFORNIA SOLID STATE CONTROLS



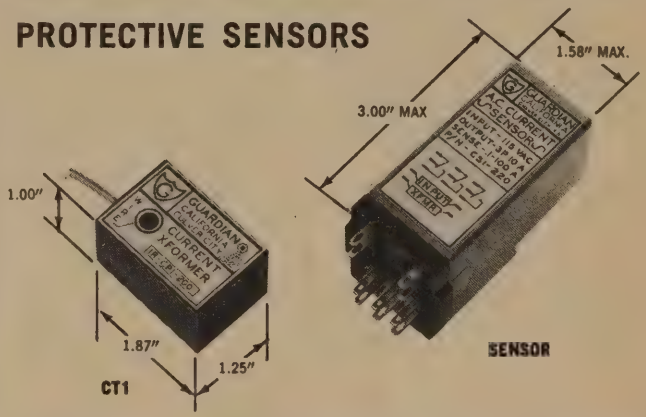
TDO SERIES TIME DELAY

Series TDO incorporates many features of more expensive units, but is most economical, offering contacts rated at 5 amps, DPDT, 120 VAC with adjustable delay of 0.5 to 30 seconds on attract with a ten turn potentiometer. Repeatability is within 5% after a line interruption of 100 milliseconds. Standard unit available is 120 VAC.

Guardian No.	Volts	Delay Range (Sec.)	Net ea. 1-24
TD062C30-120A	120 VAC	.5 to 30	$16.32

TMP & TMT SERIES TIMING MODULES

Series TMP/TMT Time Delay Modules are available in "on operate" and "on release" configurations with two time delays and three standard input voltage ranges. Time delay is externally adjustable within two ranges from ½ to 100 seconds and 100 to 300 seconds. Repeatability is ±1% under normal conditions. Life expectancy is one million cycles. Standard input voltages are 24 VAC, 120 VAC and 24 VDC. TMP is terminated in an octal plug for quick mounting and remote control of relay and other switching devices. The TMT "Flat Pack" package was designed to accept Guardian relays mounted to it, or to allow stacking of modules for extension of timing periods, or direct installation into a printed circuit board.



Guardian No.	Volts	Time Range Sec.	Net ea. 1-49
IR-TMT-O-100-24D	24 VDC	.5 to 100	$11.59
IR-TMT-O-300-24D	24 VDC	100 to 300	14.76

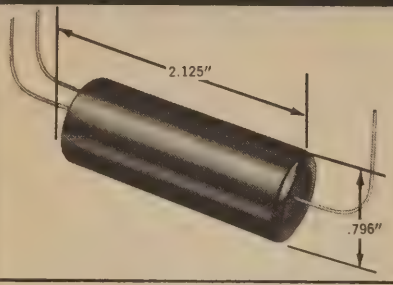
O in part number indicates delay on operate, R delay on release.

PROTECTIVE SENSORS

A complete line of industrial sensors is available from GUARDIAN including 3-phase (IR-AV2), Close Differential (IR-VS3), Over-Voltage (IR-VS1), Under-Voltage (IR-VS2), 4 wire Phase Sequence (IR-PR1), Adjustable Frequency (IR-FS1) and AC Current Sensors (CS1 Sensor with CT1 XFormer). These sensors are bi-products of designs for military application with solid state networks. The relay is 3PDT 10 amps resistive with 24VDC, 24VAC or 120VAC, available. Mounting is by socket, chassis mount or directly into a printed circuit (110). Temperature range is from 0°C to +50°C. Life is 100,000 operations minimum and protection for transient voltages is to 600 volts for the 3 phase model, 2500 volts for all others. All units come with a dust cover enclosure except the CT1 series which is a transfer molded part.



Guardian No.	Nominal Input	Current Sensing Range	Net ea. 1-24
IR-CS1-220	90-125 VAC, 50-60 Hz		$31.20

GUARDIAN® CALIFORNIA SOLID STATE CONTROLS

GU SERIES INLINE TIME DELAY

A new solid state Inline Time Delay designed for applications where low cost is a consideration but not at the sacrifice of quality. The GU Series is available in 12, 24 and 110 VDC in two time ranges: .1 to 10 seconds and 2 to 300 seconds. Accuracy is ±10% of setting with operating temperature range of +10° to +40°C. Termination is by 1⅞″ axial leads, delay on operate.

CSR SERIES SOLID STATE HYBRID RELAYS

Guardian introduces a new line of Solid State Hybrid relays capable of switching up to 15 amps with an SPST output. Voltage input can be logic level 5 VDC at 10 mils or 120VAC, output of 120 AC or 240 AC. 50/60 Hz. The relay features a reed relay input control for isolation. Output switching is Solid State for long-life, arc-less switching which offers a hi gain, compact, rugged switching control for varied industrial and commercial application. Terminations are .250″ Faston with single screw mounting.

LEVEL DETECTORS

A new, inexpensive Voltage Level Detector with unusual operating characteristics is now in production. These molded modules incorporate circuits comprised of silicon semiconductor devices to form a peak detecting voltage differential amplifier, signal amplifier and a solid state output switch suitable for driving a number of GUARDIAN® relays. The unit's sense level is adjustable (either fixed or variable) over ranges of 85-135 VAC, 50-60 Hz, 20-30 VAC, 50-60 Hz, 20-30 VDC, 180-250 VAC, 50-60 Hz by external resistance. This broad adjustment range permits operation as either an under or over level detector. Two units may be used to form band pass or pedestal level sensing. When used with GUARDIAN® CALIFORNIA TMT/TMP timing modules, they provide inexpensive time delayed voltage detection systems that allow them to ignore normal line fluctuations. Transient suppressed, they will withstand 2500 V peak (short duration) without damage or malfunction. On DC units, transient protection is 600 volts.

Guardian No.	Volts	Net ea. 1-24

LDP-100-24D	24 VDC	17.55

SLS SOLID STATE LOGIC STEPPER

The SLS 100 Series Solid State Steppers are the only power solid state steppers to accept either high level or logic level inputs with high noise immunity for industrial applications. The output of each step is a 120 VAC 2½ amp switch. They are modularly constructed so that many configurations can be accomplished from stacked modules. Standard "off the shelf" models have ten or twenty steps. Units may be obtained with pulsers to make them self-stepping steppers. They can be cascaded or paralleled to perform complex switching and control functions. GUARDIAN® CALIFORNIA's new Steppers are built for operation on input power of 120 VAC, 50-60 Hz or 400 Hz and 24 VDC. All solid state construction offers the advantages of mechanical noise free operation and, under proper operating conditions, practically unlimited life.

Guardian No.	Volts	Steps	Net ea. 1-24
SLS110-2A111*	120 VAC	10	$130.00
SLS110-1A211*	24 VDC	10	112.00

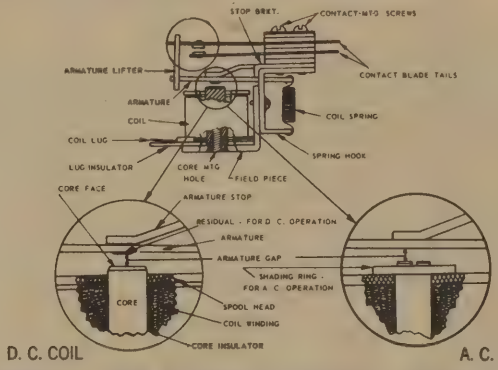
GUARDIAN® ORDERING INFORMATION

ALL PRODUCTS IN THIS CATALOG are immediately available from any Guardian Distributor at factory prices.



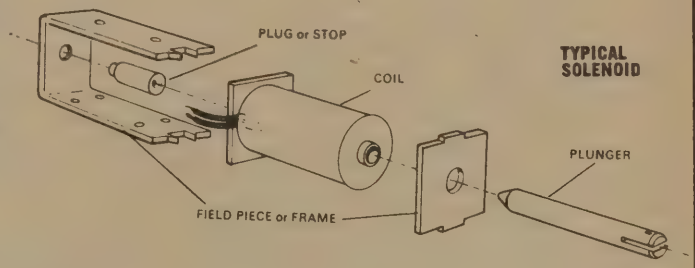
CATALOG PRICES: Contact your Guardian Distributor for lower prices on your quantity orders.

REMEMBER: Your Guardian Sales Engineer and your Guardian Distributor are qualified and eager to help you select the appropriate product for your specific applications.

CHECK LISTS FOR ORDERING relays, solenoids and steppers are included below. Each list indicates the factors you should consider and evaluate when selecting an appropriate product. When ready to order, your Guardian Distributor needs only the Guardian Number from this catalog to give you immediate delivery.

RELAY ORDERING CHECK LIST:

1. GUARDIAN NUMBER
2. TYPE OF RELAY: on/off, latching, clapper, etc.
3. AC or DC
4. COIL VOLTAGE and CURRENT
5. CONTACT COMBINATIONS: SPDT. DPDT. etc.
6. CHARACTERISTICS OF CONTACT LOAD: AC or DC, inductive or non-inductive, voltage, current values
7. APPROPRIATE SIZE
8. OPEN or ENCLOSED
9. TYPE OF TERMINATION
10. U/L or CSA RECOGNITION or CONSTRUCTION



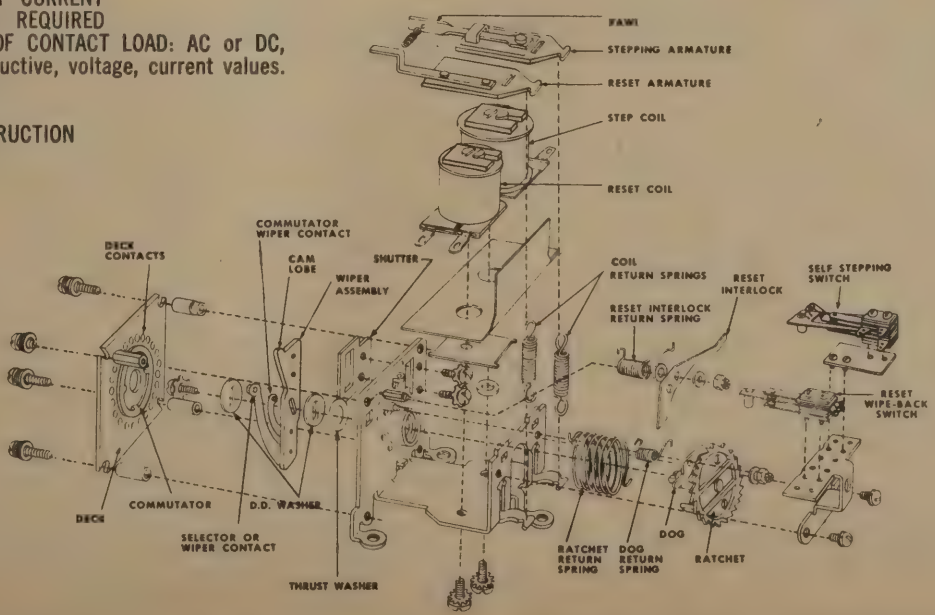
TYPICAL RELAY

SOLENOID ORDERING CHECK LIST:

1. GUARDIAN NUMBER 2. TYPE OF SOLENOID: pull type, push type, solenoid switch, tubular, etc. 3. AC or DC 4. COIL VOLTAGE and CURRENT 5. DUTY: continuous or intermittent 6. STROKE LENGTH 7. WORK REQUIREMENT: pull or push in ounces 8. APPROPRIATE SIZE 9. U/L or CSA CONSTRUCTION

APPLICATION CONSIDERATIONS:

- INTERMITTENT DUTY SOLENOIDS are generally stronger and will do more work in terms of "lift." However, they should not be energized for more than 5 consecutive minutes or be permitted to rise more than 85°C above 24°C ambient without giving them sufficient time to cool between operation cycles.
- CONTINUOUS DUTY SOLENOIDS are designed with a higher coil resistance so they will not rise more than 85°C above 24°C ambient temperature when operated within maximum lift and stroke ratings shown in this catalog.
- LAMINATED SOLENOIDS are available for AC operation only.
- TUBULAR SOLENOIDS are available for DC operation only.
- BRACKETS FOR TUBULAR SOLENOIDS are shipped loose.
- FOR PUSH TYPE SOLENOIDS the lengths of the push rods are equal to the maximum stroke length shown in this catalog.



TYPICAL SOLENOID

STEPPER ORDERING CHECK LIST:

1. GUARDIAN NUMBER
2. TYPE OF STEPPER: continuous rotation, electrical reset, etc.
3. AC or DC
4. COIL VOLTAGE and CURRENT
5. NUMBER OF STEPS REQUIRED
6. CHARACTERISTICS OF CONTACT LOAD: AC or DC, inductive or non-inductive, voltage, current values.
7. APPROPRIATE SIZE
8. LIFE EXPECTANCY
9. U/L or CSA CONSTRUCTION

APPLICATION CONSIDERATIONS

- ALL CONTACTS are 1½ amp.
- SEE STEPPING CONTROLS INTRODUCTORY DATA on page 8 of this catalog.

TYPICAL STEPPER

TIME DELAYS/SENSORS
THERMOSTATS/FLASHERS

G·V CONTROLS SB
DIVISION OF SOLA BASIC INDUSTRIES

ERTION THERMOSTATS — SERIES D-8

D8 Thermostats are designed to operate under the most demanding requirements. Response to temperature changes is rapid as the shell of the D8 is the sensing element and is in direct contact with the medium. Thermostats can be applied in both liquid and air sensing applications. These versatile thermostats are used as temperature limiting and controlling devices in electronic systems, computers, communications equipment, vending machines, etc.

TECHNICAL DATA:

Operating Range: 0 to 150°C (32 to 300°F)

Setting Tolerances: ±5°F; customer adjustable*

Dielectric Strength — 1250 volts RMS between contacts and shell.

Material and Finish — Standard shells are of brass, unplated.

Rate of Response — Time constants, or lag factors of these thermostats in various media are as follows:

Water, moving 0.4 sec	Air, (450-550 FPM) 40 sec.
Water, still 1.0 sec.	Air, (250-300 FPM) 60 sec.
Metal block 10-20 sec.	Air, still 180 sec.

Response is approximately the same as that of a laboratory thermometer.

* Contact factory for special instructions.

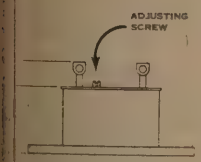
B. Standard units are shipped with factory settings as indicated.
C. Available with flange (-F) or bracket (-B) for mounting.

RFACE MOUNTED THERMOSTATS — SERIES VE

VE crystal can size thermostats are ideally suited for applications requiring a small, accurate temperature sensing device. The applications include temperature monitoring of heat sinks, power supplies and other vital elements in computers, electronic systems, idustrial processes, etc.

TECHNICAL DATA:

Operating Range: 0 to 150°C (32 to 300°F)



Setting Tolerances: Field setting to ±2°F is feasible

B. Shaded entries available from distributor stock.
C. For sealing adjustment screw after setting, an epoxy resin is recommended.

MMERCIAL "QUICK-CONNECT" TIMING RELAYS — SERIES ET

ET Relays (quick connect) are designed for industrial and commercial applications requiring pilot-duty, low cost, time delay devices. Simplified installation requires only two (2) screws and connections with push-on terminations. ET Relays can be mounted in any position, thereby simplifying inventory requirements. Quick-connect terminals provide for easier equipment service and installation time can be maintained at a minimum.

Applications include; computer systems, copying machines, residental and commercial microwave ovens, air conditioning systems, refrigeration control systems, etc.

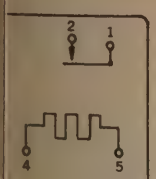
TECHNICAL DATA:

Delay Range: 2-180 Seconds

Operating Tolerance: ±20% at rated voltage

Operating Temperature: 80°C (176°F) Maximum

Standard Heater Voltages: 24 and 115V. AC/DC



Contacts: SPST; N.O. and N.C.

Contact Ratings: 2A Resistive to 115 VAC
1A Resistive to 28 VDC

Power Requirement: 2.5 Watts

Contact Life: 100,000 cycles

Connections: Push-on terminals

TIME DELAYS/SENSORS THERMOSTATS/FLASHERS

COMMERCIAL PLUG-IN TIMING RELAYS — SERIES DT

DT Red Line Relays are high performance thermal relays, suitably packaged for industrial and commercial applications. These include computers, copying machines, telephone systems, commercial and industrial ovens, etc., where performance reliability is essential.

TECHNICAL DATA:

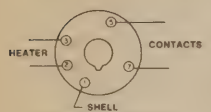
Delay Range: 2-180 Seconds*

Operating Tolerance: ±15%, at rated voltage, slightly higher below 10 seconds.

Operating Temperature: 85°C (185°F) Maximum

Standard Heater Voltages: 24 and 115 VAC/DC

Contacts: SPST; N.O. and N.C.



Contact Ratings: 5A Restive to 125 VAC
0.7A Resistive to 48 VDC

Power Requirement: 4 Watts

Contact Life: 100,000 cycles

Connections: Standard octal socket

* Similar units available 0.5 — 2.0 seconds.

BASELINE™ TIMING RELAYS / 9 PIN MINIATURE — SERIES BL

Baseline Thermal Timing Relays are a new family of standard commercial units available only from G-V distributors. They are designed for applications where low cost and long life are major considerations. Baseline relays are completely interchangeable with competitive products of similar type and pin configuration. The metal shell offers protection against damage in handling.

Baseline relays are ideal for service replacement programs, prototype work, hobby kits, etc., where low cost time delay fuctions are required.

TECHNICAL DATA:

Delay Range: 2-120 Seconds

Operating Tolerance: ±25% at rated voltage

Operating Temperature: 80°C (176°F) Maximum

Standard Heater Voltages: 6.3, 26 and 115 V. AC or DC

Contacts: SPST; N.O. and N.C.

Contact Ratings: 2A Resistive to 115 VAC
1A Resistive to 28 VDC

Power Requirement: 2.5 Watts

Dielectric Strength: 1250 volts, RMS between contacts and shell

Connections: Standard 9 pin miniature socket

IME DELAYS/SENSORS
IERMOSTATS/FLASHERS

G•V CONTROLS SB
DIVISION OF SOLA BASIC INDUSTRIES

STANT-RESET TIMING ELEMENT — SERIES DM

Schematic shown is for N.O. load circuit.

DM Thermal Timing Elements are utilized when instant recovery of the operate mode is necessary after the timing period has been initiated. This function is achieved, by having the DM operate in conjunction with a customer provided DPDT magnetic relay. Refer to figure for typical circuit.

Areas of usage include; computers, telephone systems, machine tool control, combustion and refrigeration control systems, etc.

TECHNICAL DATA:

Delay Range: 0.75 to 360 Seconds
Operating Tolerance: ±15% at rated voltage, slightly higher below 5 seconds
Operating Temperature: 85°C (185°F) Maximum
Standard Heater Voltages: 6.3, 24, 48 and 115V. AC/DC
Load Contacts: SPST; N.O. and N.C.
Load Contact Ratings: 5A Resistive to 125 VAC
1A Resistive to 48 VDC
Power Requirement: 8 watts peak, 3 watts average excluding magnetic relay
Contact Life: 100,000 cycles at rated load
Mounting: Standard octal socket

STANDARD MODELS — Normally Open Contacts

NOTES: A. Models listed are supplied for N.O. load circuits.
B. Shaded entries available from distributor stock.
C. Request application bulletin from factory for complete technical data.

MMERCIAL FLASHERS — SERIES 902-C

IRING CONNECTIONS

902-C Flashers are accurate, reliable, solid-state devices with a relay output. They can be utilized in most circuits requiring a cyclic output. Applications include; alarm panels, annunciator systems, HI-LO priority alarm circuits, combustion and refrigeration indicating lights, safety warning lights, etc.

TECHNICAL DATA:

Contact Arrangement: SPDT (Relay Output)
Contact Ratings: 1A resistive @ 28 VDC or 115 VAC
Operating Power: 1 Watt max.
Effects of Voltage Variation: ±10% voltage variation will not vary flashing rate more than ±5%
Nominal On-Off Ratio: 50:50
Flashing Tolerance: ±20% at 72°F
Operating Temp. Range: 32°F to 158°F
Cover: Dust tight
Mounting: Standard octal socket
Weight: 6 oz. maximum

B. Shaded entries available from distributor stock.

LTAGE SENSING RELAYS — SERIES DS

IRING CONNECTIONS

DS Voltage Sensing Relays are thermal type limiting devices used to protect systems and equipment when voltage deviates beyond predetermined levels.

Applications include; communications equipment, emergency power systems, industrial process control, building operations monitors, etc.

TECHNICAL DATA:

Voltage Range: 6-150 volts AC or DC
Setting Tolerance: ±6%
Operating Temperature: 85°C (185°F) Maximum
Contacts: SPST; N.O. or N.C.
Power Requirement: 4 Watts Nominal
Contact Ratings: 3A Resistive to 150 VAC
0.7A Resistive to 48 VDC
Connections: Standard octal socket

130		√		√	DS-5158

DIMENSIONS — 2¾"H x 1$^{3}/_{32}$" Dia.

NOTE: Models listed are supplied with contact configurations and settings as indicated.

FLOW SENSORS — SERIES FS

FS Sensors, positioned in the air-stream, will continually monitor the air flow. If the velocity falls below the sensor setting, the contacts will open or close, depending on the switch configuration. Will reset automatically upon resumption of adequate flow.

Applications include, protection for commercial and military electronic equipment, computers, process control systems, etc.

TECHNICAL DATA:

Velocity Range: 250-1600 FPM
Response Time: 1-20 Seconds
Operating Temperature: 80°C (176°F) Maximum
Operating Voltages: 24 and 115 Volts AC/DC
Power Requirement: 2.5 Watts
Contacts: SPST; Open on loss of flow or Close on loss of flow
Contact Ratings: 2A Resistive 115 VAC
1A Resistive 28 VDC
Connections: 9 pin miniature socket

MINIATURE PLUG-IN *LOW PROFILE LOW COST*

(SERIES MKTR)

Despite its compact size this new totally enclosed, low cost, low profile miniature relay has not compromised the high quality of its progenitor the Series MK open relay. The low mounting profile (dust cover included) has been made possible by incorporating the frame of the relay with the connector-header. Thus a certain basic hardware has been eliminated resulting in important size reduction. Versatility is also assured since the standard terminals can be used with Amp snap-on connectors, printed circuits, or plug-in receptacles. Also available with studs for chassis mounting. Termination can be used for soldered connections. The plug-in-receptacle is true 10 ampere construction. Lugs can be used for either solder or snap-on connections.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* MKTR1A SPDT	$4.25	$4.65
	* MKTR2A DPDT	4.95	5.35

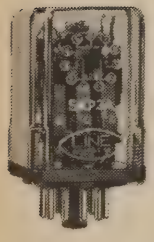
GENERAL PURPOSE RELAYS

NEW MINIATURE SENSITIVE RELAYS (SERIES SK) 60 MILLIWATTS PER POLE

Type SK

Type SKA



This entire series of SK type relays is identical in construction to our MK series miniature relays, with one essential difference —the special alloy used in pole and frame increases the magnetic flux many times thus making the relays very sensitive to very low power levels—only 60 milliwatts per pole.

SERIES SK OPEN TYPE 5 AMPS

NEW MINIATURE CRADLE TYPE RELAYS (SERIES JMR) AND (SERIES JMRB BIFURCATED)

The JMR is an imported miniature cradle type relay incorporating a unique reed hinge. The reed hinge eliminates the possibility of binding and wear, thereby providing exceptional long life.
All contact connections are molded directly through the base; the only solder connections in the relay are those to the coil.
The JMR features gold diffused, silver contacts which are suitable for low level as well as full rated 5 amp. loads. The relay is enclosed in a high impact polycarbonate housing and the relay base is black bakelite. All internal phonoelic spacers are baked and out-gassed prior to assembly, thereby assuring reliable operation under the most adverse conditions.

GENERAL PURPOSE RELAYS

MINIATURE 4-POLE RELAY
*** (SERIES JA)**

The series JA is a high quality, miniature 4PDT relay for AC or DC operation. The JA relay features nylon dust cover, gold flashed fine silver contacts rated at 3 amps. This imported relay features exceptional quality and rugged design to meet the most exacting requirements. It is excellent for computers, logic systems and data processing. Standard configuration features solder terminals and 3-48, 23/64" mounting stud. Can be used with our 92-79 solder lug socket or 92-80 P.C. socket (50c each)

	Voltage	Resistance	Nominal Power	Price
DC	6 VDC	40 OHMS	800 MW	$4.10
	12 VDC	160 OHMS	800 MW	4.10
	24 VDC	650 OHMS	800 MW	4.10
	48 VDC	2500 OHMS	800 MW	4.20
	110 VDC	10000 OHMS	800 MW	4.90
AC	6 VAC	10.5 OHMS	1.1 VA	$4.40

DIMENSIONS: 3-1/4 × 1-15/16 × 1-15/16

HEAVY DUTY RELAY OPEN TYPE (SERIES LG)

Open type relay, specifically designed for extremely heavy-duty applications. Standard Fine Silver load contacts are rated at 15 amps. with optional Silver Cadmium Oxide contacts where larger inrush loads are encountered. Loads are rated at 115/60 non-inductive. All load contacts are factory gold-flashed to prevent contact oxidation prior to use.

AC

MECHANICAL LATCH RELAYS

OPEN TYPE (SERIES RL)

Open type for use where a sustained relay closure is required, and current drain of a relay coil is to be eliminated. Incorporates two coils, one to close load contacts, the other to reset them. Requires only momentary electrical contact to operate or release. Provides positive mechanical latch, eliminating chatter during sustained relay closure.

HERMETICALLY SEALED RELAYS

PLUG-IN TYPE (SERIES HKP)

The Series HKP relay incorporates the basic MK frame into hermetically sealed plug-in configuration. All units are thoroughly vacuum baked and out-gassed and back filled with nitrogen before sealing. The HK series will fit any standard octal based receptacle and is in the classification of a general purpose relay.

PLATE CIRCUIT RELAYS 5 Amp

REED RELAYS — 3 STANDARD TYPES

In computer, data processing and guidance system development, design engineers are enthusiastically applying dry reed relays in place of switching diodes. The reasons: miniature profile—life expectancy exceeding 100,000,000 operations—less heat generated compared with switching diodes—3 millisecond operating time and very high resistance in the open contact stage.

To efficiently serve the growing demand for dry reed relays in these and other applications, Line Electric now stocks these 3 standard types for immediate delivery in prototype quantities.

NEW MINIATURE POWER RELAY (SERIES PF)

The PF Series Relays are especially designed for applications where limited space is a factor. This relay, although small in size, is ideally suited for heavy duty industrial control applications where long life and fast action are a requirement. The PF Relay is supplied with ¼" quick connect terminals on the contacts for ease of installation. Other type terminals are available upon request. Consult factory for details.

CONTACTS

Material ¼" dia. silver cadmium oxide gold flashed.
Contact Terminals ¼" quick connect. Pierced for soldering.

SOLID STATE TIME DELAY RELAY ADJUSTABLE PLUG-IN TYPE (SERIES VTL)

GENERAL DESCRIPTION

The essential difference between solid state electronic timers and other types is the absence of mechanical moving parts within the controlling circuit. For this reason they often require less installation space than the equivalent electro-mechanical models, while delivering longer performance.

Today the incorporation of solid state electronic time controls in original equipment is an indication of advanced engineering design, a strong factor in influencing preference for your company's products. We invite your inquiries.

The Series VTL Time Delay Relay provides an adjustable time delay between the closure of 115 VAC input voltage to the subsequent actuation of a set of SPDT load contacts.

TECHNICAL SPECIFICATIONS

The Series VTL Time Delay Relay has a setting potentiometer with slotted shaft and locking device for adjusting time delay

1. 115 VAC input.
2. Isolated load contacts SPDT.
3. Load capacity 10 amperes non-inductive rated at 115 VAC.
4. Terminals — standard 8 pin octal plug.
5. Temperature range — 30°F. to +120°F.
6. Power consumption 2.0 VA at 115 VAC.
7. Repeat accuracy ±5% of full scale at 115 ±4% VAC.

MODEL	MIN. SETTING	MAX. SETTING

AC or DC operation.
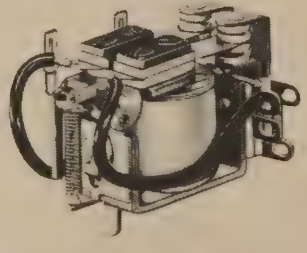
Crackproof, see through plastic dust cover.
SPDT, DPDT, 3PDT — 10 amps.



- Size: 2 1/8 x 1 3/8 x 1 3/8"
- Silver alloy, gold-flashed, contacts rated 10 amps at 115 volts AC or 32 volts DC, resistive load.
- Furnished with 8 or 11 pin std. octal plug.
- Rugged hinge-pin armature for long life and stability of operation.
- Weight: 3 oz. approx.

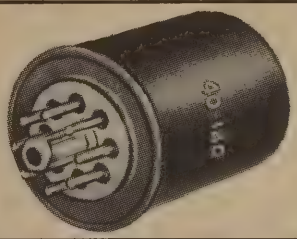
Magnecraft® general purpose relays

STOCK FOR IMMEDIATE DELIVERY

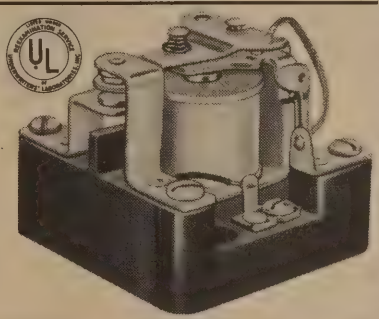
ass 88L latching relay

- or DC operation — 4PDT and 6PDT — 10 amps.
- ize: 3 x 1¾ x 1 13/16"
- ombination of two Class 88 Relays with interlocking latch-in evers mounted on a common base.
- ach armature latches when pulled in. Energizing one rmature releases or resets the other.
- ilver alloy, gold-flashed, contacts rated 10 amps at 115 volts C or 32 VDC resistive load.
- asy mounting with clearance holes for six #6-32 screws.
- ugged hinge pin armature for long life and stability of operation.
- eight: 6½ oz. approx.



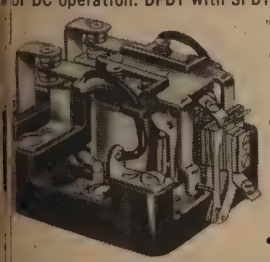
ass 88LCP enclosed plug-in tching relays — 4 PDT 10 amp

- or DC operation.
- ize: 2⅜ x 1¾ x 3 3/16"
- nclosure: Crackproof, see-through plastic dust cover.
- ounting: 20-pin octal style plug mates with std. mphenol 77-MIP-20 socket.
- eight: 8 oz. approx.



ass 88HP hermetically sealed ug-in relay

- or DC operation — DPDT or 3PDT — 10 amps.
- ize: 2 1/32 x 1 1/16 dia.
- ermetically sealed to afford maximum protection against severe mbient conditions.
- ilver alloy contacts, gold-flashed, rated 10 amps at 115 volts AC or 28 volts DC, resistive load.
- ounting: Standard 8 or 11-pin octal style plug.
- eight: 5 oz. approx.

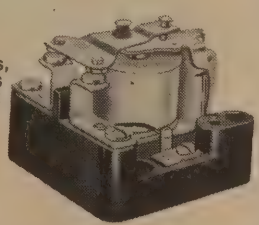


ass 99 heavy duty power relays, L listed

- or DC operation — 25 amps 1 HP.
- T, DPST-NO, and DPDT.
- ize: SPDT — 2½ x 2½ x 2 3/16", DPST-NO — 2½ x 2½ x 2⅜", DPDT — 3 3/16 x 2½ x 2⅜"
- versize silver alloy, gold-flashed contacts, rated at 25 amps t 115 VAC or 32 VDC, resistive load, or 1 HP, AC.
- eavy duty hinge-pin armature for long life and stability of peration. Screw type terminals and molded phenolic base.
- asy mounting: Two 3/16" diameter clearance holes on ⅞" centers.

ass 99/power relay ith aux. contacts

- or DC operation. DPDT with SPDT Aux. contacts.



- Size: 4 3/32 x 2½ x 2⅜"
- Basic Class 99 Relay, equipped w/SPDT Auxiliary Contacts.
- DPDT power contacts rated 25 amps or 1 HP, SPDT auxiliary contacts rated 5 amps at 115 VAC or 32 VDC
- Screw type terminals.

class 99D power relay

50 amps — SPST-NO-DM — 2 HP.

- Size: 2½ x 2½ x 2 3/32"
- AC or DC operation
- Oversize silver alloy, gold-flashed, contacts, rated at 50 amps at 115 VAC or 32 VDC resistive load, or 2 HP.

ass 99S space saver ower relay

amps — SPDT — 1 HP.

- Size: 2⅞ x 2 x 1 13/16"
- Power switching in small space.
- One #6-32 tapped mtg. hole and locating boss.
- AC or DC operation.
- Screw terminals.
- SPDT silver alloy, gold-flashed, contacts rated at 25 amps or 1 HP.

class 99SD space saver power relay

50 amps — SPST-NO-DM — 2 HP.

- Size: 2½ x 2 x 1 13/16"
- 50 amp switching in small space.
- Screw terminals.
- One #6-32 tapped mtg. hole and locating boss.
- AC or DC operation.

sistance Values ±10% at 25°C.
ltage Specified Relays pull in at 80% of nominal or less for DC lays and 85% of nominal or less for AC relays at 25°C.

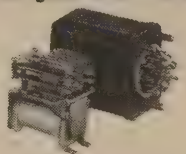
MAGNECRAFT® ELECTRIC COMPANY

Magnecraft® telephone type relays

IN STOCK FOR IMMEDIATE DELIVERY

class 33



Sub-miniature 11/16 x 1¼ x 1¼"

- DPDT — 4PDT, 3 amp contacts.
- Hinge pin assures long life.
- Telephone type switching versatility.
- Fast operate and release time.
- Rigid mount — Four 4-40 mtg. holes.
- Weight: 1 oz.

class 33HS

Miniature Hermetically Sealed
Hermetically Sealed to Afford Maximum Protection Against Severe Ambient Conditions.

- Size: 31/32 x 1 11/32 x 1 41/64"
- DPDT — 4PDT 5 amp contacts.
- Telephone versatility and reliability.
- High resistance to shock and vibration.
- Widely used in military and civilian equipment.
- #4-40 3 stud mtg. — 8 or 14 pin solder terminal header.
- Weight: 3 oz.

IN STOCK FOR IMMEDIATE DELIVERY

class 128

- Size: 2⅞ x 2⅝ x 1 7/16"
- SPDT RF switching silver alloy contacts.
- Rated 100 watts of RF power.
- Impedance matched to 50 ohms cable.
- Equipped with std. UHF connectors.
- VSWR 1.25: 1 max. from 0 to 500 MC.
- Operate Time: 25 ms. max.
- Long life hinge pin construction.
- Coaxial cavity, machined brass, with removable plug, for contact inspection.
- AC or DC operation.
- Release Time: 25 ms. max.
- 4-40 thd. — 4 mtg. holes.

CLASS 128 Coaxial Relay

CLASS 128 Coaxial Relay with 10 amp DPDT Aux. Contacts

*Resistance Values ±10% at 25°C.
†Voltage Specified Relays pull in at 80% of nominal or less for DC relays and 85% of nominal or less for AC relays at 25°C.
††Current Specified Relays pull in at Specified Value or less.

class 137MPC position-free mercury wetted reed relay

NEW!

Size: 1⅛ x 13/32 x ⅜
Contact Load Rating: 1 Volt-amperes max. at .100 amperes max. or 10 VDC max. resistive
Nominal Coil Power: 500 MW
Operate and Release Time: .5 millisecond average
Contact Bounce: None, with diode suppressed coil
Dielectric withstanding Voltage between Contacts: 500 VDC
Dielectric withstanding Voltage between Contacts and Coil: 500 VAC, RMS
Contact Resistance: 100 milliohms average
Typical Life at Rated Load: 20,000,000 operations; longer at reduced loads
Note: To Achieve Bounce-Free Operation Provide Diode Across Coil.

NEW Magnecraft® dual-inline all solid state relay

The Three-In-One Relay From Magnecraft

Switching — Latching — Timing

class 505QIC

SOLID STATE RELAY

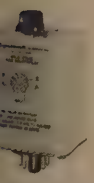
Size: .890 x .400 x .380
Contact Load Rating: 1 amp @ 30 VDC at 25°C Case, maximum at any type of load
Contact Combination: DPDT (2 form C)
Sensitive Input Impedance: 50,000 ohms
Switching Time
Operate Time: 50 microseconds max.
Release Time: 50 microseconds max.
Transfer Time: 20-35 microseconds
Isolation Resistance: 30 x 10^6 ohms, minimum
Contact Resistance: 500 milliohms, maximum
Typical Life: Greater than 1 billion operations at rated load

IN STOCK FOR IMMEDIATE DELIVERY

Stock Part No.	Must Operate Voltage	Must Release Voltage	Driver Supply Voltage (VDC) (MA)	†Contacts
W505QICX-1	2.5 VDC	1.1 VDC	3.6 @ 45	1 amp 30 VDC
W505QICX-3	9.0 VDC	4.5 VDC	12 @ 45*	750 MA 30 VDC

Price 1-9: $25.68 (for Both Part Numbers)

*To increase to 1 amp @ 30 VDC, merely connect in parallel a zener diode to pin 7 and 4, and connect a series limiting resistor to the driver supply.



†Pins 4 and 11 must be connected on the printed circuit, providing switching on the low noise negative ground bus.

NEW

Compact Size 2⅛ x 1⅜ x 1⅜"

CLASS 214CP

Now in the size of a general purpose relay, Magnecraft has developed a fully adjustable solid state time delay relay.

- Repeat Accuracy: ±5% at nominal voltage, 25°C.
- Contacts: DPDT, 5 amps at 32VDC or 115VAC, res.
- Steady State Current: 20 ma.
- Mode of Time Delay: Delay on operate.
- Convenient top screw driver time adjustment.
- Reset and Recycle Time: Typically 100 ms.
- Transient protection to twice input voltage for 8 ms.
- Enclosure: Molded dust cover.
- Mounting: Standard 8 pin octal style plug-in.
- Weight: 3 oz. approx.
- Polarity Protection (DC Models)

Stock Part No.	Contact	Input Volts	Timing Range	Price 1-9

(CSA Listed)

WMR-11

Compact units capable of handling loads nearly twice that of equal size ordinary armature type units. Hermetically sealed, mercury-to-mercury contacts. No contacts to pit, stick or corrode. Full 20 ampere rating (per pole) at 120 Vac with inductive or resistive loads.

Coil current at 120 V, 60 Hz:
WMR-1, -2, .042A WMR-11, .084A WMR-111, .120A

Dimensions (H x W x D):
WMR-1, 3½" x 1⅞" x 1¾" WMR-11, 4½" x 3" x 2"
WMR-2, 4" x 1⅞" x 1¾" WMR-111, 5" x 3¼" x 2¾"

Type	Description	1-9	10-49	50-99
WMR-1	Normally Open, SPST	$13.35	$11.68	$11.50
WMR-2	Normally Closed, SPST	13.90	12.16	10.95
WMR-11	2-Pole, Both N.O.	24.75	21.65	19.49
WMR-111	3-Pole, All N.O.	35.60	31.15	28.00

"WEM" series

35 AMPERES — 120 VAC
(UL and CSA Listed)

WEM-111

Rated 35A (per pole) at 120 Vac. Coil operating at 120 Vac 60 Hz: EM-1, EM-2, .050A; EM-11, .120A; EM-111, .200A.

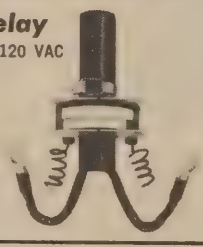
Dimensions (H x W x D):
WEM-1, 4½" x 2⅝" x 2⅜" WEM-11, 5⅜" x 3⅜" x 2½"
WEM-2, 5⅛" x 2⅝" x 2⅜" WEM-111, 6¼" x 4" x 3⅜"

WEM-1	Single Pole, N.O.	$15.10	$13.20	$11.88
WEM-2	Single Pole, N.C.	16.50	14.45	13.00
WEM-11	2-Pole, Both N.O.	29.20	25.52	23.00
WEM-111	3-Pole, All N.O.	42.40	37.10	33.37

"WHD" series

60 AMPERES — 120 VAC
(CSA Listed)

WHD-111



Type WHD load rated 60A for 120 Vac and 35A for 230 Vac, 60 Hz. per pole. Coils — 120 Vac 60 Hz.

Dimensions (H x W x D):
WHD-1, 5¼" x 4" x 2⅜" WHD-11, 5¾" x 4" x 2½"
WHD-2, 5¼" x 4" x 2⅜" WHD-111, 6¼" x 4" x 3⅜"

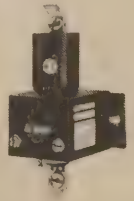
WHD-1	Single Pole, N.O.	$22.35	$19.50	$17.56
WHD-2	Single Pole, N.C.	22.50	19.68	17.73
WHD-11	2-Pole, Both N.O.	40.50	35.40	31.90
WHD-111	3-Pole, All N.O.	57.50	50.25	45.30

"W100" relay

100 AMPERES — 120 VAC
(CSA Listed)

"W100"

Rated 100A at 120 Vac or 12kW resistive load capacity. Coil operating current, .260A. Coils, 120 Vac, 60 Hz.



Dimensions: 6½"H x 3¼"W x 3½"D

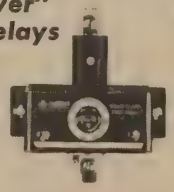
W100-1	Single Pole, N.O.	$43.10	$37.70	$33.91

"HI-POWER" armored steel shell

WA-11

WB-1

WH-1



WS-1

High performance relays have hermetically sealed steel shells with ceramic lined electrode chamber, epoxy insulation. Similar to our standard mercury displacement relays, but with higher current capacity, maximum reliability. Impervious to physical or thermal shock, moisture and dirt. Types S and T completely epoxy encapsulated. Rated to switch loads up to 550 volts AC. Coils — 120 Vac, 60 Hz. Special coil voltage available.

Sizes	Type	Description	1-9	10-49	50-99

Epoxy cast block construction:						
Molded terminals.						
No enclosure required.						

WTD "HI-Power" time delay relays

WTD

Single-pole, N.O. mercury-to-mercury contacts. The solid-state time delay circuit automatically resets upon completion of the delay. Load contacts are totally isolated from the delay circuit and are capable of switching loads to 60kW. Range, −10° to +65°C. Repeatability, ±2%. Epoxy-clad, hermetically sealed construction. Delay operates from 120 Vac. Preset or adjustable time delays from 100ms to 120 seconds are offered.

		Amperes at:

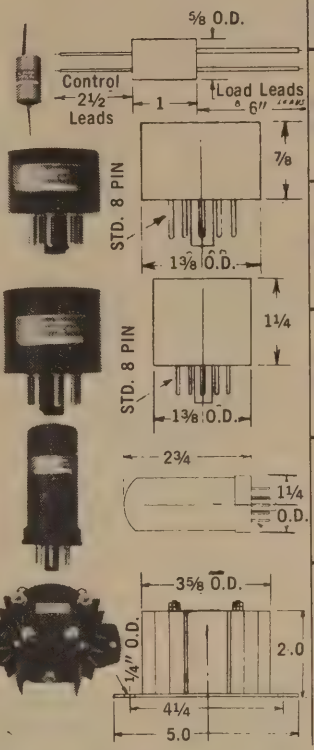
PSG Industries, Inc.

MANUFACTURER OF PRECISION THERMO AND ELECTRONIC CONTROLS

FORMERLY PHILA. SCIENTIFIC GLASS CO.

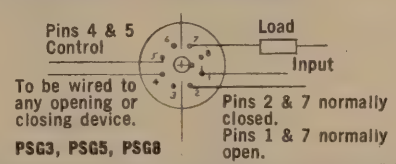
SOLID STATE RELAYS



PSG Solid State Relays are full wave relays for controlling AC loads from an external contact; such as mercury thermostats, mercury switches, Reed Relays or any other opening or closing device. Since they conduct over the full 360 degree cycle, they are used in switching inductive, tungston and resistive loads, solinoids, heaters, etc.

GENERAL SPECIFICATIONS

Ambient Temperature Range: −65°F to 212°F
Operating Temperature Range: −65°F to 212°F
Voltage: 115 VAC
220 VAC (Add Suffix—2A)
28 VDC (Add Suffix—28DC) Only in 1.5 Amps
Arrangement: Normally Open or Normally Closed (Specify)
Control Current: 1.0 Milliamp Maximum (Resistive)



PSG SOLID STATE RELAYS HAVE THE FOLLOWING OUTSTANDING FEATURES

1. **HIGH RELIABILITY:** Each component used in these relays are inspected prior to assembly. Physical and final functional tests are made prior to shipping.
2. **LONG LIFE:** Since these relays have no moving parts eliminating arcing and bounce, they are basically maintenance free having a life expectancy of over 100 million cycles.
3. **HIGH SURGE CURRENT CAPABILITY:** All of these Solid State Relays have surge current rating of at least 10 times their rated load for one cycle. This is considerably greater than the surge handling capabilities of standard mechanical relays.
4. **FULLY ENCAPSULATED:** Each Relay is potted in thermally conductive epoxy lowering component temperature. Due to our encapsulation, the Relays are used in explosive, dusty and many other contaminated atmospheres.
5. **ZERO TURN-OFF:** Reduces R.F.I. and increases the reliability of the Relay.
6. **NO DRIVE POWER:** Any opening or closing device will activate these Solid State Relays. Control current of only 500 microamperes essentially eliminates arcing. Ideal for use with, mercury thermostats, reed relays or any other device requiring low power.
7. **NO MOVING PARTS:** No contacts, eliminates bounce and wear.
8. **LOW PRICE:** Due to our manufacturing methods and circuit design, we can offer you a high quality Solid State Relay at the most economical prices.

SOLID STATE VARIABLE TRANSFORMERS

MERCURY PLUNGER RELAYS

Model VPC15 • Model VP15
Dimensions: 3½ x 3½ x 3½
Weight: 1 lb. 5 oz.

VARI-POWER-TROL

MODEL NO. VPC15

A compact, completely Solid State AC Power Controller; will allow you to proportion power from a fraction of a watt up to 1800 watts at 115 VAC, 50/60 cycles.

Control Sensitivity: 10 Microamps

Vari-Power-Trol, comes complete with terminals for thermostat or any opening or closing device, fuse, 3 wire cord and plug.

Vernier Control Knob, output receptacle indicator light.

USES: Heaters, ovens, lamps, heating mantles, etc. **$110.00**

PR-5 & PR-6, MPR-5, MPR-6

VARI-POWER MODEL NO. VP15

Is dimensionally the same except it does not have control circuit; adjustable Solid State AC Power Control is complete with fuse, 3 wire cord and plug, vernier knob, and output receptacle.

Capacity: 1800 watts, 15 amps, 115 VAC, 50/60 cycles.

USE: Heaters, lamps, ovens, heating mantles, replaces the wire wound variable transformer. **$75.00**

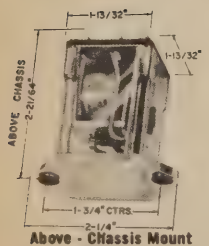
OHMITE general purpose relays

MODEL GPR — INDICATOR, PLATE, THYRATRON AND LATCHING VERSIONS IN UNENCLOSED AND ENCLOSED TYPES

Simple, rugged, low cost relays handling substantial power for small size. Uncomplicated design provides unusual flexibility for making and changing connections and mounting. Stock includes relays in versatile enclosures, some with indicator light, a plate, thyratron and latching versions. Wide commercial a industrial use where economy and versatility are important.

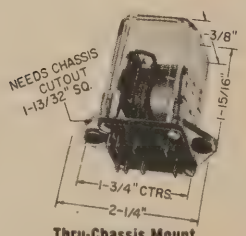
GPR
3-Pole

GPR
4-Pole



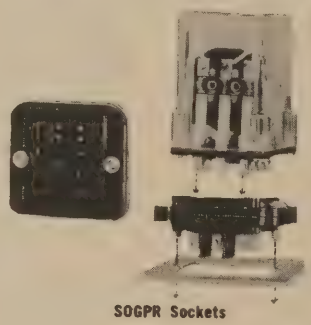
UNENCLOSED RELAYS

Basic (Unenclosed) Relay: All connections terminate on barrier-type terminal panel on combination solder — quick-connect (push-on) lugs which accept AMP 110 female connectors. The terminal panel is conveniently incorporated into printed circuit boards. Fixed contacts are integral inlay on terminal itself. Normally furnished with a 6-32 x ½" mounting stud and non-turn boss (or lug for 4-pole relays). A 6-32 threaded hole is optional. Unenclosed relays can also be mounted by plugging their panels into Ohmite SOG sockets. See "Socket" below.

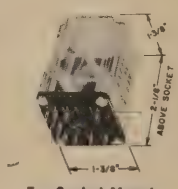


Contact Ratings: Two ratings — fine sil contacts, 5 amps at 115 VAC or 32 VDC sistive; silver-cadmium contacts, 10 am

Insulation: Tested at 1500 VAC.



Coil Wattage: 1.4 watts DC operation; watts (2.0 volt-amps) AC except 2.4 wa (3.70 volt-amps) for 4-pole AC and AC lat ing relays.



Above - Chassis Mount
GPRTA

Thru-Chassis Mount
GPRTT

SOGPR Sockets

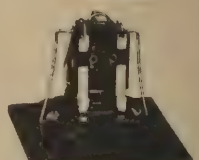
For Socket Mount
GPRTS

For Octal Plug
GPRTP

ENCLOSED RELAYS

(GPRTA-, GPRTT-, GPRTS-, GPRTP-)
Four types of clear plastic enclosures as follows:

Chassis Mounting Types: "GPRTA"—("Terminals-Above-Chassis" type) has terminal panel opposite to mounting flange; "GPRTT" —("Terminals-Through-Chassis" type) has terminal panel on same end as mounting flange, requires chassis cutout; "GPRTS" type (Terminals for Socket Use) is similar to GPRTT but has no mounting flanges. It is intended strictly for plug-in mounting in Ohmite socket "SOGPR" (see "Socket" below).



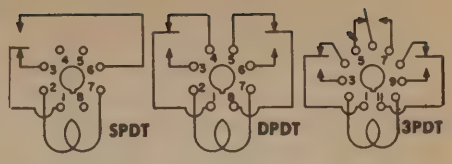
Plug Base Type: "GPRTP" — employs octal plug for 1 and 2 pole relays; 11-pin plug for 3-pole. The octal plug base is integral with relay for rigidity — is designed with recessed pins which meet UL spacing requirements (150V).

Socket (SOGPR): Unique socket fits the terminal panels of all GPR relays and provides over-the-surface spacing to meet UL requirements for 150 volts. Requires chassis cut-out to mount. Hold down springs (see illustration) for unenclosed and enclosed relays, are provided with each socket but are not required except under conditions of vibration or shock. Socket solder terminals will also accept AMP 11 quick-connectors. See socket listings.

SOCKETS FOR GPR, GPRTS RELAYS

For up to 3PDT: 1¾" square, requires 1¼" x 1½" cutout.* 2 holes (for No. 6 screws) on 1⅜" centers.
Catalog No. SOGPR-9

For 4-pole models, 1¾" x 2", requires 1½" x 1½" cutout.* 2 holes (for No. 6 screws) on 1⅝" centers.
Catalog No. SOGPR-12



*Std. punches and dies from Ward Machinery Co., Chicago. No. 28, Style 22N, 1¼ x 1½, for SOGPR-9: No. 28, Style 14R, 1½ x 1½, for SOGPR-12.

Indicator Relay: Incorporates light bulb to indicate energized condition of coil. Stocked only in GPRTP enclosures described in preceding. Neon bulb furnished with coil ratings 70 volts and above; incandescent bulbs for coil ratings below 70 volts.

UL & CSA Approval: Column heads in the stock tables carry the UL (Underwriters' Laboratories) or CSA symbol (Canadian Standards Association) where applicable. The gray tint in the column indicates the relays are recognized under the "UL components program." The acceptability of such relays by UL depends upon their combination with other equipment such as sockets etc.

*Column heads carry symbols to indicate UL or CSA (Canadian Standards Assn.) approval. The grey tint indicates that relay is recognized under UL "components program" (File No. E33069, Guide No. 380W1.14C, Assignment No. 62C3559A). CSA File No. is 21309. See explanation in "UL and CSA Approval."

†4-Pole GPRTS relays are not covered by CSA.

‡GPRTA and GPRTT types as listed by UL, differ slightly from the stock versions above and consequently, are made to order. These UL versions have a "U" added to the catalog number, such as in "GPRTAU." They also have CSA approval.

STOCK GPR PLATE CIRCUIT RELAYS — 5 AMP CONTACTS

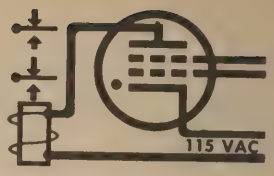

Plate Relays: Feature same physical construction as standard general purpose relays but are adjusted for greater sensitivity and can be used as electronic circuit controls, i.e., in the plate circuits of standard vacuum tubes.

Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.

OHMITE general purpose relays

Thyratron Plate Relay: Designed specifically for plate circuit of thyratron tubes 2050 and 2D21 with 115 VAC supply (see diagram). Also suitable for operation in series with silicon controlled rectifiers from a 115 VAC supply. Ready to work, no capacitors or adjustments required, no chatter. Available unenclosed and in most GPR enclosures.

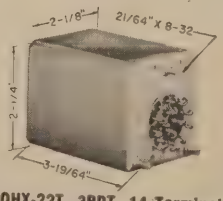
MODEL DO RELAYS AC or DC

Particularly adaptable to aircraft and mobile equipment applications where severe shock and vibration are encountered. Design of molded parts around contact arms protects against mechanical injury. Stocked in 3-pole or 4-pole type, and also in hermetic enclosures and in latching types.

Coil Wattage: 3.00 watts, DC operation; 6.00 watts, 60 cycle AC. Maximum temperature rise 45°C, DC operation; 75°C, AC.
Coil Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycle. Stock voltages in table.
Contacts: 10 amps nominal. Ratings are for 115 VAC or 32 VDC, resistive load.
Weight: Unenclosed 3-pole, 5 oz.; 4-pole, 6 oz.



DO RELAYS IN HERMETIC ENCLOSURES

Stock DO relays with 115 volt coil in hermetically sealed metal enclosures, filled with dry nitrogen. Enclosures provide protection for relay under most adverse ambient conditions. Both 3 and 4-pole DO relays are supplied in these enclosures with plug (DOHPX-) or solder terminal (DOHX-) connectors as illustrated. See listings in stock table above.
Weights: 3-pole hermetic relay approx. 14 oz.; 4-pole approx. 15 oz.

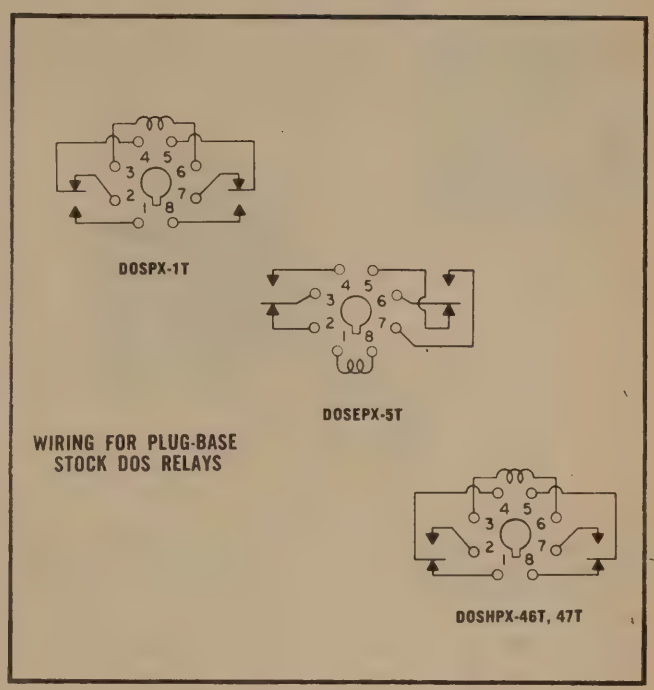
OHMITE general purpose relays

MODEL DOS RELAYS AC or DC

Wide application, general purpose relay, compact and lightweight. Handles loads usually demanded of much larger relays. Meets rigorous aircraft relay standards.

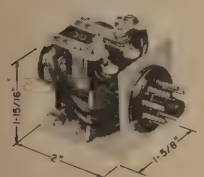


Coil Wattage: 2.5 watts, DC operation; 3 watts, 60 cycle AC. Maximum temperature rise 45°C, DC operation; 65°C, AC.

Coil Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycles. Table lists stock voltages.

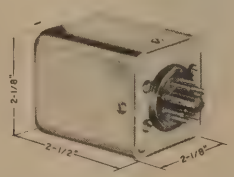
Contacts: 15 amps nominal. Rating is for 115 VAC or 32 VDC, resistive load.

Weight: Unenclosed, 4 ounces.



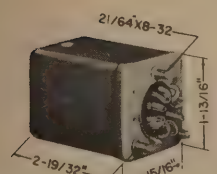
DOS RELAYS WITH PLUG-BASE OR IN DUST-TIGHT OR HERMETIC ENCLOSURES

DOS relays with 115 volt AC coils are available from stock with a standard octal plug base, unenclosed (DOSPX-1T) or with an octal plug base and drawn aluminum, removable dust-tight enclosure (DOSEPX-5T).



Weights: 8 oz. each.

Hermetically Sealed non-removable enclosures, filled with dry nitrogen, are also available to provide protection under adverse ambient conditions. DOS relays with 115 volt AC or DC coils are provided in these enclosures with either octal plug (DOSHPX-) or solder-terminal (DOSHX-) connectors as illustrated. See listings and prices in DOS stock table.



Weights: 8 oz. each approx.

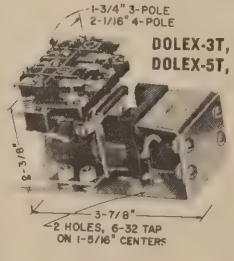
OHMITE latching relays

Enclosed Latching Relay (GPRLETP)

6PDT Latching Relay (GPRLE)



Latching Relay: Consists of two GPR relays with armatures linked so that the n.o. contacts of one are mechanically latched in closed position when, and after, this relay is energized. When 2nd relay is energized, first relay restores and latches 2nd. Permits switching of twice the number of circuits and holding without coil current. Unenclosed type "GPRLE." Enclosed type "GPRLETP" in clear plastic case with Jones plug P-324-SB fitting S-324-AB socket.

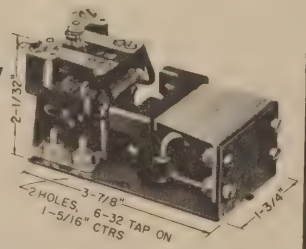
Approx. weight				7.0 oz.	11.3 oz.

*Column heads carry symbols to indicate UL or CSA (Canadian Standa Assn.) approval. The gray tint indicates that relay is recognized under "components program" (File No. E33069, Guide No. 380W1.14C, Assi ment No. 62C3559A). CSA File No. is 21309. See explanation in "UL a CSA Approval."

MODEL DO LATCHING RELAY (DOLEX-)

Consists of Model DO relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset c is pulsed. Permits "holding" of circu without continuous coil current. Co of stock units (both relays and res coils) are 115 VAC. Available with or 4-pole DO relays



Weights: 3-pole — 16.5 oz.; 4-pole — 17 oz.

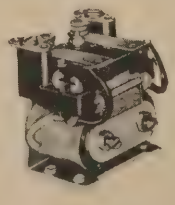
LATCHING TYPE

Catalog No.[1]	Type	Volts	Coil Data † Amps	DC Ohms
DOLEX-3T	3PDT	115VAC	.110	145.0
DOLEX-5T	4PDT	115VAC	.110	145.0

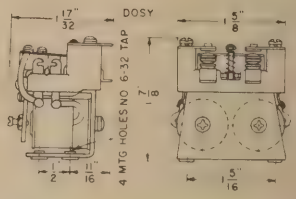
†Coil data applies to relay part of latching assembly. Reset magnet operates 115VAC, 60 cycle also.

MODEL DOS LATCHING RELAY (DOSLEX-)

Consists of Model DOS relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset coil is pulsed. Permits "holding" of circuits without continuous coil current. Coils of stock units (both relay and reset magnet) are 115VAC.



Weight: 14.2 oz.



LATCHING TYPE

Catalog No.[1]	Type	Volts	Coil Data Amps †	DC Ohms
DOSLEX-1T	DPDT	115VAC	.043	450

†Coil data applies to relay part of latching assembly. Reset magnet operates on 115 VAC, 60 cycle also.

MODEL DOSY RELAY FOR PLATE CIRCUITS

Similar in construction to Model DOS relay but equipped with twin coils for increased sensitivity. The DOSY relay is adaptable to a wide range of electronic control appli cations such as plate circuit controls, or as overload or underload controls in D.C circuits to signal attainment of predetermined current levels.

Coil Wattage: 1.00 watt, with maximum temperature rise of 45°C. Lower wattages available.

Contacts: Stock combinations as listed. Ratings are for 115 VAC or 32 VDC, resistive load.

Weight: Approximately 4½ ounces.

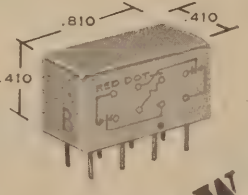
POTTER & BRUMFIELD RELAYS

GA SERIES Low cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, pierced solder type terminals. Contacts: Silver, designed for maximum self-cleaning action. Mounting: No. 8-32 tapped core with locating boss. Weight: 3½ ozs.

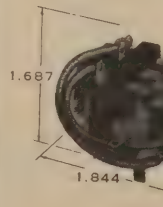


See GF Series for similar relays having 10 amp ratings.

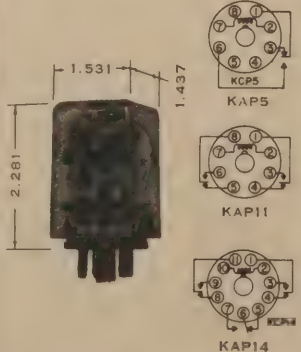
HP SERIES This commercial miniature relay is recommended for applications requiring high reliability in minimum space, such as TV cameras, dictating machines, desk top computers, copying machines and others. For circuit board or socket mounting and encased in a nylon heat-sealed (non hermetic) cover, the HP is a half crystal case size relay with terminals on a .200" grid. Weight: .3 oz.

HPS SERIES Hermetically sealed version of commercial HP half-crystal case size relay above. HPS is designed for reliable performance in logic circuits or where prolonged submersion of pc boards in cleaning solvents may be required. Recommended for use in applications requiring more critical specifications than HP relay provides. HP socket may be used for mounting. Sealed metal enclosed relay weighs .25 oz.

HP SERIES SOCKETS
(For HP, HPS and HCM relays)



DPDT Solder terminal socket, 27E062
Socket retainer, 24A051
Box of 10 each, 9HP1 **NET $4.75**



NEW

KA AND KAP SERIES Small, low cost, highly efficient general purpose relays for handling light power loads such as small motors, solenoids and other relays, and general automation work. All KA and KAP relays with "Y" suffix bear CSA listing (File No. LR-15734) and carry U/L component recognition (File No. E22575). Mechanical life expectancy: 10 million operations. Duty: Continuous Contacts: Movable, Gold-flashed silver; stationary, Silver overlay.

The KA is the open version of this series. Mounting: One No. 6-32 threaded stud and locating tab on .438 centers. Wt: 2 ozs. The KAP is the enclosed model and is protected by a clear polycarbonate dust cover. Terminals: 8 or 11-pin plug. Weight: 3 ozs.

"G" suffix indicates silver-cadmium oxide contacts on movable rated 10 amps.

POTTER & BRUMFIELD RELAYS

KA-KAP Series continued.

HOLD DOWN SPRINGS
Designed to insure secure mounting of relays in any position. Will accommodate machine screws or rivets.

KAP SERIES
Hold down spring, 20C206
Box of 50 each, 9KA1 **NET $5.80**

KCP AND KRP SERIES
Hold down spring, 20C217
Box of 50 each, 9KR15 **NET $5.80**

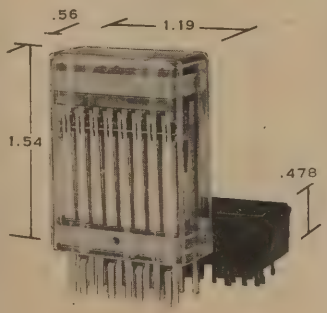
KUP SERIES (PLAIN CASE)
Hold down spring, 20C228
Box of 50 each, 9KU3 **NET $5.25**

KDP SERIES This compact, general purpose DC relay offers 8 Form C (8PDT) switching with bifurcated gold over silver contacts rated 1 amp @ 30V DC, resistive, or 0.5 amp @ 120V AC. Designed for dense packaging applications, the KDP provides electrical isolation on both the input and switching sides. Operate speed is 15 milliseconds @ nominal voltage @ 25°C. Mechanical life expectancy: in excess of 10 million operations. Duty: Continuous. Enclosure: Clear polycarbonate dust cover. Mounting: Solder terminal sockets with snap-lock spring for front insertion into chassis or panel. Approximate weight without socket: 1.3 ozs.

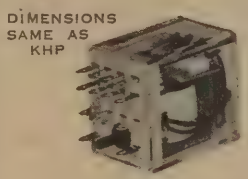
KDP SERIES SOCKETS
8PDT Solder terminal socket, 27E093
Box of 10 each, 9KD2 **NET $9.50**

Hold down spring, 20C238
Box of 50 each, 9KD3 **NET $5.50**

KHU/KHP/KHS SERIES Small, rugged, 4PDT relays available for AC or DC operation. Only KHU relays are recognized under the Component Program of Underwriters' Laboratories, Inc. KHU has clear polycarbonate and KHP has nylon dust cover; KHS is hermetically sealed in metal enclosure. Relays are designed to meet exacting requirements of data processing, computer and process control applications. Various contacts available: suffix "11" denotes gold-flashed silver rated 3 amps @ 30V DC or 120V AC, resistive; suffix "12" denotes silver-cadmium oxide rated 3 amperes; suffix "13" indicates gold alloy contacts for low level to 2 amp applications; suffix "16" indicates gold overlay on silver, bifurcated contacts rated 1 amp @ 30V DC, resistive, or 120V AC. Mounting: Solder terminals with No. 3-48 stud .312" long. All relays fit sockets (below) with printed circuit or solder lug terminals. Weight without sockets: KHU and KHP 1.12 oz.; KHS 1.63 oz.

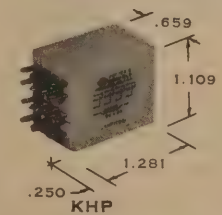


KHP SERIES SOCKETS
KHP, KHS, KHU relays and CD-31 time delays



4PDT Solder terminal socket, 27E006
Socket retainer, 24A032
Box of 10 each, 9KH1 **NET $6.60**

4PDT Printed circuit terminal socket, 27E007
Box of 10 each, 9KH2 **NET $6.60**



Hold down spring, 20C217
Similar to KCP/KRP on page 4
Box of 50 each, 9KH3 **NET $5.50**

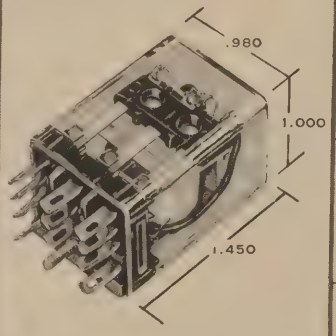
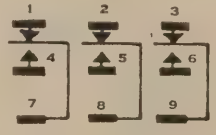
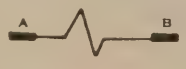
POTTER & BRUMFIELD RELAYS

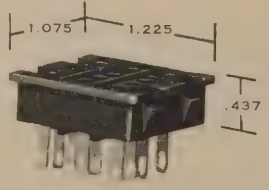


KL SERIES 4PDT relay has high dielectric phenolic insulation and affords broad versatility and utility. Widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Contacts rated 5 or 10 amps @ 120 volts AC, 50/60 Hz resistive are available. Mounting: All models — two No. 6-32 tapped holes on 1.438″ centers. Weight: 5 ozs.



KLT SERIES relays are designed for DC applications that require sensitive coils to operate transistors. Contact arrangements to 3PDT are rated 3 amperes at 120 volts AC, 50/60 Hz resistive. Coils are designed for continuous duty @ 6 Watts @ +25°C on open types. Expected life is 10 million mechanical operations. Mounting: Same as KL Series. Weight: Approximately 4 ozs.





KNP SERIES A small general purpose relay designed for economizing chassis space. Recommended for a multitude of general purpose applications, these relays are recognized under the Component Program of Underwriters' Laboratories, Inc. for ratings of 1/10 HP @ 120V AC; 3 amps @ 32V DC, resistive, or 3 amps @ 240V AC, 80% PF. U/L File No. E22575. Contacts are fine silver cross bars for low resistance point contact. Terminals are .110″ quick-connect/solder designed to fit solder or printed circuit terminal sockets shown below. Direct-to-chassis mounting provided by No. 3-48 stud. Enclosed in a clear polycarbonate dust cover, the KNP measures 1.415″ max. high when seated. Weight: 1.4 ozs. approximately, without socket.

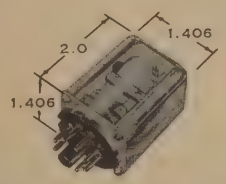
POTTER & BRUMFIELD RELAYS

KR3-H SERIES Ruggedly constructed but of small size, KR3-H is a heavy duty relay especially designed for applications where limited space is a factor. Its heavy duty copper-alloy movable contact carrier has twin silver-cadmium oxide contacts rated 20 amps @ 120V AC 60 Hz, resistive, or 28V DC; 1 HP 120/240V 60 Hz. Contact arrangement is 1 Form X (SPST-NO-DM) only. Terminals: suitable for .250" quick connect, also solder; for contacts: solder only for coil. Size: 1.6" x 1.671" x 1.52". Seated height: 1.21". Mounting: One No. 6-32 stud and locating tab on .437" center. Weight: 2 ozs.



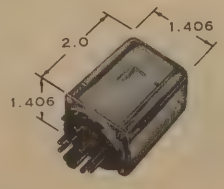
KRP3-H SERIES All electrical specifications listed above for the KR3-H series relays apply to the KRP3-H. However, the KRP3-H is enclosed in a clear polycarbonate dust cover and features an octal plug-in base. Weight: Approximately 3 ozs.

KRP3AH

KRP SERIES Versatile, multi-contact arrangement. Enclosed in a clear polycarbonate dust cover. Standard 8-pin octal-type plug for KRP5 and KRP11, 11-pin for KRP-14. Weight: Approx. 3 ozs. Contacts: 5 amp, Gold flashed silver, 10 amp silver-cadmium oxide. See KCP-KRP hold down spring for special mounting applications. See KRP-N indicator lamp relay for current monitoring applications.

KRP5 KRP11 KRP14

KRP-N INDICATOR LAMP RELAY A general purpose relay incorporating a lamp to indicate current or voltage availability in power circuit. Contacts: Silver-cadmium oxide. Enclosures: Clear, polycarbonate dust cover. Mounting: Standard octal plug.

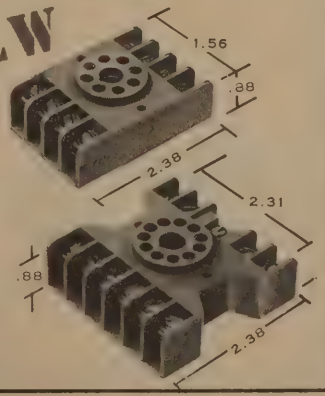


Weight: Approx. 3 ozs.

Hold down spring (Please see Page 4).

"P"—CASE A clear polycarbonate case for mounting rectifiers, capacitors, resistors, or a combination of these. Available with octal-type plug with 8 or 11-pins. Comes complete with four screws. Weight: .5 ozs. each. See KCP-KRP Hold Down Spring for special mounting applications.

35D070 Case (8-pin plug) **NET $.65**
35D072 Case (11-pin plug) **NET $.80**



NEW

KR SERIES SOCKETS

(For KRP, KRP3-H, KAP, KBP, KCP, EBT, EBA relays; CD-21 and CD-38, CH and CK time delays; and CP and CS sensors.)

8-pin Screw terminal socket, 27E122
Rated 10 amperes; molded Lexan
Box of 5 each, 9KR31 **NET $12.50**

11-pin Screw terminal socket, 27E123
Rated 10 amperes; molded Lexan
Box of 5 each, 9KR32 **NET $18.75**

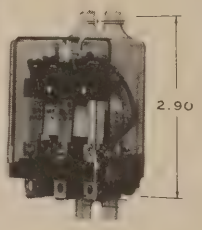
POTTER & BRUMFIELD RELAYS

KUP SERIES This reliable 10-ampere relay for industrial control is available with a socket that is also rated 10 amperes. The .187″ terminals of the relay are of the quick-connect/solder type. Sockets are priced separately. The KUP is enclosed in a clear polycarbonate dust cover. Silver-cadmium oxide contacts assure long contact life. Operation: Continuous.



1 FORM C

2 FORM C

3 FORM C

KUP SERIES with slotted flange case for direct-to-chassis mounting. Identical in both electrical and mechanical specifications as the KUP described above, except that they are not suitable for socket mounting. The .187″ terminals are of the quick-connect/solder type. Slot width: .156″. Weight: 3 ozs. All models are recognized under the Component Program of Underwriters' Laboratories, Inc. (File No. E22575)

KU SERIES SOCKETS for use with KUP plain case, KUL, and KUR, Series relays; CU and CL time delays having .187″ quick-connect terminals and a rectangular base arrangement.

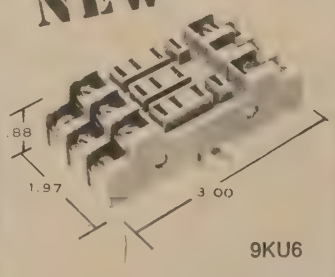
KUP SERIES SOCKETS
(For KUP plain case, KUL and KUR relays; CU and CL time delays.)

SPDT/DPDT/3PDT Pierced solder terminal socket, 27E043
Rated 10 amperes; molded nylon; (2) .165″ dia. mounting holes
Box of 5 each, 9KU1 **NET $3.95**

SPDT/DPDT/3PDT Printed circuit terminal socket, 27E046
Accepts .187″ terminals; molded nylon; (2) .165″ dia. mounting holes
Box of 5 each, 9KU2 **NET $4.75**

Hold down spring, 20C228
Box of 50 each, 9KU3 **NET $5.25**

SPDT/DPDT/3PDT Quick-connect .187″ terminal socket, 27E067
Rated 10 amperes; molded nylon; (2) .165″ dia. mounting holes
Box of 5 each, 9KU5 **NET $6.30**



SPDT/DPDT/3PDT Screw terminal socket, 27E121
Rated 10 amperes; molded Lexan; (2) mounting slots for No. 6 screws. Accepts .187″ terminals
Box of 4 each, 9KU6 **NET $14.00**

All sockets except 9KU6 are included in the Underwriters' Laboratories, Inc. Component Recognition of KU Series relays. The 9KU6 is "a suitable mounting means" when used with a U/L recognized relay.

POTTER & BRUMFIELD RELAYS

R10-E1 SERIES industrial relays with solder terminals and No. 3-48 stud or sockets for plug-in mounting. U/L recognized, File No. E42810. Relays provide sensitivity of 125 mW per pole. DPDT to 6PDT contact arrangements for DC coils are available with three contact styles: "X" —5 amps, "Y"—2 amps, and "Z"—100 mA. Operating temperature: —55°C to +72°C. R10-E1 AC version also available with DPDT arrangement with "X" style contacts rated 5 amps. AC operation achieved by adding two 400 volt diodes in the motor assembly. Sockets shown below fit all R10 relays and provide grounded or ungrounded versions with solder or p. c. terminals. Grounding provisions are pre-installed and wire hold down spring is included. R10-E1-Z Series has bifurcated contacts for low level loads. "J" Sensitive Current Adjustment: 85 mW (DPDT); 175 mW (4PDT).

R10-E2 SERIES has printed circuit terminals for mounting on p. c. board without sockets. Available with "Y" or "Z" style contacts for DPDT, 4PDT or 6PDT. Other electrical and mechanical specifications same as R10-E1 above. Weight: .8 to 1.4 ozs.

R10 SERIES SOCKETS WITH GROUND

DPDT Solder terminal socket, A10-10
Hold down spring, R10-P28-1
Box of 10 each, 9XR10-1 **NET $5.50**

4PDT Solder terminal socket, A10-20
Hold down spring, R10-P28-2
Box of 10 each, 9XR10-2 **NET $7.00**

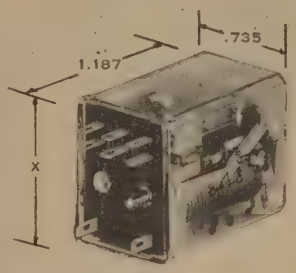
6PDT Solder terminal socket, A10-30
Hold down spring, R10-P28-3
Box of 10 each, 9XR10-3 **NET $9.00**

2PDT Printed circuit terminal socket, A11-10
Hold down spring, R10-P28-1
Box of 10 each, 9XR10-4 **NET $5.50**

4PDT Printed circuit terminal socket, A11-20
Hold down spring, R10-P28-2
Box of 10 each, 9XR10-5 **NET $7.00**

6PDT Printed circuit terminal socket, A11-30
Hold down spring, R10-P28-3
Box of 10 each, 9XR10-6 **NET $9.00**

R10 SERIES SOCKETS WITHOUT GROUND

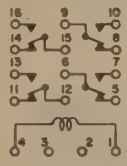


DPDT Solder terminal socket, A10-40
Hold down spring, R10-P28-1
Box of 10 each, 9XR10-7 **NET $5.50**

4PDT Solder terminal socket, A10-50
Hold down spring, R10-P28-2
Box of 10 each, 9XR10-8 **NET $7.00**

6PDT Solder terminal socket, A10-60
Hold down spring, R10-P28-3
Box of 10 each, 9XR10-9 **NET $9.00**

Strap hold down spring, R10-P49
For printed circuit sockets
Box of 50 each, 9XR10-10 **NET $2.50**



R10-E2 Series continued on page 9.

POTTER & BRUMFIELD RELAYS

R40 SERIES SLIMLINE DC operated 4PDT relays are designed for printed circuit board use. Features low profile—only .430" height. Allows easy circuit board layout and 6" board mounting centers. Also available with solder/plug-in terminals to fit sockets described below. A variety of contact styles provide switching dry circuit to 5 ampere loads. A wide range of coils for DC voltage are available. Nominal pick-up power is 720 mW. Weight: .8 to 1.05 ozs.

R40-E1 SERIES provides solder terminals or plug-in socket mounting. (See sockets below.) Bifurcated contacts for low level applications available or with cross bar contacts for dry circuit use.

R40-E2 SERIES has printed circuit pins for vertical mounting.

R40-E3 SERIES fits a socket for mounting flat on a printed circuit board. Weight: .8 to 1.05 ozs. without socket.

R40 SERIES SOCKETS

4PDT Right angle printed circuit terminal socket, R40-S410
Hold down spring, R40-P33
Box of 10 each, 9XR40-1 **NET $13.50**

4PDT Vertical printed circuit terminal socket, R40-S420
Hold down spring, R40-P33
Box of 10 each, 9XR40-2 **NET $9.50**

4PDT Chassis mount solder terminal socket, R40-S430
Hold down spring, R40-P33
Box of 10 each, 9XR40-3 **NET $10.00**

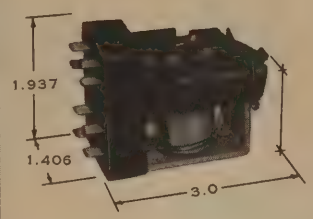
ORDERING INFORMATION FOR R10 AND R40 SERIES RELAYS

To select your relay:

1. Decide on terminal type and mounting.
2. Select rating and contact arrangement.
3. Choose the proper coil resistance.
4. Pick a mating socket, if needed.

EXAMPLES:



R10	E1	Y4	V700	9XR10-2 Socket
R10 Type Relay with Transparent Enclosure	Plug-in Solder Terminals and Mounting Stud	4 Form C Contacts Rated 2 Amps	700 ohm coil for 24V DC Operation or **J2.5K** Sensitive Current Adjustment	Chassis Mount Socket for a 4 Form C Relay

R40	E2	Z4	V200	9XR40-1 Socket
R40 Slimline Series Relay	Printed Circuit Terminals, No Stud Mounting	.100 amp Contacts 4 Form C Bifurcated	200 Ohm Coil for 12V DC Operation	Right Angle Printed Circuit Socket

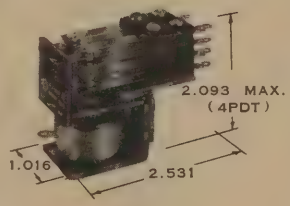
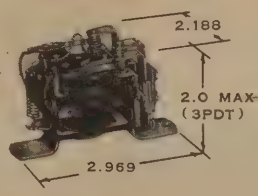
POTTER & BRUMFIELD RELAYS



AB SERIES For appliance and general purpose applications where rugged construction, long life and quiet operation are required. All equipped with terminals to fit snap-on connectors and may be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models are recognized under the Component Program of U/L (File No. E29244) and are CSA listed (File No. LR-15734). Mounting: Two No. 8-32 tapped holes, on 1¼" centers. Silver contacts. Weight: Approx. 5 ozs.

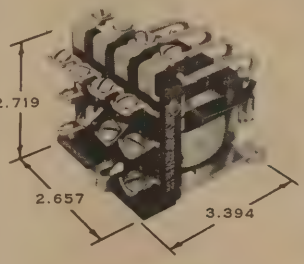
ABC SERIES Medium duty power relay with dust cover. For small motors, industrial control and similar applications. All equipped with terminals to fit snap-on connectors and may be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models are recognized under the Component Program of U/L (File No. E29244) and are CSA listed (File No. LR-15734). Mounting: One No. 8-32 threaded stud ⅜" long and locating tab on .562" centers. Contacts: Silver. Weight: Approx. 7 ozs.



GF SERIES Medium duty power relay for industrial control applications. Long contact arms have silver contacts rated at 10 amps at 120V AC or 28VDC, resistive. Contacts have excellent wipe or self-cleaning action. Tinned, pierced solder terminals. Mounting: 8-32 tapped core with locating boss. Weight: 4.75 ozs. (See GA series on page 3 for similar voltage actuated relays.)

MR SERIES A medium duty power relay that can handle small motors, transmitters, and general purpose applications. Mounting: Two .156" dia. holes on 2.250" centers for MR 3 and 11, 2.625" centers for MR2, 5 and 14. Contacts: Silver. Weight: 4 ozs.

MS/MR SERIES DUST COVER



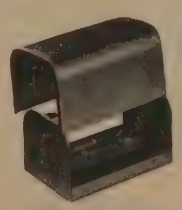
Metal dust cover, 35D130
Similar to PM/PR shown below
Box of 1 each, 35D130 **NET $2.20**

PM SERIES A compact 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has silver-cadium oxide contacts rated at 25 amps at 240V, 50/60 Hz resistive AC, 1 HP per movable arm at 120V or 240V, AC single phase, U/L (File No. E22575) and CSA* listed, except 480V. Mounts by one front key-hole and two rear channel slots for 8-32 screws on 2" x 2.5" triangular centers. Weight: 14 ozs.

PM SERIES ADAPTOR PLATE

Adaptor plate, 37B370
For mounting PM on PR mounting holes
Box of 10 each, 9PM1 **NET $1.75**

PM:
L: 5.313 MAX.
W: 3.812 MAX.
H: 3.812 MAX.



PR:
L: 5.312 MAX.
W: 3.175 MAX.
H: 3.125 MAX.

PM AND PR DUST COVERS These dust covers have a sheet metal base with knockouts for .5" dia. conduit and an aluminum cover fitted with two screws. Finished in gray hammertone. Mounting: Three No. 10 holes on 1.875" x 4.125" centers. Approx. weight: 1 lb.

Metal dust cover, 35D227
For PM only
Box of 1 each, 35D227 **NET $3.45**

Plastic dust cover, 35D203
For PM only
Box of 4 each, 9PM2 **NET $1.90**

Metal dust cover, 35D013
For PR only
Box of 1 each, 35D013 **NET $3.45**

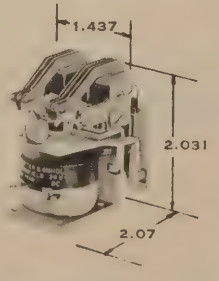
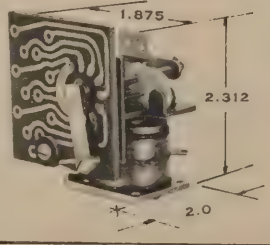
POTTER & BRUMFIELD RELAYS

PR SERIES Heavy duty relay for industrial control applications requiring long life and fast action. Heavy duty screw-type terminals. All AC and DC models except PR11AL5 carry U/L (File No. E22575) and CSA* listing. Mounting: Two .188" dia. holes on 1.875" centers. Weight: 11 ozs. max. Contacts: Silver. Enclosure: See "PR" cover. The PR11AL5 relay is equipped with silver SPDT auxiliary contacts rated at 5 amps, open only, auxiliary contact equipped relay will not fit inside cover.



AP SERIES RATCHET, IMPULSE A reliable compact unit for applications requiring on-off or reversing action on alternate operations. Positive ratchet operation at all speeds on impulses as short as 60 ms. Intermittent operation only. Mounting: Three .156" dia. holes on 3.375" x .875" triangular centers. Contacts: Silver. Weight: 7 ozs. Coils for intermittent duty only.



BU BUZZER AC operated coil with a spring steel armature which buzzes when coil is energized. Used extensively in test equipment, laboratories and a host of other applications where a small light weight, dependable buzzer is required. Recognized under the Component Program of Underwriters' Laboratories, Inc. (File No. S1154). Weight: 1⅝ ozs. Mounting: No. 6-32 tapped core.

GM SERIES Unusually versatile switching makes this impulse/sequencing relay especially suitable for single coil latching. The 2 Form C contact arrangement is switched alternately by cam action during drop-out of the armature. It can also be furnished with additional 2 Form C auxiliary contacts (designated by "L"). AC version operates on a 50% coil duty cycle (5 Min. max.). Mounting: 8-32 tapped core with locating boss. Weights: With aux. contacts 4¾ ozs. Without aux. contacts 4 ozs.

The **GM1N10** and **GM1N12** AC or DC use the basic GM structure with uni-directional printed circuit boards with 10 or 12-steps, respectively. The board is attached to an extension of the ratchet shaft. The movable contact arm advances one position each time the armature drops out. Contact rating: .25 amps. Contact arrangement: SP-10 pos. and SP-12 pos. Size: 2.312" x 1.875" x 2".

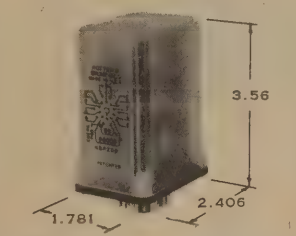
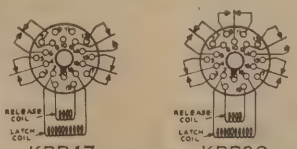
POTTER & BRUMFIELD RELAYS

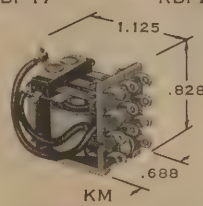
GP SERIES Separate AC and DC coils to match with 2PDT or 4PDT switches. AC coils (GPA) available in 6, 12, 24, 120 and 240 volts. DC coils (GPD) available in 6, 12, 24 and 110 volts; current coils: 2,500, 5,000 and 10,000 ohms. Contacts: Silver.



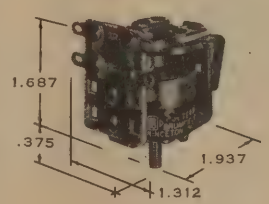
GP11 Switch Assembly DPDT 5 amps **$2.00**
GP17 Switch Assembly 4PDT 5 amps **3.40**



KB SERIES LATCHING RELAY Both release and trip coils must be for the same voltage. One coil operates relay to set latch and other coil releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. Mounting: Two .156" dia. holes on 1.375" centers. Weight: 6 ozs. Contacts: Silver, rated 5 amps; "G" suffix indicates silver-cadium oxide contacts on movables rated 10 amps. AC relays with 5 amp. Contacts are recognized under Component Program of Underwriters' Laboratories, Inc. (File No. 29244) and are CSA* listed. AC coil for intermittent duty only.

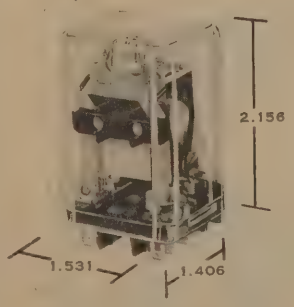


KBP SERIES LATCHING RELAY Enclosed in a translucent polypropylene dust cover, the KBP is furnished with 20-pin octal-type plugs for socket mounting. Contact arrangements of 4PDT and 5PDT are available. Otherwise all specifications are identical to the KB series described above. U/L component recognition does not apply to the KBP series. Weight: 8 ozs.



KM SERIES Subminiature relay for applications requiring unusually small relays with up to 3-poles. Contacts: Silver. Withstands 30g mechanical shock and .06" excursion 10 to 55 Hz mechanical vibration. Used extensively in small business machines, alarm systems, automatic toys and communications systems. Mounting: One 2-56 tapped core and locating .062" dia. half-punch on .187" centers. Solder terminals. Weight: .58 ozs.

KT SERIES ANTENNA SWITCHING RELAY Glass base insulation for minimum RF loss to switch 300 ohm line. Mounting: One No. 6-32 threaded stud and locating tab on .438" centers. Contacts: Gold-flashed silver. Weight: 1½ ozs.



KUL SERIES Small, magnetic latching relay requiring approximately half the space needed for mechanical latching relays. Designed for continuous duty in applications demanding good memory stability, the KUL is ideal for machine tools, process controls and business machines. SPDT or DPDT silver-cadmium oxide contacts are rated 10 amps @ 28V DC, resistive or 120V AC, 80% PF. All AC DPDT relays include diodes inside the clear polycarbonate dust cover. Mounting: Various 10 amp rated nylon sockets available (see KU sockets page 7). Weight 3.4 ozs.

KUL SERIES SPRING

(For KUL relay, CU and CL 51 style time relays.)

Hold down spring, 20C247
Box of 25 each, 9KUL21 NET $4.50

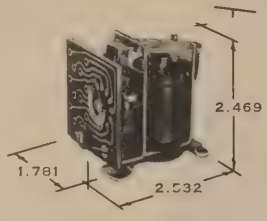
POTTER & BRUMFIELD RELAYS

MS SERIES MOTOR STARTING RELAYS For starting capacitor start, induction-run motors. Operates on back EMF of start winding. Armature gap can be altered to change pick-up. Recognized under Component Program of Underwriters' Laboratories, Inc. (File No. 29245). Mounting: Two .156″ dia. holes on 1.563″ centers. Contacts: ¾ HP, fine silver; 3 HP, silver cadmium. Weight: 5 ozs. max.



MS/MR SERIES DUST COVER
Metal dust cover, 35D130
Similar to PM/PR on page 10
Box of 1 each, 35D130 **NET $2.20**

PC SERIES Single coil impulse latching relay for on-off and current reversal switching on alternate pulses. Mounting: Two .156″ dia. holes on 2.625″ centers. Weight: 5 ozs. Contacts: Gold-flashed silver-cadmium oxide. Coils for intermittent duty only.

SA SERIES STEPPING SWITCH A twelve position stepping relay with printed circuit strips to switch currents up to 250 milliamps. Armature-driven pawl operates a ratchet wheel to drive the movable contact in steps of 30 degrees over 12 positions. Used widely for audio-level switching in TV remote control units, scoreboards and process controls. Mounting: Two 6-32 holes on 1.813″ centers. Weight: 4 ozs. AC coil for intermittent duty only.

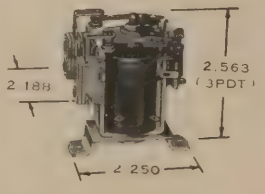
GB SERIES (See GA series page 3 for similar voltage actuated relays.) Sensitivity 115 milliwatts for single pole and 275 milliwatts for 4 pole. Medium cost, high quality relay. Pick-up is not adjustable. Mounting: No. 8-32 tapped core and locating boss. Contacts: Silver. Weight: Approximately 5 ozs.

KCP SERIES Low cost sensitive relay enclosed in clear polycarbonate cover. Sensitivity 125 mw single pole; 250 mw double pole; 375 mw three pole. Mounting: Standard octal plug-in type. Eight pin for KCP5 and KCP11. Eleven pin for KCP14. Contacts: Gold-flashed silver. Weight: Approximately 3 ozs. Use KCP-KRP hold down spring when vibration is a factor or when using inverted or horizontal mounting. (See page 4.)



LB SERIES Designed for top performance, long life at an unusually low cost. Each coil is wound with a given coil resistance and factory adjusted to operate on minimum current requirements. Mounting: Two .188″ holes on 2.219″ centers. Contacts: Silver. Weight: Approximately 2 ozs.

LM SERIES (See KL page 5 for similar voltage actuated relays.) Sensitivity: 100 milliwatts for single pole and 200 milliwatts for double pole. Medium cost, high quality relay with gold-flashed silver contacts. Pick-up adjustable by tail spring adjusting screw. Mounting: Two No. 6-32 tapped holes on 1.813″ centers. Weight: Approximately 5 ozs. DC Coils only.

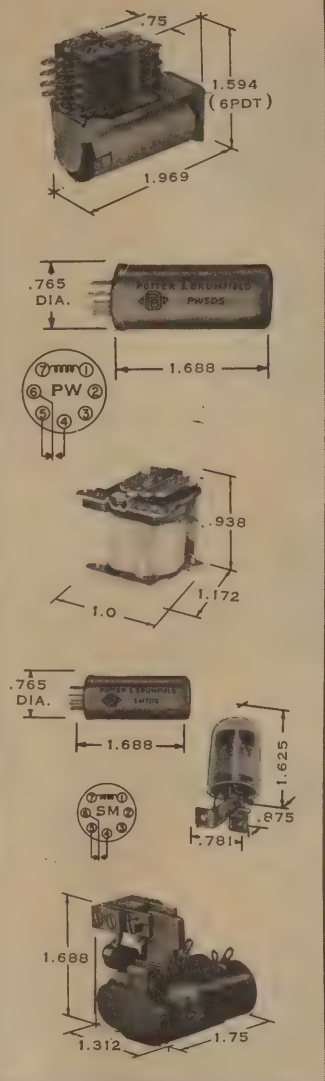
POTTER & BRUMFIELD RELAYS



ML SERIES A small telephone type relay having excellent sensitivity and outstanding switching capabilities. Ideal for transistorized computer networks, telephone systems and battery powered communications equipment. Single contact arms have gold-flashed silver contacts rated at 3 amps for 100,000 operations. Pierced solder terminals. Mounting: Four 3-48 holes on .375″ centers. Weight: 2.5 ozs.

PW SERIES (In both voltage and current actuated models.) Sensitivity: 40 mw for current actuated models, 180 mw for voltage actuated models. Precision, lightweight, hermetically sealed relay for aircraft and missile applications. Will withstand 10g vibration to 500 Hz. Mounting: Standard 7-pin miniature tube base. Weight: Approx. 1 oz.

RS SERIES (In both voltage and current actuated models.) 60 mw sensitivity. Low-cost, small, lightweight, sensitive relay for radio-sonde, light immer and model applications. Mounting: Two No. 4-40 tapped holes on diagonal .75″ x .625″ centers. Contacts: Bar palladium. Weight: 1½ ozs.

SM SERIES (In both voltage and current actuated models.) Sensitivity 75 mw for current actuated models. Medium cost, lightweight, dust cover (right) or hermetically sealed (left) relay for light contact loads found in computers, model airplanes and similar applications. Extremely long mechanical life because of reed armature. Mounting: Sealed, standard 7-pin miniature tube socket; dust cover, two .094″ dia. holes on .531″ centers. Contacts: Stationary silver; movable rhodium. Weight: 1 oz. max.

SS SERIES Ultra sensitive precision relay. 10 mw sensitivity. Dual series-connected coils with balanced armature on needle-point bearings for all low energy circuits such as instruments and bridge balancing. May also be used as a differential relay by connecting the two coils in separate circuits. Mounting: Two No. 6-32 tapped holes on .719″ centers. Contacts: Silver. Weight: Approx. 3½ ozs.

BS SERIES Long coil telephone type. Suited for computer and automatic test equipment applications requiring large numbers of poles. Tinned, pierced solder terminals for rear panel wiring. Mounting: Two No. 8-32 NC 2B tapped holes on .75″ centers. Contact arms: Bifurcated with twin palladium contacts. Weight: Approximately 9 ozs.

BS DUST COVER Sheet metal enclosures for BS relays up to 6 Form C (6PDT, BS23), measures: H: 2.188″, W: 1.250″, L: 3.844″ exclusive .625″ knob; weight: 6.5 ozs.
35D188 **NET $2.10**

LS SERIES Short springs and lightweight armature provide fast action without sacrificing reliability and long life. Stainless steel hinge bearing designed to give 100 million operations. Tinned, pierced solder terminals. Mounting: Two No. 6-32 tapped holes on .75″ centers. Bifurcated contact arms with twin palladium contacts. Weight: Approximately 4 ozs.

The LSP version has identical specifications as the LS, except that it is enclosed in a clear polycarbonate cover and is provided with a rectangular socket with combination taper tab or solder terminations. Enables plug-in like any other plug-in component. Two sizes of sockets and covers are available: 16-pin for 4 Form C (4PDT) or 28-pin for 6 Form C (6PDT). Dimensions: LSP17D: 1.71″ x 1.39″ x 2.52″ seated; weight 4 ozs. LSP23D 2.11″ x 1.39″ x 2.52″ seated; weight 4½ ozs.

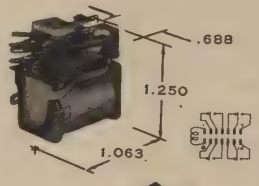
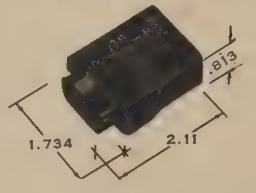
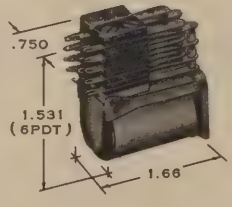
POTTER & BRUMFIELD RELAYS



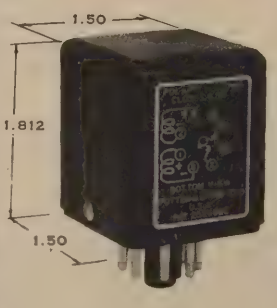
MB SERIES Miniature DC contactor. Designed for very high current applications. Extra rugged construction ensures long life. Contact arms: Stationary, heavy brass, silver contacts pierced solder terminals. Movable, silver bar contact. Mounting: Four No. 3-48 tapped holes on .375″ x .375″ centers. Weight: 2 ozs.



MC SERIES Built with ceramic contact spacer for RF switching to minimize losses at high frequencies. Intercontact capacitance 1.5 mmfd. max. Tinned, pierced solder type terminals. Mounting: Four No. 3-48 tapped holes on .375″ x .375″ centers. Contacts: palladium. Weight 2 ozs.



MG SERIES Sub-miniature telephone type relay can be furnished open, sealed or in nylon dust cover. Mounting: Open model has four No. 3-48 tapped holes on .375″ x .375″ centers. Sealed model has three No. 4-40 threaded studs on 1″ x .50″ centers. Dust cover model has plug-in header that fits Amphenol receptacle 57-20140 or similar. Contacts: Silver. Weight: Open 1.2 ozs.; Dust cover 2.0 ozs.; Sealed 2.75 ozs.



MH SERIES MINIATURE TYPE Ideal for applications where space and weight are factors. Mounting: Open model, MH11L, one No. 6-32 threaded stud .344″ long plus locating boss. All other open models have four No. 3-48 holes on .375″ x .375″ centers. Sealed models, M enclosures, three 6-32 NC 2 threaded studs on 1.250″ x .50″ centers. D enclosures, three 6-32 threaded studs on 1.188″ x .938″ centers. All sealed models have hook solder terminals.
All models have gold-flashed silver contacts. Weight: Open models 2½ oz. max. Sealed models 5 ozs. max.

MDP SERIES Small size, ultra-sensitive, polarized relays are characterized by high speed switching and efficient, bounce-free contact action. Their operation depends on both the magnitude and direction of the coil current. Two types of contact arrangements provide the following action when coils are de-energized: Bi-Stable—armature remains in its last energized position; Center-Stable—armature remains in center-off position with contacts open. Contact material as listed. Temperature: −60°C to +85°C. Relays are enclosed in a plastic dust cover and equipped with 8-pin plugs for mounting. MDP relays measure: 1.500″ square by 1.812″ high (when seated). Weight: 4.25 ozs.

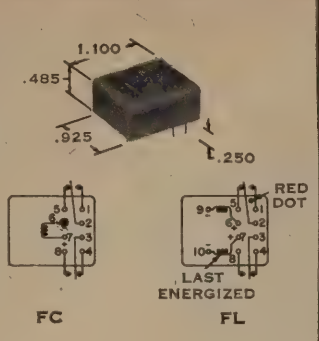
POTTER & BRUMFIELD RELAYS

FC SERIES Conventional miniature relay lies flat on printed circuit board. Withstands 150g shock, 400g linear acceleration, 30g vibration to 2000 Hz. Ambient temperature range: − 65° to + 125°C. Hermetically welded. Bifurcated contacts. Plugs in on .2″ grid. Meets applicable sections of MIL-R-5757E and MSFC-SPEC-339. Weight: .75 oz.

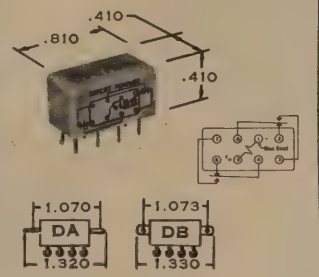
FL SERIES Dual-coil latching relay has same specs as above, except operates by pulsing each coil alternately (observing coil polarity); or connecting the coils in series from a reversing (polarized) source. Remains latched without coil power.

HC SERIES A miniature, non-polarized, non-latching half-size crystal case relay for high reliability performance. Its high-torque motor structure and bifurcated, gold-plated silver DPDT contacts, rated dry circuit to 2 amps @ 28V DC resistive, provide positive performance in low level applications. Temperature range: − 65°C to + 125°C. Hermetically welded. HC11D has plug-in, plain case; HC11DA has hook-end solder terminals and shoulder brackets; HC11DB has hook-end solder terminals and flat mounting plate with 2 holes. The HC series meets or exceeds all applicable sections of MIL-R-5757E, and complies with MSFC-SPEC-339. Size: Plain case .8″ x .4″ x .4″ (seated). Weight: .5 oz.

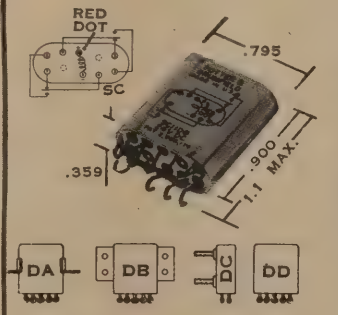
HCM SERIES Military version of miniature HC relay. Same rugged construction features. Hermetically sealed and vibration tested for use in demanding applications such as aircraft and ground support equipment. Meets or exceeds appropriate sections of MIL-R-5757E. Straight pins or hook solder terminals. Shoulder bracket available. HCM has same mountings as HC Series above. Weight: .5 oz.



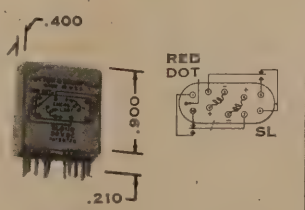
SC SERIES Miniature permanent magnet relay for low power, high shock/vibration applications. 200g shock, 30g vibration to 2000 Hz with no contact opening. Ambient temperature range: − 65°C to + 125°C. Features single coil action and conforms to standard miniature coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Mounting: SC11D**, -DA, -DB, DC and DD correspond to similarly designed SL mountings. SCG11D has rectangular header with terminals on .2″ grid. Weight: ¾ oz.



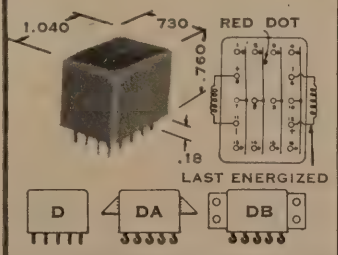
**Armel No. HRK-1, 8-pin receptacles available from distributors for plug-in applications.



SL SERIES Dual coil miniature magnetic latching relay with same shock/vibration, resistance and ambient temperature range as SC. Coils may be connected in series for polar operation. Mounting: SL11D* for plug-in applications: -DA has shoulder flanges with two .104″ x .136″ holes on a 1.062″ center; -DB has a welded bracket with four .125″ dia. holes on 1.062″ x .281″ centers; -DC has two No. 4-40 NC 2A threaded studs on .488″ x .220″ diagonal centers; -DD has plain case with hook-end solder terminals. SLG11D has plug-in terminals on .2″ grid. Weight: 2 ozs.



*Armel No. HRKB-1, 10-pin receptacles available from distributors for plug-in applications.



TL SERIES High reliability 4PDT miniature magnetic latching relay for severe environments. Hermetically welded relay case. Strong permanent magnetic forces keep the contacts locked in desired position when relay is de-energized. Approx. 0.5 ms transfer time. Temperature range: −65° to +125°C. Meets or exceeds applicable sections MIL-R-5757E and MSFC-SPEC-339. Weight: Approx. 1¼ ozs. Mountings: D-plain case, plug-in header. DA = shoulder bracket. 300″ from base, hook-end solder. DB = flat plate, .593″ wide x 1.60″ long, 4 -.125″ dia. holes on .281″ x .30″ centers, hook-end solder.

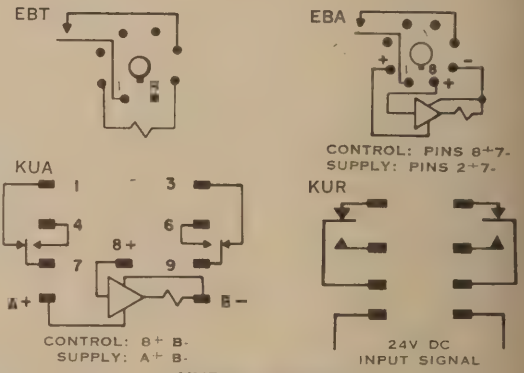
Solid state hybrid relays solve many critical switching problems

Now, these new devices make it possible to interface semiconductor logic circuits with inductive loads such as motors, solenoids, or relays. Inputs as low as 60 microwatts switch 7 ampere loads. And they install conventionally, too! Look at tomorrow's switching devices today . . .



EBT SERIES combines input/output isolation of reed relay with inrush switching capabilities, long life of solid state switch. Switches 7 amps, 60 Hz @ 25°C ambient with nominal load voltage of 120V. Rated 5 amps rms 60 Hz @ 55°C ambient. Minimum operating current: 200 mA, 60 Hz. Expected life greater than 10 million operations. Bounce free. Operate time: 2 msec. maximum. Release time: 10 msec. maximum. Typical "Closed contact" voltage drop is 1.1 V. Octal terminals fit standard 8-pin socket on page 6. Weight 5.5 ozs. approx.

EBA SERIES has output switching characteristics, package, mounting of EBT, plus control signal amplifier. Operates from current sourcing output mode of DTL, TTL logic circuits, 60 microwatt signal switches 7 A load. Must Operate voltage: 2.4 V DC @ approx. 25 μamp at 24V DC supply. Maximum input is 30 V DC or 1 mA. Release occurs at 0.5 V DC or less. Rate of control voltage change: 1V/msec. min. Polarity protection provided. Operate Time: 2 msec. max. @ Must Operate control voltage; Release time: 10 msec. max. @ Must Release control voltage; both rated at nominal supply voltage.

KUA SERIES Amplifier-driven KUP relay, offers standard input sensitivity of 60 microwatts. Operated from low power signals associated with integrated circuits: DTL and TTL logic outputs in the current sourcing mode. Control signal of 2.4 V DC @ approx. 25 μA operates relay, at specified supply voltage. Maximum control signal: 30 V DC or 1 ma. Must Release control voltage: 0.5 V DC @ specified supply voltage. Polarity protection provided. Gold-flashed fine silver contacts switch 5 A @ 28 V DC. res.. or 120 V 60 Hz, 80% P.F. Terminals: .187"q.c./solder fit standard KU sockets on page 7. Clear polycarbonate case. Weight: 3.5 ozs. approx.

KUR SERIES Alternate direct-action, impulse relay employs permanent magnet latching relay plus flip-flop circuit that switches on leading edge of applied pulse. Recommended for pulse operation or alternate energizing of two loads, has permanent memory, alternate action features. Transfers DPDT contacts when specified input pulse (25 msec. min. duration and 1200 PPM max.) is received. Holds mode with or without power. Controlled from single DC source. Contacts: gold-flashed fine silver rated 5A @ 28 V DC, or 120 V AC, 80% P.F. Terminals: .187" q.c./solder. fit standard KU sockets on page 7. Has yellow plastic dust cover. Weight: 3.5 ozs. approx.

Other hybrid relays show on pages 18 and 19.

POTTER & BRUMFIELD RELAYS

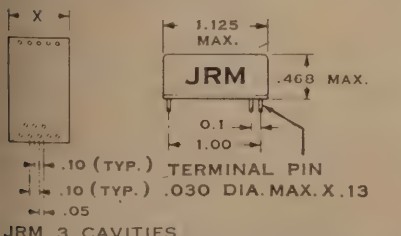
DRY REED

JR STANDARD / JRA LOW COST / JRM MINIATURE

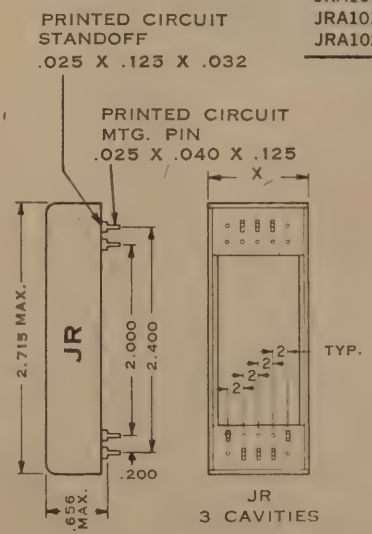
Fast response, reliable performance, high sensitivity and long life are characteristic of the JR Series dry reed relays. JR standard and JRM miniature relays are especially suited for data processing applications, computer equipment, logic circuitry and various other sophisticated control circuits. The JRA Series low cost relays are limited to applications where stray magnetic fields and interaction of coils will not interfere with their operation. Adequate spacing (not less than .75" separation) is recommended.

TWO TYPES OF CAPSULES

The JRA Series is available only in a Form A (SPST-NO) contact arrangement. Both JR and JRM relays have reed switches with either Form A (SPST-NO) or Form C (SPDT) contact configuration. Biasing with a permanent magnet changes Form A to a Form B (SPST-NC). This arrangement requires that coil polarity be observed. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized.



SPECIFICATIONS



Pick-up: 75% of nominal @ 25°C.
Typical Operate Time: At nominal voltage @ 25°C.: JR: 3 ms. JRA: 1.5 ms. JRM: 1 ms.
Release Time: At 25°C: JR:.5 ms. JRM: .05ms.
Coil Power: Based on nominal voltage and resistance.
JR: 1 capsule—240mw; 2 capsules—360mw; 3 capsules—720mw; 4 capsules—960mw; 5 capsules—1.5w. **JRA:** 1 capsule—550mw. **JRM:** 1 capsule—180mw; 2 capsules—275mw; 3 capsules—420mw; 4 capsules—540mw; 5 capsules—720mw. For additional specifications see columnar listings and drawings.

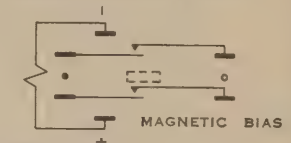
DRY REED



JRL LATCHING

This bi-stable dry reed latching relay requires no coil current to maintain contact in either position. Reversing the polarity of the coil causes the contacts to transfer. Designed for reliable memory work, JRL latching relays mount on p.c. board and are not position sensitive. 1 Form A and 2 Form A contacts are rated 15 watts, resistive. Operate time at 25°C is 1.0 millisecond (including bounce). Weight: 2.0 ozs.

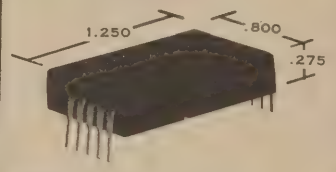
Select the desired nominal operating voltage and contact arrangement. Specify the corresponding P&B type number indicated under TYPE in the columnar listing.



JDT DUAL THIN-LINE

Low profile (only 0.275" max. height) JDT Dual Thin-Line reed relays are ideal for high density packaging applications. Feature hermetically sealed glass capsules epoxy-encapsulated in four package sizes: JDT7 (2 pole), JDT15 (4 pole), JDT21 (6 pole), and JDT27 (8 pole). All have dual in-line terminals on .100" centers for pc board mounting. Contacts will switch 10 watts maximum, resistive (50V DC or 0.5 amp. max.). Operate time is 3.5 milliseconds including bounce. Release time is 3.5 milliseconds maximum. Approximate weights: JDT7-, .35 oz.; JDT15-, .55 oz.; JDT21-, .65 oz.; JDT27-, .70 oz.

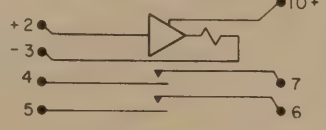
POTTER & BRUMFIELD RELAYS

SOLID STATE/REED HYBRID RELAYS



JDA SERIES Sensitive, amplifier-driven reed relay features same 0.275″ low profile, Dual Thin-Line design as JDT reed relays series. Control signal is amplified by solid state driver circuit with sensitivity of 100 microwatts. Designed to operate from output of DTL and TTL logic circuits in current sourcing mode. Control signals between 2.4 and 30 volts DC will operate the JDA relay when specified supply voltage is applied. Release occurs when control signal is reduced to 0.5V DC, or less. Nominal supply power requirement approximately 490 mW in the activated state. Relay is designed for control voltage change to exceed the rate of 1V msec. Contacts are 2 Form A (DPDT-NO) rated 10 watts maximum resistive (50V DC or 0.5 amp max. switching) per contact. Terminals are spaced on 0.1″ grid centers for printed circuit board mounting. Approximate weight: 0.4 oz.

JDB SERIES Solid state hybrid relay designed specially for interfacing from solid state circuits providing DC signals intended to control 120V 60 Hz loads, such as fractional HP motors, solenoids, and contactors. Expected life exceeds 10 million operations for any specified load current and ambient temperature combination. The SPST normally open solid state "contact" is designed to carry maximum load of 1.7 amps rms, 60 Hz @ 25°C ambient, or 1.0 amp rms, 60 Hz @ 55°C ambient. Internal RC network provides dv/dt suppression, yet results in less than 1 mA leakage current at 120V rms, 60 Hz. Operate time is 1 ms maximum @ nominal coil voltage @ 25°C. Release time is 10 ms maximum. Dual Thin-Line package design has terminals on 0.1″ grid centers for mounting capability on pc boards with other electronic components. Approximate weight: 0.6 oz.

JM SERIES
MERCURY-WETTED CONTACT RELAYS

Rare long life, high speed, and unvarying dependability—all are the result of the basic component of these relays: a hermetically sealed glass capsule. It contains the contact arrangement and a small reservoir of mercury sealed in a high pressure hydrogen atmosphere. A film of mercury is renewed for every operation—that's why you can think in terms of billions of operations without contact bounce, pits or welds.

TWO TYPES OF CAPSULES

The capsule used in JMF and JMF2 (with 2 capsules) modules and JML relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JMD, JMP, JMS and JM1 to JM4 relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML, JMP and JMS Series achieve a high rate of sensitivity by factory-adjusted magnet biasing.

All JM Series mercury-wetted contact relays except the JMF2 relays may be operated up to 5 times the Must Operate current shown in the columnar listings. The JMF2 may be operated up to a maximum voltage of twice the Suggested DC Voltage shown.

Mounting Position: Upright mounting required, but deviation from upright to 30° causes only minor deviation in operating characteristics.

CONTACT RATINGS

JMF, JMF2, JML and JMS: 500V max., and 2 amps max., 100VA max.* JMP, JMD and JM1 to JM4: 500V max., and 5 amps max., 250 VA max.

*With contact protection unless used in a low level circuit. Details of a simple protection circuit consisting of resistor and capacitor in series are packed with each relay.

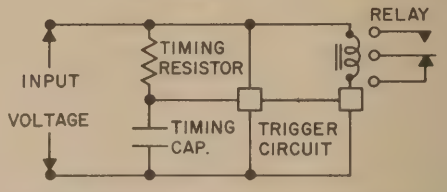
SOLID STATE TIME DELAYS

- DELAY ON OPERATE
- DELAY ON RELEASE
- KNOB ADJUSTABLE
- RESISTOR ADJUSTABLE
- FIXED TIME DELAY

A wide selection of solid state time delay controls are represented by Potter & Brumfield. The differences are in their degree of accuracy, the variety available in each series, and their cost.

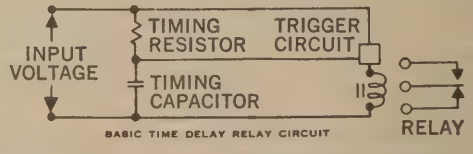
BASIC TIMING CIRCUIT

The basic timing circuit consists of a resistor in series with a capacitor. When the input voltage is applied to the resistor-capacitor circuit, the voltage across the capacitor slowly increases. When the firing level is reached a solid state circuit energizes a switching relay or external electrical load.



CD SERIES

Remarkably dependable, accurate and flexible, the CD series offers an unusually wide selection of operational configurations, all with accurate time delay values, fast reset time and excellent repeatability. It is available in two types: Knob-adjustable in two versions, one with the relay in the same enclosure as the solid state unit, the other with an auxiliary relay. A second type is adjustable with an external resistor. The CD series is available for time delay on operate or on release.



CH SERIES

The CH series is intended for a wide range of industrial applications where economy is of greater interest than highly critical performance. It is available in two types: Knob-adjustable with the relay in the same enclosure as the solid state unit. The second type has a fixed time delay period that is set at the factory and cannot be modified; its case has no knob. The CH series is available for time delay on either operate or on release.

CD, CK, CL AND CJ DELAY ON OPERATE CIRCUIT

CH AND CU DELAY ON OPERATE CIRCUIT

If the timing interval is interrupted, the switching contacts may momentarily transfer (pick up and drop out). Reset is accomplished by removal of the input voltage.

POTTER & BRUMFIELD RELAYS

MORE SOLID STATE TIME DELAYS

CK SERIES

The CK Series is similar to the CH with the exception that they will not false operate† and will time as low as 0.1 second. These time delays include an internally mounted DPDT KR relay rated 10 amperes to form a compact and convenient assembly. Enclosed in white nylon dust covers, CK relays are available in three types: fixed, resistor adjustable and knob adjustable for AC or DC operation. Mounting convenience is provided by plug-in octal type terminals.

CU SERIES

An outstanding value in solid state time delay relays. The low cost CU Series is designed for delay on operate application in machine tool controls, copiers, office equipment, coin-operated machines, process controls and many others. Relays are available in three types: Fixed time delay that is set at the factory and cannot be modified, Adjustable with an external resistor, and Knob-Adjustable with a reference scale. For minimum time (on external resistor types), two terminals, 2 and 5 must be shorted; for maximum time, the listed external resistor must be added between terminals 2 and 5. For intermediate times select a lesser value resistor or use a potentiometer. Either fixed or resistor adjustable models can be furnished in two types of enclosures with the relay mounted in the same case as the solid state circuit. The CUB series knob-adjustable time delay is offered in a slightly taller enclosure. All CU series time delays have an internal DPDT 10 amp relay of the KUP series featured on page 7. The cases for the CU and KUP are dimensionally the same.

CL SERIES

Designed for delay on operate the CL Series is similar to the CU with the exception that they don't false operate† and will time to 0.1 second. These solid state time delays are ideal for AC or DC applications. A DPDT KU relay rated 10 amperes is mounted in the same enclosure, forming a compact assembly. CL relays are enclosed in yellow polycarbonate dust covers and are available in three types: fixed, resistor adjustable and knob adjustable. Plug-in/quick-connect terminals facilitate handling and hook-up.

CJ SERIES

CJ Series time delay dry reed relays combine the basic timing characteristics of time delay relays with the long life and performance of miniature dry reed relays. Two series are available, the CJC fixed time delay on operate and the CJH external resistor adjustable time delay on operate.

R12 SERIES

The R12 Series time delay relays combine the field proved R10 Series basic relay with a high quality delay circuit. These small DC variable time delay relays do not false operate and will time as low as 0.1 second. Timing range of 0.1 to 120 seconds is spanned by three models: 0.1 to 2, 1.0 to 30 and 5.0 to 120 seconds. Each time range is varied with a high resolution 15-turn potentiometer. The internally mounted R10 Series relay is equipped with DPDT contacts rated 5 amperes. Solder terminals are provided and mounting may be accomplished by #3-48 stud or sockets offering solder or printed circuit board terminals.

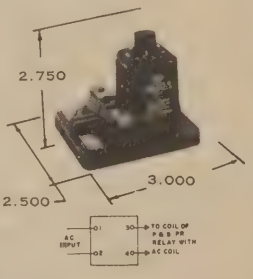
CHOOSE FROM A WIDE SELECTION OF TIME DELAYS

(FOR DELAY ON OPERATE)



CD-21. Knob-adjustable. Use with P&B KRP relays (see page 6) as listed under Note 2.

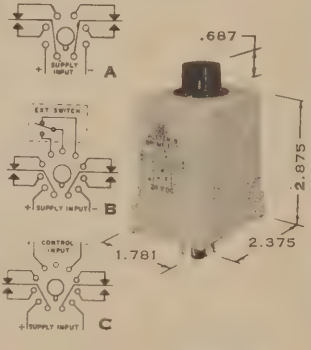
CD-31. Adjustable with external resistor (not furnished). Use with KHP relay (see page 4), Note 4.

CD-45. Knob-adjustable. For heavy duty when used with PR power relay (see page 11) as listed under Note 6.

(DELAY ON OPERATE OR RELEASE)

CH-38 and CD-38. Knob-adjustable delay on operate with internally mounted DPDT relay. Contacts rated to 10 amps. Diagram A.

CH-38 delay on release requires auxiliary SPDT switch or relay contacts:

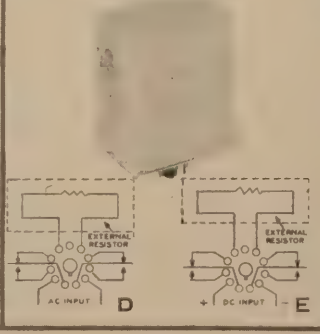


CHB-38-70011 CHD-38-30011
CHB-38-70013 CHD-38-30013

Refer to hook-up diagram B.

CD-38 delay on release occurs when "Control" circuit is de-energized; supply circuit must be on continuously.

CDB-38-70012
CDB-38-30012



Refer to hook-up diagram C.

CK-38 DIMENSIONS SAME AS CH-38 ABOVE

CK-38 SERIES. Similar to CH.

Three types available: fixed, resistor adjustable, (external resistor not furnished) and knob adjustable. CKA-38-70010 and CKB-38-30010, -70010 and -70120: Diagram A. CKC-38-30010: Diagram A. CKF-38-70010: Diagram D. CKH-38-30010: Diagram E.

*External resistor (not furnished) for maximum time. Recommend ¼ watt minimum resistor.

NOTES

1. Has internal relay with DPDT contacts rated at 10 amperes, 120V AC. **2.** Use with Potter & Brumfield relay KRP5AG- 120V AC, KRP11AG- 120V or KRP14AG- 120V AC. **3.** Use with Potter & Brumfield KRP5DG- 24V DC, KRP11DG- 24V DC or KRP14DG- 24V DC relay. **4.** Use with Potter & Brumfield KHP17D11- 24V DC relay. **5.** Supplied with 180 seconds delay; adjustable to 1.8 seconds with external resistor (not furnished). **6.** Use with Potter & Brumfield PR11AY—120V AC relay. **7.** Provides delay on release; all others have delay on operate. **8.** Internal relay contacts rated at 10 VA. **9.** Use 750K resistor for maximum time. **10.** Internal relay has 5 ampere rated contacts.

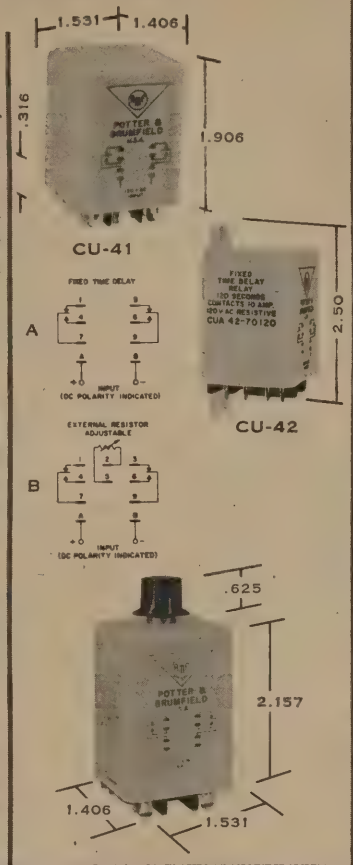
POTTER & BRUMFIELD RELAYS

SOLID STATE TIME DELAYS

AS LOW AS $14.20

(FOR DELAY ON OPERATE)

CUA and CUC are fixed time delays. CUF and CUH are resistor adjustable delays. All with internal DPDT 10 amp contact relay.



CU-41 is a plain case relay, **CU-42** has a slotted flange case. Diagram A is for fixed delays, diagram B for resistor adjustable delays.

SOCKETS FOR CU-41 PLAIN CASE RELAYS

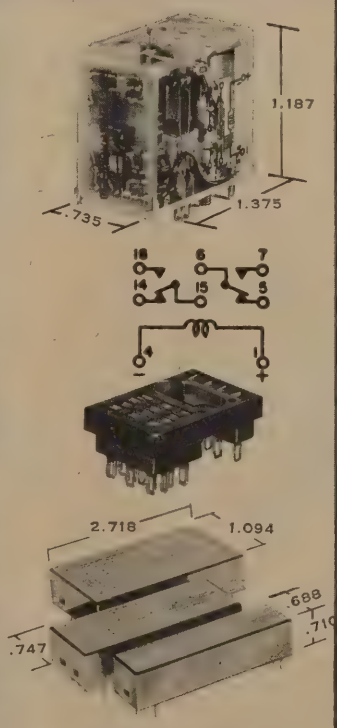
The plain cases fit the same sockets (except CU resistor-adjustable type will not fit 9KU6) and the same hold down spring (9KU3) can be used. Please use KUP type designators (9KU1, 9KU2 and 9KU6) and prices on page 7 when ordering accessories.

CL-41 is a plain case relay similar to the CU-41 with the exception that it doesn't false operate. See page 7 for mounting accessories (9KU).

CUB/CLB-51. Knob-adjustable versions of CU enclosed in slightly taller 51 style case. Same mounting accessories as KUL on page 12. CLB does not false operate.

(FOR DELAY ON OPERATE)

R12. Variable time delay with high resolution 15-turn potentiometer. Calibrated timing capacitor. Fits sockets below. See note 10.



R12 SERIES SOCKETS

DPDT Solder terminal socket, A10-3T
Hold down spring, R10-P28-3
Box of 10 each, 9XR12-1 **NET $9.00**

DPDT Printed circuit terminal socket, All-3T
Hold down spring, R10-P28-3
Box of 10 each, 9XR12-2 **NET $9.00**

CJC SERIES. Fixed time delay that is factory set and cannot be modified.

CJH SERIES. Resistor adjustable type with terminal provisions for external resistor or potentiometer for adjusting time delay period to within ±10% at nominal voltage at 25°C ambient temperature. Pin terminations are for printed circuit board mounting.

NOTES

1. Has internal relay with DPDT contacts rated at 10 amperes, 120V AC. **2.** Use with Potter & Brumfield relay KRP5AG- 120V AC, KRP11AG- 120V or KRP14AG- 120V AC. **3.** Use with Potter & Brumfield KRP5DG- 24V DC, KRP11DG- 24V DC or KRP14DG- 24V DC relay. **4.** Use with Potter & Brumfield KHP17D11- 24V DC relay. **5.** Supplied with 180 seconds delay; adjustable to 1.8 seconds with external resistor (not furnished). **6.** Use with Potter & Brumfield PR11AY—120V AC relay. **7.** Provides delay on release; all others have delay on operate. **8.** Internal relay contacts rated at 10 VA. **9.** Use 750K resistor for maximum time. **10.** Internal relay has 5 ampere rated contacts.

See ordering information on page 23.

CS SERIES SOLID-STATE VOLTAGE SENSORS

• CLOSE-DIFFERENTIAL • UNDER-VOLTAGE

A voltage sensor is designed to energize and de-energize a relay at predetermined voltages. These solid state voltage sensors actuate an internally-mounted relay when a specific voltage level is reached. This pick-up level is either fixed or knob adjustable. Fixed sensors are factory set and cannot be changed. Knob-adjustable versions allow the pick-up levels to be varied over a predetermined range.

If the sensing voltage decreases to a pre-set level after pick-up occurs, the internal relay de-energizes. This is the drop-out level and may be fixed or knob-adjustable. The pick-up voltage point must be set higher than the drop-out voltage point.

Voltage sensors consist of a sensing circuit that acts to turn on a solid state switch, energizing the accompanying relay. Both the solid state switch and a DPDT relay rated at 3 amperes are enclosed in the same molded nylon dust cover.

Type 1. A series with factory fixed pick-up and single knob-adjustable drop-out voltage levels.

Type 2. A series with both knob-adjustable pick-up and drop-out for selecting desired voltage levels.

These reliable solid state voltage sensors can be used as protective devices in alarm circuits, motor controls and to activate or cut off a system automatically. It is possible to combine certain of the above sensors into a custom unit designed for specific individual control functions.

CONTACTS:
Load Switching Relay: Arrangement: 2 Form C (DPDT)
Rated: 3 amps @ 28V DC resistive: 120V AC resistive.

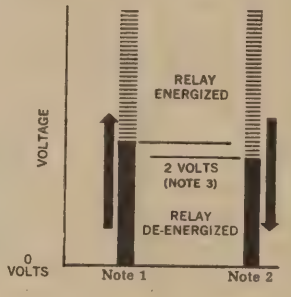
COILS:
Operate Power: DC: 1.5 watts approximate.
AC: 1.0 volt-ampere approximate.
Duty: Continuous.

GENERAL:
Operate Time @ 25°C: 25 milliseconds approximately at nominal voltage.
Temperature Range: −10°C to +55°C
Reverse Polarity Protection: Yes, on DC types
Size: 2.375″ x 1.750″ x 3.593″ seated height.
Approximate Weight: 8 ozs.
Mounting: Octal plug.
Enclosures: Nylon dust cover.

Fixed pick-up and adjustable drop-out. One knob for setting drop-out value.

Adjustable pick-up and drop-out. Two knobs for setting desired values.

FIXED PICK-UP AND ADJUSTABLE DROP-OUT*



Type	Pick-up (Volts)	Drop-out Range (Volts)	Type of Voltage	Sugg. Resale Price
CSJ38-71010	105	90-103	AC(50/60 Hz)	$29.20
CSL38-31010	22	16-20	DC	23.15

ADJUSTABLE PICK-UP AND DROP-OUT*

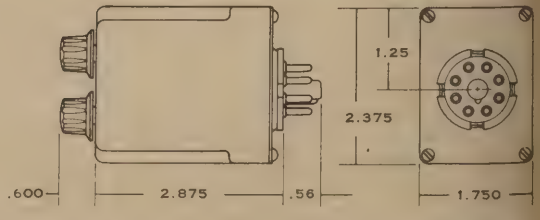
Type	Pick-up Range (Volts)	Drop-out Range (Volts)	Type of Voltage	Sugg. Resale Price
CSJ38-30010	20-30	18-28	AC(50/60 Hz)	$30.20
CSJ38-70010	92-140	90-138	AC(50/60 Hz)	32.95
CSL38-30010	20-30	18-28	DC	26.20

Set point varies over temperature range.

ADJUSTABLE VOLTAGE SENSOR OPERATIONS

NOTE 1
As voltage increases, the relay will pick up at a predetermined point and remain energized while voltage is maintained at that level or higher.

NOTE 2
As voltage decreases, after pick up, the relay will drop out at a predetermined point.



NOTE 3
Minimum difference between pick-up and drop-out points should not be set at less than 2 volts.

NOTE 4
Set point varies over temperature range.

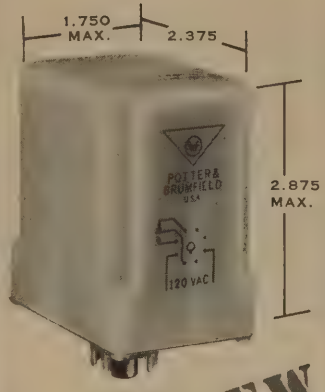
POTTER & BRUMFIELD RELAYS

SOLID STATE SENSORS

FREQUENCY SENSOR

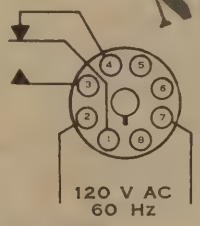
CPF SERIES Solid state frequency sensor de-energizes its output relay when frequency of the AC input reaches upper or lower limit (62 or 58 Hz, for example) of an adjustable bandpass that brackets 60 Hz. The SPDT relay contacts rated 10 amps @ 120V, rms, 60 Hz will drop out to stop a process, sound an alarm, or perform other desired function. Bandpass adjusts continuously from 56-64 to 59-61 Hz. Tripping point tolerance is ±1% of bandpass limits. Relay chatter at threshold limits is prevented by fixed amount of hysteresis introduced between drop out and pick up. The sensor operates on 120V AC ±10%. Operating temperature: —10°C to +55°C. Solid state sensor circuit and general purpose relay are enclosed in 38-style nylon dust cover equipped with standard 8-pin plug for socket mounting. Weight: 8 ozs. approx.



3ϕ SEQUENCE SENSOR

CPS SERIES Solid state 3-phase sequence sensor is designed to detect reverse phase sequence and provide positive control of conventional 3-phase, 4-wire, 60 Hz circuits. Output relay de-energizes on loss of one or more phases or when phase reversal causes a combination other than the normal A-B-C relationship. Rugged, long life general purpose relay provides SPDT isolated contacts rated 10 amps @ 120V rms, 60 Hz, resistive. Solid state sensor circuits and general purpose relay are enclosed in a 38-style nylon dust cover. SPDT silver-cadmium oxide contacts rated 10 amps @ 120 volts rms, 60 Hz resistive offer reliable switching. Operating Temperature: —10°C to +55°C. Coil is designed for continuous duty in 120/208 volt, 60 Hz, 3-phase, 4-wire systems. A standard 8-pin plug is provided for convenient socket mounting. Weight: 8 ozs. approx.

3ϕ VOLTAGE SENSOR



CPV SERIES Three-phase voltage sensor provides undervoltage protection. Designed to sense lower than normal 3-phase voltage, it responds by activating an alarm or by de-energizing a process under its control. The output relay de-energizes when average input voltage drops below a pre-determined level. Pick-up and drop-out levels are designed to prevent triggering on fractional voltage variations. Solid state sensor circuits and general purpose relay are enclosed in a 38-style nylon dust cover. SPDT silver-cadmium oxide contacts rated 10 amps @ 120 volts rms, 60 Hz resistive offer reliable switching. Operating Temperature: —10°C to +55°C. Coil is designed for continuous duty in 120/208 volt, 60 Hz, 3-phase, 4-wire systems. A standard 8-pin plug is provided for convenient socket mounting. Weight: 8 ozs. approx.

Sockets for sensors shown above may be found on page 6.

WARRANTY

Potter & Brumfield Division of AMF Incorporated warrants its products, including but not limited to those manufactured to specifications supplied to it, for a period of one year from date of delivery to the retail purchaser to be free from defects in both workmanship and materials. Any defect appearing more than one year from the date of delivery to purchaser shall be deemed to be due to ordinary wear and tear. Potter & Brumfield Division of AMF Incorporated, however, assumes no risk or liability for results of the use of products purchased from it, including but without limiting the generality of the foregoing: (1) The use in combination with any electrical or electronic components, circuits, systems, assemblies or any other materials or substances; (2) unsuitability of any product for use in any circuit or assembly. Purchaser's rights under this warranty shall consist solely of requiring Potter & Brumfield Division of AMF Incorporated to repair, or in Potter & Brumfield Division of AMF Incorporated's sole discretion replace, free of charge, F.O.B. factory, any defective items received at said factory within said year and determined by Potter & Brumfield Division of AMF Incorporated to be defective. The giving of or failure to give any advice or recommendations by Potter & Brumfield Division of AMF Incorporated shall not constitute any warranty by or impose any liability upon Potter & Brumfield Division of AMF Incorporated. The foregoing constitutes the sole and exclusive remedy of the purchaser and the exclusive liability of Potter & Brumfield Division of AMF Incorporated, AND IS IN LIEU OF ANY AND ALL OTHER WARRANTIES, EXPRESS, IMPLIED OR STATUTORY AS TO MERCHANTABILITY, FITNESS FOR PURPOSE SOLD, DESCRIPTION, QUALITY PRODUCTIVENESS, OR ANY OTHER MATTER. In no event shall Potter & Brumfield Division of AMF Incorporated be liable for special or consequential damages or for delay in performance of this warranty.

SCHRACK ELECTRICAL SALES CORPORATION

SCHRACK RELAYS

SCREW DOWN SOCKET WITH MOLDED TERMINAL STRIPS

No. RN 73301 — 8 Pin

No. RN 73302 — 11 Pin

For surface type installations and proto type work where screw terminals are convenient. Adequate barriers for hi-voltage installations.

STANDARD SOLDER LUG SOCKET

No. RN 78710 — 8 Pin

No. RN 78711 — 11 Pin

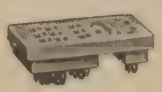
Conventional type molded socket with numbered pins — screw mounting.

PRINTED CIRCUIT LUG SOCKET

No. RN 78712 — 8 Pin

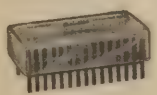
No. RN 78713 — 11 Pin

Standard type for conventional circuit board assemblies — black molded with numbered pins.



MINIATURE SOCKETS FOR RA RELAYS

No. RA 78700 — for screw mounting, made specially for mounting Schrack RA type relays but may be used for miniature modular circuitry with plug base and dust cover available on request. Precision type with spring-hold grounding terminal.



No. RA 78701 — for spring mounting.

No. RA 78702 — for printed circuit mounting.

SOCKETS AND ACCESSORIES FOR RE RELAYS

No. RE 78700 Standard Socket
RE 78702 Printed Circuit Socket
RE 28800 Hold-down Spring

SOCKET FOR TYPE RTM

No. RT 78700 for printed circuits
RT 78701 — w/solder lugs
RT 78703 — Screw type term

SPECIAL SOCKET FOR CAF SERIES

No. RD 78700 — 8 or 11 Pin

Exclusive with Schrack. This socket accommodates either 8 or 11 pin base. Its small size and design provides for strip mounting with no loss of space.

BASE FOR SCHRACK CAF SERIES

No. RD 78600 — 11 Pins

May be used with above socket and dust cover for building modular component requiring U. L. specs for spacing.
for 8 or 11 wiring

No. RD 78601 — same as above but with printed circuit pins.

STANDARD MOLDED PLUG

No. RN 78600 — 8 Pin

No. RN 78704 — 11 Pin

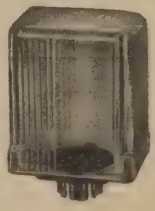
Accommodates RN 16035 or RN 16019 Dust Covers for building plug is modular circuitry.

SCHRACK TYPE HOODED PLUG

No. RN 78714 — 8 Pin

No. RN 78715 — 11 Pin

Permits any relay or component to be mounted remotely and to be plugged into standard socket in circuitry.



DUST COVER FOR CAD+CAF SERIES

No. RN 16035 POLYSTRENE
with holes in base for screw mounting.

No. RN 16019 — Same as above but molded of Macralone*.

METAL DUST COVER FOR CAF SERIES ONLY

No. RD 10701 on request.

LARGE DUST COVER FOR METAL PLATE

No. RN 16022 Polystyrene
Internal grooves provide means for mounting circuit boards with components.

No. RN 16034
Same as No. RN 16022 but made of Macralone*.

No. RN 16039
Same as No. RN 16022, but grey opaque.

PLUG MOUNTED ON METAL PLATE

No. RN 74221 — 8 Pin
No. RN 74104 — 11 Pin

Metal plate provides base for oversize dust cover in order to install components for modular circuitry.

HIGH POLYSTYRENE DUST COVER

No. RN 16020

May be used with CAD Series.
Two holes in top for ventilation.

HOLD DOWN SPRING

No. RN 28623

To hold relay in place—fastens to mounting screws of standard type socket.

HOLD DOWN CLIP—Formed piano wire. No. RN 28611

*Macralone is a polycarbonate resistant to high temperatures.

Self tapping screws for dust covers available on order.

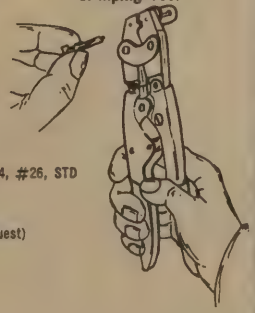
Ganged T-Bar Switches

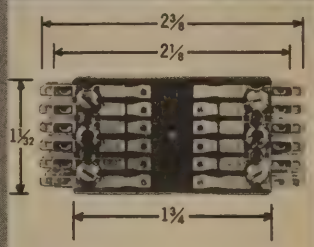


Toggles may be ganged for controlling additional circuits . . . 48, 72, 108, etc. Shown here, 108 poles.

T-BAR Connectors save time and reduce installation costs using individual snap-in crimp terminals crimped to pre-stripped wire and then snapped into a contact block, which forms the connector. The connector is pushed onto the wafer terminals, eliminating soldering. Because we offer a connector, rather than a receptacle, harness work can be completed outside the chassis and therefore no fancy chassis work is required to accept a receptacle. It not only makes the metal work simpler, but it also saves layout engineering and drafting time. Since T-Bar Switch/Relays are so easily mounted, they are often found on the back of meter panels or on their own brackets.

6 P/N88601 Shown
Can be used with all units shown above

8601-51 Crimping Tool



PHYSICAL PROPERTIES:
Wire Accommodated: (1) #18, #20, #22, #24, #26, STD (2) #22, #24, #26 STR
Connector Material: Lexan®
Snap-in Contact Material: Phosphor Bronze
Snap-in Contact Finish: Tin Plated (other on request)
Retaining Clip Material: Stainless Steel
Connector Weight: Approximately 0.3 oz.

MANUFACTURED BY:

T-Bar INCORPORATED SWITCHING TECHNOLOGY

Manufactured under 1 or more of the following patents: 3,206,990, 3,226,508

® "T-Bar" — Reg. T.M.

GENERAL FEATURES:

The series 801 T-Bar Relays are solenoid actuated multi-pole relays with a unique design permitting stack-up of enclosed contact "wafers." Each wafer has a maximum of 12 pole double throw contacts thereby allowing ECI to supply the 801 relay with any combination from 4 to 60 poles.

CONTACT RATING:
3 amp, resistive load 150 watt maximum make or break;
5 amp, 500 watt maximum carry.

CONTACT MATERIAL:
Gold bonded, fine silver, standard. Others available on special order.

CONTACT FORMS:
"A" single throw N.O.
"B" single throw N.C.
"C" double throw, break before make
"D" double throw, make before break

NUMBER OF POLES (RELAYS):
One Wafer — 12 poles
Two Wafers — 24 poles
Three Wafers — 36 poles
Four Wafers — 48 poles
Five Wafers — 60 poles
("A" form only)

OPERATE VOLTAGE:
Min. voltage: 80% of nominal at 25°C

RELEASE VOLTAGE:
Max. voltage: 20% of nominal at 25°C

OPERATE TIME:
One Wafer Relay — 15 ms. max.
Two Wafer Relay — 25 ms. max.
Three Wafer Relay — 30 ms. max.
Four Wafer Relay — 35 ms. max.
Five Wafer Relay — 40 ms. max.

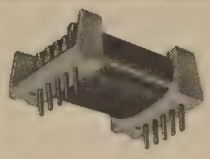
RELEASE TIME:
5 ms. max. (36 pole) — 10 ms. max. (12 pole)

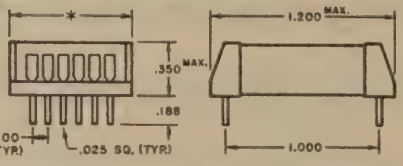
TERMINALS:
Solder tab that also mates with T-Bar connector P/N 88601 (two required per wafer)

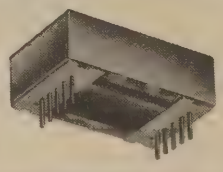
ENCLOSURE:
Contacts enclosed in dust tight plastic enclosure that is separated from the actuator assembly. Withstands Mil. Std. — 202 method 106B moisture resistance test.

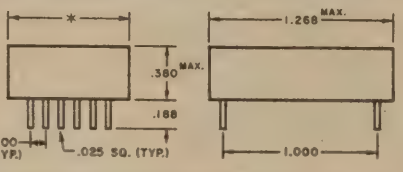
LIFE:
Mechanical — 20,000,000 operations minimum for relay
Electrical — 20,000,000 operations minimum at 100 milliamps to 100,000 minimum at 5 amps, 150 watts resistive load.

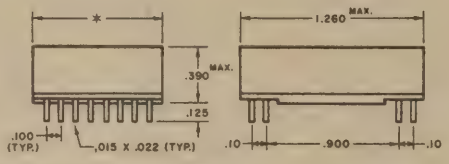
DIELECTRIC:
1000 vrms terminals to case at sea level and 25°C
1000 vrms terminal to terminal at sea level and 25°C
1000 vrms coil to case at sea level and 25°C

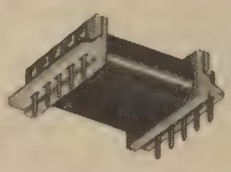


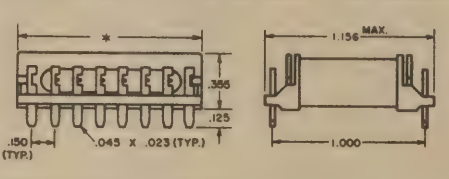


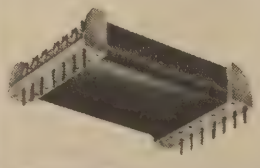


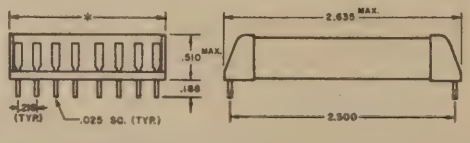


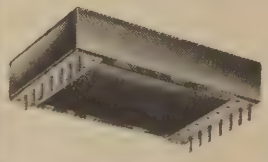


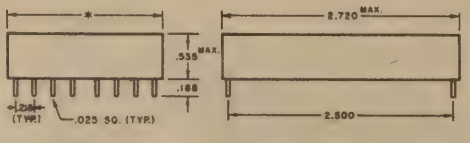


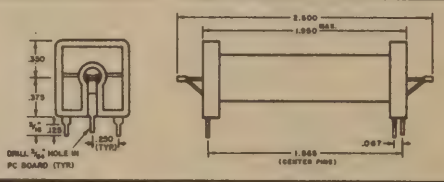












TEMPERATURE RANGE:
−55°C to +85°C

INSULATION RESISTANCE:
5,000 megohms @ 25°C minimum

ORDERING INFORMATION:
Specify Series No. — number of poles plus contact form letter-coil voltage. For example a 36 pole double throw relay with a 24 VDC coil is: 801-36C-24

CORNING Glass Tin Oxide Film Resistors

The unique construction of CORNING Tin Oxide Resistors provides the ultimate in stability and reliability. The fully oxidized metal film is moleculary bonded at red heat to a glass substrate, thus eliminating degradation normally experienced with films that are free to oxidize. The matched thermal expansions of the glass substrate and tin oxide film eliminate fatiguing stresses.

		CGW/MIL	RESISTANCE (ohms)		WATTAGE		TOLERANCE

It's easy

to order from this catalog.

When ordering products shown in this catalog
or writing for additional information,
be sure to specify:

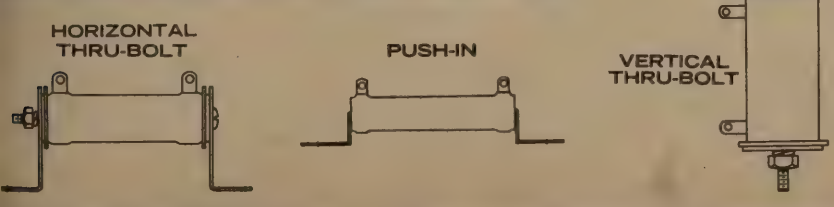
1. **The year and edition of this MASTER**
2. **Manufacturers' catalog numbers and page numbers**

This will avoid confusion
and expedite delivery.

Thank you!

DALE for Optimum Value in Wirewound Resistors

INDUSTRIAL WIREWOUND POWER RESISTORS, SILICONE OR VITREOUS ENAMEL COATED



Dale's expanded industrial wirewound line provides both silicone and vitreous coated models. Silicone models are recommended where maintenance of tolerance and T.C. is of primary concern. Vitreous models are recommended where maximum resistance to chemical action is required.

CONTACT DISTRIBUTOR FOR PRICES.

TYPE	APPLICATION	APPLICABLE MIL SPEC AND TYPES	WATTAGE RATING	RESISTANCE RANGE	CORE SIZES	TERMINALS	MOUNTINGS	TOLERANCE

MIL. TYPE	RWP-18	RWP-20	RWP-21	RWP-23

WIREWOUND PRECISION RESISTORS, SILICONE COATED & MOLDED

Meets applicable requirements of MIL-R-26E, MIL-R-26C (Char. G & V) and MIL-R-23379. Non-inductive styles are available. Both RS and G types have established outstanding reliability records (write for test reports).

TYPE G

Beryllium oxide core for decreased size, increased stability. Meets applicable specifications of MIL-R-26 and MIL-R-23379.

(Available with Weldable Leads)

Tolerance: .5%, 1%, 2%
Operating Temp. Range: –55° C to +165° C
Temperature Coefficient: –200 PPM to –500 PPM, depending on value within normal resistance range.
*Applies to MC only.

Charles T. Gamble Industries

PRECISION WIRE WOUND RESISTORS & NETWORKS

Charles T. Gamble Industries has engineered and designed non-inductive precision wire wound resistors to meet the requirements of Mil-R-93D. These resistors are completely sealed against the effects of high humidity and salt water immersion cycling. The material used in the manufacture of our resistors has a very high dielectric strength. The bobbin material used in winding the resistors is one and the same as the encapsulating material. All resistors use resistance wire with very low thermal E.M.F. to the copper leads. Where thermal effects can be disregarded, welded construction with nickel alloy leads may be specified.

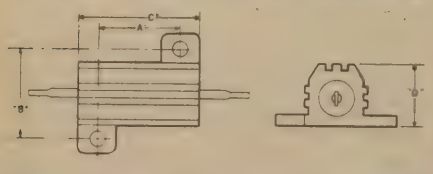
Standard temperature coeficient is ±10 PPM/°C. Lower T.C.'s, and T.C.'s as high as 6000 PPM/°C can be supplied.

Tolerance available (non power styles): 1%, 0.5%, 0.1%, 0.05%, 0.025%, 0.02% and 0.01%. Resistors with tolerances of 0.1% and below are stabilized by artificial aging and temperature cycling.

NETWORKS: RC NETWORKS, LADDER NETWORKS, VOLTAGE DIVIDERS, BINARY NETWORKS

Sub-miniature Axial lead Precision resistors have been designed for applications where space is a prime factor.

Encapsulated printed circuit resistors are designed for printed circuit board application, where space is a factor.



Radial lug type resistors have been designed to meet the requirements of Mil-R-93D.

All resistors are hermetically sealed with epoxy resin to protect the windings against the effects of high humidity and salt water immersion cycling. Resistors can either be inductive or non-inductive wound.

The materials used in the construction of radial lug type resistors are identical to those used in the construction of axial lead types.

These resistors are supplied with a thru hole for mounting to the chassis by means of a #6 thru bolt.

OMI RESISTORS T SERIES

PRECISION POWER RESISTORS, AXIAL LEADS

Highly reliable, silicone coated, precision resistors manufactured to meet MIL-R-26 specifications. There are 17 basic sizes with power ratings from ½ to 10 watts and resistance ranges from .05 ohms to 275K ohms. Resistance tolerances from .05% to 5% (1%, standard). Temperature coefficient of resistance 2PPM up (20PPM, standard).

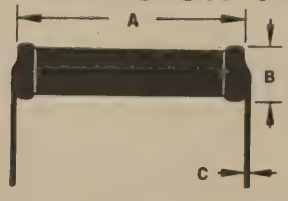
* Max. working voltage determined at .0008 wire.



SPECIAL FEATURES

• Close tolerances (to .01% available). • Extremely high stability. Low TC of resistance (to 2PPM). • Welded construction terminal to terminal. • Wide temperature range; from −65° to 275° C. • A specially formulated silicone coating makes OMI T-series resistors impervious to moisture, salt spray, abrasion and expanded temperatures.

PRECISION POWER RESISTORS, RADIAL LEADS

SPECIFICATIONS

TR electrical, mechanical, material, power rating and derating specifications are identical to models of equivalent wattage and size in the OMI T Series. Also available, non-inductively wound, and identified as the "NR" Series.

N
HN
NR
HFN

ALUMINUM HOUSED, NON-INDUCTIVE

OMI models of equivalent physical and electrical specs are available with non-inductive windings. For the "T" Series, specify "N"; for the "TR" Series, specify "NR"; for the "HT" Series, specify "HN"; and for the "HF" Series, specify "HFN". **NOTE:** In ordering non-inductively wound resistors, (1) Maximum resistant values must be divided by 2, (2) Maximum working voltage must be multiplied by .707 and (3) Maximum weights may slightly exceed those shown.

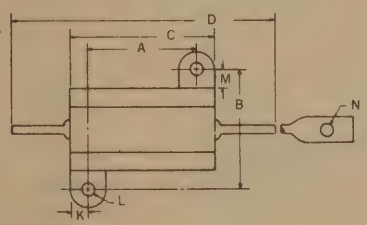
OMI RESISTORS HT HF

HT-5 through HT-75

HT Models are anodized, aluminum-housed, precision wirewound resistors, designed to chassis mount for maximum heat dissipation. They are manufactured to meet or exceed MIL-R-18546 specifications. Four sizes: 5 to 50 watts (mounted), resistance ranges from .1 ohm to 250K, depending on size. Tolerances—1% standard—.05% to 5% available. Temperature coefficient from 2PPM up. (20PPM, standard.)

HF Models are identical in dimensions, resistance ranges, tolerance and temperature coefficients with those of the HT Series, but offer a great increase in their power ratings as similar size through the use of beryllium oxide cores for increases heat dissipation. These are manufactured to exceed MIL-R-18546 power ratings.

STANDARD ELECTRICAL SPECIFICATIONS



OMI Type		MIL Type	Power Rating (Watts)*			Resistance Range		Max. Working Voltage		Max. Weight Grams
			HF (OMI)	HT	MIL	MIN.	MAX.	HF	HT

*Rating is based on chassis mounting area and stability

DERATING

OMI, HT and HF resistors have an operating temperature range of −55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temperatures. The graph curves shown apply to operation of unmounted resistors. Free air rating.

A = HT5, HT-10
B = HT-25

TEMPERATURE COEFFICIENT

Although all OMI, T, F, HT and HF resistors are manufactured with a temperature coefficient of ±20PPM/°C over the full temperature range and resistance range as standard production, closer temperature coefficients are available.

Special Close T.C. Availability: All styles can be supplied with temperature coefficients of ±10PPM, ±5PPM, and ±2PPM. Non-inductively wound styles can be supplied with ±10PPM.

Temperature Range: −65°C to +275°C.

Tolerance Range: 0.05% to 5%.

Resistance Range: 0 to 2 watts, 25 ohms to maximum for each size.
Over 2 watts, 50 ohms to maximum for each size.

Code to Designate Special T.C:

10PPM	C-10
5PPM	C-5
2PPM	C-2

To Order Resistors with Special T.C., Specify:
(example)

Resistor Type	Resistance Value	Tolerance	T.C. Code
T-5	4700 ohms	0.5%	C-5

OHMITE radial lead resistors for P.C. boards

LASS PC-58

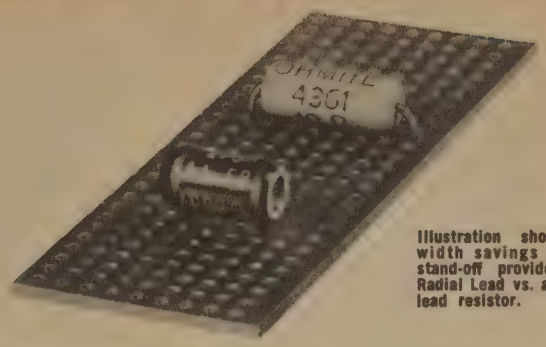

Illustration showing overall width savings and built-in stand-off provided by PC-58 Radial Lead vs. a typical axial lead resistor.

Increases productivity 28.1% — Saves circuit board space

f you are manually inserting axial lead resistors in printed circuit boards, it will pay you to examine the new Ohmite PC-58 resistor.

DVANTAGES:

BOR SAVING: Radial Leads eliminate cutting, bending, and forming of ads. Productivity is increased 28.1%. You achieve a 21.9% savings in bor cost. (Time Study Publication No. 163 available on request.)

PACE SAVING: Radial leads reduce total length dimension required com- red to axial lead types, increases packaging density possibilities.

SITIVE POSITIONING: Built in stand-off automatically provides correct acing between resistor and P.C. board.

ST SAVING: PC-58 resistors are priced lower than comparable axial lead pes. This is in addition to savings in labor as explained above.

ANDARD SIZE: PC-58 Radial Leads fit standard .1 inch matrix boards with andard .046 inch diameter holes.

ARKINGS ALWAYS VISIBLE: Value and Ohmite code markings are always sible from the top of the PC-58. Eliminates time consuming orientation rmally required of axial lead types.

OICE OF COATINGS: PC-58 resistors are available in ±5% tolerance with treous Enamel (Type 270) for resistance values to 3300 ohms for 3-watt d to 6800 ohms for 5¼-watt or Ohmicone® silicone-ceramic (Type 470) r values over 3300 ohms and 6800 ohms for 3 and 5¼-watt sizes, spectively. For tolerances of ±3% and closer or for low T.C., specify micone® Type 474.

AILABILITY: Now standard PC-58 resistors are in stock at your local mite authorized stocking distributor.

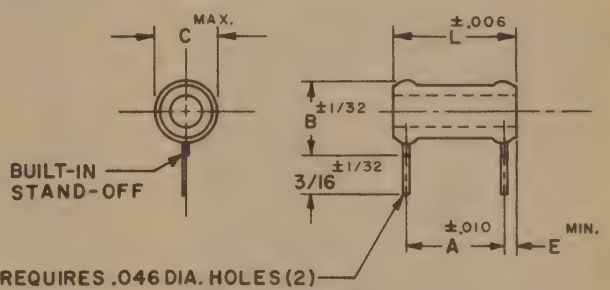
SPECIFICATIONS:

MECHANICAL

Coating: Vitreous Enamel or Ohmicone® (silicone-ceramic), depending on Type.

Terminals: Radial, solder-dipped.

Markings: Ohmite Code and Resistance (Ohms) Value.



Weight: 3-Watt: .002 lbs.; 5¼ Watt: .003 lbs.

ELECTRICAL

Tolerance: ±5% for 1 ohm and above; ±10% below 1 ohm.

Wattage: 3-Watt, derated to 0 at 350°C—5¼-Watt, derated to 0 at 350°C

Temperature Coefficient: Less than 260 ppm/°C.

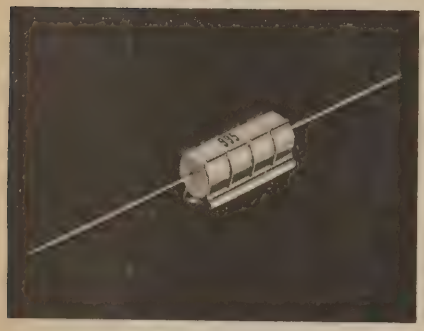
OHMITE type 995 MOLDED axial lead vitreous enameled resistors



- **FIRST MOLDED WIREWOUND, VITREOUS ENAMEL RESISTOR**
- **INSULATED! Meets 1000 VAC Test**
- **WITHSTANDS 1500°F Temperatures without Distortion**
- **RESISTS Chipping, Breaking**
- **VITRIFIED MARKINGS, Resist Abrasion and Active Solvents**
- **UNIFORM SIZE Permits Clip-Mounting with Significant Heat Sink Benefits**
- **HIGH OVERLOAD CAPABILITY**

An exclusive technique (U. S. Patent No.'s 3,229,237 and 3,489,828) permits application of the vitreous enamel coating by **molding** instead of the conventional "dip" process. The dimensionally consistent and thicker coating that results, guarantees a 1000 VAC insulation rating plus unparalleled capability for withstanding very high temperatures, high humidity and immersion in salt solution.

These resistors are normally mounted by their axial leads. However, their consistent form also permits mounting in clips with heat sink benefits up to 100% (see "Clips" lower left). Resistor markings are also vitreous and will not burn off even under extreme overloads. Resistance tolerance is ±5%. Series 99 resistors meet the requirements of MIL-R-26 for "insulated" resistors

MOUNTING CLIPS

Uniform shape and consistent dimensions of Series 99 and 88 (page 6) resistors, permits them to be conveniently mounted in clips. If the clip is on a metal surface, the wattage capability of the resistor can increase by as much as 100%. Holes in clip base permit fastening to chassis by means of machine screws, eyelets or rivets.

CLIPS for TYPE 995 and 884* RESISTORS

Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.

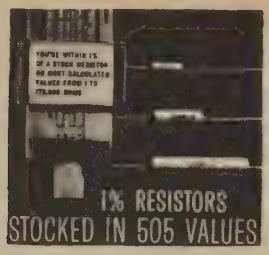
OHM'S LAW CALCULATOR . . .



Solve Ohm's Law/Parallel Resistance problems with Ohmite's pocket-sized calculator. Also convenient A, B, C, and D slide rule scales for supplementary calculations. Resistance scales from 0.01 ohm to 100 megohms. Varnished cardboard or deluxe plastic model.

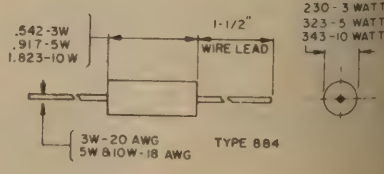
Type	Stock No.	Price
Cardboard	5180	$0.30
Plastic	5182	$1.65

Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.

OHMITE type 884 Riteohm® Resistors—1% tolerance

molded for uniform shape and size

miniature precision resistors—1% tolerance



OHMICONE® molded • wirewound • aged for stability • insulated for 1000 volts • low T.C.

Type 884 Riteohm® Resistors are stocked in power ratings of 3, 5 and 10 watts. Single layer wound on ceramic cores, Riteohm resistors feature a pressure-molded coating of tough, resillient Ohmicone® silicone-ceramic material which meets the MIL-R-26, 1000 VAC insulation test. Riteohms are aged for long term stability and exhibit negligible inductance at audio frequencies. Temperature coefficient of resistance is 0±10ppm/°C[1] for most values. Values shown are based on the MIL-Bell system of standard values. For non-standard values, closer tolerances, etc. contact your local Ohmite office.

Resistance (Ohms)	3 WATTS Style 884-3 Cat. No.[2]	Max. Amps (Emax= 200)	5 WATTS Style 884-5 Cat. No.[2]	Max. Amps (Emax= 460)	10 WATTS Style 884-10 Cat. No.[2]	Max. Amps (Emax= 1100)

Uniform shape of Riteohms permits clip mounting for extra heat dissipation. The wattage capability can be increased by as much as 100% when clip is mounted to a metal surface. See Series 99 listings for clip ordering information.

[1]T.C. of values in 3 Watt size under 97.6 ohms is as follows: From 97.6 thru 10 ohms, 0±20ppm/°C; from 9.76 thru 1.0 ohms, 0±50ppm/°C; below 1 ohm, 0±90ppm/°C.

[2] **Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.**

OHMITE type 270 vitreous enameled fixed resistors

These lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel — the time-proved standard covering that is the best conductor of heat for a material which must also be a good electrical insulator.

Resistance tolerance is ±5% for values 1 ohm or higher; ±10% below 1 ohm.

Wattage ratings are for use in free air. When resistors are mounted in closed spaces or where the circulation of air is restricted, they should not be used at more than one-half rating. Currents and voltages for reduced ratings can be obtained by multiplying full rating by the following factors: 75% load = .86, 66% = .81, 50% = .71, 33% = .57, 25% = .50.

Mounting brackets are automatically supplied in individual unit packs; supplied only when specified in bulk pack orders. See page 18, "Mounting Brackets for Tubular Resistors" to specify other brackets.

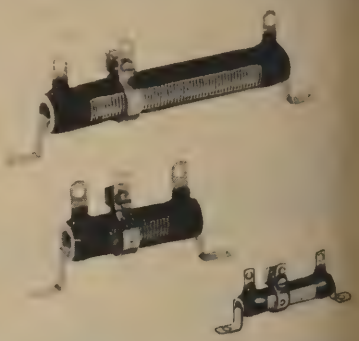
OHMITE dividohm® type 210 adjustable vitreous enameled resistors



"Dividohm" resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Such tapped "bleeders" are made by using one or more adjustable lugs, as required. "Dividohms" are also handy for obtaining odd resistance values, for adjusting circuits, and for use on equipment which must be set to meet various line voltages.

"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to any wire in this strip is made by an embossed contact on the adjustable lug (supplied).

WATT RATING: **The stated wattage rating applies only when the entire resistance is in the circuit.** When the adjustable lug is set at an intermediate point, the wattage rating is reduced in approximately the same portion, i.e., if the lug is set at half the resistance, the wattage is reduced by one-half. A safe rule to follow is to make sure that the maximum rated current is not exceeded. This should be carefully checked particularly if the resistor will be used as a voltage divider with several adjustable lugs. Resistance tolerance is ±10% for the total resistance value.

adjustable lugs

One "Screw Driver Type Adjustable Lug" is supplied with each unit. Lugs with a silver contact button can be ordered from the table shown below.

MOVING THE LUGS: Lugs always should be loosened completely before moving and not moved except while the current is off, in order to protect the exposed wire from mechanical or electrical injury and to protect the operator from dangerous voltages.

DOUBLE THUMB SCREW ADJUSTABLE LUG

This adjustable lug, which is illustrated above, features two advantages — ease of adjustment and less chance of damaging the resistance wire while moving lugs. Available for 1⅛" cores.
Catalog No. **2160**

OHMITE type 200 *brown devil*® fixed resistors

BROWN DEVIL® (Type 200) resistors, are vitreous enameled, wirewound units long famous for ruggedness and durability in small power resistors. With the emphasis towards miniaturization and the current industry trend towards higher operating temperatures, Ohmite has been able to increase the ratings on two Brown Devil sizes. The 5 watt size is now rated **8 watts** and the 10 watt size is now rated **12 watts**. The 20 watt unit retains the same rating. The higher ratings may be confidently applied to any 5 or 10 watt unit now in the possession of users or distributors. At this time also, to meet the demand for lower wattage units, Ohmite introduces two, new, small stock sizes — 3 and 5¼ watts.

Standard resistance tolerance is ±5% for values 1 ohm or higher; ±10% for values below 1 ohm. Tinned leads 1½" long: 3 and 5¼ watt, 20 AWG; 8, 12 and 20 watt, 18 AWG.

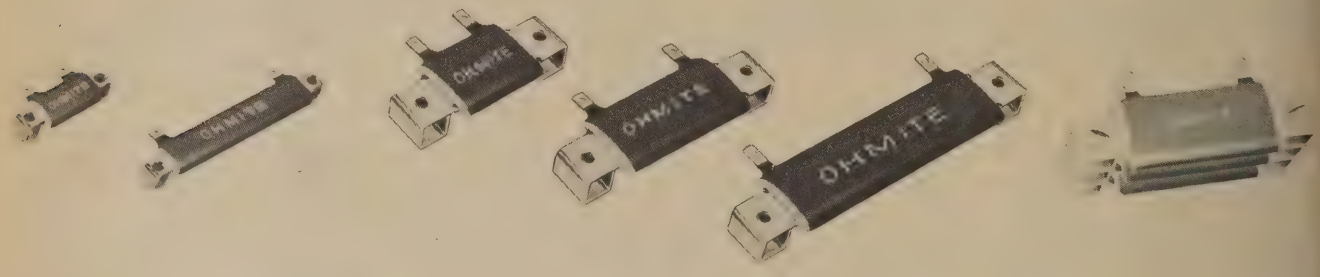
Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.



OHMITE type 250 "THIN" vitreous enameled resistors

Ohmite "Thin" Resistors are intended for use in equipment where space is at a premium. They are wound on flat, oval shaped ceramic cores, and covered with Ohmite's exclusive vitreous enamel coating. Resistance tolerance. ±5%.

Integral mounting brackets extend through the resistor core to equalize heat distribution and to conduct heat directly to the mounting surface — provides equivalent wattage with less bulk and in less space. Wattage ratings assume the use of a metal mounting surface. Reduce ratings 15% for non-metallic surfaces.

"Thin" resistors are mounted or compactly stacked by means of bracket studs which are hollow to receive assembly bolts. The load should be reduced for each unit when resistors are stacked or used in confined, poorly ventilated spaces. Total height from bottom of mounting stud to top of resistor is approximately 9/16" for the Standard units and 11/32" for the Miniature units.

For other sizes, closer tolerances, non-stacking brackets, Dividohm adjustable or other features, consult factory.

OHMITE corrib® HIGH CURRENT LOW OHMS resistors

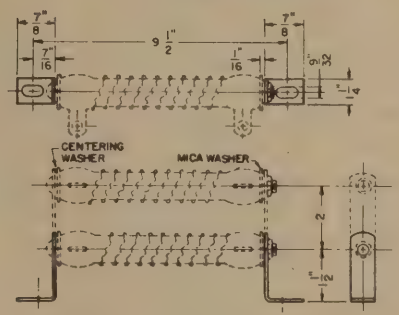
Fixed

Dividohm® Adjustable

High current, low resistance, heavy duty units used in motor starting, dynamic braking, etc. "Corrib" type units employ a corrugated ribbon of resistance alloy. This is space-wound edge-wise around a ceramic tube. Vitreous enamel is fused around the alloy ribbon to lock the turns securely in place. Heavy lug terminals. Resistance tolerance is ±10%.

Available in fixed or Dividohm® adjustable types. Dividohm® type is similar to fixed and includes one adjustable lug. Rating of Fixed or Dividohm® stock units—300 watts—reduce unit load for stack-mounted resistors; core size (bare) 8½" long x1⅛" diameter. Other sizes made to order.

STOCK CORRIBS — 300 WATT SIZE
Type 280 Fixed; 230 Dividohm®



Core: 8½x1⅛" Fixed or Adjustable (DIVIDOHM)
Avg. Weight (Fixed) .61 lb.; (Dividohm) .64 lb.

powr-rib® HIGH CURRENT LOW OHMS resistors

Even higher power handling capability—approximately 700 to 1000 watts—is available in stock, "Powr-Rib" resistors. These are UNCOATED types and are wound either edgewise with ribbon ("Edgewound" type) or with round wire (Round-Wire type).

The core of these units consists of ceramic segments on a metal bar which is slotted on both ends for rapid installation. Standard resistance tolerance is ±10%. Terminals clamp onto the resistor wire and may be moved in from the ends for intermediate resistance values. Extra terminals available for use as taps. See diagrams for terminals. Terminal Stk. No. 2172G (not shown) has screw connections.

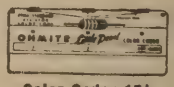
OHMITE *Little Devil*® molded composition resistors on "Tally Tape"

"Tally Tape," Ohmite's wonderfully convenient packaging presently provides for ¼, ½, 1 and 2-watt resistors. Each perforated segment holds 5 resistors — prevents spilling or tangling — simplifies counting — is printed for quick identification — guarantees original, factory-fresh stock.



Now Includes MIL-R-II Types

Also available per MIL-R-39008 for ⅛, ¼, ½ and 1 Watt, ±5% Tol.

Little Devils, Ohmite's famous molded composition resistors, find broad use in commercial and military applications. The ⅛, ¼, ½, 1 and 2-watt sizes, which conform respectively to Styles RC05, RC07, RC20, RC32 and RC42 of MIL-R-11, meet all the stringent requirements of this military specification. The five sizes available satisfy a wide range of design and service needs.

Little Devils have molded insulation for high dielectric strength. Noted advantages of these units are great stability, low noise level, low voltage coefficient, high insulation breakdown voltage and rapid heat dissipation. They may be used at full rated wattage at 70°C (158°F) ambient temperature.

Little Devils are available from stock in standard EIA resistance values in the tolerances and resistance ranges shown in the price table. Ratings for maximum continuous RMS voltage drop are high: 150 volts for ⅛ watt units, 250 volts for ¼ watt, 350 volts for ½ watt, 500 volts for 1 watt, and 750 volts for 2 watt units. See "Little Devil" Resistor Assortments page 16.

OHMITE *Little Devil*® industrial and service resistor assortments

RESISTORS AND HANDY CABINET FOR THE PRICE OF THE RESISTORS ALONE

Select the composition resistor you need, right on the job from time-saving Little Devil® Assortments. Ohmite now offers **seven industrial** assortments in addition to the four service assortments that have been so popular for many years. In this complete line, there is an assortment to fill every industrial and service need. An attractive plastic cabinet or cabinet assembly is furnished at no extra cost with each assortment. Each drawer of a single 5-drawer cabinet has eight compartments all individually labeled. Dimensions of the single cabinet are 9" long, 4¾" high, 5¼" deep. Dovetail tops and bottoms facilitate stacking. Cabinet assemblies for industrial assortments are riveted to metal strips which afford rigidity and permit hanging of the unit on the wall.

Of the seven industrial assortments, there are three ±10% tolerance assortments of ¼, ½ or 1 watt sizes each containing 80 values. A two-cabinet assembly is furnished for these assortments. Four 5% tolerance assortments provide 160 values each of resistors in the ⅛, ¼, ½, or 1 watt sizes. A four-cabinet assembly is furnished for each of these assortments.

The four popular **service** assortments provide ±10% tolerance resistors in a single cabinet in ¼, ½, 1 or 2 watt sizes.

Cabinets are factory packed in accordance with the tables shown below.

11 ASSORTMENTS

Assortment	Catalog No.	Quantity of Resistors	Wattage Size	Net Price
INDUSTRIAL ±10% Tolerance 80 Resistance Values 2 Cabinets	**CAB-25**	1000	¼	$ 70.00
	CAB-26	1000	½	60.00
	CAB-27	600	1	54.00
INDUSTRIAL ±5% Tolerance 160 Resistance Values 4 Cabinets	**CAB-45**	1000	⅛	225.00
	CAB-46	1500	¼	210.00
	CAB-47	1500	½	180.00
	CAB-48	900	1	160.00
RADIO & TV SERVICE KITS ±10% Tolerance 37 Values—CAB-4 40 Values—Others 1 Cabinet	**CAB-4**	150	¼	19.50
	CAB-10	150	½	18.00
	CAB-2	125	1	22.50
	CAB-3	125	2	30.00

OHMITE *Little Rebel*™ carbon film resistors

high stability • low noise • extra long life

Tally Tape® is Ohmite's exclusive convenient packaging of ¼ and ½ watt Little Rebel resistors that prevents spilling or tangling, simplifies counting, decodes ohmic value for quick identification, and guarantees original, factory-fresh stock. Each perforated segment holds 5 resistors; 10 segments packaged in poly bag 50 pack.

High stability, very low noise level, and exceptionally long life make these resistors ideal for applications requiring a steady low power drop. Their accuracy and consistency are relatively unaffected by adverse environmental conditions.

Resistors of 10Ω to 1MΩ have a homogenous film of pure carbon deposited on a high grade ceramic body by cracking a hydrocarbon gas. Resistors having values lower than 10Ω have a nickel film instead of cracked carbon.

Contact caps of special alloy are pressed onto the ends of the resistor body to which the tin coated electrolytic copper connecting wires are welded. Finally the resistors are coated with three or more layers of a special lacquer for electrical, mechanical and environmental protection. This special lacquer will withstand regular industrial cleaning solutions used for cleansing printed circuit boards.

SPECIFICATIONS

Ratings

	⅛W	¼W	½W
Power rating P_{nom}			
T_A 70°C	0.125W	0.25W	0.5W
Maximum voltage AC or DC	150V	250V	350V
Voltage (RMS) that may be applied for 1 sec. across insulated coat	300V	500V	700V
Insulation resistance	10^4MΩ	10^4MΩ	10^4MΩ
	ALL TYPES		
Ambient temperature	−55°C to +155°C		
Temperature coefficient	see figure 2		
Noise voltage	see figure 1		

Voltage Breakdown
2x limiting voltage for 1 min. between terminals of resistor and metal foil ..... no breakdown or flashover

Short Term Overload (Room Temperature)
Loaded 5 sec. at 6.25 P_{max} at 25°C (not to exceed 2x maximum voltage)
10 cycles: 5 sec. on, 10 sec. off
$\triangle R_{max}$ 1%

Shelf Test
At 25°C$_{nom}$ for 12 months
$\triangle R_{max}$ for R 1MΩ 1.5%
R >1MΩ 3%

Temperature Cycling
5 cycles: 3 hours −55°C, 3 hours +155°C
$\triangle R_{max}$ ..... 0.5% or 0.5Ω

Humidity Specifications
After long-term exposure to damp heat at 40°C, 5 VDC
RH = 90-95% for 56 days with no drying 5 VDC
$\triangle R_{max}$ for R_{nom} = 10Ω to 100 kΩ 1%
R_{nom} = 100 kΩ to 1 MΩ 2%
R_{nom} = 1 MΩ or higher 3%

Solder Test (thermal shock)
Terminations immersed for 3 sec. up to .24 inches from end cap in solder bath at 350°C
$\triangle R_{max}$ ..... 0.5% or 0.5Ω

Lead Test
a. Tensile
diameter .024-.032 inches; load 2.20 lbs.; 10 sec.
diameter >.032 inches; load 4.41 lbs; 10 sec. ..... no damage
b. Bending
diameter .024-.032 inches; load 1.10 lbs; 4 x 90°
diameter >.032 inches; load 2.20 lbs.; 4 x 90° ..... no damage
c. Torsion
2 x 360° in opposite directions ..... no damage
$\triangle R_{max}$ (for all tests) ..... 0.5% or 0.5Ω

Shock Test
3 x 1500 shocks in three directions: 50 G:
$\triangle R_{max}$ ..... 0.5% or 0.5Ω

Vibration
Frequency: 10-500 Hz
Displacement 0.06 inches or acceleration 10 G; three directions; total 9 hrs.
$\triangle R_{max}$ ..... 0.5% or 0.5Ω

Voltage Coefficient 5PPM/Volt (0.0005%/Volt)

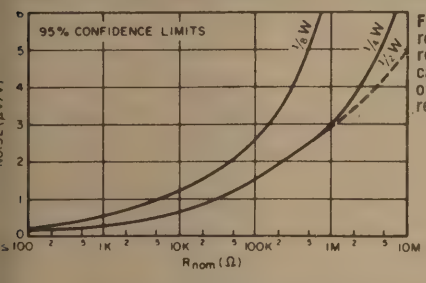

Figure 1. Noise as a function of the resistance value, applicable to all resistor wattages (as per IEC specifications 195; Method of measurement of current noise generated in fixed resistors).

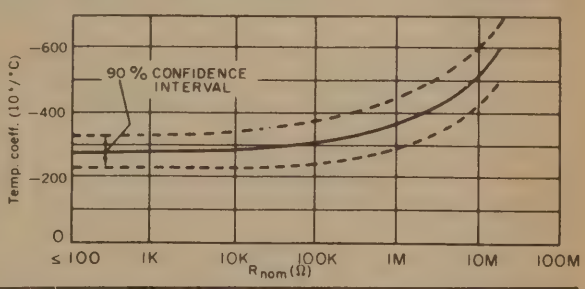

Figure 2. Temperature coefficient as a function of the resistance value, applicable to all resistor wattages.

OHMITE 0.1% precision Determ-Ohm® resistance box

The new Ohmite Precision Determ-ohm® is a resistance decade box with an accuracy of ±0.1%. Four models cover the resistance range from 1 ohm to 1 megohm in a choice of three-4 decade and one-6 decade models.

Simplified selection of resistance values is accomplished by operation of rocker-type thumbwheel switches. Resistance setting is indicated by a direct in-line numeric readout. Unique switch feature (pat. pend.) allows advancing or decreasing of values directly from 9 thru 0 to 1 or vice versa, without retracing all the other values.

The housing is a functional sloping panel metal case equipped with universal binding posts and a grounded metallic binding post for effective shielding.

SPECIFICATIONS

Accuracy: 0.1% (plus .01Ω max. contact and ci cuit resistance per decade).

Selection: Rocker-type thumbwheel switches, cor tinuous rotation in either direction.

Switch Life: In excess of 50,000 operations.

Power: ¼ Watt per resistor.

Operating Temperature: +15 to +35°C.

T.C. of Resistors: ±10 ppm/°C, max. 20 ppm/°C

MAXIMUM CURRENT RATINGS

(Do not exceed 500 Volts.)

Resistance Range (Ohms)	Maximum Current (Milliamps)
1-9	710
10-99	220
100-999	71
1000-9999	22
10,000-99,999	7.1
100,000-999,999	1.1

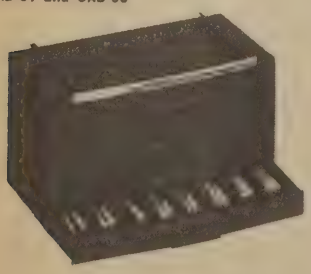
wire-wound

resistor assortments



of type 995 axial lead MOLDED vitreous enamel

- Perfect for R & D and Prototype Labs
- All popular values included.
- Resistors and handy cabinet for the price of the resistors alone.
- 4 Wattage sizes to choose from.
- Contents clearly marked on front of each drawer segment.

Select the wire-wound resistor you need, right on the job. All the popular resistance values, as determined by national usage, are contained in these handy, compact assortments.

The attractive plastic cabinet is furnished at no extra cost with each assortment. Cabinets are factory packed in accordance with the table (shown at right) which states the quantities of each resistance value per assortment. Each drawer segment is individually labeled. Dovetail tops and bottoms of cabinets facilitate stacking. Dimensions for single cabinets are 9″ long x 4¾″ high x 5¼″ deep; double cabinets are 10″ high, including wall hanging brackets.

Single Cabinets for CAB-91 and CAB-99

Double Cabinets for CAB-93 and CAB-95

STACKPOLE® FIXED COMPOSITION RESISTORS

Stackpole Resistors offer superior performance in terms of load life, moisture resistance, shelf life, and other important characteristics. Available in ¼, ½, 1 and 2 watt insulated types in resistance values with 5%, 10% and 20% tolerances as shown below.

EASIEST SOLDERING

Soldering is assured thanks to an exclusive extra solder coating applied after the usual tin dipping. Leads of Stackpole Resistors solder readily by any method — dip or iron — stay tarnish-free even after months in storage. And, their baked-on color codes resist solvent scrubbing operations . . . maintain uniform, attractive appearance.

MILITARY APPROVED

Resistors approved to MIL-R-39008 have failure rates expressed as percentages per 1000 hours based on load life data generated at 50 percent full load operation and an ambient temperature of 70°C. The failure rates are established at a 60 percent confidence level on the basis of the life test.

All Stackpole Resistors are qualified to the R level of MIL-R-39008 which corresponds to a failure rate of 0.01 percent per 1000 hours.

Call Your Sprague Industrial Distributor For Current Quantity Prices

- Feature Improved Internal Construction in Which Windings and Leads are Welded to End-Cap for Superior Mechanical Strength
- Special Insulated Wire is Space Wound and Cemented, to Prevent Turn-to-Turn Shorting. Permits Higher Resistance Values in a Given Size Than in Conventional Resistors
- Non-Porous Tubular Ceramic Shells Sealed With High Temperature Silicone Cement
- Unexcelled Insulation and Mechanical Protection. Can be Mounted in Direct Contact With Chassis
- For Complete Technical Details, Refer to Latest Issue of Sprague Engineering Bulletin 7300

KOOLOHM® TAB-TERMINAL WIREWOUND RESISTORS

- Extremely High Insulation Resistance—10,000 Volts From Surface of Ceramic Jacket to Inner Resistance Elements
- Insulated Wire Permits Winding Higher Values in Layers Which Means Much Smaller Physical Sizes for Each Wattage Rating
- Standard Resistance Tolerance: ±5%
- These Resistors Are Also Available in 5 and 10 Watt Ratings, Axial-Lead Style. See Latest Issue of Sprague Catalog C-619
- For Technical Data, See Latest Issue of Sprague Engineering Bulletin 7310

BLUE JACKET® VITREOUS-ENAMEL WIREWOUND RESISTORS

- Improved Minified Resistors Designed for Thorough Reliability and Stability Under Extreme Operating Conditions
- Matched Coefficient of Expansion Allows Uniform Expansion of Vitreous Enamel Coating, Ceramic Base, and End Caps, Eliminating Crazing, Cracks, and Protects From Fumes and Humidity
- Windings and Leads Welded to End-Caps for Superior Mechanical Strength
- For 2BJ, 3BJ, 5BJ and 10BJ Commercial or Service Equivalents to These Resistors, Refer to the Latest Issue of Sprague Catalog C-619
- For Complete Technical Data, See Latest Issue of Sprague Engineering Bulletin 7410

TYPE RW67, RW68, RW69 BLUE JACKET® WIREWOUND RESISTORS

- This series of Blue Jacket Resistors meet all performance characteristics of Military Specification MIL-R-26E, Characteristics V & G.
- For additional technical data, see latest issue of Sprague Engineering Bulletin 7410.1.

SPRAGUE RESISTORS

ACRASIL® PRECISION/POWER WIREWOUND RESISTORS

- Exclusive Silicone Coating Has Such Excellent Protective Qualities That Extremely Fine Diameter Wire is Used in Winding Resistor Body —Result is Higher Values of Resistance Than Were Previously Available.
- Extended Range of Resistance Values In No Way Impairs the Stability or Reliability of These Resistors, Even Under Extreme Operating Conditions.
- Small Size—Ideal for High-Density Circuitry.
- Both Standard and Non-Inductive Windings Are Available.
- Designed to Meet the Stringent Requirements of MIL-R-26E.
- Standard Resistance Tolerance, ±1%.
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 7450.

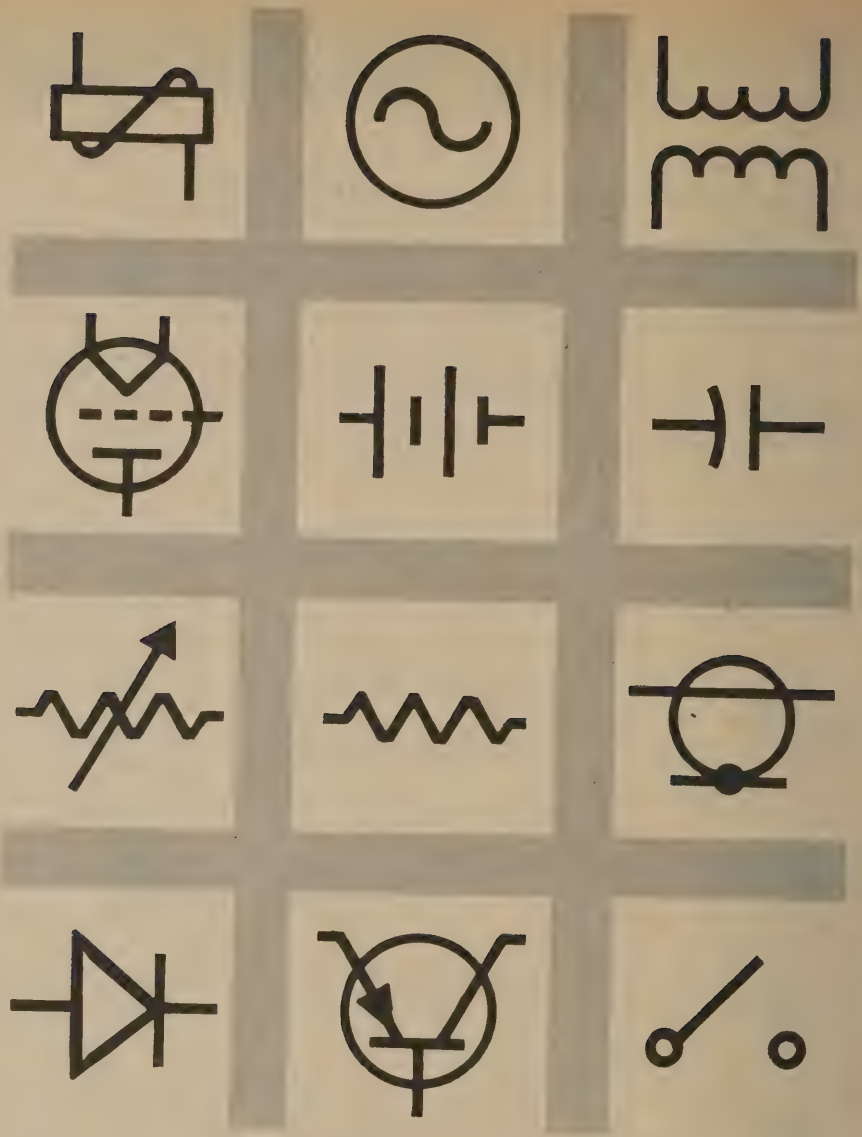
SEAL TYPE IDENTIFICATION

1. Immersion proof per MIL-R-27208
2. Humidity proof per MIL-STD-202, Method 106
3. Sealed per MIL-R-39015
4. Humidity proof per MIL-STD-202, Method 103, Condition B
5. Immersion proof—sealed for board washing, leak tested in 70° C water
6. Immersion proof per MIL-R-22097

PRECISION POTENTIOMETERS—SINGLE TURN *(Write for Catalog B)*

• Precision machined anodized aluminum cups • Molded Diallyl Phthalate liners • Welded tap and terminal construction • Precious metal wipers and slip rings • Flush clamp bands • Gold-plated terminals • Precision sleeve or ball bearings • Centerless ground stainless steel shafts • Single or ganged units.



SPECIFICATIONS:

- Meet requirements of MIL-R-12934 and NAS-710
- Eight physical sizes, 3/4" to 3" diameter
- Electrical angles and functions to specification
- Special mechanical configurations available

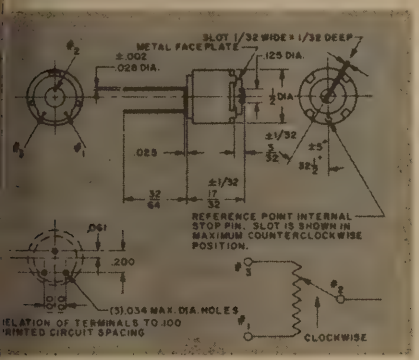
OHMITE Resistance Trimmers

ot molded single-turn immers



TYPE AFR
SINGLE TURN

MITE type AFR Trimmers are single-turn controls lt to withstand severe environmental conditions. eir unique design includes a hot-molded resistor ck bridged by a single moving molded contact sh. Resistance material, collector track material, ulation material and metal terminals are all lded together at one time into a single, solid, egral structure. There are no cracks or crevices admit moisture.

Enclosure of the Ohmite type AFR is non-magnetic, rosion resistant, and splash-proof. Type AFR mmers are designed for screwdriver adjustment. ed stops withstand a maximum shaft torque of inch-pounds.

In excess of 50,000 operational cycles with low oise" level initially — decreasing with use — can expected in conventional applications.

HARACTERISTICS

wer Rating: ¼ watt @ +70°C ambient temperature. Derate power linearly to zero at +120°C ambient for resistance values to 0.5 megohms. Additional derating required for resistance values over 0.1 megohms at ambients higher than 70°C.

sistance Range: 100 ohms to 5.0 megohms. Resistance change is nominally linear with shaft rotation.

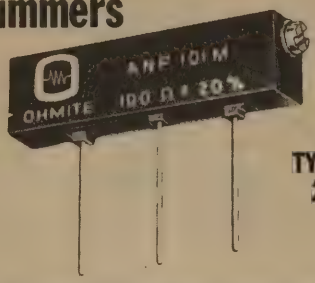
ierance: ±20% standard.

mperature Range: −55°C to +120°C.

orking Voltage: 350 volts ,RMS, maximum.

electric Strength: 750 VAC, RMS, at sea level.

djustment: Single turn, 295 ±5°.



rque: 0.25 to 3.0 inch-ounces.

ads: Designed for mounting directly on printed wiring boards using the terminal leads which are spaced to fit the 0.1" printed wiring board standard spacing.

hot molded 25-turn trimmers

TYPE ANP
25-TURN

Ohmite type ANP Hot-Molded Trimmers are continuously adjustable 25-turn variable resistors intended primarily for trimmer applications. Designed for use on printed circuit boards, these dependable three-terminal devices can be applied as either rheostats or potentiometers with equally satisfactory results. Stepless and relatively non-inductive regardless of resistance value. Unexcelled stability of setting in normal environmental conditions.

The type ANP Trimmer is produced by a hot-molding process using a high insulation material together with a hot molded resistance track, low resistance collector track and terminal pins — all combined into a single, solid, integral structure. The type ANP is splash-proof, dust-tight and can be mounted by its own rugged terminals.

CHARACTERISTICS

Power Rating: ⅓ watt @ 50°C ambient temperature. Derate power linearly to zero at 100°C.

Resistance Range: 100 ohms to 0.1 megohms. Resistance change is nominally linear with shaft rotation.

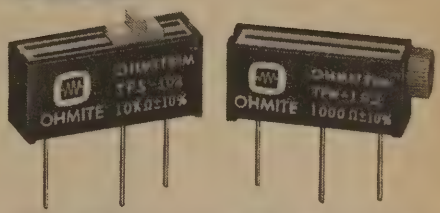
Tolerance: Standard resistance tolerance is ±20%.

Temperature Range: −55°C to +100°C.

Working Voltage: 350 volts RMS, maximum at sea level.

Dielectric Strength: 700 volts RMS maximum, at sea level.

Insulation Resistance: 1000 megohms minimum.



Adjustment: 25 ±3 turns for continuous resistance change. Mechanical release at end positions. Turning torque is 0.10 to 8 inches-ounce. Slotted for screwdriver adjustment.

Leads: Pin type terminals, spaced in accordance with 0.1" printed wiring board grid system.

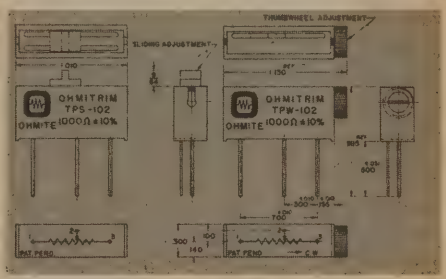
Ohmitrim™ wirewound trimmers



TPW and TPS series, Ohmitrim™ wirewound trimmers have a nominal 1 watt rating and are offered in resistance values ranging from 10 to 20K ohms. Leads are printed circuit type, spaced for standard 0.1 inch matrix hole patern. They are available in screwdriver / thumbwheel (TPW series) and slider (TPS series) actuator styles.

Model TPW is lead-screw operated (approximately 35 turns) and provides clutching action at either end of the winding. Trimming is accomplished by either screwdriver or hand via a thumbwheel.

Model TPS is slide operated. It permits fast approximate placement of the slide actuator to a predetermined position and subsequent fine adjustment by an additional small movement. This model is especially useful where a number of trimmers, stacked side by side, can be quickly positioned to their approximate location by using a single template.

Both models are of a new "open" design and are not "sealed." A number of openings in the enclosure permit cleaning solvents to enter and readily leave. Thorough testing has assured that when the cleaning process is properly performed in a vapor degreaser, there is no danger of contamination of either the winding or the contact.

Both models meet the requirements outlined in EIA Standard RS-345 "Resistors, Variable, Wirewound" for characteristic "A." They both have the exact lead spacing of style CRT 11 of the EIA Standard. While they deviate slightly in dimensions, both models conform closest in this respect to style CRT 13.

FEATURES

Ohmitrim™ trimmers offer four features, especially important in view of their economical price:

1. **Gold plated** leads for excellent solderability.
2. **Gold plated** contact for excellent oxidation-free long life service.
3. Resistance wire is welded to leads for noiseless connection.
4. Choice of thumbwheel or slider for easy adjustment without tools.

CHARACTERISTICS

Temperature Rating: 40°C maximum ambient. (For full wattage rating.)
Power Rating: 1 watt.
Resistance Tolerance: ±10%.
Temperature Coefficient: 0 ±.010% per °C.
Dielectric Strength: 500 Volts AC.
Insulation Resistance: 100 megohms.
Torque: 0.1 to 0.8 oz.-inches.
End Resistance: 2% maximum.
Number of Turns: 35, approximately.
Leads: Gold Plated, 0.1 grid spacing.
Contacts: Gold Plated.
For △ R = ±10%: Thermal Shock: −55 to ±85°C.
Rotational Life: 200 cycles.
Electrical Life: 1000 hours.

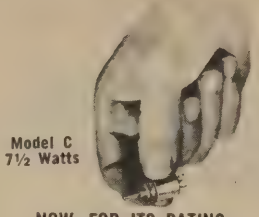
OHMITE vitreous enameled rheostats (potentiometers)



Now, Ohmite offers TWELVE sizes in its line of famous rheostats ranging from 7.5 to 1000 watts. Nothing to shrink or burn, all models are metal and ceramic construction and coated with Ohmite's exclusive vitreous enamel or Ohmicone® silicone ceramic. The revolutionary Model C, 7½ watt miniature unit, **the smallest rheostat of its rating available,** employs this same construction! All Model C stock units and the enclosed Model E unit, are normally supplied in a corrosion-resistant dust-proof case. Model C units are stocked in both standard and locking type bushings.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel or Ohmicone® silicone ceramic. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

Models H, J, G, K, L, P, and N, marked "Series A," are listed under the Underwriter's Laboratories Reexamination Service. RHEOSTAT KNOBS are listed on page 20. Rheostats can be supplied to meet military specification MIL-R-22.

RATINGS: Current ratings shown, assume use in free air. If units are enclosed, currents should be reduced to as much as 50% depending upon ventilation. The rated current causes the rheostat to dissipate its rated wattage when its full resistance is in the circuit.

SPECIAL RHEOSTAT FEATURES: Hundreds of features to meet your special rheostat requirements can be furnished. Submit your specifications.

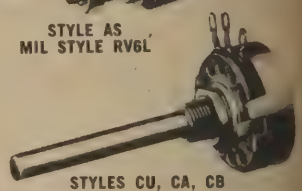
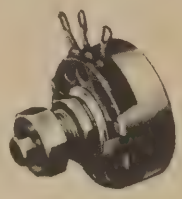
lar items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking butors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.

OHMITE molded composition potentiometers

Ohmite molded composition potentiometers are used in commercial and military electronic applications where high quality and dependable performance are important. Type AB is rated 2 watts at 70°C ambient and is available with ⅞" slotted shaft (CMU), 2" unslotted shaft (CU, CA, CB, CCU) and locking type bushing with slotted shaft (CLU). Type AS is a miniature unit rated ½ watt. It is available with locking type bushing and slotted shaft (Style AS) and standard bushing with longer (slotted) shaft for knob control (Style ASM).



Because the resistance element is a thick, solid-molded ring — not a sprayed film or paint-type resistor — longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are dust and splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94. Styles CMU, CLU, AS and ASM conform respectively to MIL-R-94, Styles RV4N, RV4L, RV6L and RV6N.



Styles and tapers are listed in table. Dimensions of all stock units are shown below.

STYLE CMU

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

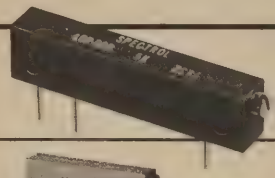
INVENTORY

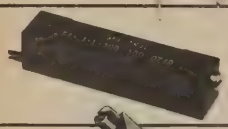
While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

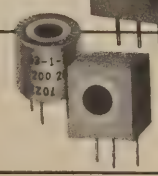
ORDERING

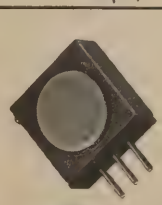
It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

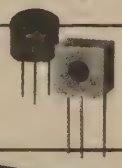
DISCOUNTS

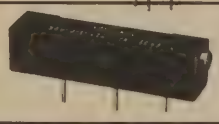












Trade discounts apply in most cases where LIST PRICES are shown.

Spectrol

TRIMMING POTENTIOMETERS

A complete selection of industrial and MIL-approved models is available. Cermet and wirewound units offer excellent quality and performance characteristics to meet your most demanding application.

Spectrol distributors offer immediate delivery and low competitive prices in all popular trimmer designs. MIL-approved units per MIL-R-27208 and cermet designs exceeding the specifications of MIL-R-22097 are available from stock.

Spectrol

TRIMMING POTENTIOMETERS (CONTINUED)

pectrol Trimming Potentiometer designs bring features to ur systems that are measurable in dollar savings and long e. Cost saving designs, calling for increased reliability, fewer rts, and low industrial prices are standard in every Spectrol mming potentiometer.

A complete line of **Industrial** cermet and wirewound trimmers highlight the Spectrol product line featuring space-saving designs with excellent settability and high-performance characteristics. **Military** configurations such as the RT 12, 22, and 24 are even better examples of the quality and reliability built into every Spectrol trimming potentiometer.

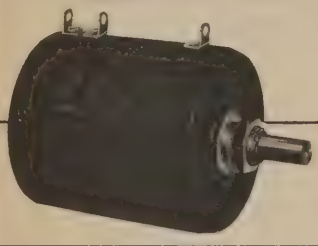
PRECISION POTENTIOMETERS



he complete Spectrol series of single-turn, three-turn, and en-turn precision potentiometers offers you wide design flexiility in sizes ranging from ½ inch to 1⅝ inches in diameter. ach unit is designed and manufactured to Spectrol rigid uality standards. Wirewound, conductive plastic, or cermet lements may be provided in any of the many single-turn odels.

Other quality features include extra long resistance elements to provide the best electrical resolution available and "whisker" slip-ring brush that assures positive contact under severe shock and vibration to offer long-term reliability, low torque, and long rotational life. Servo, bushing, and screw mountings are available as standard options. All models meet or exceed applicable military and commercial specifications for rotational load life, temperature range, shock, vibration, humidity and salt spray.

SWITCHES AND MULTIDIALS®

The Spectrol Model 87 Rotary Switch introduces a new dimension of flexibility to discrete component circuitry. The Model 87 is available in volume quantities at production line prices for mounting directly on printed circuit boards or for panel mounting. Designed with only two moving parts, this unique half-inch switch has application wherever printed circuit boards are used and can be used to make other components perform multiple duties. The Model 87 is offered in either continuous or stop models with up to ten positions for single-pole, up to five positions for double pole, and up to three positions for three-pole units.

Multidials: Spectrol also offers a complete line of precision concentric and digital turns-counting dials for use on multiturn potentiometers and other rotating devices .

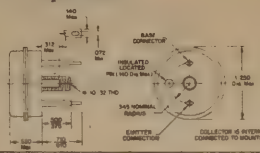
Delco Electronics POWER SEMICONDUCTORS



SILICON NPN HIGH ENERGY POWER TRANSISTORS High voltage ratings — V_{CEX} up to 1400V — permit circuit simplification. Highly reliable for video deflection. converters, regulators power amplifiers.

GE GE-504A AND GE-509 UNIVERSAL RECTIFIERS

A silicon rectifier with a 100-amp surge rating. Recommended as a replacement for all selenium, germanium and silicon rectifiers used in TV receivers. The 100-amp surge rating eliminates the need for the surge limiting resistors normally required when silicon rectifiers are used.

Type	PIV	I_{DC}	Sugg. List Price	Type	PIV	I_{DC}	Sugg. List Price
GE-504A	600V	1A	$1.10	GE-509	1000V	1A	$1.25

GE TYPE IN91 GERMANIUM RECTIFIER

PIV = 100V, max. I_{DC} = 150mA. Suggested List Price $1.55.

GE BR-600 SILICON RECTIFIER

PRV = 600V, max. I_{DC} = 1.5A. Suggested List Price $1.55.

SILICON POWER RECTIFIERS

HY-A-SIL
High - Ampere - Silicon

FEATURES

- High operating temperature, 190°C (Up to 120°C ambient)
- High operating voltage (Up to 600 p.i.v.)
- High efficiency (99% compared to about 75% for selenium)
- Excellent regulation (4% compared to about 15% for selenium)

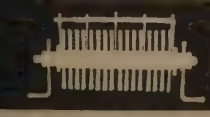
SL-BR-F



SL-PH-F

Our Production is geared to the Original Equipment and Replacement Market.

Our Products are used for: Alarms, Switchboards, Elevator Controls, Signals, DC Machinery, Magnets, Welding and Plating Equipment, Battery Chargers, etc.

- **SANFORD MILLER can handle your needs from 50 milliamp to 3000 amps in half-wave to six phase configuration.**
- **We manufacture a top quality product guaranteed to meet rigid specifications, both Military and Commercial, delivered on time at the right price.**

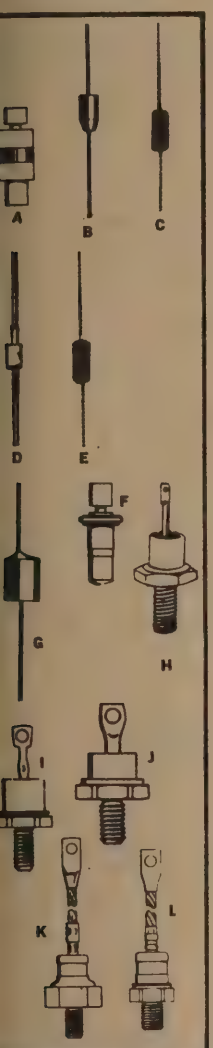
SARKES TARZIAN



Silicon Avalanche Rectifiers

of the silicon rectifiers listed below are supplied with avalanche aracteristics as standard. They are direct replacements, electrically d physically, for ordinary silicon rectifiers, yet they provide important nefits to you and your products, **at no** extra cost.

ervoltage protection is built into the rectifier. Transient voltage in- ced failures are virtually eliminated because these units avalanche at tages well below the destruction point. The overvoltage spike is dis- ated through the junction at a point below the critical voltage stress oss the edge of the junction.

Lower circuit costs are readily achieved. When avalanche rectifiers are used suppressor and balancing devices, such as resistors, capacitors, R-C networks, etc., are no longer needed. In addition, their elimination improves circuit reliability, due to a reduction in number of components and interconnections.

Dependable performance is assured. Over 20,000,000 of these devices already have been delivered and are in actual use in the field. They are now routinely available from high volume production lines.

* Derate 50% for single phase halfwave with capacitor load.
Derate current 20% for single phase operation on battery motor or capacitive load.
** Add suffix "N" for anode connected to stud.

AST RECOVERY — 250 NANOSECONDS

MAX. REV. CUR. = 1 μA @ 25°C, 5 μA @ 85°C

These multijunction high voltage diodes use from 2 to 30 wafers. They have transfer-molded cylindrical cones, to assure void-free construction and silver axial leads for maximum thermal transfer. Maximum operating and storage temperature is 150°C.

KLIPVOLT SURGE SUPPRESSORS

A voltage transient does its damage in a few microseconds — destroying semiconductors or causing circuit malfunction. But Tarzian Klipvolt selenium suppressors protect semiconductor components and circuits from voltage transients in 1/10 the time required for silicon device reaction.

Tarzian Klipvolt selenium suppressors have turn-on and turn-off characteristics that exceed requirements of even the fastest silicon devices available. Typical Klipvolts can turn on, or off, within 200 nanoseconds.

Tarzian Klipvolt surge suppressors inhibit or reduce peak voltages generated in many different kinds of circuits. They are used to protect silicon rectifiers, transistors and other semiconductor devices and to reduce noise transients.

Polarized types function in DC circuitry and non-polarized types in AC circuits. Extremely small units are available for easy mounting on printed circuit boards.

LOW CURRENT SUPPRESSORS

POLARIZED				SINGLE PHASE NON-POLARIZED				
Max. DC Blocking Volts	Max. Discharge Current (Amps)	Std. Type	Sealed Type	Max. RMS Volts	Dis-charge Curr. (Amps)	Clamp-ing Voltage	Std. Type	Sealed Type

The most commonly used types are listed here. However, there are literally hundreds of variations that can be supplied on short notice, constructed from standard stocked parts. Your distributor can supply them, based on the part numbering system described below. For additional data and specifications, ask him for the Tarzian Klipvolt Surge Suppressor Catalog 71KV4.

ORDERING INFORMATION — KLIPVOLT SUPPRESSORS

1. Consult Table I to determine cell number (size) needed to meet current requirements for non-polarized (AC or DC) applications. Consult Table II for equivalent information on polarized (DC only) applications. Insert all numbers in part numbering key.
2. Consult Table III (non-polarized) or Table IV (polarized) to determine how many cells are needed to meet voltage requirements for 26 or 33 volt cells. Insert number of cells and cell voltage rating in appropriate positions in part numbering key.
3. Indicate construction requirements and finish.

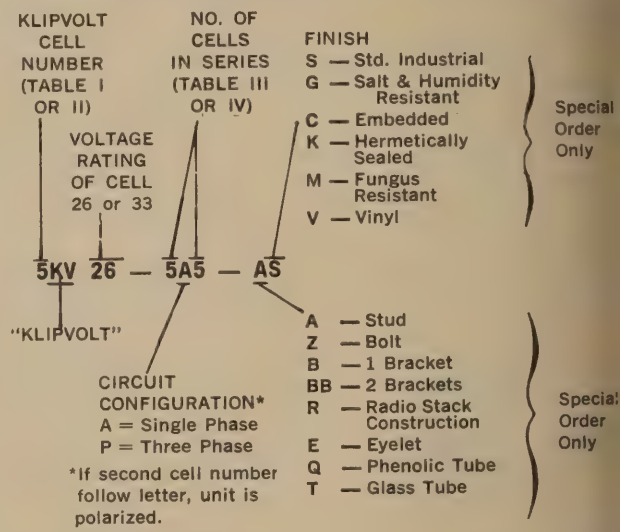

TABLE I
CURRENT CHARACTERISTICS
NON-POLARIZED CELLS

Cell No.	Current	Cell Range	Cell Size (Inches)
0KV	0.62	5 to 15	.281 Dia.
1KV	2.20	5 to 15	.468 x .468
2KV	5.9	1 to 14	1 x 1
3KV	11.0	1 to 14	1.250 x 1.250
4KV	19.6	1 to 14	1.6 x 1.6
5KV	33.9	1 to 14	2 x 2
6KV	70.0	1 to 7	3 x 3
7KV	129.6	1 to 7	4 x 4
8KV	212.5	1 to 7	5 x 5
9KV	216.6	1 to 7	4.250 x 6
10KV	259.6	1 to 7	5 x 6
12KV	445.2	1 to 7	4.250 x 12
14KV	404.6	1 to 7	6.250 x 7.250

TABLE II
CURRENT CHARACTERISTICS
POLARIZED CELLS — all available in 1 to 10 cells

Cell No.	Current	Cell Size (Inches)
2KV	5.5	1 x 1
3KV	11	1¼ x 1¼
3KV	20	1.6 x 1.6
5KV	33	2 x 2

Solid State Devices, Incorporated

On the following pages Solid State Devices, Inc. presents a selection of popular, "off the shelf" semiconductor devices which will meet a wide variety of applications in military and commercial electronic equipment. All of the devices listed bear standard 1N and 2N designations from which you may order without getting "spec'd" in or out. Solid State Devices also manufactures and stocks many silicon semiconductor devices not listed here. Contact us with your requirements.

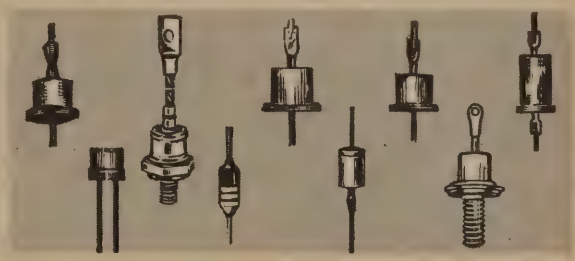
Semitron SEMICONDUCTORS

AT YOUR FINGERTIPS!

Whatever you require, Semitronics has them all — Transistors, Small Signal and Power, Silicon Rectifiers, Germanium and Silicon Diodes, Silicon Controlled Rectifiers, Silicon Zener Diodes, etc. in a variety of miniature glass, epoxy and metal packages. Light and heavy duty, high current types, lowest leakages.

Check first with Semitronics. Over 50,000 semiconductor types on file for immediate reference. Rush deliveries our specialty. Custom specifications are available to specific requirements.

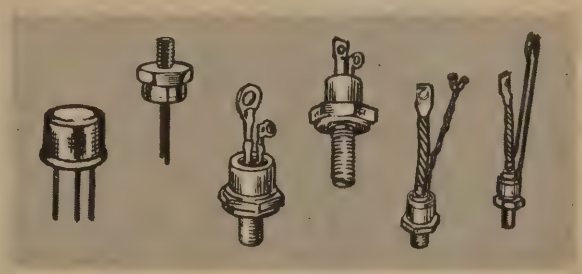


Small Signal Transistors

Germanium and Silicon transistors in medium current range, from 10 V to 1,000 V. High frequency, fast switching and audio types available. PNP and NPN alloy — mesa — planar and epitaxial processes in a variety of epoxy and metal packages.

Power Transistors

Germanium and Silicon, heavy duty, high current types available in a variety of cases and shapes. NPN and PNP alloy, mesa and diffused process transistors. Fast switching types available.

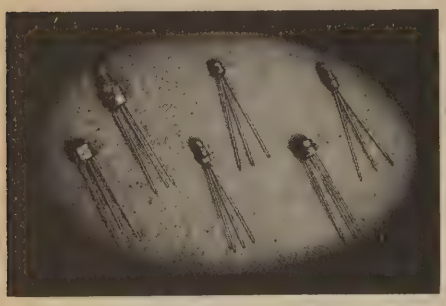


Silicon Rectifiers

Semitron diffused silicon rectifiers are available with special low leakages for use in all power control circuits. Supplied in a variety of popular packages. Reverse polarity available. Wide range of voltages and currents from 150 MA to 300 amps, 25 V to 2,000 volts.

Diodes—Voltage Regulators

Semitron quality Germanium and Silicon computer and high speed switching diodes are available in standard and miniature sizes, using the latest semiconductor processes. Semitron Silicon Voltage Regulators, Zener diodes are available in all, popular packages — from 150 MW to 50 watts. Voltages from 2 volts to 200 volts.



Silicon Controlled Rectifiers

Produced by the most up-to-date diffused process for use in power control and switching circuits. Available in a variety of popular packages and shapes. Voltages from 25 volts to 1300 volts and from 1 amp to 235 amps.

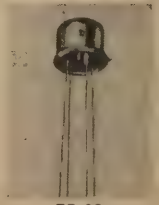
All Semitron products conform to EIA and Jedec specifications. Write for information on integrated circuits, FETs, and special assemblies. Detailed catalog supplied on request.

Semitronics Corp.

SPRAGUE SEMICONDUCTORS

METAL-ENCASED TRANSISTORS

- Sprague Transistors are Produced by Advanced Equipment and the Latest Manufacturing Techniques.
- Excellent Design Flexibility and Electrical Properties Meet the Most Rigid Performance and Reliability Standards.
- Highest Quality and Outstanding Economy.
- For Complete Technical Data, Refer to Latest Issue of the Applicable Engineering Bulletin.



Call your Sprague Industrial Distributor for current quantity prices.

SPRAGUE SEMICONDUCTORS

ECONOLINE® PLASTIC-MOLDED TRANSISTORS

- An Improved Low-Cost Line of Transistors Priced for Commercial Applications, Yet Retain the Reliability Required in Industrial Equipment.
- Automated Assembly and Plastic Packaging Bring Prices Substantially Under Those of Comparable Metal-Can Types.
- For More Data, See latest Issue of Short-Form Catalog IND-851.

Type No.	Case	Description
2N2711	TO-98	NPN G/P Small-signal Audio Amplifier

Thermalloy SEMICONDUCTOR HEAT SINKS AND INSULATORS

SERIES 1101 AND 1103 CONDUCTION HEAT SINKS

Removes heat by transfer to external surfaces; 1101 has 10-32 stud, 1103 is tapped for 4-40 screw. Avg. ship. wt., 1 oz. Thermal resistance data was taken with units attached to a 6" x 6" x ¼" aluminum plate.

Thermalloy Number•	Fig.	Thermal Resist., °C/W	For Case Style	Size, Inches Dia. x Height	Net Each, Lots of 1-11	12-99	100-499	500-999

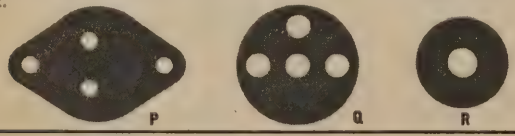
BERYLLIUM OXIDE INSULATORS

High-purity beryllium oxide is a better heat conductor than aluminum, yet insulates better than porcelain and has low capacitance.



Thermalloy Number•	Fig.	Dielectric Strength Volts/Mil	For Case Style	Size, Inches Width x Depth x Height	Net Each, Lots of 1-11	12-99	100-499	500-999

Thermalloy SEMICONDUCTOR HEAT SINKS

LOW-PROFILE HEAT SINKS

Created for compact designs requiring optimum performance in a small space. Well-designed, small, low cost heat sinks are ideal for most PC applications. Avg. ship. wt., 6 oz.

Thermalloy Number•	Fig.	Thermal Resist., °C/W	For Case Style	Size, Inches Width x Length x Height	Min. Device Mtg. Width, Inch	Net Each, Lots of 1-49	50-99	100

DIP SINKS — Dual In-line Packages

6007A is 2-piece hard anodized heat sink for 14 and 16 pin dual in-line packages—provides good heat removal plus positive retention to board. 6010B is one piece sink to be bonded to top of 14 or 16 pin DIP's with Thermabond #4952, a thermally conductive epoxy.

THERMACOTE THERMAL JOINT COMPOUND

Non-toxic insulating thermal joint compound improves transfer of heat energy across metal-to-metal surfaces between transistor or rectifier case and heat sink. Conducts heat approximately 30 times better than air and more than 4 times better than silicon grease. Opaque white compound is stable; neither cakes nor runs from −40°F to +400°F.

Thermalloy No.	Description	Net Each
249	1-ounce tube	$1.10
250	2-ounce jar	1.95
251	1-pound can	8.45

• **FINISH SUFFIXES** — Suffix **A** indicates hard anodize finish per MIL-F-14072, 400 V insulation; **B**, black anodize finish per MIL-A-8625 Type II; **C**, gold chromate finish per MIL-C-5541.

Westinghouse

SCR types are listed by half sine-wave average current rating at 180° conduction angle. Surge ratings are peak one-half cycle currents at 60 Hz. Voltage ratings are maximum steady state blocking voltages. Complete with mounting hardware.
